PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63 12147 Telephone No. 208-939-0242

2. Name(s) of Permit Holder(s): Eagle Water Co., INC.

3. Mailing Address: P.O. Box 455 Eagle, Id. 83616

4. Source of Water: Groundwater If **GROUNDWATER** (well), Date Drilled: mo. 5 / yr. 96

a. Well Driller: Pete Cope Drilling Co., INC. Drilling Permit Number: 63 - 94 - W - 848 0

b. **OPTIONAL:**
Pump Horsepower: 250 Pressure (psi): 90 Dynamic pumping level (ft): 65

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): _____ Stockwater (No. and type of stock): _____

Irrigation (No. of acres): _____ Other: Municipal

6. Total rate of diversion and/or volume for which proof is submitted: 5.00 cfs OR _____ acre feet

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required? Yes X or No _____

Has the measuring device been installed? Yes X or No _____

Flow Measurement Port: Is a flow measurement port required? Yes _____ or No X

Has the measurement port been installed? Yes _____ or No X

8. Fee Enclosed: \$ 200.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Norman Revels Telephone Number: 208 939-0242

Address: P.O. Box 455 Eagle, Id. 83616

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

REQUEST FOR EXTENSION OF TIME
TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF
BENEFICIAL USE FOR A WATER RIGHT PERMIT

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right.

Permit No. 63-12147

Name(s) of Permit Holder: Eagle Water Co., Inc.

Mailing Address: P O Box 455 Eagle, Idaho 83616

Date Proof is Due: February 1, 1998 Telephone No. 208-939-0242

Describe what work has been completed toward the development of this water right:

(This must be filled out! If no work has been completed, show "none".)

Well is drilled and tested, pump and motor is installed.

Underground piping is completed, pump house is under construction.

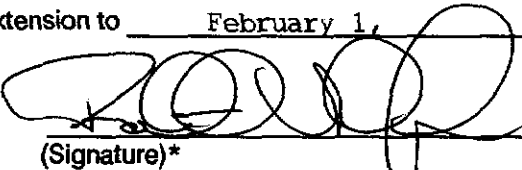

Costing \$100,000.00 +

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Work is in process. Well should be on line in approximately 90 days.

Permit holder(s) request an extension to February 1, 1999

FEE: \$50.00

(Signature)*

*If other than permit holder, Power of Attorney must be supplied.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be APPROVED and the time within which to submit proof of beneficial use is extended to February 1, 1999.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

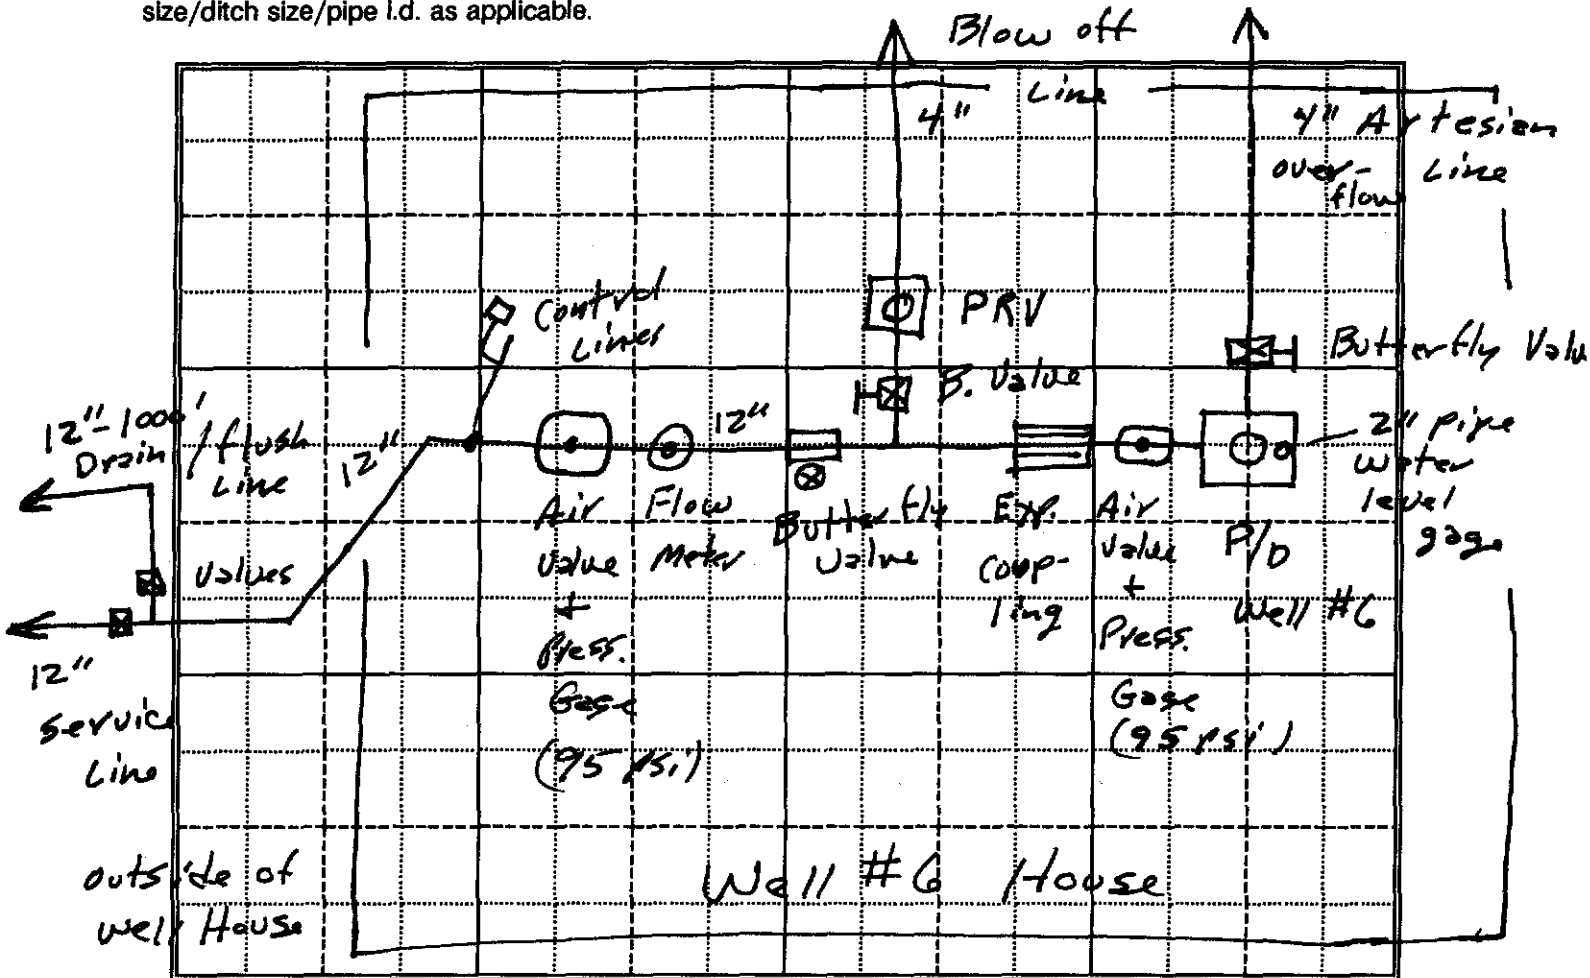

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
Flow meter Well #6	Tot.	Mcrometer		98-10-6440	(in 12" line)	
(Well #4 also has a similar flow meter)						

2. Measurements: None - Municipal System operates from 88 to 105 PSI. Normal is 95 PSI.

E. NARRATIVE/REMARKS/COMMENTS

1. This permit was for 5.0 cfs from a new well, #6, in SWSW, Sec. 8, and was later Amended (11-18-96) to also include existing well #4, in NWNW, Sec. 15, and to increase well #4 right 63-11798, from 1.34 cfs to 5.0 cfs.
2. The Eagle Water Co. also has municipal wells #1, 2, + 3. Well #3 normally operates as a backup when needed. All 5 wells are interconnected and provide municipal water to the Eagle Water Co. service area.
3. Well #6 normally is artesian during the summer and has a 4" overflow line from the well casing. It also has a 12" - 1000' long drain / flush line that empties into an irrigation ditch west of the site.
4. Well #6 is located at the corner of old Hwy 44 and S. Payette St. in the Pine Ridge Subdivision.
5. Well #4 is also artesian during the summer, and has a flow meter similar to the one for well #6. This well is

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

Additional Computation Sheets Attached

Measured Method: None - Theoretical Cal.

$$\text{Well \#6, } Q_6 = \frac{(8.8)(250 \text{ H}_2\text{O})(70\%)}{2' + (88 \text{ psi})\left(\frac{34'}{14.7 \text{ psi}}\right)} = 7.5 \text{ cfs}$$

$$\text{Well \# 4 } Q_4 = \frac{(8.8)(26014)(702)}{2 + (88)(\frac{34}{14.7})} = 7.8 \text{ cfs}$$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$$

$$V = \text{Smaller of } V_{LB} \text{ and } V_{DB} =$$

2. Volume Calculations for Other Uses:

$Q_6 = 3300 \text{ Grm} = 7.4 \text{ cfs}$
@ 88 psi

$Q_6 = 3050 \text{ GPM} = 6.8 \text{ cfs}$
@ 105 psi

(TDPH = 245')

$Q_4 = 3495 \text{ Gpm} = 7.8 \text{ cfs}$
 @ 88 psi

$Q_4 = 3250 \text{ GPM} = 7.2 \text{ cfs}$
@ 105 PSI

Both wells can
pump more than
5.0 cfs

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
Municipal	01/01	12/31	5.0	
Totals:			5.0	

2. Recommended Amendments

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-12147

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Enclosed is an order reinstating the permit since proof was submitted after the proof due date. Note that the priority date has been advanced to September 29, 1994, as provided in Section 42-218a.2, Idaho Code.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination, you may contact the **WESTERN** Regional Office of the department in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH

Senior Secretary, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 63-12147

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1999. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 63-12147

Dear Permit Holder:

I have enclosed a copy of the approved request for extension of time submitted August 29, 1996, in connection with the above referenced permit which extends the time within which to submit proof of beneficial use to **February 1, 1999**. Please note that the department granted the extension based on due diligence. It is important that you work diligently towards completion of this project since the department **will not** be able to grant additional extension requests based on due diligence.

Section 42-248, Idaho Code, which became effective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact this office or any regional office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner.

Please contact me at (208)327-7953, if you have any questions regarding this matter.

Re: Delay in completing Well No. 6

Dear Robert:

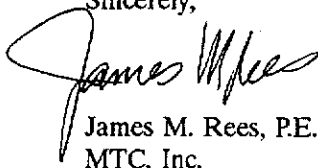

I guess it's a good thing the moratorium on the sewer connections delayed the number of additional users that would have been hooked up to your system when your Well No. 6 was delayed from going on line, because of the additional requirements that the Department of Water Resources placed on the completion of the well when the Well Driller sealed the well casing without the engineer, or a representative from the Department of Water Resources to be present.

As you know, the specifications for the well, required either the engineer or a representative from the Department of Water Resources to be present when the well casing was sealed to insure that the two sources of water would not cross feed. This is doubly important when it is anticipated that the aquifers would be artesian. Other wells in the area are artesian, and when this well did not initially flow, there was a suspicion that there was a cross connection.

With this understanding, the Department representative required the wells to be logged with a nuclear logging mechanism, to assure that the well was properly sealed around the exterior of the casing in accordance with the approved specifications. An out of state contractor capable of performing these logs was required. This resulted in the delay, because of the unavailability of his equipment for a period of time. These results were obtained and forwarded to the Department of Water Resources, and to the best of my knowledge have been approved.

I understand that the plans for the pump and pump house have been approved by Department of Environmental Quality. If you have any further questions, please call.

Sincerely,

James M. Rees, P.E.

RE: Permit No. 63-12147

Dear Permit Holder:

I have enclosed a copy of the Request for Extension of Time submitted for the above referenced water right permit. Before the department can take action on the request, a clarification of one of the statements made on the request is needed.

You state that one of the reasons you were unable to complete development of the water right, was due to "additional requirements by the Department of Water Resources." Please provide specific information as to what those requirements were and how the development was affected.

Please provide the requested information within **(30) days** of receipt of this letter, and please address your correspondence to my attention.

Please contact me at (208)327-7953 if you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script that reads "Julie L. Yarbrough".

PROOF DUE NOTICE

RE: PERMIT NO. 63-12147

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1997. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

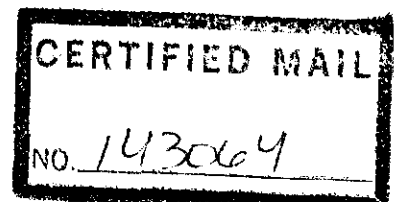

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 63-12147

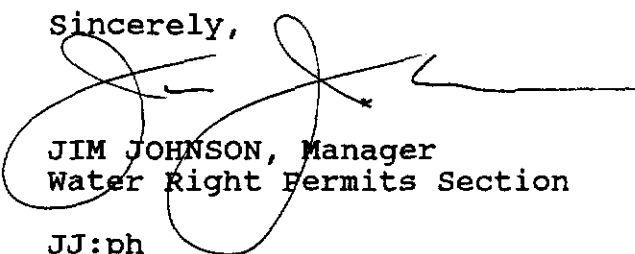

Dear Water Right Holder(s):

Enclosed is a copy of your Amendment of Permit No. 63-12147 changing the point of diversion. If you have any questions concerning this document, please contact me at (208) 327-7946.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address **PRIOR** TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

JIM JOHNSON, Manager

NOTICE OF AMENDED WATER RIGHT PERMIT

Notice is hereby given that permit No. 63-12147 in the name of Eagle Water Co., Inc., was filed on 9/27/1994 for 5.0 cfs from groundwater with a point of diversion within the SWSE, Sec 8, T04N R01E, to be used for municipal use within the city of Eagle and surrounding service area. The permit was amended 3/21/1995 to add a point of diversion in the NWNW, Sec 15, T04N R01E.

The applicant now proposes to amend the permit by changing the point of diversion listed in the SWSE to the SWSW, Sec 8, T04N R01E.

Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, 2735 Airport Way, Boise ID 83705, together with a protest fee of \$25.00, on or before October 21, 1996. The protestant must also send a copy of the protest to the applicant.

MEMORANDUM

RECORDED

JUL 11 1995

Department of Water Resources

TO: ~~Glen Saxton~~ *File*
FROM: Dave Tuthill *DT*
DATE: July 7, 1995
RE: Request to Change Conditions of Approval for Permit
63-12147 in the Name of Eagle Water Company

This memorandum is prepared in response to your memorandum in this regard dated June 8, 1995.

Water right permit no. 63-12147 authorizes Eagle Water Company, Inc. to divert up to 5.0 cfs for municipal uses with a date of priority of September 27, 1994. The place of use is identified as being within the city limits of Eagle and the surrounding service area. The permit was originally approved with a point of diversion within SWSE Sec. 8 T4N, R1E, and was amended to add a point of diversion within NENE Sec. 15, T4N, R1E.

The diversions proposed by Eagle Water Company were not protested when advertised. I am not aware of any ground water availability problems in the vicinities of the two identified points of diversion. I have considered the advisability of advertising the proposed changes to conditions of approval, and have concluded that in this situation where no known controversies exist and where the newly proposed point of diversion has recently been advertised, further advertisement would serve no beneficial purpose. In light of the modification of the Boise River Basin Moratorium, restrictive conditions of approval can now be removed.

Accordingly, in response to the June 2, 1995 letter from Mr. DeShazo I would recommend that the three conditions of approval related to (1) daily diversion volume for commercial and industrial use, (2) domestic use authorization, and (3) irrigation of large projects be removed from permit no. 63-12147.

MEMORANDUM

To: ~~Dave Tuthill~~ *File*
From: L. Glen Saxton *LS*
RE: REQUEST TO CHANGE CONDITIONS OF APPROVAL FOR PERMITS
63-12147 AND 63-11798 IN THE NAME OF EAGLE WATER
COMPANY
Date: June 8, 1995

You have forwarded the attached letter from Eagle Water Company indicating that you recommend removal of a condition of approval which limits the use of water for irrigation under the municipal use.

File 63-11798 was licensed in September 1994. Hence, it does not appear reasonable to allow enlargement of the license by removing the condition which limits irrigation. A new application for permit for the desired irrigation use seems appropriate.

File 63-12147 is a permit for which the department could change the conditions of approval. Before action is taken to change the conditions of approval, I would like a brief memo from the region recommending that the change be made and the reasons to support the recommendation.

PETITION FOR REMOVAL OF PERMIT CONDITIONS

Eagle Water Company, Inc. holder of permit #63-12147 and #63-11798, petitions the Idaho Department of Water Resources for removal of conditions from existing permits for appropriation of water. Permit #63-12147, condition 9, and permit #63-11798, condition 7, restricts the petitioner from irrigating parks, golf courses, or sports activity fields. Recently the Director, Idaho Department of Water Resources, modified the moratorium on applications for permits for diversion and use of surface and ground water within the Boise River drainage area. The order provided a mechanism by which new wells for irrigation may be approved upon meeting certain conditions which protect existing aquifers, prevent material injury to prior surface and ground water rights, and that recognize the need for continued ground water recharge. The two permits noted above were approved during the period the moratorium was in effect and the two conditions referenced were appropriate at the time. However, with the new data available to the Idaho Department of Water Resources and the lifting of the moratorium, it appears that these conditions are no longer appropriate or necessary to protect the ground water resource. Eagle Water Company, Inc. therefore requests that the Idaho Department of Water Resources remove condition 9 on permit #63-12147 and condition 7 on permit #63-11798 for the following reasons:

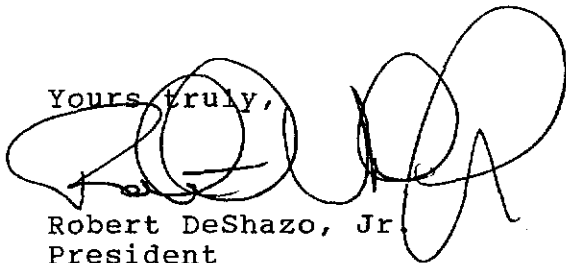

1. The aquifers from which Eagle Water Company pumps its water are not considered to be water limited in the Boise Valley.
2. No injury will occur to other water right holders in the area since it is clear from the Department's action that this area is not considered one in which potential injury exists from pumpage of ground water.

AUG 09 1995

3. Irrigation of common areas and small parks within subdivisions located in the Eagle Water Company service area will enhance recharge to the ground water system since any water applied in excess of plant needs will at least, in part, percolate to the ground water system.
4. Eagle Water Company wells are constructed to public supply standard which insures proper sealing and depth of construction so as to eliminate the possibility of use of shallow aquifers which are the most likely to be impacted by future development.
5. Eagle Water Company's wells are separated from other wells in order to insure adequate water supply and non interference with other water rights and wells in the nearby area.
6. Irrigation of common areas and subdivision parks assist in maintaining a higher quality of life in the local area and the preservation of open space which is in the local public interest.

Eagle Water Company respectfully requests the removal of the two conditions on the two separate permits and if any additional information is required, please contact Mr. Robert DeShazo, Jr., Eagle Water Company, Inc., P. O. Box 455, Eagle, Idaho 83616-0455.

Yours truly,

Robert DeShazo, Jr.

MEMORANDUM

TO: FILES

FROM: STEVE LESTER *SL*

DATE: APRIL 19, 1995

RE: TRANSFER NOS. 4589 & 4590, APPLICATION FOR PERMIT 63-12192

A package of two transfers for Joint School District #2 and one application for permit for United Water Idaho dba Eagle United Water are reviewed together. The package proposes using three existing wells to provide domestic and irrigation water for two Eagle school sites plus provide municipal water in the service area currently being evaluated by IPUC.

The three existing wells and existing rights are as follows:

Crandlemire	Sec. 5	right no. 63-11090
Redwood Creek	Sec. 7	none found per WR & AJ ¹
Ricks	Sec. 12	right no. 63-08437

T4589 63-08437 ALL THREE WELLS

Proposes use of all three wells for 63-08437B. Thirty six acres under B will be reduced to 28 acres and used in two tracts around the high school. The rate of flow associated with 36 acres will also be used for domestic needs in the school facility. Table 1 on page 6 of the application presents a thorough summary of the before and after uses plus includes SRBA summary data.

Page 2 of the filing outlines 63-08437A for the remaining use. This page is included to document the remaining use since it is different than the remaining licensed data as noted by tracing the license and then the SRBA claim. Part A will use the licensed well (Ricks).

The claim lists reduced flow and acres. The attached photo and map copies that I prepared verify that at least the number of irrigated acres licensed and claimed were in play in 1987. The July, 1987 NAPP verification serves to address the SRBA and license places of use. The applicant's consultant, Terry Scanlan, will provide additional information tracing the land ownership and water uses as related to shifting irrigation practices defined in the claim.

Therefore, the transfer will provide modified irrigation and domestic use to the school (B) plus will codify the remaining irrigation, which also shows a minor stock use (A). The additional uses for parts A and B will not represent an expansion since total use will not increase. The issue of well usage all year long is addressed via the legal notice process as has been done in other transfers in Western Region (expanding season for ground water possibly allowed where not protested).

APPROVED

JUN 08 1995

¹Letter of inquiry sent to consultant about this.

copy → 63-12147

T4590 63-11090 CRANDLEMIRE & RICKS WELLS

This is similar to T4589 but less complicated. This right was examined in 1992 and SRBA does not apply. The same evaluation process for use outside of the irrigation season for part B will be used (public notice). Again, an expansion does not appear evident per application Table 1 on page 4 of the application. Domestic use is for a middle school.

The consultant will provide the ownership documents soon.

APPLICATION 63-12192 CRANDLEMIRE & REDWOOD CREEK WELLS

This is an uncomplicated municipal application for 5.00 cfs using two of the three wells in question. The service area is still under IPUC consideration. Of particular interest is the area east of Hwy 55 -- this might be served by the applicant or perhaps by Eagle Water Co., Inc. but not by both as I understand the situation.

Eagle Water Co., Inc. filed an amendment (pending, at Region now) of municipal permit 63-12147 that includes, among other areas served, the same site east of the highway where new subdivision development is now occurring. This office, and perhaps the S.O., has sent some correspondence on this matter (see DRT for details if needed).

This detail of which entity will provide municipal service to land east of Hwy 55 should not present any significant problem in processing the applications at this time.

For the proposed municipal use in 63-12192, the aquifer recharge condition recently implemented might be appropriate. It is conceivable that land now irrigated by surface water, e.g. Farmers Union Ditch Co., might show irrigation replacement via municipal wells if development details preclude continued use of ditch deliveries. This can be prevented by adopting some version of an aquifer recharge and/or use of available surface water condition of approval. Such a condition lends itself to future municipal filings in the local area.

Perhaps this suggested condition should also be applied to 63-12147.

NOTICE OF AMENDMENT OF WATER RIGHT PERMIT NO. 63-12147

Notice is hereby given that Eagle Water Co., Inc. of Eagle, ID has applied to the Department of Water Resources to Change the Point of Diversion of the following described water right to be changed pursuant to Section 42-211 of Idaho Code:

WATER RIGHT PERMIT AS RECORDED:

Date of Priority 9-27-1994
Source Groundwater
Amount 5.00 cfs
Use Municipal from 1-1 to 12-31
Point of Div SWSE, S8, T4N, R1E Ada County
Place of Use City limits of Eagle & surrounding service area
Point of Div TO BE CHANGED AS FOLLOWS:
Add a well in NWNW, S15, T4N, R1E. Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this permit.

The permit will be subject to all prior water rights. Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705, together with a protest fee of \$25.00 on or before April 24, 1995. The protestant must also send a copy of the protest to the applicant.

Re: Brenson Subdivision

Dear Mr. Young:

Thank you for taking the time to meet with me on Wednesday, April 5. I'm sure you're aware from our discussions, that the Brenson Subdivision is a very important project and I am deeply concerned that we continue to meet all of the criteria and requirements of federal, state and local agencies. Obviously because of the investment we've already made in the property and the on-going work, time is of the essence to us. For that reason, I would urgently request that the decision relating to the moratorium exception be made as quickly as possible.

Our development (Brenson Subdivision) lies immediately adjacent to Highway 55 in portions of Section 11, T4N, R1E, near the existing Sage Acres Subdivision. The project is ultimately designed to serve 234 homes, most of which lie on one-quarter acre lots. Within the development there are several common areas, many of which will be left in their natural state except for trails and paths; but two areas comprising 5.23 acres will be irrigated. Our project is very close to the service area for Eagle Water Corporation and because of that we are in the process of making arrangements with them to obtain domestic water.

Eagle Water Co., Inc. is in the process of acquiring the necessary amendments to their water right permits and approval from the IPUC to serve our project. During the last few weeks of correspondence and contacts with Mr. Dave Tuthill of your agency, we have become aware that Eagle Water Co. water rights fall within the existing moratorium on surface and ground water development and could create a significant problem regarding irrigating our common areas. While the existing moratorium order provides that

JUN 08 1995

Page 2
April 6, 1995
Norm Young

applications for multiple domestic uses may be approved where each unit within the project meets the test of domestic uses as defined in Section 42-111, Idaho Code; the Department has taken the position that large open expanses such as ball fields and golf courses may not be irrigated. Section 42-111, Idaho Code, defines domestic uses as including irrigation of up to one-half acre of land per residence. Since our project is primarily made up of one quarter acre lots with houses, driveways and associated other development, the actual irrigated acreage within the entire subdivision is much less than one-half acre per residence. This results in a lesser amount of acreage being irrigated than would have been under single family domestic well development and a much lower rate of depletion from aquifers in the area.

The Director, as provided for in Section 9 of the Moratorium Order can review on a case by case basis applications that might qualify for approval because of certain conditions. It is my feeling that this development does in fact qualify for a waiver of the moratorium for a number of reasons. I believe that development of this project does further the local public interest. The common areas will provide open space for children, residents of the project and the adjacent community. The R-3 zoning for the project allows for our current density (234 lots) with 18,000 square foot minimums. What has been required of us amounts to a density transfer, thereby shifting footage from individual lots into a more manageable common area. Planned unit developments such as ours need to have open space to provide the aesthetics and recreational opportunities needed and desired by today's urban dwellers. Most projects in Ada County, would not be approved by the Planning and Zoning Commission or the County Commissioners without significant open space for use of the community.

Paragraph B, Section 9, provides for more technical reasons for waiver of the moratorium. The additional water from the Eagle Water Corporation system necessary to irrigate the 5.23 acres of common area is only about .1cfs or less than 50 gallons per minute during the irrigation season. Hydrographs of wells in the area of Eagle Water Corporation's withdrawal (State Street and Edgewood Drive) indicate significant recovery over the last few years from drought impacts. For those areas that have continued to decline, only minimal amounts of decline have occurred, primarily due to decreasing recharge in the area because of limited irrigation application. We submit that given the minimal amount of the rate of diversion, and the fact that consumptive use from the aquifer will be less than 10 acre feet per year for the additional acreage, that no senior water rights will be injured and in fact the impact is unmeasurable. Additionally, as pointed out by Mr. Glen Saxton of your office in a letter to Bob Unger on March 17, 1995, "water imported to the subdivision from the well located at the corner of State Street and Edgewood where no known water shortages exist, potentially would assist in the recharge of the local aquifer where a local water shortage (exists) as perceived by

JUN 08 1995

Page 3
April 6, 1995
Norm Young

some." An additional factor to consider is with the paving of the roads, installation of sidewalks, homes and driveway pads, the evapotranspiration would be eliminated and essentially transferred to the ground water system because of storm water runoff and storm drains which will enhance recharge.

In our meeting we discussed mitigation as one of the options for approval of the waiver. Based on the information above, I believe that the project qualifies for a waiver of the moratorium without mitigation. However, if in the opinion of the Director, mitigation is a necessity for approval of a waiver, I would propose the following in the interest of a speedy decision. Brenson Corporation would establish a \$1,000 escrow account for purchase of water from the Boise River Water Bank as mitigation for the irrigation of the 5.23 acres of common area. It is anticipated that this would allow the purchase of approximately 10 acre feet of water each year for at least the next 10 years. As an alternative, Brenson Corporation would write into the conditions, covenants and restrictions (CC&R) for the Brenson Subdivision a requirement that the Homeowners Association purchase at least 10 acre feet of water from the Boise River Water Bank each year. It is estimated that the annual consumptive use of irrigation for the common area is approximately 10 acre feet and assumed as well that water will be available from the Boise River Water Bank in future years for mitigation.

In summary the project qualifies for a waiver of the moratorium on new development based on technical grounds as well as hardship. However, in the interest of time we would agree to implement one of the alternatives described above as mitigation. Again, it is extremely important that we receive a quick decision on this matter and if you would like to meet again or need additional information, please feel free to contact me directly or our consultant, Sherl Chapman, at his office.

Thank you for your consideration of this matter and your time in meeting with us.

Sincerely,

Peter Harris
Project Manager

NOTICE OF AMENDMENT
OF WATER RIGHT PERMIT
NO. 63-12147

Notice is hereby given that Eagle Water Co., Inc. of Eagle, ID has applied to the Department of Water Resources to Change the Point of Diversion of the following described water right to be changed pursuant to Section 42-211 of Idaho Code:

WATER RIGHT PERMIT AS RECORDED:

Date of Priority	9-27-1994
Source	Groundwater
Amount	5.00 cfs
Use	Municipal from 1-1 to 12-31
Point of Div	SWSE, S8, T4N, R1E Ada County
Place of Use	City limits of Eagle & surrounding service area

TO BE CHANGED AS FOLLOWS:

Point of Div	Add a well in NWNW, S15, T4N, R1E. Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this permit.
--------------	---

The permit will be subject to all prior water rights. Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705, together with a protest fee of \$25.00 on or before April 24, 1995. The protestant must also send a copy of the protest to the applicant.

RE: Water Supply for Property on Brenson Subdivision (formerly
Mule Deer Valley Estates)

Dear Mr. Unger:

In response to Dave Tuthill's letter dated February 16, 1995, in the above-referenced matter, the department received two documents. One is a letter dated March 3, 1995, from Mr. Robert DeShazo, Jr. which conveyed several attachments including a map of the proposed service area for Brenson Subdivision and Brenson #2 Subdivision. The other document is a copy of the letter dated March 2, 1995, from Randy Lobb of the Public Utilities Commission (PUC) to you which expressed the PUC position relative to Eagle Water Company supplying water to the subdivision.

It is my understanding based on a discussion with Randy Lobb that Eagle Water Company wants to provide water for the Brenson Subdivision property via a well located at the northeast corner of State Street and Edgewood, within the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 15, T4N, R1E, B.M. The water right for the use of this well, is represented by License No. 63-11798. This licensed right is conditioned with the following language:

Irrigation of large projects such as parks, golf courses or sports activity fields is not authorized under this right. Domestic uses authorized under this right shall not exceed 13,000 gallons per day in accordance with the provisions of Section 42-111, Idaho Code.

The place of use is located within the city limits of Eagle and surrounding service area.

Based on our review of this matter, License No. 63-11798 can be used to provide service to Brenson Subdivision after the subdivision is within its service area provided other terms of the licensed right are followed. Alternatives which are available to Eagle Water Company include applying to amend either permit nos. 63-11893 or 63-12147 to include the well in the NWNW Section 15, T4N, R1E, B.M. as an authorized point of diversion or filing a new

JUN 08 1995
1895-1995

application for permit.

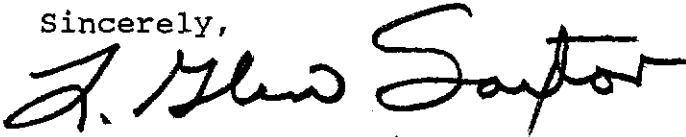

Although we recognize that the developer, Peter Harris, is anxious to use Eagle Water Company water to proceed with development that has already been initiated, the use has to be authorized by water rights of record.

Water imported to the subdivision from the well located at the corner of State Street and Edgewood, where no known water shortages exist, potentially would assist in the recharge of the local aquifer where a local water shortage as perceived by some. As with all subdivisions, the water use is minimal at first and increases with time.

In summary, existing water right records of the department do not authorize Eagle Water Company to provide water to the Brenson Subdivision. Eagle Water Company needs to make appropriate changes to its existing water right permits or apply for a new permit to provide the water.

If you have additional questions, please feel free to contact the department.

Sincerely,

A handwritten signature in black ink, appearing to read "L. Glen Saxton". The signature is fluid and cursive, with the first name "L." and last name "Saxton" clearly distinguishable.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12147

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a "Proof Due Notice" approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

Also enclosed is a copy of the approved drilling permit submitted in connection with this water right.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

MEMORANDUM

TO: Eagle Water Company , Inc. Application for Permit
FROM: Dave Tuthill *DT*
DATE: October 28, 1994
RE: Proposed Special Conditions of Approval

In compliance with the provisions of the Boise River Basin Moratorium, and in recognition of the proposed revisions of the Administrator's Memorandum regarding municipal uses, the following special conditions of approval are proposed:

~~1. Place of use is within the certificated service area of Eagle Water Company, Inc.~~

2. Use of water under this right is limited to domestic uses as defined by Section 42-111, Idaho Code. This water right shall not be used for irrigation of ~~tracts~~ ^{lots} in excess of one-half acre or for commercial or industrial uses in excess of 2500 gallons per day per user.

a. For unprotested applications and permits being reprocessed, the additional information required by Rule 040.05.c. shall be submitted within thirty (30) days after the director notifies the applicant that the application or permit is being reviewed for decision. The director may extend the time within which to submit the information upon request by the applicant and upon a showing of good cause. Failure to submit the required information within the time period allowed will be cause for the director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late. The director will provide opportunity for hearing as provided in Section 42-1701A, Idaho Code.
(7-1-93)

b. For protested applications or protested permits being reprocessed, the information required by Rule 040.05.c. may be requested by the director to be submitted within thirty (30) days after notification by the director, may be made a part of the record of the hearing held to consider the protest, or may be made available in accordance with any pre-hearing discovery procedures. Failure to submit the required information within the time period allowed will be cause for the director to void an application or to advance the priority of a permit being reprocessed by the number of days that the information submittal is late.
(7-1-93)

start → c. The following information shall be submitted for applications to appropriate unappropriated water or trust water and for permits being reprocessed for trust water. The additional information submittal requirements of this rule are waived for filings which seek to appropriate five (5) cfs or less or storage of five hundred acre-feet (500 A-F) or less and for filings seeking reallocation of trust water which the director determines will reduce the flow of the Snake River measured at Murphy Gauge by not more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than two hundred (200) acres will be irrigated. However, the director may specifically request submittal of any of the following information for any filing, as he determines necessary. Information relative to the effect on existing water rights, Section 42-203A(5)(a), Idaho Code, shall be submitted as follows:
(7-1-93)

i. For applications appropriating springs or surface streams with 5 or fewer existing users, either the identification number, or the name and address of the user, and the location of

FEB 16 1995

the point of diversion and nature of use for each existing water right shall be submitted. (7-1-93)

✓ ii. For applications appropriating groundwater, a plat shall be submitted locating the proposed well relative to all existing wells and springs and permitted wells within a one-half mile radius of the proposed well. (7-1-93)

✓ iii. Information shall be submitted concerning any design, construction, or operation techniques which will be employed to eliminate or reduce the impact on other water rights. (7-1-93)

d. Information relative to sufficiency of water supply, Section 42-203A(5)(b), Idaho Code, shall be submitted as follows:

✓ i. Information shall be submitted on the water requirements of the proposed project, including, but not limited to, the required diversion rate during the peak use period and the average use period, the volume to be diverted per year, the period of year that water is required, and the volume of water that will be consumptively used per year. (7-1-93)

✓ ii. Information shall be submitted on the quantity of water available from the source applied for, including, but not limited to, information concerning flow rates for surface water sources available during periods of peak and average project water demand, information concerning the properties of the aquifers that water is to be taken from for groundwater sources, and information on other sources of supply that may be used to supplement the applied for water source. (7-1-93)

e. Information relative to good faith, delay, or speculative purposes of the applicant, Section 42-203A(5)(c), Idaho Code, shall be submitted as follows: (7-1-93)

✓ i. The applicant shall submit copies of deeds, leases, easements or applications for rights-of-way from federal or state agencies documenting a possessory interest in the lands necessary for all project facilities and the place of use or if such interest can be obtained by eminent domain proceedings the applicant must show that appropriate actions are being taken to obtain the interest. Applicants for hydropower uses shall also submit information required to demonstrate compliance with Sections 42-205 and 42-206, Idaho Code. (7-1-93)

ii. The applicant shall submit copies of applications for other needed permits, licenses and approvals, and must keep the department apprised of the status of the applications and any subsequent approvals or denials. (7-1-93)

f. Information Relative to Financial Resources, Section 42-203A(5)(d), Idaho Code, shall be submitted as follows: (7-1-93)

i. The applicant shall submit a current financial statement certified to show the accuracy of the information contained therein, or a financial commitment letter along with the financial statement of the lender or other evidence to show that it is reasonably probable that financing will be available to appropriate the water and apply it to the beneficial use proposed. (7-1-93)

ii. The applicant shall submit plans and specifications along with estimated construction costs for the project works. The plans shall be definite enough to allow for determination of project impacts and implications. (7-1-93)

g. Information Relative to Conflict with the Local Public Interest, Section 42-203A(5)(e), Idaho Code, shall be submitted as follows: The applicant shall seek comment and shall submit all letters of comment on the effects of the construction and operation of the proposed project from the governing body of the city and/or county and tribal reservation within which the point of diversion and place of use are located, the Idaho Department of Fish and Game, the Idaho Department of Health and Welfare, Division of Environment, and any irrigation district or canal company within which the proposed project is located and from other entities as determined by the director. (7-1-93)

End → h. The following information Relative to the Public Interest Criteria of Section 42-203C(2), Idaho Code, shall be submitted by an applicant seeking reallocation of trust water for a project which the director determines will reduce the flow of the Snake River by more than two (2) acre-feet per day. For filings proposing irrigation as a purpose of use, the additional information is required if more than two hundred (200) acres will be irrigated. The director may request any or all of the following information for any filing seeking the reallocation of trust water. (7-1-93)

RE: Application for Municipal Water Right

Dear Sir:

The above-referenced application for water right permit is in the process of being advertised. The application includes a municipal well for 6.68 cfs for the city of Eagle. After advertising but before the application can be sent from this office to our state office for final action, other information is needed.

Based on Idaho Code 42-203A(5)(a-e), additional information is needed for applications for permit involving irrigation of more than 200 acres and/or diversions exceeding 5.00 cfs and/or 500 acre-feet of storage. Please provide information relating to the proposed water right as outlined in the attached copy of Water Appropriation Rules 37.03.08.05(c) through (g), formerly known as rules 4,5,3,1 through 4,5,3,5 under the old rule numbering system. This covers the following items:

- a) effect on existing water rights,
- b) sufficiency of water supply,
- c) good faith, delay, or speculative purposes,
- d) financial resources, and
- e) local public interest.

The items to be answered are highlighted in the attached pages with a check mark. A response within 30 days is requested. Please call me at 334-2190 if you have any questions.

Sincerely,

Steve Lester
Water Rights Supervisor

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is _____ Date _____

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **READ CAREFULLY!**

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.
