MORE INFORMATION - EXISTING USE

Lands are within the service area of Riverside I.D., and shares are held for irrigation. However, shares are no longer deliverable because of a collapsed pipeline across a draw and the slope of the land being upgradient from the diversion. Consequently, a pump was placed in Alkali Drain around 1975 and used to irrigate this parcel. Claim A63-21750 was filed on this use but rejected as in violation of permit statute, and was withdrawn with this application filed in its place. \$75 fee from A63-21750 have been transferred to application (C015814), with balance of fees (\$25) on W018917, 4-12-95.

Because use was existing before 1987 and no new acres will be developed, processing is allowable under moratorium. Also, a delayed claim review may have caused the application filing to be deterred until affected by moratorium, hence, processing should be allowed to proceed. Applicant was requested to provide proof of pre-1987 use, and will forward when collected.

E. NARRATIVE/REMARKS/COMMENTS

1. The irrigation system consists of an intake pipe from Alkali Drain to a 3½' Dia. Steel Sump; A 10 HP motor which belt drives a vertical shaft connected to a vertical centrifugal pump set in the bottom of the sump. The pump supplies water through an 8" steel, 220' buried discharge line to a concrete lined ditch. The concrete ditch is located on the highest portion of the land and supplies water to the two tracts of land with siphon tubes. The ditch flows north.
2. At some time in the past, the Riverside Irrigation District supplied water to these tracts from a pipeline that crossed Boulder Rd. Apparently, this pipeline would not supply ^{water} adequate due to the elevation of the concrete ditch, and it was taken out.
3. The pump is left in place during the winter, and has a static lift of 25'.
4. Power Meter # 68 325 695. No flow measuring device.

=====

Today I phoned Bobbie Maggard, Sec./Tr. of the Riverside Irrigation District, at 208-722-6553 to discuss Application for Permit 62-12196. Specifically, I wanted to know if approving this application to divert from the Alkali Drain would interfere with Riverside Irrigation District rights in any way. Mrs. Maggard told me that Riverside Irrigation District does not utilize the Alkali Drain as part of its conveyance system. She said water in the drain is outside the control of Riverside Irrigation District.

Mrs. Haggard did recommend, however, that I contact the Riverside Drainage District by calling president Larry Story at 208-722-5380 or board member Marvin Abbott at 208-722-5398.
