DEPARTMENT OF WATER RESOURCES

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-12197 Telephone No. 336-8000
2. Name(s) of Permit Holder(s): ROSWELL Duck Club h.w.c.
3. Mailing Address: 2118 SILVER CREEK - BOISE ID 83706
4. Source of Water: tributary of Scott Drain **GROUNDWATER** (well), Date Drilled: mo. _____ / yr. _____
- a. Well Driller: _____ Drilling Permit Number: _____ - _____ - _____
- b. **OPTIONAL:**
- Pump Horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft): _____

- 5. Use(s) (as authorized by the water right permit):**

Domestic (No. of households): _____ Stockwater (No. and type of stock): _____

Irrigation (No. of acres): _____ Other: Wildlife, Wildlife Storage

6. Total rate of diversion and/or volume for which proof is submitted: 2.0 cfs OR 120 acre feet

- 7. Measuring Device Requirement:** (refer to the approval conditions on your permit and respond accordingly)

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required? Yes ☒ or No ☐
Has the measuring device been installed? Yes ☒ or No ☐
Flow Measurement Port: Is a flow measurement port required? Yes ☐ or No ☒
Has the measurement port been installed? Yes ☐ or No ☒

8. Fee Enclosed: \$ 125 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Bob Glaisye IR 1A Navy Telephone Number: 336-8000 333-7400
Address: 2118 S. POISE I DRIVE 85711

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Signature of permit holder: Robert D. J. R. - Manager

E. NARRATIVE/REMARKS/COMMENTS

On June 22, 2000, Dan Nelson and I conducted a field examination of the ponds and wetlands, which belong to the Roswell Duck Club. The point of diversion is located in the SESW of Section 24, Township 05N, Range 06W. The place of use is the wetlands and ponds in the NESE, SWSW, and SESW of Section 24, Township 05N, Range 06W. The area of the wetlands and ponds is about 37 acres. I verified the number of acres through the NRCS office in Caldwell and also with a planimeter. The average depth of the water according to the Mr. Nagy was 3 to 3.5 feet and according to the NRCS the average depth is 2.5 ft.

The wetlands and ponds are essentially an extension of the wetlands that belong to the Idaho Department of Fish and Game located immediately South of the Roswell Duck Club. The ponds and wetlands provide year-round wildlife habitat. At the time of the field examination no water was being held at the outlet to Scott Drain. Typically water is backed up in the fall and winter after the irrigation season to increase the water level in the ponds. The primary times when the storage is desired is during the fall and winter.

A measuring device and a lockable controlling works were not found during the field examination as required by the permit. The installation of a measuring device and a lockable control at the point of diversion would be extremely expensive and impractical considering the location of the point of diversion. The wetlands and ponds are part of an in-stream system. Water is not diverted away from the natural drainage. Water enters the Duck Club property from the Fish and Game ponds through a culvert under Roswell Highway. If a lockable device were installed at the point of diversion it is possible that the road could be washed out because the water would not have any where to go. The permit owners have requested that the condition requiring a measuring device be waived. In addition, they agree to allow the Department to reserve the right to require a measurement device at the outlet (Scott Drain) of the wetlands in the future if deemed necessary by the Department. They will install a lockable device on the controlling works to the outlet (Scott Drain) of the wetlands. The installation of a lockable device should be verified before this permit is licensed. If the Department waives the measurement requirement the owners have also agreed to remove the "Wildlife" portion of the permit if they are allowed the excess storage in order to maintain the level of the pond. (See attached memo dated June 27, 2000 and the letter from Bob Glaisyer dated July 10, 2000.)

Mr. Nagy indicated that a large portion of the water entering the ponds and wetlands comes from the Dutton Drain due to seepage from wetlands adjacent to the property owned by the duck club. The Roswell Duck Club also has 135 shares of canal water. This water is used irrigate 120 acres in the SWSW, NWSW, and NESW of Section 24, Township 05N, Range 06W.

I recommend that this permit be licensed once proof has been made that a lockable device has been installed at the outlet of the ponds. It is recommended that the permit be licensed for 120.0 AFA. The capacity of the system is approximately 92.5 AF. The additional 27.5 AF should be allowed to compensate for evaporation and seepage.

Have the conditions of permit been met? _____ YES X NO

F. FLOW CALCULATIONS

Measurement Method: N/A

RE: 63-12197

Dear Mr. Hansen:

This letter is to request a waiver for measuring devices on the inflows and outflows to our ponds. Such a requirement would essentially not be possible. However, we agree to install a lockable device on the outflow to the Scott Drain. We further agree that the Department of Water Resources can reserve the right to require a measuring device to the outflow on the Scott Drain in the future as deemed necessary by the Department.

If the Department grants this waiver for measurement devices on the inflow, we will agree to remove the "Wildlife" portion of this permit so long as we are allowed the excess storage (27.5 ac. ft.) from our permit.

These requests and agreements are in consultation with Richard Hansen, Temporary Field Examiner and Dan Nelson, Water Resource Agent. We thank them for their help and advice on this matter.

Robert D. Glaisyer
Roswell Duck Club

RDG:ry

MEMORANDUM

TO: File 63-12197
FROM: Richard D. Hansen *RDH*
DATE: June 27, 2000
SUBJECT: Field Exam Conducted June 22, 2000

Dan Nelson and I conducted a field examination for water right permit 63-12197. We were accompanied by Dale Nagy. Several important items were discovered.

1. The wetlands and ponds already existed prior to the development of the permit. The permit holder(s) have enhanced the existing ponds and other habitat for wildlife.
2. No water is diverted to storage. The wetlands and ponds are on stream storage facilities.
3. No measuring devices have been installed as required by the permit.
4. A lockable controlling works has not been installed as required by the permit.

The following steps must be completed to satisfy the conditions of approval.

1. It is recommended that the permit holder request in writing that the wildlife component be removed. This would allow the department to remove the measuring requirement. If the wildlife component is retained the permit holder should request that the condition requiring a measuring device be waived. However, the Department should reserve the right to require a measuring device in the future as needed.
2. A lockable device shall be installed to provide the watermaster with control of the diverting works.
3. A condition should be added to the permit that would allow the permit holder to maintain the water level in the pond.

Permitted afa – pond volume = allowable volume to maintain the water level

120 afa - (37 acres X 2.5 ft ave depth) = 27.5 afa to maintain pond volume

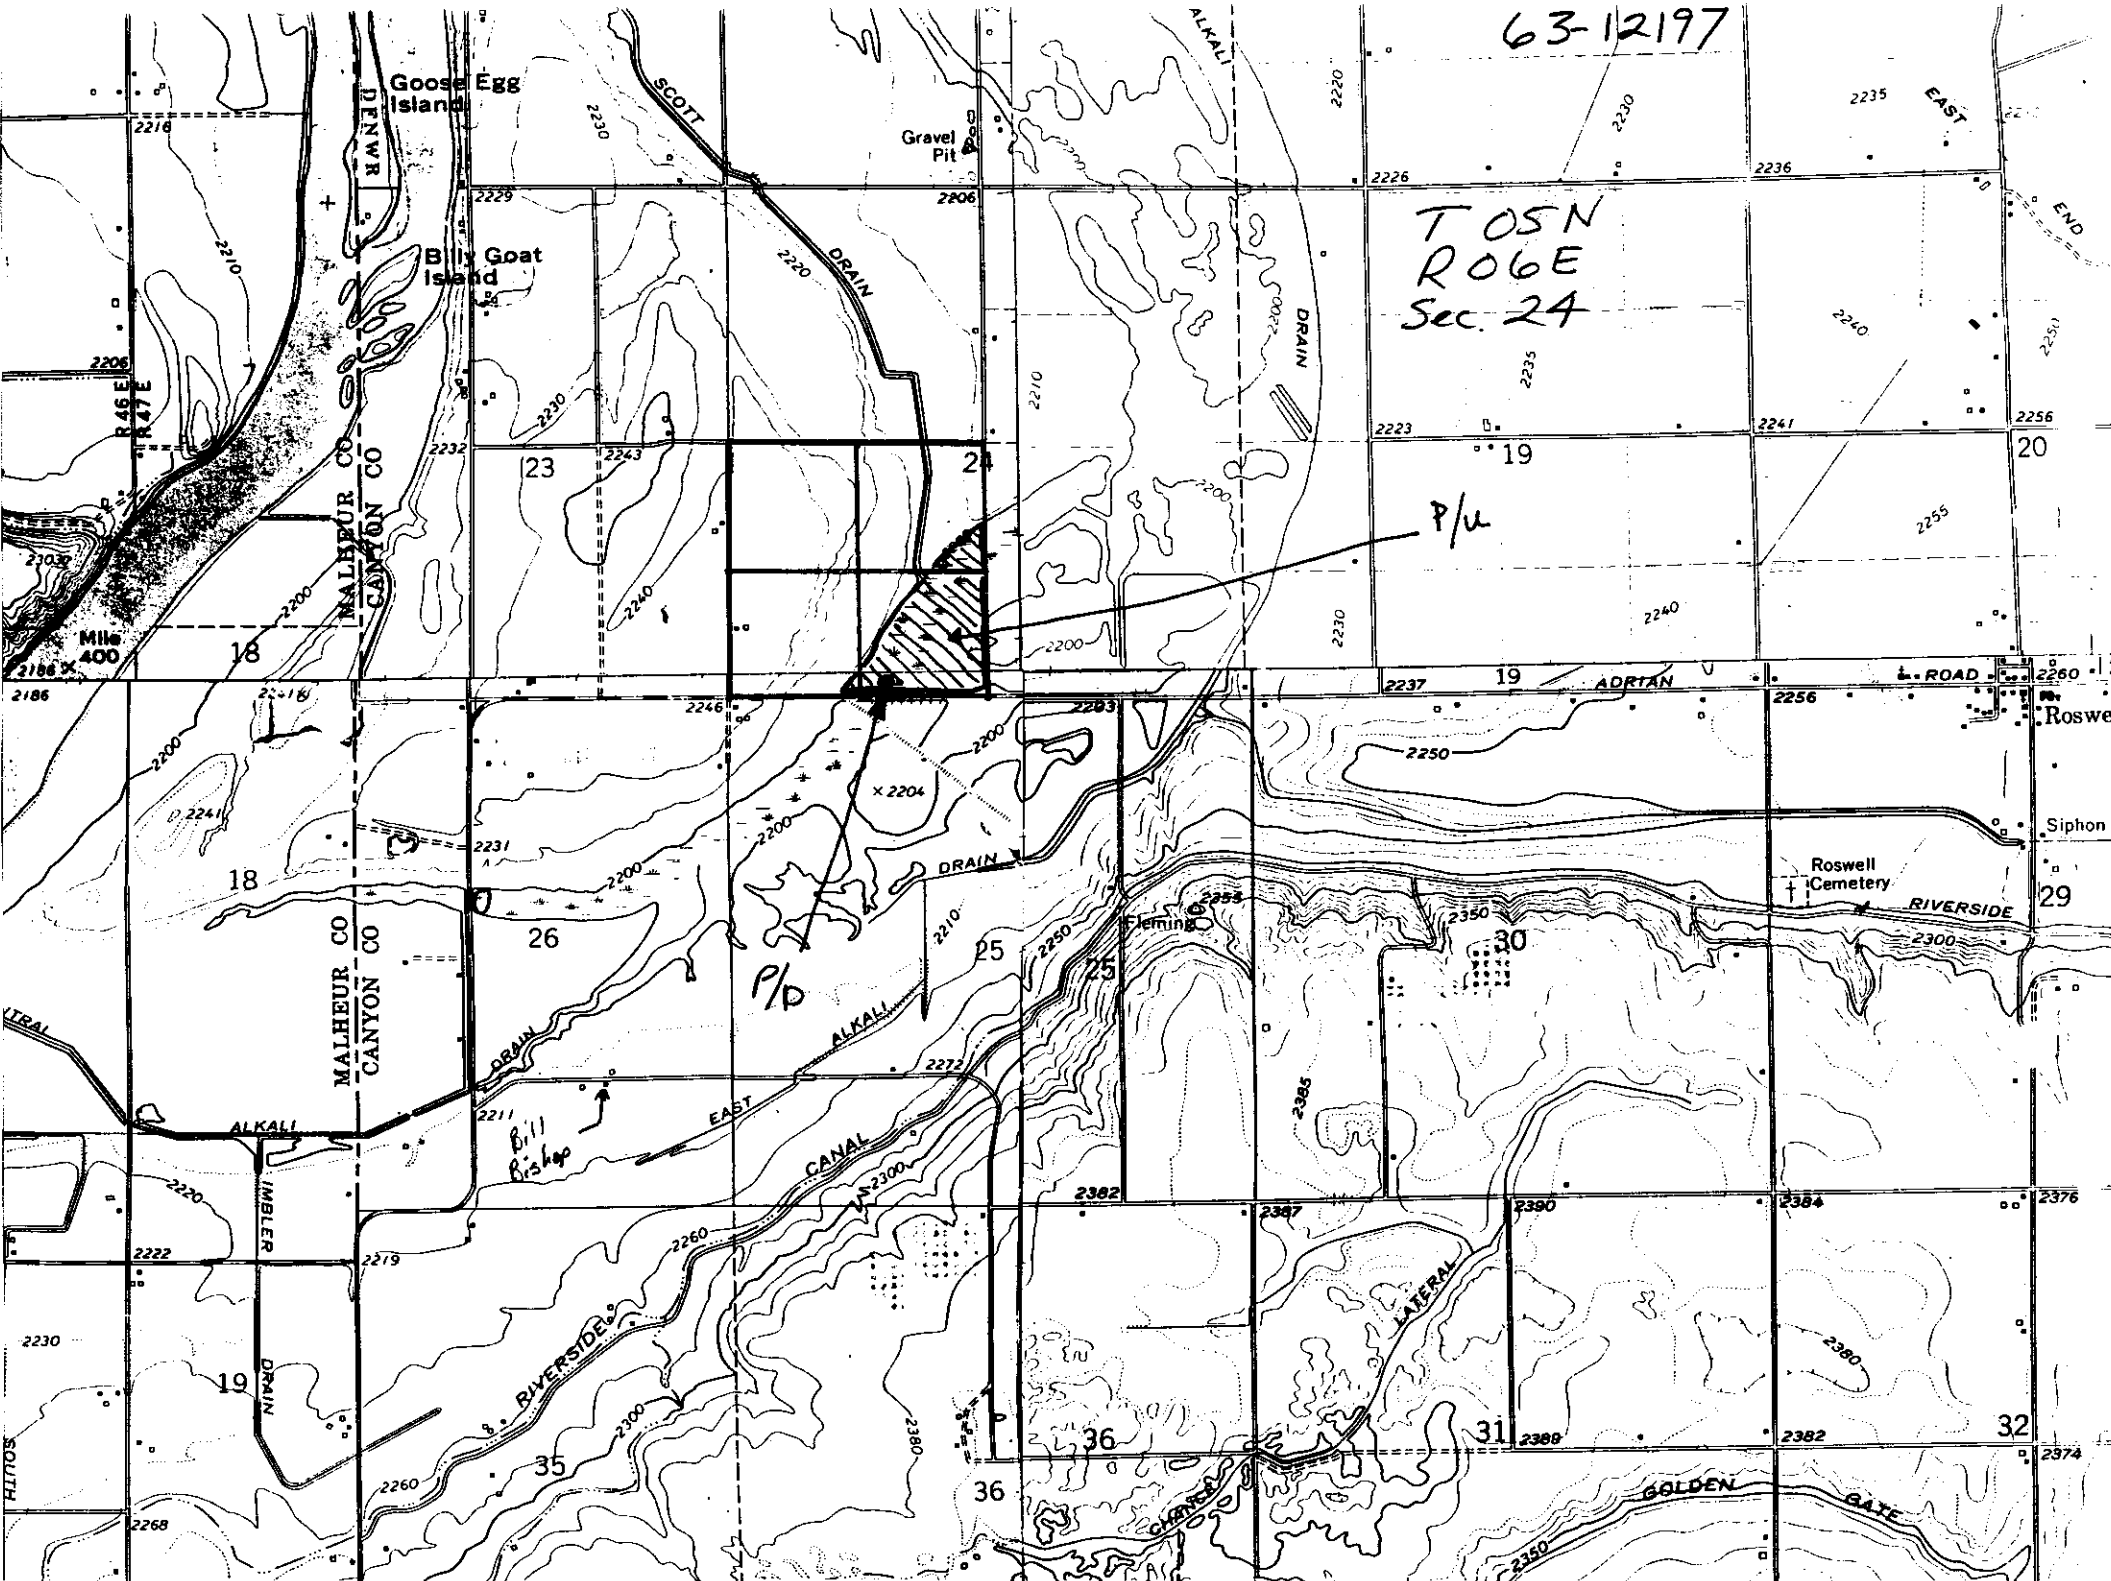

Dan and I will meet with Bob Glaisyer on Wednesday, June 28, 2000 to discuss the conditions that need to be met to continue processing the permit.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-12197

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the **WESTERN** Regional Office of the department in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH, Administrative Assistant
Water Allocation Bureau

RE: Permit No. 63-12197

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time submitted in connection with the above referenced permit which extends the time within which to submit proof of beneficial use to **July 1, 2002**. The department has granted this extension based on governmental agency delay. It is important that you work diligently toward the completion of the development during the construction period allowed since the department may not be able to grant additional extensions in connection with this permit.

Section 42-248, Idaho Code, which became effective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner.

Please contact me directly at (208)327-7953, if you have any questions regarding this matter.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 63-12197

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1999.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12197

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "Conditions of Approval and Remarks" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Be sure to note the special condition requiring you to install a measuring device and lockable controlling works that will enable the watermaster to control the rate of diversion.

Please note that a separate stream channel alteration permit must be obtained from the IDWR prior to any activity in the stream channel other than construction or maintenance of the diversion structure for your water right(s). Applications for stream channel alteration permits must be filed at least sixty days prior to the commencement of work in the stream.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

MEMORANDUM

DATE: June 25, 1996

TO: File 63-12197

FROM: Shelley W. Keen *SWK*

RE: Application for Permit No. 63-12197

Bob Glaisyer called this afternoon in response to the letter I sent him yesterday. At issue is whether filing 63-12197 should contain a flow rate component as well as a storage volume component. Mr. Glaisyer explained that part of the project will involve a diversion of natural flow.

Also, Mr. Glaisyer explained that he and Dale F. Nagy should be listed as the "officers" of the Roswell Duck Club, LLC. He said that with a limited liability corporation they are technically termed "members".

RE: Application for Permit No. 63-12197

Dear Applicants:

Application for Permit No. 63-12197, which you filed with the Department of Water Resources in April of 1995, is being reviewed to determine if a permit to appropriate water should be issued at this time. I am writing you because there are two items which must be resolved before the review process can be completed.

First, my understanding of your application is that you intend to add 120 acre feet of storage capacity to an existing pond/reservoir. Your application indicates that you also intend to appropriate 2.0 cfs of natural flow for wildlife purposes. While I can see from the plans you submitted how you will accomplish the impoundment of an additional volume of water, I cannot discern how you will be appropriating a rate of flow. With the exception of storage rights and rights for stock watering purposes, the natural flow of Idaho's public waters cannot be appropriated unless the water is diverted from the natural stream channel and applied to a beneficial use. Because your intention appears to be to impound additional water in the pond, not to divert flowing water away from the pond, the inclusion of a natural flow component on your application for permit may have been unnecessary.

Please let me know within fourteen days how you intend to appropriate a flow of water in addition to the volume you intend to store. A map or diagram would be helpful. If I do not hear from you on this subject within fourteen days, your application will be processed for the appropriation of a storage volume only.

Second, due to the requirement of Water Allocation Rule 035.03.b.i., I need a list of the names, titles, and addresses of all the officers of Roswell Duck Club, LLC. Your application cannot be processed without this information. If you have any questions, please contact me at 208-327-7946.

Respectfully

Shelley Walter Keen
Water Rights Supervisor

RE: Source Name

At first glance the source name of Pond tributary to Scott Drain seems odd. Upon further consideration, however, this name has merit, for the following reasons:

1. Pond is one of the approved source names in the database system.

2. If an appropriator desires to divert from or add storage capacity to an existing storage feature, the name of the storage feature is the appropriate source. For example, the source for the Big Payette Lake storage and direct flow water rights is Big Payette Lake. Similarly it is appropriate for the source in this case to be pond, where the pond was in existence prior to the raising of the pond level.

RE: Application for Permit No. 63-12197 in the Names of Robert D. Glaisyer, Roswell Duck Club LLC, and Dale F. Nagy

Dear Interested Party:

On April 20, 1995, this office received the above-referenced water right application for permit. We advertised the application in accordance with standard water right processing laws and rules, by publishing notice in the Press Tribune on May 3 and 10, 1995. The protest end date was May 22, 1995, and at the end of that date no protests had been received.

We received the affidavit of publication from the Press Tribune on June 7, 1995, but prior to the issuance of a water right permit we received a telephone call and various letters of protest. We forwarded three of the late protest letters to the applicants. A fourth received from Dan Chaney does not appear to have been forwarded to the applicants but is enclosed herewith. The language in this letter is identical to the language in the other three protest letters.

The applicant responded with a letter dated June 28, 1995 (copy enclosed). At that time the new Director of the Department, Mr. Karl Dreher, was reviewing the issue of the Boise River basin moratorium, and we delayed issuing approvals for water rights within the drainage.

We have now determined to move forward with processing surface water rights in the Boise River basin downstream from Star, so this application can proceed. Because the application is not officially protested we will not prevent approval of the application. The purpose of this letter is to ensure that all of the interested parties of record are aware of the processing status of this project.

At this point I would suggest that the applicants consider to a maximum extent the concerns of the protestants before moving forward with this project. Also, the applicants are hereby advised that their application for a stream channel alteration permit has been made a part of the file in this matter but no approval is needed because the water right serves to exempt the project from the requirements of the stream channel protection permitting process.

At this time I am forwarding the file to our state office for final processing and approval.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

Re: Application for permit claim no. 63-12197

Dear Mr. Tuthill:

It is my request that your department not recommend approval of this application by Mr. Glaisyer and Mr. Nagy for water storage for wildlife.

My concerns as a property owner downstream from this project is that there are no agreements between water users about water distribution according to age of water rights. Without such an agreement, I foresee possible lawsuits. Furthermore, construction of this storage dam to hold 120.00 acre-feet of water may cause the water table at my farm property to rise. A higher water table could make my property unproductive for farming. This may seem unreasonable, but in fact, as a result of a similar project downstream from my property on the Alkali Drain, flooding is occurring on adjacent farm ground. The Alkali Drain was dug long ago in an attempt to make this area into productive crop land. This storage dam in an area with a historically high water table is not logical.

Mr. Tuthill, I thank you for your consideration and for your attention to my concerns regarding water issues in the past. If I can provide more information, I will gladly do so.

Sincerely,

Dan Chaney

RE: Permit # 63-12197

Dear Mr. Tuthill:

Yesterday, Dale Nagy and I drove around the property of Messrs. VanVliet, Kiser and Lewman to determine the extent of their concerns. We did not see any evidence of flooding or damage as a result of water held on our property (Roswell slew).

Their property is about two miles north of ours. We have not heard from anyone else within that two square miles of any damage, real or threatened, to their land. We certainly are not hydrologists or engineers, nor are we qualified to scientifically determine if the water table would rise as a result of storing water two miles south. However, the evidence does not seem to support their concern.

We have visited with Jim Hitch concerning water that he is storing just below the property in question. He told us that he did not understand their complaint. He said that he has told these people that if his storage of water affected them adversely, he would remove boards from his dam to reduce the water table. He said that he has never been asked to do so.

Further, the protesters concerns seem ill founded because their concern is with the Alkali Drain. Our Permit is for the Scott Drain. Also, with the approval of our Permit, more water will be directed to the Scott Drain, thereby actually reducing water flows to the Alkali Drain. Subterranean water flows will correspondingly be reduced, thereby alleviating the protesters concerns.

We will continue to research this issue and work with all parties concerned. If possible, we want to satisfy everyone, however, we would like to continue with our Permit process. Please let us know what needs to be done to accomplish this task.

Sincerely,

Robert D. Glaisyer

JOINT APPLICATION FOR PERMIT
U.S. ARMY CORPS OF ENGINEERS
IDAHO DEPARTMENT OF WATER RESOURCES
IDAHO DEPARTMENT OF LANDS

PARATE PERMIT DECISIONS MUST BE
RECEIVED FROM BOTH THE STATE OF
IDAHO AND THE CORPS OF ENGINEERS
PRIOR TO START OF WORK

The Department of the Army permit program is authorized by Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act. These laws require permits authorizing structures and work in or affecting navigable waters of the United States and the discharge of dredged or fill material into waters of the United States, including their adjacent wetlands. State permits are required under the State of Idaho, Stream Channel Protection Act (Title 42, Chapter 38, Idaho Code) and the Idaho Lake Protection Act, Section 58-142 et. seq, Idaho Code. This application will meet the requirements of the above agencies.

6. Describe the proposed activity. Provide a general description of the proposed work including all discharges of fill material and any structures such as piers, floats, boat lifts, bulkheads, and cofferdams.

To repair and restore historical marshland. Remove silt and debris from ponds and drain systems. Material will be placed on adjacent land to dry. Discharge to be used for berms, banks and/or islands for wetland restoration and wildlife habitat. Excess to be removed from site.

Describe construction methods and equipment:

Drag line, dredge and earth moving equipment.

List all soil series located at project site, and indicate if any are on the county's hydric soils list:

Silt from irrigation and drain systems

Length of project along the stream or extension into lake or reservoir: 3,000 ft

Will material be placed waterward of ordinary high water mark? NO If yes, volume: _____ (cubic yards)

Will material be placed in wetlands? YES If yes, total area: _____ (BOTH TEMPORARY AND PERMANENT)

Type and composition of fill material: Silt (i.e. sand, etc.) Material Source: Ponds and drain systems

Will excavation or dredging be required? YES If yes, volume: 50,000 (cubic yards) Composition Water and silt

Disposal site for excavated material: Adjacent lands Method of excavation: drag line dredge caterpillar
HYDRAULIC DREDGE

Stream gradient: Flat

Method of controlling turbidity and/or sedimentation: Create silt pits/traps at entry of drain ditch systems

7. Size and flow capacity of proposed bridge or culvert and area of drainage served (sq. miles) (Idaho Department of Water Resources requirement)

AUG 09 1996

6. Preparation of drawings. One set of original and quality reproducible drawings must be attached to this application. NOTE: DRAWINGS NO LARGER THAN 8-1/2 X 11 INCHES IN SIZE. See the instruction pamphlet for instructions and a checklist for making the drawings. Include photographs of the project site mounted on 8-1/2 x 11 sheets.

9. Purpose and intended use: Commercial _____ Public _____ Private X Other _____ Describe _____

Necessity and justification for project To restore, establish and repair ponds and waterways for wildlife.

10. Proposed Starting Date August 1996 Estimated Duration one year

11. If any portion of the activity is complete, indicate month and year of completion _____
Indicate the existing work on the drawings.

The intent of this application is to improve and enhance an existing wildlife storage use covered on SRBA claim A63-30230, with a 1912 claimed priority date. Any additional storage that may result from the proposed improvements will be on previously wetted ground. Applicant therefore seeks exemption from the Snake River moratorium.

Permits will be subject to all prior water rights. Protests may be submitted based on the criteria of Sec. 42-203A, Idaho Code. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 together with a protest fee of \$25.00 on or before MAY 22, 1995. The protestant must also send a copy of the protest to the applicant.

MANT'S NAME: Roswell Drain Club &/or Naga &/or Gila &/or DATE: 06/13/1995ITY: CanyonJOYEE: TT Minicucci

Mr. David Kiser called today about this application. Mr. Kiser irrigates land from the Alkali Draw, which is one of two draws off the wetlands area which is the subject of this application. The applicants had a meeting with all the property owners on May 23, 1995. Mr. Kiser was under the impression that he could protest this application, but the final date for protests was May 22, 1995. After speaking with allocations staff @ W. Region, I advised Mr. Kiser that he could write a letter of concern but that the letter would not be considered a formal protest. I suggested he contact the applicants to voice his concerns and to make sure that he was clear on their intentions (Mr. Kiser had received a letter from the applicants about the meeting on May 23). I also suggested that he call John Herman @ IDWR's state office if he had further questions about his options to possibly intervene on this application. Mr. Kiser has a neighbor downstream who has a license to store 18 AF - Mr. Kiser claims that the neighbor has stored so much water that his ^(Mr. Kiser's) pasture is flooded out. He does not want this situation to be compounded by another storage facility; he feels this ~~was~~ ^{could} occur if this application is approved.
