STAR SEWER AND WATER DISTRICT PROPOSED WATER SYSTEM

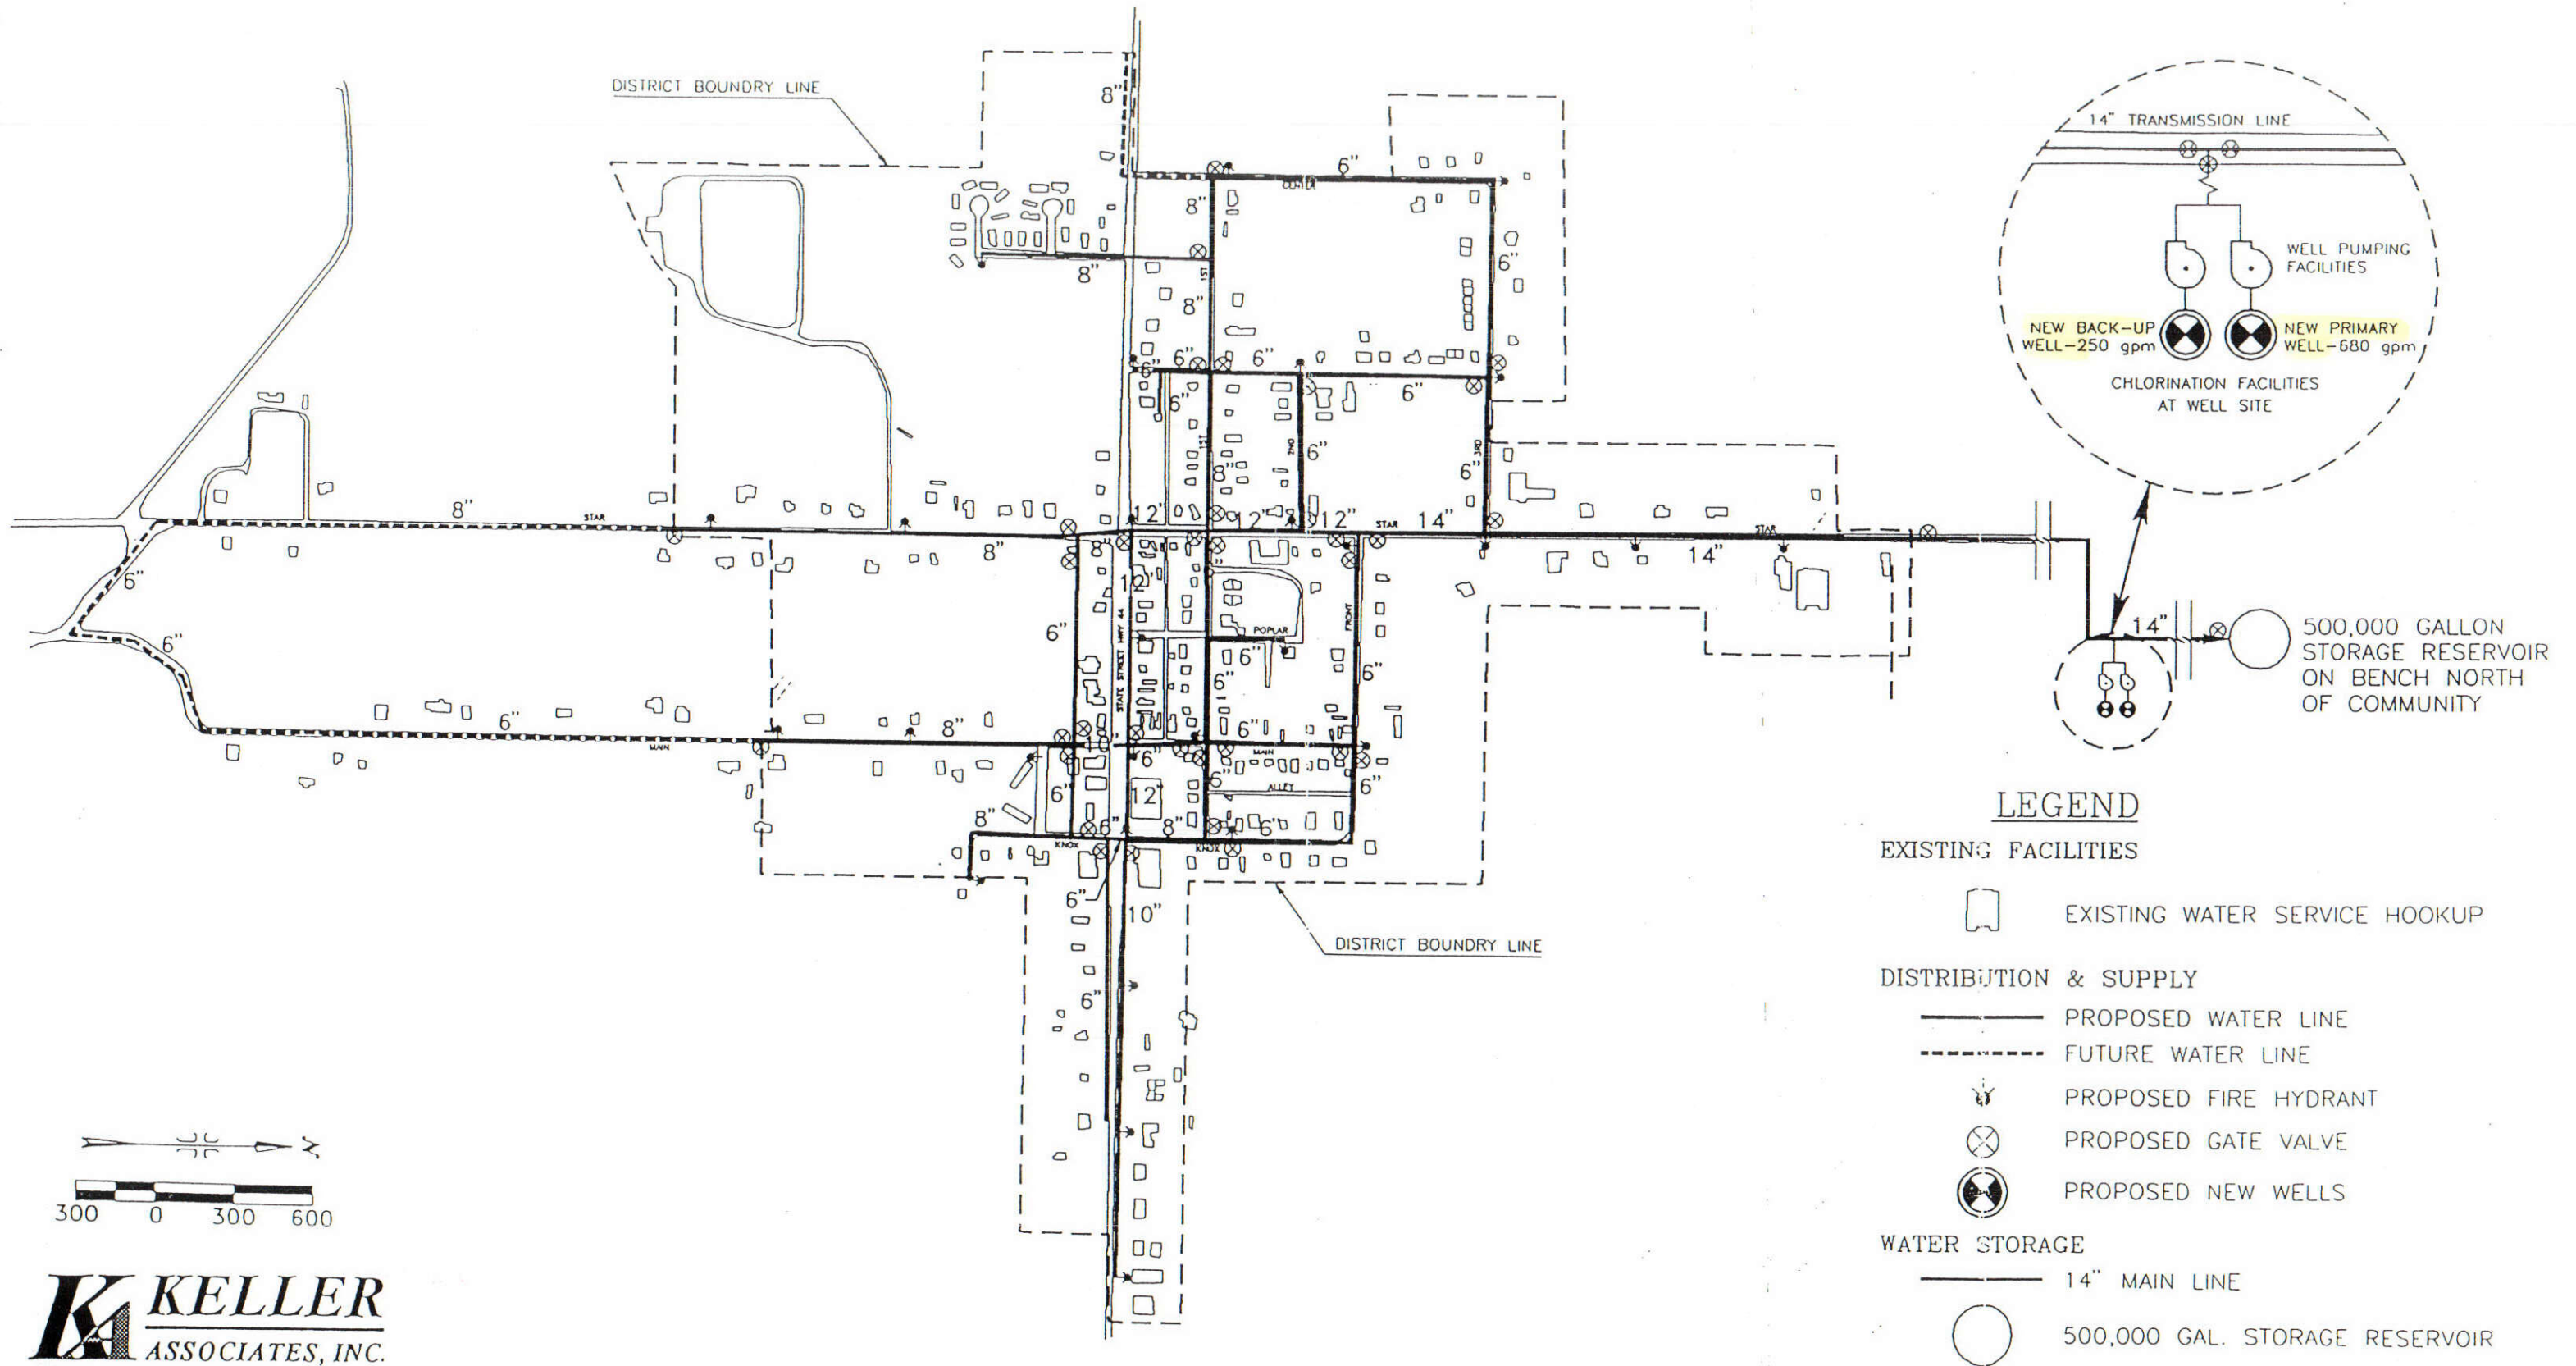

FIGURE 2

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 63-12100

Priority: March 5, 1994

Maximum Diversion Rate:

1.50 CFS

This is to certify, that STAR SEWER & WATER DISTRICT

PO BOX 277

STAR ID 83669-0277

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated February 1, 1994; and has submitted Proof of Beneficial Use on July 3, 1996. An examination indicates that the works have a diversion capacity of 2.560 cfs of water from a **GROUNDWATER** source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
MUNICIPAL	01/01 to 12/31	1.50 CFS	
<u>LOCATION OF POINT(S) OF DIVERSION:</u>		SWNW , Sec. 8, Township 04N, Range 01W ADA County	

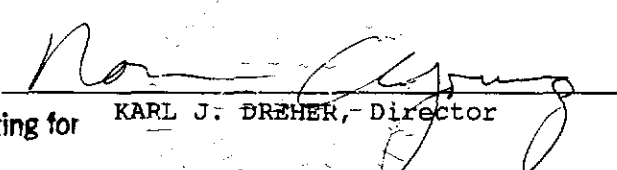

PLACE OF USE: See Remarks

CONDITIONS OF APPROVAL AND REMARKS

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. The daily diversion volume for non-domestic uses under this municipal right shall not exceed 2,500 gallons per use and the daily diversion volume for domestic uses under this right shall not exceed 13,000 gallons per dwelling in accordance with Section 42-111, Idaho Code.
5. Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this right.
6. Place of use is lands within the boundaries of the Star Sewer and Water District.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 23RD day of APRIL, 1998.

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-12100 Telephone No. (208)286-7388

2. Name(s) of Permit Holder(s): Star Sewer and Water District

3. Mailing Address: P.O. Box 277; Star, Idaho 83669

4. Source of Water: Groundwater If **GROUNDWATER** (well), Date Drilled: mo. Feb. / yr. 1995

a. Well Driller: Riverside, Inc. Drilling Permit Number: 63 - 94 - W - 0972

b. **OPTIONAL:**

Pump Horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft): _____

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): 246 Stockwater (No. and type of stock): N/A

Irrigation (No. of acres): N/A Other: N/A

6. Total rate of diversion and/or volume for which proof is submitted: 2.5 cfs OR _____ acre feet

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required? Yes X or No _____

Has the measuring device been installed? Yes X or No _____

Flow Measurement Port: Is a flow measurement port required? Yes _____ or No X

Has the measurement port been installed? Yes _____ or No X

8. Fee Enclosed: \$ 150.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Jack Kirtley Telephone Number: (208) 286-7388

Address: 390 N. Star Road (P.O. Box 103); Star, Idaho 83669

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

REQUEST FOR EXTENSION OF TIME
TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF
BENEFICIAL USE FOR A WATER RIGHT PERMIT

RECEIVED

MAY 25 1995

WATER RESOURCES
WESTERN REGION

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right.

RECEIVED

MAY 30 1995

Permit No. 63-12100

Name(s) of Permit Holder: Star Sewer and Water District

Mailing Address: P.O. Box 277 Star, Idaho 83669

Department of Water Resources

Date Proof is Due: June 1, 1995 Telephone No. (208) 334-8469

Describe what work has been completed toward the development of this water right:
(This must be filled out! If no work has been completed, show "none".)

Well drilled, pump installed, some distribution pipelines laid.

Costing \$ 490,000

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

In present construction. Reservoir is anticipated to be completed by October, 1995 and
the distribution system by January, 1996.

Permit holder(s) request an extension to April, 19 96

FEE: \$50.00

[Signature]
(Signature)*

*If other than permit holder, Power of Attorney must be supplied.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be APPROVED and the time within which to submit proof of beneficial use is extended to June 1, 1996.

Signed this 7 day of June, 19 95

PLACE OF USE: See Remarks

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 1995.
2. Subject to all prior water rights.
3. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
6. Construction of the well must comply with Idaho well construction standards.
7. The issuance of this right in no way grants any right-of-way or easement across the land of another.
8. Place of use is lands within the city limits of Star.
9. Domestic use is for 246 homes.
10. The domestic use authorized under this permit shall not exceed 13,000 gallons per day per dwelling in accordance with Section 42-111, Idaho Code.
11. This permit authorizes irrigation of up to 1/2 acre within each platted subdivision lot upon which a domestic dwelling has been constructed.
12. Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this permit.

RE: Water Right No. 63-12100

Dear Water Right Holder:

In response to your exception to the water right license issued as a preliminary order on March 31, 1998, the Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit 63-12100. The April 23, 1998, license, which supersedes the March 31, 1998 license, is an amended preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See

section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have questions, please contact me at (208) 327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen". The signature is written in dark ink and is positioned above the printed name.

Shelley W. Keen

Re: Star Sewer and Water District
Well #1 Water Right (#63-12100)

Dear Mr. Keen:

As I said on the telephone this morning, Keller Associates is the engineer for the Star Sewer and Water District. I have reviewed the Water Right License issued for Well #1 (#63-12100). It appears that Condition #6 is worthy of review and modification by your office.

The city limits of Star do not correspond with the boundaries of the Star Sewer and Water District. This water right license was issued to the Star Sewer and Water District for use by its patrons. Therefore, the place of use is more correctly defined as the boundaries of the Star Sewer and Water District. Please modify Condition #6 of the Water Right License 63-12100 to read, "Place of use is lands within the boundaries of the Star Sewer and Water District".

If you have any questions, please call me.

Sincerely,

KELLER ASSOCIATES, INC.

RE: WATER RIGHT NO. 63-12100

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below.

Also, please note that in accordance with your permit, your water right license limits you to a diversion rate of 1.50 cfs. The field examiner reported that your diversion capacity is about 2.50 cfs. If you intend to divert more than 1.50 cfs, you must acquire another water right. Please contact our Western Regional office to apply.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

MICROFILMED

APR 16 1998

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

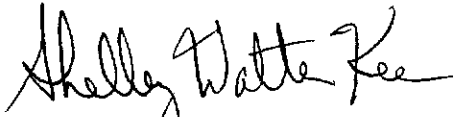

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please call me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

E. NARRATIVE/REMARKS/COMMENTS

1. Well No. 1, the well house, the 15" PVC pipeline, and the 500,000 Gal. Storage tank were developed to provide municipal service to the City of Star. This water system replaces numerous artesian wells throughout the service area that did not meet new water quality standards. Without an intensive field investigation, it is not possible to determine if these old wells are still in service for other purposes, abandoned, or still providing domestic water in the same service area (Plu). Also, the location and number of these wells, along with the WR #'s, is not known at this time. Transfers may be required for these old wells. Most of the old wells are low pressure (15 psi $\pm$) artesian.

2. This well is artesian at about 17 psi. No real draw down occurs during pumping. The normal system operating pressure is 75-85 psi. The artesian pressure on the well gage was 22 psi at the time of the exam, and the line pressure was 82 psi. The well will produce about 550 GPM at artesian pressure.

3. Based on the pump/motor data furnished, the 4-stage pump will produce 1150 GPM - 2.56 ~~at~~ ^{cfs} at start-up pressure of 75 psi. The permit is for 1.50 cfs, but proof was filed for 2.5 cfs.

Have conditions of permit approval been met? ☒ yes ☐ no

The pumps + motor was installed to meet future needs.

4. The 8" Flow Meter in the well House is made by Water Specialties Corp. MICROFILMED

5. The well pumps to the storage tank, and when the tank gravity feeds the city system. APR 16 1999

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 63-12100

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Enclosed is an order reinstating your permit since the proof was received after the proof due date of June 1, 1996. Please note that the priority date has been advanced to March 5, 1994.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination, contact the **WESTERN** Regional Office in Boise at (208) 334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

LAPSE NOTICE

RE: PERMIT NO. 63-12100

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated March 31, 1996. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifty dollar (\$50.00) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

L. GLEN SAXTON
Chief, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 63-12100

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1996.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

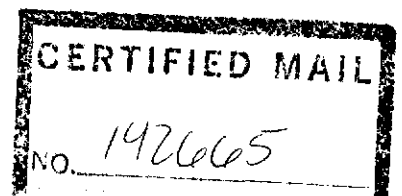

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Permit No. 63-12100

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to **June 1, 1996**. Please note that the department has granted this extension based on **due diligence**. It is important that you work diligently toward the completion of this project during the construction period allowed since the department will not be able to grant additional extensions based on due diligence.

If you have any questions or if I can be of any assistance, please feel free to contact me at (208)327-7900.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

STAR SEWER & WATER DISTRICT
PO BOX 277
STAR ID 836690277

PROOF DUE NOTICE

RE: PERMIT NO. 63-12100

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1995.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

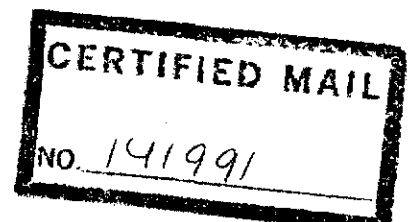

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Star Sewer and Water District

Dear Mr. Birdsall:

I am replying for Director R. Keith Higginson regarding your letter of May 18, 1994 in which a request was made for comments on the proposed community water system for the town of Star. The information that you provided has been reviewed and the following comments are offered.

The Star Sewer and Water District recently obtained an approved water right permit for a new well to be located within the SW 1/4 of NW 1/4 , Section 8, Township 4 North, Range 1 West on the north side of Star. The well can be used for up to 1.50 cubic feet per second for municipal use within the city limits of Star. The permit was issued as an exception to the Snake River Moratorium, which includes the Boise River drainage, and therefore allows limited use of the well with respect to irrigation uses (yards etc.).

Please see the enclosed copy of Permit No. 63-12100 for details of this water right. The permit provides a development period through mid-1995 (Proof Due Date). Use of ground water developed under the permit will be valid within the limits of the right; conditions of approval and remarks clarify the limits. Uses beyond the limits of Permit 63-12100 must be protected by some other water right(s) to comply with Idaho statutes. The town of Star does not have any other municipal water rights for use within the city limits or other types of rights to cover community use beyond the city limits.

Also note that the permit covers one well. The information that you provided discusses two wells, a primary production well and a secondary backup well. To drill a second well, right no. 63-12100 must be amended via an Application for Amendment of Permit or a second water right must be obtained by filing another Application for Permit.

RECEIVED
JUN 14 1995

Mr. Jim Birdsall

June 8, 1994

Page 2

Any well drilling activity associated with the project must be done under approved well drilling permits issued by this agency. The normal procedure in a situation like this is to first secure a water right and then obtain a well drilling permit for well construction. I believe that a drilling application for one community well for Star is currently being processed by this office.

Please contact this office (334-2190) if you need additional information or if other water right and/or well drilling actions are anticipated.

Sincerely,

Steve Lester
Water Rights Supervisor

↓

Dear Mr. Higginson:

The Star Water and Sewer District of Ada County is in the process of seeking the release of Federal funds for improvements to the community's domestic water supply and distribution systems. The project will cost the district approximately \$1,754,200, of which \$500,000 will come from the Idaho Community Development Block Grant Program, \$622,000 will be provided by the Farmer's Home Administration; leaving approximately \$ 632,200 to be furnished by district patrons in the form of tax exempt revenue bonds.

For your review I have included a draft environmental assessment and project maps. Please note that the draft assessment includes references to appendices and exhibits that do not accompany this mailing. These items may be provided upon request to help further your analysis of this project.

Please review the enclosed assessment and project maps, and comment upon any effects this project will have on your agency's area of jurisdiction. Specific items of interest include:

- Water Resources
- Water Rights

Even if the project will not affect your area of jurisdiction, a written commentary to that affect is required for the project files. Given the desire to begin construction activities, expedient comment will be greatly appreciated. If we do not hear from you by June 18, 1994, then we will assume you have no comments or concerns regarding this project.

JUN 14 1995

EXHIBIT I

1) Primary Beneficiaries

The major focus of this project will be to provide an adequate and safe supply of public water to the existing residents of the Star community. However the small central business area of Star will benefit as well. There is no existing or projected business growth identified at this time. A listing of those existing small businesses is as follows:

- Star Mercantile
- Star Cafe
- Blake Trailers
- Star Attractions Hair Styling
- Star Saloon
- Star Satellite and Electronics

In addition the existing senior citizens center, post office and the Star Fire Protection District office will benefit from these project improvements.

2) Area Descriptions

The community of Star is the only small rural community in Ada County, that is primarily supported by surrounding agriculture. Star is also the only unincorporated community area in Ada County and is located approximately 10 miles northwest of the City of Boise and adjacent to the Ada County/Canyon County line. The community of Star has now been organized through the development of a Sewer and Water District which will be the sponsor for improvements to the communities culinary water system.

The Star Sewer and Water District meets the sewer and water needs of those people living within the District boundaries. The District encompasses an area of approximately 0.50 square miles as shown on Figure 1 Appendix B. There are approximately 280 residences in the District, 246 of which have committed to support a new water system.

Figure 1 of Appendix B shows the Star Sewer and Water service area and surrounding area topography. The district will provide culinary water service to all residents living within the existing direct impact area as shown in Figure 2 of Appendix B, providing these residences have signed user agreements. It is anticipated that future growth will occur within and beyond the present district limits and will be served by the distribution system proposed for this service area.

As indicated in the cover sheet (USDA-FmHA Form 1940-2) under the Item 3 checklist there are eight areas of discussion required as follows:

- Item 2 Commercial - there does exist a small commercial area in the central part of the community. This project will only positively affect this sector due to improved water supply and fire protection.

JUN 14 1995

- Item 3 Residential - the primary focus of this project is to improve the public water supply to community residents. No adverse affect anticipated. In most cases existing public easements will be used for construction.
- Item 4 Agricultural - some agricultural lands lie adjacent to the community. Minimal effect is expected with only occasional line easements (to storage) required. Protection of these lands will be achieved through normal county planning and zoning procedures.
- Item 9 Transportation - Idaho State Highway 44 runs east to west through Star while Star Road (Ada County) bisects the community north to south. These are the only transportation systems in the community. Impact is projected to be minimal with only temporary detours due to construction expected. These actions will take place in accordance with State and County guidelines.
- Item 12 Schools - the community does include Star Elementary School which is operated by the Meridian Consolidated School District. The school will maintain its own existing water supply and will not be affected by this project.
- Item 15 Steep Slopes - there is no anticipated long term impact on steep slopes in the area. However, sighting of the new storage facility may cause temporary line construction on slopes. In such cases appropriate construction and reclamation techniques will be required of the contractor.
- Item 21 Wetlands - No permanent impact on wetlands is expected. However temporary disturbance may take place in one or two areas for water transmission line construction to the storage facility. These areas will be investigated during the environmental review period for wildlife or protected species. In addition appropriate reclamation activities during and following construction will be required of the contractor.

RECEIVED
JUN 14 1995

- Item 22 Floodplain - it appears that a small portion of distribution line serving existing residents along Star road and Main Street south from Highway 44 may lie within Zone B (500 year) as indicated on the FEMA floodplain map. No system related above ground structures are planned in this area.
- Item 25 Historical/Archeological - No known historical or archeological sites are located within the project area. Corroboration of this estimate will be provided through the Idaho SHPO.

3) Air Quality

The Star community is not located within a non-attainment area. Idaho air standards do not restrict this project at this location. Temporary construction dust would be the only impact of this project and would be addressed through sprinkling requirements for the contractor.

4) Water Quality

Surface Water: Surface water is available to the project area from either the Boise River or Middleton Canal. However, surface water supply for Star is not considered a viable or cost effective alternative for the following reasons:

- Surface water treatment costs would be prohibitively high for a small town such as Star. Capital costs would be on the order of at least five times what a similar sized well supply would cost.
- Federal and State surface water treatment requirements are becoming increasingly complex and costly under the Safe Drinking Water Act. Highly trained staff would add to the high cost of water treatment plant maintenance.
- Raw water is susceptible to high irrigation return flows as well as upstream wastewater discharges from the City of Boise resulting in potential poor raw water quality.
- The Star Water and Sewer District does not currently own surface water rights.

Groundwater: There are approximately 30 to 40 mostly small domestic wells drilled within a radius of two miles of Star. Most of these wells tap a shallow aquifer and are less than 200 feet deep. Many of these wells have iron and manganese concentrations which exceed maximum recommended contaminant levels. As a result, many residents have problems with staining of fixtures and clothes. There are also a number of wells in the area which tap into a deeper aquifer (300-450 feet deep). Those wells appear to have better water quality including softer water and no problems with iron and

JUN 14 1995

manganese. It is, therefore, recommended that groundwater be used from a depth of 350-450.

Disinfection: The State IDHW-DEQ currently does not require mandatory disinfection of a groundwater source unless it may be influenced by surface water, the water source or system may be susceptible to contamination, or the system consistently is contaminated by fecal coliform. The EPA under the Safe Drinking Water Act is in the process of providing more stringent regulations for groundwater sources. Many groundwater source systems in the next few years will be required to disinfect their water supplies. In the interest of public health and safety, it is recommended that Star provide disinfection of its water supply by chlorination such that a chlorine residual is maintained in the distribution system. Chlorine contact time can be provided by pumping of wells directly into the storage reservoir, by contact time in the well and/or pipeline prior to the first service, or by providing a small reservoir downstream of the injection point.

Water Supply: As indicated earlier, the preferred water supply alternate consists of constructing a new 350-450 feet deep, 680 gpm, 12-14 inch diameter well north of the community of Star. A backup water supply well will also be required per State of Idaho IDHW-DEQ requirements. The backup well is proposed to meet average daily flow requirements of 250 gpm. It is anticipated the backup well would be a 10-inch diameter well approximately 350-450 feet deep drilled on the north side of town also. ✓ ?

5) Solid Waste Management

Solid waste collection within the City of Star is provided by a private contractor and delivered to a county-owned and operated landfill. No significant impact or change is expected resulting from this project.

6) Transportation

As indicated in the Area Description the two primary public transportation facilities in the community consist of Hwy. 44 which crosses town east to west and the Star Road (ACHD) which bisects the town north to south. No new significant transportation patterns are expected as a result of construction of this project, nor will existing land uses be affected by the existing transportation system. It is not anticipated that capacities on any existing transportation facilities will be exceeded as a result of the proposed project.

7) Noise

No new noise sources will be created by construction of the water system. Existing sources of noise will continue to function as they have in the past. Some temporary construction noise from construction equipment and the well drilling rig is expected, but equipment will be muffled and construction activity will be limited to acceptable construction hours.

UNRECORDED

JUN 14 1995

8) Historic/Archeological Properties

No known historic properties listed on the National Register of Historic Places are apparent at this time. No negative impact is expected on existing properties of local or state significance. Further assessment of this subject will take place following notification and response from the Idaho SHPO offices. Any historic/archeological surveys discovered through this contact will be inserted as Exhibit III to this report.

9) Wildlife and Endangered Species

Animals within the project area boundaries include domestic livestock, small mammals, and song birds. No wildlife refuges are located near the project area, and no listed or proposed threatened or endangered candidate species are apparent at this time. Further assessment will be confirmed following contact with U.S. Fish and Wildlife Service.

10) Energy

The energy sources available in the City of Star are natural gas and electricity. Only small increments of increased demand will be generated from the proposed project, primarily from residential activity and additional power used to run the pumps and controls for the new wells. This slight added demand would not compromise line capacities or overall ability of the utilities to deliver their products.

11) Construction

The construction work will involve trenching and boring to lay water lines, well drilling, and storage tank construction. No soil erosion/siltation is anticipated in the project area. Potential construction-related water pollution will be controlled by standard construction specifications which outline specific measures to ensure that no pollutants or soils reach natural or man-made waterways. Dust control measures will be employed to help control particulates entering the air during construction. Properly muffled construction equipment and trucks should be used on the project to assure that noise is not unduly increased during line installation.

12) Toxic Substances

No toxic substances are anticipated to be produced as a result of this project. All disposal of motor oils, etc., will be at an approved disposal site. No site within the project area has been designed for toxic waste removal. Site contamination is unlikely. Local, state and federal regulations for handling any such materials will be complied with, and no violations have been noted in the project area.

JUN 14 1995

13) Public Reaction

In the course of applying to the Idaho Department of Commerce for Community Development Block Grant funds, a public hearing was held in accordance with IDOC's requirements. A copy of the minutes of the public hearing and citizen comments are included as Exhibit IV. No objections to this project are apparent.

14) Alternatives to the Proposed Project

Due to the health and safety concerns for the residents of Star as they relate to the proposed new water system, not constructing a new system is an unacceptable alternative. In terms of constructing a new system several alternatives were reviewed in arriving at the apparent best alternative. This discussion and recommendations is presented in Chapter 4 of the water study commissioned by the district, which is attached to this report as Appendix C.

15) Mitigation Measures

Some construction mitigation measures, such as dust control and muffling of equipment, will be employed to alleviate noise and air quality impacts. The result of this project will be more beneficial in the long term, resulting in improved water services. All construction plans and specifications will have the approval of the Idaho Department of Health and Welfare Division of Environmental Quality before implementation.

16) Permits

Approval of final design for this system by Idaho Department of Health and Department of Environmental Quality will be required. Approval of preliminary design from these agencies has been achieved. Some temporary construction crossing permits will be necessary from State and County Highway departments. Some right of way easements will also most likely be necessary.

17) Other Federal Actions

No other federal programs or actions related to or located in this project area are anticipated at this time.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12100

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

If a well has not already been constructed you are required to obtain a "drilling permit" from the department. The right to drill a well is not a part of this permit to appropriate water.

Sincerely,

A handwritten signature in dark ink, appearing to be 'Jim Johnson', written over a horizontal line.
