CONDITIONS OF APPROVAL AND REMARKS

1. This right is subject to all prior water rights.
2. Use of water under this right shall be non-consumptive.
3. Upon further finding and order of the director that gauging stations are required to maintain the approved minimum flows under this right, such measuring devices shall be permanently installed and maintained as specified by the director.
4. The Director retains jurisdiction, as described below, to review and amend any and all parameters of this right. The Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to the right. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or known interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the right should be amended in the public interest. The burden of proof at the hearing shall be upon the persons or parties seeking the amendment to establish that the amendment of the right would be in the public interest.

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 63-12034

CONDITIONS OF APPROVAL AND REMARKS

5. This minimum stream flow begins at a point in the SESENE, Section 3, Township 7N, Range 6E (Elk Creek, North Fork), and at a point in the NWSWNE, Section 14, Township 7N, Range 6E (Elk Creek, East Fork), merging into Elk Creek in the SWSENE, Section 16, Township 7N, Range 6E and ending at the municipal water supply diversion for Idaho City in the NWSENW, Section 26, Township 6N, Range 5E. The length of the minimum stream flow reach is approximately 15.4 miles; the 5.0 cfs dedicated as the minimum stream flow is measured at the ending point of the reach.
6. The purpose of this minimum stream flow is to preserve the water quality of the municipal water supply for Idaho City.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 23RD day of OCTOBER, 1997.

IN THE MATTER OF APPLICATIONS FOR)
PERMIT NOS. 63-12030 THROUGH 63-12034)
IN THE NAME OF THE IDAHO WATER)
RESOURCE BOARD TO ESTABLISH MINIMUM)
STREAM FLOWS IN THE UPPER BOISE)
RIVER DRAINAGE)

FINAL ORDER

On May 24, 1993, the Idaho Water Resource Board (Board) filed five (5) applications for permit with the Department of Water Resources (department) seeking to establish minimum stream flows on certain water sources in the Upper Boise River Drainage. The applications were filed pursuant to Chapter 15, Title 42, Idaho Code.

The department sent copies of the applications to the Idaho Departments of Fish and Game, Health and Welfare, and Parks and Recreation and to the Boise River watermaster for review and comment. Notice describing the proposed appropriations and setting the time and place for hearing was published in The Idaho Statesman newspaper on October 10, 1996 and on October 14, 1996.

On October 30, 1996, the department conducted a public hearing in Boise, Idaho for the purpose of eliciting testimony regarding the applications.

Parties appearing in a formal capacity at the hearing included the Idaho Water Resource Board, Idaho Department of Fish and Game and Idaho Rivers United. There were no public witnesses who wished to testify in the matter.

On November 5, 1996, the hearing officer for the Idaho Department of Water Resources (department) issued a Recommended Order in connection with the above captioned matter. None of the parties filed a petition for reconsideration, a brief or exceptions in connection with the Recommended Order. Based upon his understanding of the law and the facts in this matter, the Director makes the following Findings of Fact, Conclusions of Law and Final Order:

FINDINGS OF FACT:

1. Application for Permit No. 63-12030 seeks a minimum stream flow of 0.11 cubic feet per second (cfs) on an Unnamed Stream also known as East Fork Montezuma Creek tributary to Montezuma Creek in a 1.9 mile reach beginning in the

MICROFILMED
FEB 27 1997

SE1/4SE1/4NE1/4 Section 1, T5N, R11E, B.M. on the East Fork Montezuma Creek and ending at its confluence with Montezuma Creek in the SW1/4NE1/4SW1/4 Section 2, T5N, R11E, B.M. The purpose for the proposed minimum flow appropriation is to preserve the water quality of the municipal water supply for the city of Atlanta. The period of use for the proposed appropriation is year-round. (Note: The "1/4" designations will be omitted from subsequent legal descriptions in this order).

2. Application for Permit No. 63-12031 seeks a minimum stream flow on Crooked River tributary to North Fork Boise River in a 10.1 mile reach beginning at a point in the SWNWSW Section 11, T7N, R7E, B.M. and ending at its confluence with the North Fork Boise River in the NWSESW Section 17, T6N, R8E, B.M. The rate of flow sought is 34 cfs from July 1 to April 30 and 150 cfs from May 1 to June 30. The purpose is to preserve fish habitat of Crooked River.

3. Application for Permit No. 63-12032 seeks a minimum stream flow on the Yuba River tributary to Middle Fork Boise River in a 2.8 mile reach beginning at a point in the NENESE (lot 4) Section 16, T5N, R11E, B.M. and ending at its confluence with the Middle Fork Boise River in the SENWNW (lot 5) Section 4, T5N, R11E, B.M. The rate of flow sought is 44 cfs from July 1 to April 30 and 200 cfs from May 1 to June 30. The purpose is to preserve the fish habitat of the Yuba River.

4. Application for Permit No. 63-12033 seeks a minimum stream flow on the Middle Fork Boise River tributary to Boise River in a 16.3 mile reach beginning at a point in the NWNWNW (lot 1) Section 31, T6N, R11E, B.M. and ending at the confluence with the Boise River in the NWNWNW (lot 1) Section 7, T5N, R9E, B.M. The rate of flow sought is 230 cfs from July 1 to April 30 and 1000 cfs from May 1 to June 30. The purpose is to preserve fish habitat and recreational quality of the Middle Fork Boise River.

5. Application for Permit No. 63-12034 seeks a minimum stream flow on the North Fork Elk Creek tributary to Elk Creek, on the East Fork Elk Creek tributary to Elk Creek and on Elk Creek tributary to Mores Creek in a 15.4 mile reach beginning at a point on North Fork Elk Creek in the SESENE Section 3, T7N, R6E, B.M. and at a point on the East Fork Elk Creek in the NWSWNE Section 14, T7N, R6E, B.M. and ending at the municipal water supply diversion for Idaho City in the NWSENE Section 26, T6N, R5E, B.M. The rate of flow sought is 5 cfs year-round. The purpose is to preserve the water quality of the municipal water supply for Idaho City.

6. The applications were filed consistent with the recommendations in the Comprehensive State Water Plan, Upper Boise River Basin (IWRB, 1992). In 1993, the Idaho Legislature approved the Comprehensive State Water Plan.

7. Exhibits offered and accepted as a part of the record include the following:

a. Applicant's Exhibit 1 - Location map, water right information for Elk Creek and water measurement notes in connection with application No. 63-12034.

b. Applicant's Exhibit 2 - Location map and water right information for Unnamed Stream tributary to Montezuma Creek in connection with application No. 63-12030.

c. Applicant's Exhibit 3 - Location map, water right information for Crooked River and Snake River Basin Adjudication (SRBA) claims in connection with application No. 63-12031.

d. Applicant's Exhibit 4 - Location map, water right information for Yuba River and Snake River Basin Adjudication (SRBA) claims in connection with application No. 63-12032.

e. Applicant's Exhibit 5 - Location map, water right information for Middle Fork Boise River and Snake River Basin Adjudication (SRBA) claims in connection with application No. 63-12033.

f. Applicant's Exhibit 6 - Comprehensive State Water Plan, Upper Boise River Basin, 1992.

g. Idaho Department of Fish and Game (IDFG) Exhibit 1 - Fisheries Management Plan 1991 - 1995.

h. IDFG Exhibit 2 - Densities of trout observed by IDFG personnel using snorkeling techniques on the Middle Fork Boise River - from Allen, D.B., S.P. Yundt and B.J. Flatter, 1996.

i. IDFG Exhibit 3 - Middle Fork Boise River creel survey.

j. IDFG Exhibit 4 - Bar graphs showing fish species distribution on Crooked River.

k. IDFG Exhibit 5 - Bar graphs showing Crooked River measurements taken by IDFG.

l. IDFG Exhibit 6 - Bar graphs showing fish species distribution on Yuba River.

m. IDFG Exhibit 7 - Bar graphs showing Yuba River measurements taken by IDFG.

8. Flows in the sources for the five (5) applications have been measured or estimated as follows:

a. 63-12030 - Unnamed Stream tributary to Montezuma Creek

- In September 1979, department of water resource staff measured 0.11 cfs of flow in the Unnamed Stream while conducting a water right field examination for Permit No. 63-08647 in the name of the Atlanta Water Association.

The water rights of record pre-date the minimum stream flow application.

b. 63-12031 - Crooked River

Below Edna Creek - IDFG has measured the flows from a low of 24 cfs in August 1994 to a high of 250 cfs in June 1995.

Above confluence with North Fork Boise River - IDFG has measured the flows from a low of 30 cfs in July 1994 to a high of 67 cfs in July 1993.

IDFG measured the average flow in July 1993, 1994 and 1995 to be 80 cfs and the flow in August 1995 to be 46 cfs.

The one (1) surface water right of record is for domestic purposes and predates the minimum stream flow application.

c. 63-12032 - Yuba River - IDFG has measured the flows from a low of 29 cfs in September 1993 to a high of 315 cfs in July 1995. Flows measured in August 1995 average 45 cfs.

The four (4) water rights of record pre-date the minimum stream flow application.

d. 63-12033 - Middle Fork Boise River - A summary hydrograph of flows for the Middle Fk Boise River (Applicant's Exhibit 5) which was estimated from flows measured near Twin Springs shows the amount of water discharged.

The water rights of record pre-date the minimum stream flow application.

e. 63-12034 - North Fork Elk Creek, East Fork Elk Creek and Elk Creek - Department of water resource staff have measured a flow of 7.5 cfs in October 1996 about 1/4 mile upstream from the diversion of Idaho City near the lower end of the minimum stream flow reach. The flow of Elk Creek has also been measured in April 1988 to be 13.6 cfs and during the drought year of 1977 to be less than 5.0 cfs.

The water rights of record, including the larger ones for mining, pre-date the minimum stream flow application. Many of the mining rights have not been claimed in the Snake River Basin Adjudication and likely are no longer valid.

6/1/97 11:00

9. All rights acquired under application Nos. 63-12031, 63-12032 and 63-12033 are for instream non-consumptive use and will be subject to all vested water rights, permits or applications for permit having dates of priority earlier than May 24, 1993. Rights acquired under application Nos. 63-12030 and 63-12034 to preserve the water quality of the municipal water supplies for Idaho City and Atlanta also are subject to all prior water rights having dates of priority earlier than May 24, 1993 but are associated with the municipal uses of Idaho City and Atlanta which are partially consumptive.

10. There was no opposition to the approval of the five (5) minimum stream flow applications.

CONCLUSIONS OF LAW:

1. Chapter 15, Title 42, Idaho Code, provides that stream flow preservation for the protection of fish and wildlife habitat, aquatic life, recreation, aesthetic beauty, navigation and water quality, when made pursuant to this statute, is in the public interest and is declared to be a beneficial use of such water.

2. The proposed minimum stream flows will not interfere with any vested water right, permit, or application for permit having a priority date earlier than May 24, 1993.

3. The flows requested in the applications are the minimum flows required to preserve the existing unique characteristics of the streams for the public benefit, and are not the ideal or most desirable flows which could be utilized for those purposes.

4. The proposed minimum stream flows are in the public, as opposed to private, interest.

5. The minimum stream flows proposed by the applications are necessary to maintain existing trout rearing and spawning habitat, fish populations, aquatic life, recreational values, and to preserve water supplies for Idaho City and Atlanta.

6. The proposed minimum stream flows are the minimum flows required for the purposes cited in Conclusion of Law No. 5. above and are not the ideal or most desirable flows.

7. The requested flow for the Middle Fork Boise River during the period July 1 to April 30 each year is not reasonably sustainable unless it is reduced to approximately 200 cfs.

8. The proposed minimum stream flows as approved in this recommended order are generally capable of being maintained.

9. The department should approve the applications with certain conditions and limitations.

ORDER:

IT IS, THEREFORE, HEREBY ORDERED That Application for Permit Nos. 63-12030 through 63-12034 in the name of the Idaho Water Resource Board are **APPROVED** subject to the following conditions and limitations as follows:

1. The use of water under the permits is subject to all prior water rights.

2. The use of water under Permit Nos. 63-12031, 63-12032 and 63-12033 shall be non-consumptive.

3. The approved minimum flow for the Middle Fork Boise River during the period July 1 to April 30 each year shall not exceed 200 cfs.

4. Upon the future finding and order of the Director that gaging stations are required to maintain the approved minimum stream flows, such stations shall be permanently installed and maintained as specified by the department.

5. The Director retains jurisdiction, as described below, to review and amend any and all parameters of these rights. The Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to the right. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or known interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the right should be amended in the public interest. The burden of proof at the hearing shall be upon the persons or parties seeking the amendment to establish that the amendment of the right would be in the public interest.

6. The applications hereby approved by the Director shall be submitted to the Idaho Legislature by the fifth day of the next regular legislative session and the Director's approval shall not become finally effective until approved by the legislature pursuant to provisions of Section 42-1503, Idaho Code.

7. Proof of instream beneficial use of the minimum flows appropriated shall be submitted in a manner approved by the Department on or before December 1, 2001.

Dated this 26th day of November, 1996.

KARL J. DREHER
Director

STREAM FLOWS IN THE UPPER BOISE)
RIVER DRAINAGE)

RECOMMENDED ORDER

On May 24, 1993, the Idaho Water Resource Board (Board) filed five (5) applications for permit with the Department of Water Resources (department) seeking to establish minimum stream flows on certain water sources in the Upper Boise River Drainage. The applications were filed pursuant to Chapter 15, Title 42, Idaho Code.

The department sent copies of the applications to the Idaho Departments of Fish and Game, Health and Welfare, and Parks and Recreation and to the Boise River watermaster for review and comment. Notice describing the proposed appropriations and setting the time and place for hearing was published in The Idaho Statesman newspaper on October 10, 1996 and on October 14, 1996.

On October 30, 1996, the department conducted a public hearing in Boise, Idaho for the purpose of eliciting testimony regarding the applications.

Parties appearing in a formal capacity at the hearing included the Idaho Water Resource Board, Idaho Department of Fish and Game and Idaho Rivers United. There were no public witnesses who wished to testify in the matter.

Based upon the sworn testimony, documentation and public statements included in the record and upon his understanding of the facts and the law, the hearing officer for the Director recommends the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT:

1. Application for Permit No. 63-12030 seeks a minimum stream flow of 0.11 cubic feet per second (cfs) on an Unnamed Stream also known as East Fork Montezuma Creek tributary to Montezuma Creek in a 1.9 mile reach beginning in the SE1/4SE1/4NE1/4 Section 1, T5N, R11E, B.M. on the East Fork Montezuma Creek and ending at its confluence with Montezuma Creek in the SW1/4NE1/4SW1/4 Section 2, T5N, R11E, B.M. The purpose for the proposed minimum flow appropriation is to preserve the water

quality of the municipal water supply for the city of Atlanta. The period of use for the proposed appropriation is year-round. (Note: The "1/4" designations will be omitted from subsequent legal descriptions in this order).

2. Application for Permit No. 63-12031 seeks a minimum stream flow on Crooked River tributary to North Fork Boise River in a 10.1 mile reach beginning at a point in the SWNWSW Section 11, T7N, R7E, B.M. and ending at its confluence with the North Fork Boise River in the NWSESW Section 17, T6N, R8E, B.M. The rate of flow sought is 34 cfs from July 1 to April 30 and 150 cfs from May 1 to June 30. The purpose is to preserve fish habitat of Crooked River.

3. Application for Permit No. 63-12032 seeks a minimum stream flow on the Yuba River tributary to Middle Fork Boise River in a 2.8 mile reach beginning at a point in the NENESE (lot 4) Section 16, T5N, R11E, B.M. and ending at its confluence with the Middle Fork Boise River in the SENWNW (lot 5) Section 4, T5N, R11E, B.M. The rate of flow sought is 44 cfs from July 1 to April 30 and 200 cfs from May 1 to June 30. The purpose is to preserve the fish habitat of the Yuba River.

4. Application for Permit No. 63-12033 seeks a minimum stream flow on the Middle Fork Boise River tributary to Boise River in a 16.3 mile reach beginning at a point in the NWNWNW (lot 1) Section 31, T6N, R11E, B.M. and ending at the confluence with the Boise River in the NWNWNW (lot 1) Section 7, T5N, R9E, B.M. The rate of flow sought is 230 cfs from July 1 to April 30 and 1000 cfs from May 1 to June 30. The purpose is to preserve fish habitat and recreational quality of the Middle Fork Boise River.

5. Application for Permit No. 63-12034 seeks a minimum stream flow on the North Fork Elk Creek tributary to Elk Creek, on the East Fork Elk Creek tributary to Elk Creek and on Elk Creek tributary to Mores Creek in a 15.4 mile reach beginning at a point on North Fork Elk Creek in the SESENE Section 3, T7N, R6E, B.M. and at a point on the East Fork Elk Creek in the NWSWNE Section 14, T7N, R6E, B.M. and ending at the municipal water supply diversion for Idaho City in the NWSENE Section 26, T6N, R5E, B.M. The rate of flow sought is 5 cfs year-round. The purpose is to preserve the water quality of the municipal water supply for Idaho City.

6. The applications were filed consistent with the recommendations in the Comprehensive State Water Plan, Upper Boise River Basin (IWRB, 1992). In 1993, the Idaho Legislature approved the Comprehensive State Water Plan.

7. Exhibits offered and accepted as a part of the record include the following:

a. Applicant's Exhibit 1 - Location map, water right information for Elk Creek and water measurement notes in connection with application No. 63-12034.

- b. Applicant's Exhibit 2 - Location map and water right information for Unnamed Stream tributary to Montezuma Creek in connection with application No. 63-12030.
 - c. Applicant's Exhibit 3 - Location map, water right information for Crooked River and Snake River Basin Adjudication (SRBA) claims in connection with application No. 63-12031.
 - d. Applicant's Exhibit 4 - Location map, water right information for Yuba River and Snake River Basin Adjudication (SRBA) claims in connection with application No. 63-12032.
 - e. Applicant's Exhibit 5 - Location map, water right information for Middle Fork Boise River and Snake River Basin Adjudication (SRBA) claims in connection with application No. 63-12033.
 - f. Applicant's Exhibit 6 - Comprehensive State Water Plan, Upper Boise River Basin, 1992.
 - g. Idaho Department of Fish and Game (IDFG) Exhibit 1 - Fisheries Management Plan 1991 - 1995.
 - h. IDFG Exhibit 2 - Densities of trout observed by IDFG personnel using snorkeling techniques on the Middle Fork Boise River - from Allen, D.B., S.P. Yundt and B.J. Flatter, 1996.
 - i. IDFG Exhibit 3 - Middle Fork Boise River creel survey.
 - j. IDFG Exhibit 4 - Bar graphs showing fish species distribution on Crooked River.
 - k. IDFG Exhibit 5 - Bar graphs showing Crooked River measurements taken by IDFG.
 - l. IDFG Exhibit 6 - Bar graphs showing fish species distribution on Yuba River.
 - m. IDFG Exhibit 7 - Bar graphs showing Yuba River measurements taken by IDFG.
8. Flows in the sources for the five (5) applications have been measured or estimated as follows:
- a. 63-12030 - Unnamed Stream tributary to Montezuma Creek - In September 1979, department of water resource staff measured 0.11 cfs of flow in the Unnamed Stream while conducting a water right field examination for Permit No. 63-08647 in the name of the Atlanta Water Association.

The water rights of record pre-date the minimum stream flow application.

b. 63-12031 - Crooked River

Below Edna Creek - IDFG has measured the flows from a low of 24 cfs in August 1994 to a high of 250 cfs in June 1995.

Above confluence with North Fork Boise River - IDFG has measured the flows from a low of 30 cfs in July 1994 to a high of 67 cfs in July 1993.

IDFG measured the average flow in July 1993, 1994 and 1995 to be 80 cfs and the flow in August 1995 to be 46 cfs.

The one (1) surface water right of record is for domestic purposes and predates the minimum stream flow application.

c. 63-12032 - Yuba River - IDFG has measured the flows from a low of 29 cfs in September 1993 to a high of 315 cfs in July 1995. Flows measured in August 1995 average 45 cfs.

The four (4) water rights of record pre-date the minimum stream flow application.

d. 63-12033 - Middle Fork Boise River - A summary hydrograph of flows for the Middle Fk Boise River (Applicant's Exhibit 5) which was estimated from flows measured near Twin Springs shows the amount of water discharged.

The water rights of record pre-date the minimum stream flow application.

e. 63-12034 - North Fork Elk Creek, East Fork Elk Creek and Elk Creek - Department of water resource staff have measured a flow of 7.5 cfs in October 1996 about 1/4 mile upstream from the diversion of Idaho City near the lower end of the minimum stream flow reach. The flow of Elk Creek has also been measured in April 1988 to be 13.6 cfs and during the drought year of 1977 to be less than 5.0 cfs.

The water rights of record, including the larger ones for mining, pre-date the minimum stream flow application. Many of the mining rights have not been claimed in the Snake River Basin Adjudication and likely are no longer valid.

9. All rights acquired under application Nos. 63-12031, 63-12032 and 63-12033 are for instream non-consumptive use and will be subject to all vested water rights, permits or applications for permit having dates of priority earlier than May 24, 1993. Rights acquired under application Nos. 63-12030 and 63-12034 to preserve the water quality of the municipal water supplies for Idaho City and Atlanta also are subject to all prior water rights having dates of priority earlier than May 24, 1993 but are associated with the municipal uses of Idaho City and Atlanta which are partially

consumptive.

10. There was no opposition to the approval of the five (5) minimum stream flow applications.

CONCLUSIONS OF LAW:

1. Chapter 15, Title 42, Idaho Code, provides that stream flow preservation for the protection of fish and wildlife habitat, aquatic life, recreation, aesthetic beauty, navigation and water quality, when made pursuant to this statute, is in the public interest and is declared to be a beneficial use of such water.

2. The proposed minimum stream flows will not interfere with any vested water right, permit, or application for permit having a priority date earlier than May 24, 1993.

3. The flows requested in the applications are the minimum flows required to preserve the existing unique characteristics of the streams for the public benefit, and are not the ideal or most desirable flows which could be utilized for those purposes.

4. The proposed minimum stream flows are in the public, as opposed to private, interest.

5. The minimum stream flows proposed by the applications are necessary to maintain existing trout rearing and spawning habitat, fish populations, aquatic life, recreational values, and to preserve water supplies for Idaho City and Atlanta.

6. The proposed minimum stream flows are the minimum flows required for the purposes cited in Conclusion of Law No. 4. above and are not the ideal or most desirable flows.

7. The requested flow for the Middle Fork Boise River during the period July 1 to April 30 each year is not reasonably sustainable unless it is reduced to approximately 200 cfs.

8. The proposed minimum stream flows as approved in this recommended order are generally capable of being maintained.

8. The department should approve the applications with certain conditions and limitations.

ORDER:

IT IS, THEREFORE, HEREBY ORDERED That Application for Permit Nos. 63-12030 through 63-12034 in the name of the Idaho Water Resource Board are APPROVED subject to the following conditions and limitations as follows:

1. The use of water under the permits is subject to all prior water rights.

2. The use of water under Permit Nos. 63-12031, 63-12032 and 63-12033 shall be non-consumptive.

3. The approved minimum flow for the Middle Fork Boise River during the period July 1 to April 30 each year shall not exceed 200 cfs.

4. Upon the future finding and order of the Director that gaging stations are required to maintain the approved minimum stream flows, such stations shall be permanently installed and maintained as specified by the department.

5. The Director retains jurisdiction, as described below, to review and amend any and all parameters of these rights. The Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to the right. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or known interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the right should be amended in the public interest. The burden of proof at the hearing shall be upon the persons or parties seeking the amendment to establish that the amendment of the right would be in the public interest.

6. The applications hereby approved by the Director shall be submitted to the Idaho Legislature by the fifth day of the next regular legislative session and the Director's approval shall not become finally effective until approved by the legislature pursuant to provisions of Section 42-1503, Idaho Code.

7. Proof of instream beneficial use of the minimum flows appropriated shall be submitted in a manner approved by the Department on or before the date in the final order.

Dated this 5th day of November, 1996.

L. GLEN SAXTON
Hearing Officer

LEGAL NOTICE NOTICE OF HEARING FOR MINIMUM STREAM FLOW

Notice is hereby given that on May 24, 1993, the Idaho Water Resource Board (Board) filed five (5) applications for permit with the Department of Water Resources (IDWR) to preserve minimum streamflows from water sources in the Upper Boise River drainage as follows:

Application No. 63-12030
Source: Unnamed Stream tributary to Montezuma Creek
Reach: 1.9 miles beginning at a point in SESENE Sec. 1, T5N, R11E, B.M. on the East Fork Montezuma Creek and ending at the confluence with Montezuma Creek in SWNESEV Sec. 2, T5N, R11E, B.M.
Rate of flow: 0.11 cubic feet per second (cfs)
Season of use: Year-round
Purpose: To preserve the water quality of the municipal water supply for the city of Atlanta.

Application No. 63-12031
Source: Crooked River tributary to North Fork Boise River
Reach: 10.1 miles beginning at a point in the SWNWSW Section 11, T7N, R7E, B.M. downstream to the confluence with the North Fork Boise River in the NWSESW Section 17, T6N, R8E, B.M.
Rate of flow: 34 cfs from July 1 to April 30
150 cfs from May 1 to June 30
Purpose: To preserve fish habitat of Crooked River

Application No. 63-12032
Source: Yuba River tributary to Middle Fork Boise River
Reach: 2.8 miles beginning at a point in the NENESE (lot 4) Section 16, T5N, R11E, B.M. downstream to the confluence with the Middle Fork Boise River in the SESENE (lot 5) Section 4, T5N, R11E, B.M.
Rate of flow: 44 cfs from July 1 to April 30
200 cfs from May 1 to June 30
Purpose: To preserve fish habitat of the Yuba River

Application No. 63-12033
Source: Middle Fork Boise River tributary to Boise River
Reach: 16.3 miles beginning at a point in the NWNNWN (lot 1) Section 31, T6N, R11E, B.M. downstream to the confluence with the Boise River in the NWNNWN (lot 1) Section 7, T5N, R9E, B.M.
Rate of flow: 230 cfs from July 1 to April 30
1000 cfs from May 1 to June 30
Purpose: To preserve fish habitat and recreational quality of the Middle Fork Boise River

Application No. 63-12034
Source: North Fork Elk Creek tributary to Elk Creek
Reach: East Fork Elk Creek tributary to Elk Creek
Elk Creek tributary to Moeres Creek
15.4 miles beginning at a point on North Fork Elk Creek in the SESENE Section 3, T7N, R6E, B.M. and at a point on the East Fork Elk Creek in the NWSENE Section 14, T7N, R6E, B.M. downstream to the municipal water supply diversion for Idaho City in the NWSENE Section 26, T6N, R5E, B.M.
Rate of flow: 5 cfs year-round
Purpose: To preserve the municipal water supply for Idaho City

The five (5) applications are consistent with the recommendations for the establishment of minimum stream flows in the Upper Boise River Comprehensive State Water Plan adopted by the Board on December 3, 1992 and approved by the Idaho Legislature in 1993. IDWR will hold a public hearing on the applications beginning at 9:00 a.m. on October 30, 1996 at the IDWR Conference Room, 1301 N. Orchard St., Boise, Idaho for the purpose of hearing testimony and receiving evidence in regard to the applications. The hearing will be held pursuant to provisions of Section 42-1503, Idaho Code, and the presiding officer will be L. Glen Saxton.
Any party who wishes to formally appear in the proceeding for the purpose of presenting evidence and testimony or cross-examining witnesses should file a notice of appearance with the Director of IDWR, Statehouse Mail, Boise, Idaho 83720, Attn: L. Glen Saxton, five (5) days prior to the hearing. Other parties may informally present their views and comments without filing a notice of appearance. Informal written views and comments may also be submitted to IDWR prior to the hearing.
The hearing will be conducted in a facility which meets the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the hearing, please advise IDWR at least (10) days prior to the hearing. The hearing will be conducted by L. Glen Saxton, IDWR, Statehouse Mail, Boise, ID 83720, telephone (208) 327-7900.
If issued, these permits will be subject to all prior water rights.
Karl J. Dreher, Director, IDWR

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
- e. Other:

ATTACHMENT TO APPLICATION FOR PERMIT
TO APPROPRIATE A MINIMUM STREAM FLOW

14. Provide evidence that the appropriation will not interfere with any vested water right, permit, or water right application of earlier date of priority.

This application will be junior to all previously granted rights and will not interfere with them.

15. Provide evidence to show that the appropriation would be in the public interest as opposed to private interest.

Elk Creek and its tributaries, North Fork Elk Creek and East Fork Elk Creek, provide the year-round water supply for Idaho City.

16. Provide evidence or justification that the appropriation is necessary for the purposes shown in Item 4.

The appropriation of 5 cfs is needed to meet the current and future municipal supply needs of Idaho City.

17. Provide evidence that the minimum flow or lake level is minimum and not the ideal or most desirable flow or lake level.

The requested flow is the minimum necessary to fulfill the existing municipal water rights (Numbers A63-04073 and A63-15422) and to meet the future supply needs of Idaho City.

18. Provide evidence that the flow or lake level requested is capable of being maintained as evidenced by records of stream flows and water levels.

Existing discharge records indicate that the requested flow of 5 cfs is equaled or exceeded 100% (12 months) of the year.

19. Describe the location of existing gaging stations that can be used in the administration of this appropriation.

None

20. Do you intend to install additional gaging stations? Describe the location.

No

21. List any additional remarks related to this minimum stream flow application.

This application complies with Actions and Recommendations, Item 2.E. of the Comprehensive State Water Plan, Upper Boise River Basin (IWRB, 1992).

Attachment #1, supplement to item 3:

- (b) East Fork Elk Creek which is a tributary of Elk Creek;
Location of diversion: NW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 14, T07N, R06E,
B.M., Boise County;
downstream to the confluence with the North Fork Elk Creek
located in SW $\frac{1}{4}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 16, T07N, R06E, B.M., Boise
County.
- (c) Elk Creek which is a tributary of Mores Creek;
Location of diversion: SW $\frac{1}{4}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 16, T07N, R06E,
B.M., Boise County;
downstream to municipal water supply diversion at Idaho City
located in NW $\frac{1}{4}$ SE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 26, T06N, R05E, B.M., Boise
County.

RE: WATER RIGHT NO. 63-12034

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

UNRECORDED

OCT 30 1997

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen". The signature is written in dark ink and is positioned above the typed name.

RE: STATUS OF MINIMUM STREAM FLOW APPLICATIONS SUBMITTED TO
THE 54TH IDAHO LEGISLATURE - 1ST REGULAR SESSION - 1997

Date: April 7, 1997

The department submitted the above approved applications to the Idaho legislature in January 1997 for its consideration as required in Section 42-1503, Idaho Code. The legislature printed a concurrent resolution for each approved application but did not take any action on the draft resolutions during the session.

Hence, the applications are approved as provided in Section 42-1503, Idaho Code, since the legislature failed to act prior to the end of the regular session.

MEMORANDUM

DRAFT

**A CONCURRENT RESOLUTION
APPROVING APPLICATION TO APPROPRIATE WATER
FOR MINIMUM STREAMFLOW**

Be It Resolved by the Legislature of the State of Idaho:

WHEREAS, the Idaho Water Resource Board may apply for a permit to appropriate unappropriated waters of any stream to establish a minimum streamflow; and

WHEREAS, under the provisions of Section 42-1503, Idaho Code, an approved application shall not become finally effective until affirmatively acted upon by the legislature, except that if the Legislature fails to act prior to the end of the regular session to which the application was submitted, the application shall be considered approved; and

WHEREAS, on November 26, 1996, the Director of the Department of Water Resources approved the following application by issuing a Final Order authorizing the appropriation of water for minimum stream flow:

Ident. No: 63-12034

Source: North Fork Elk Creek tributary to Elk Creek,
the East Fork Elk Creek tributary to Elk Creek
and Elk Creek tributary to Mores Creek.

Reach descr: A 15.4 mile reach beginning at a point on
North Fork Elk Creek in the SE1/4SE1/4NE1/4
Section 3, T7N, R6E, B.M. and at a point on
the East Fork Elk Creek in the NW1/4SW1/4NE1/4
Section 14, T7N, R6E, B.M. and ending at the
municipal water supply diversion for Idaho
City in the NW1/4SE1/4NW1/4 Section 26, T6N,
R5E, B.M.

Amount: 5 cfs year-round.

Use: To preserve the quality of the municipal
water supply for the city of Idaho City.

NOW, THEREFORE, BE IT RESOLVED by the members of the First Regular Session of the Fifty-fourth Idaho Legislature, the Senate and the House of Representatives concurring therein, that the same is hereby approved subject to the conditions and limitations contained in the Final Order issued by the Director of the Department of Water Resources on November 26, 1996.

**RE: APPLICATION FOR PERMIT NOS. 63-12030 THROUGH 63-12034 TO
ESTABLISH MINIMUM STREAM FLOWS IN THE UPPER BOISE RIVER
DRAINAGE**

Dear Mr. Simpson:

Enclosed for your consideration are copies of the above referenced applications for permit along with the final order which concludes the administrative processing of the applications. As you are aware, Section 42-1503, Idaho Code, requires that the applications be reviewed by the legislature. As defined by statute, each application "(i) shall not become finally effective until affirmatively acted upon by concurrent resolution of the Idaho Legislature; or (ii) except that if the legislature fails to act prior to the end of the regular session to which the application was submitted, the application shall be considered approved."

The five (5) applications were submitted to the department of water resources consistent with the recommendations for the establishment of minimum stream flows in the Upper Boise River Comprehensive State Water Plan adopted by the Idaho Water Resource Board in December 1992 and approved by the Idaho Legislature in 1993.

This letter with its enclosures constitutes submittal of the applications to the legislature for approval. Please advise if you would like further information or presentation on the nature of the applications.

Sincerely,

KARL J. DREHER
Director

RE: In the Matter of Applications for Permit Nos. 63-12030 through 63-12034 in the name of the Idaho Water Resource Board to establish minimum stream flows in the Upper Boise River Drainage

Dear Interested Party:

The accompanying order is a "final order" issued by the department pursuant to section 67-5246 or 67-5247, Idaho Code.

Section 67-5246 provides as follows:

(1) If the presiding officer is the agency head, the presiding officer shall issue a final order.

(2) If the presiding officer issued a recommended order, the agency head shall issue a final order following review of that recommended order.

(3) If the presiding officer issued a preliminary order, that order becomes a final order unless it is reviewed as required in section 67-5245, Idaho Code. If the preliminary order is reviewed, the agency head shall issue a final order.

(4) Unless otherwise provided by statute or rule, any party may file a petition for reconsideration of any order issued by the agency head within fourteen (14) days of the issuance of that order. The agency head shall issue a written order disposing of the petition. The petition is deemed denied if the agency head does not dispose of it within twenty-one (21) days after the filing of the petition.

(5) Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

(6) A party may not be required to comply with a final order unless the party has been served with or has actual knowledge of the order. If the order is mailed to the last known address of a party, the service is deemed to be sufficient.

(7) A non-party shall not be required to comply with a final order unless the agency has made the order available for public inspection or the nonparty has actual knowledge of the order.

(8) The provisions of this section do not preclude an agency from taking immediate action to protect the public interest in accordance with the provisions of section 67-5247, Idaho Code.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a final order within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5246(4) Idaho Code.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, any party aggrieved by a final order or orders previously issued in a matter before the department may appeal the final order and all previously issued orders in the matter to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days a) of

the service date of the final order, b) of an order denying petition for reconsideration, or c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration, whichever is later. See section 67-5273, Idaho Code. The filing of an appeal to district court does not in itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

A handwritten signature in cursive script that reads "L. Glen Saxton".

KARL J. DREHER
DIRECTOR

RE: In the matter of Applications for Permit Nos. 63-12030 through 63-12034 in the name of the Idaho Water Resource Board to Establish Minimum Stream Flows in the Upper Boise River Drainage

Dear Interested Party:

The accompanying order is a "recommended order" issued by the department pursuant to Section 67-5243, Idaho Code. The provisions of this order will not become effective until the Director issues a final order in this matter.

Each party to these proceedings who appeared at the hearing may file a petition for reconsideration, briefs and exceptions to the recommended order and may request oral argument before the Director of the department as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a recommended order with the hearing officer issuing the order within fourteen (14) days of the service date of the order. The hearing officer will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of this recommended order, (b) the service date of a denial of a petition for reconsideration from this recommended order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this recommended order, any party may in writing support or take exceptions to any part of a recommended order and may file briefs in support of the party's position on any issue in the proceeding. Written briefs in support of or taking exceptions to the recommended order shall be filed with the Director. Opposing parties shall have twenty-one (21) days to

respond.

ORAL ARGUMENT

The Director may schedule oral argument in the matter before issuing a final order. Oral argument on exceptions to a recommended order shall be heard at the discretion of the Director. If oral arguments are to be heard, the Director will, within a reasonable time, notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the recommended order shall be served on all other parties to these proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The agency may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

APPEAL OF FINAL ORDER TO DISTRICT COURT

A party aggrieved by a final order of the Director is entitled to judicial review in compliance with sections 67-5271 through 67-5279, Idaho Code.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

News Release

IDAHO DEPARTMENT OF WATER RESOURCES

1301 N. Orchard St., Boise ID 83706 — Phone: (208) 327-7900 FAX: (208) 327-7866

Release 96-65

PUBLIC HEARING SET FOR OCT. 30
ON FIVE MINIMUM STREAM FLOW REQUESTS FOR BOISE BASIN STREAMS

For Immediate Release

Boise, Idaho - October 24, 1996

For Media Information:

Dick Larsen - 327-7933

State water managers have set a public hearing for October 30th on applications for water rights that would provide minimum stream flows on five Upper Boise Basin drainage streams, the Idaho Department of Water Resources said today.

The minimum stream flow requests were filed by the Idaho Water Resource Board to preserve minimum stream flows on the Crooked River, Yuba River, Middle Fork Boise River, North Fork Elk Creek and an unnamed stream tributary to Montezuma Creek.

The Elk Creek and Montezuma Creek tributary requests are designed to preserve both the supply and water quality of the municipal water supply for the town of Atlanta. The other three requests are intended to preserve fish habitat and recreational quality on the streams, according to the state water officials.

If issued, the minimum stream flow water permits will be subject to all prior water rights. They must also be approved by the legislature. The public hearing is set for 9:00 a.m. at the Idaho Department of Water Resources, 1301 N. Orchard Street, Boise, Idaho

The five applications are consistent with the recommendations for the establishment of minimum stream flows in the Upper Boise River Comprehensive State Water Plan adopted by the Idaho Water Resource Board in December 1992 and approved by the Idaho Legislature in 1993.

Minimum Stream Flow Applications - Page 2

Application No. 63-12030

Source: Unnamed Stream tributary to Montezuma Creek
Reach: 1.9 miles beginning at a point in SESENE Sec. 1, T5N, R11E, B.M. on the East Fork Montezuma Creek and ending at the confluence with Montezuma Creek in SWNESW Sec. 2, T5N, R11E, B.M.
Rate of flow: 0.11 cubic feet per second (cfs)
Season of use: Year-round
Purpose: To preserve the water quality of the municipal water supply for the city of Atlanta.

Application No. 63-12031

Source: Crooked River tributary to North Fork Boise River
Reach: 10.1 miles beginning at a point in the SWNWSW Section 11, T7N, R7E, B.M. downstream to the confluence with the North Fork Boise River in the NWSESW Section 17, T6N, R8E, B.M.
Rate of flow: 34 cfs from July 1 to April 30, 150 cfs from May 1 to June 30
Purpose: To preserve fish habitat of Crooked River

Application No. 63-12032

Source: Yuba River tributary to Middle Fork Boise River
Reach: 2.8 miles beginning at a point in the NENESE (lot 4) Section 16, T5N, R11E, B.M. downstream to the confluence with the Middle Fork Boise River in the SENWNW (lot 5) Section 4, T5N, R11E, B.M.
Rate of flow: 44 cfs from July 1 to April 30, 200 cfs from May 1 to June 30
Purpose: To preserve fish habitat of the Yuba River

Application No. 63-12033

Source: Middle Fork Boise River tributary to Boise River
Reach: 16.3 miles beginning at a point in the NWNWNW (lot 1) Section 31, T6N, R11E, B.M. downstream to the confluence with the Boise River in the NWNWNW (lot 1) Section 7, T5N, R9E, B.M.
Rate of flow: 230 cfs from July 1 to April 30, 1,000 cfs from May 1 to June 30
Purpose: To preserve fish habitat and recreational quality of the Middle Fork Boise River

Application No. 63-12034

Source: North Fork Elk Creek tributary to Elk Creek East Fork Elk Creek tributary to Elk Creek Elk Creek tributary to Mores Creek
Reach: 15.4 miles beginning at a point on North Fork Elk Creek in the SESENE Section 3, T7N, R6E, B.M. and at a point on the East Fork Elk Creek in the NWSWNE Section 14, T7N, R6E, B.M. downstream to the municipal water supply diversion for Idaho City in the NWSENE Section 26, T6N, R5E, B.M.
Rate of flow: 5 cfs year-round
Purpose: To preserve the municipal water supply for Idaho City

NOTICE OF HEARING FOR MINIMUM STREAM FLOW

APPLICATIONS

Notice is hereby given that on May 24, 1993, the Idaho Water Resource Board (Board) filed five (5) applications for permit with the Department of Water Resources (IDWR) to preserve minimum streamflows from water sources in the Upper Boise River drainage as follows:

Application No. 63-12030

Source: Unnamed Stream tributary to Montezuma Creek
Reach: 1.9 miles beginning at a point in SESENE Sec. 1, T5N, R11E, B.M. on the East Fork Montezuma Creek and ending at the confluence with Montezuma Creek in SWNESW Sec. 2, T5N, R11E, B.M.
Rate of flow: 0.11 cubic feet per second (cfs)
Season of use: Year-round
Purpose: To preserve the water quality of the municipal water supply for the city of Atlanta.

Application No. 63-12031

Source: Crooked River tributary to North Fork Boise River
Reach: 10.1 miles beginning at a point in the SWNWSW Section 11, T7N, R7E, B.M. downstream to the confluence with the North Fork Boise River in the NWSESW Section 17, T6N, R8E, B.M.
Rate of flow: 34 cfs from July 1 to April 30
150 cfs from May 1 to June 30
Purpose: To preserve fish habitat of Crooked River

Application No. 63-12032

Source: Yuba River tributary to Middle Fork Boise River
Reach: 2.8 miles beginning at a point in the NENESE (lot 4) Section 16, T5N, R11E, B.M. downstream to the confluence with the Middle Fork Boise River in the SENWNW (lot 5) Section 4, T5N, R11E, B.M.
Rate of flow: 44 cfs from July 1 to April 30
200 cfs from May 1 to June 30
Purpose: To preserve fish habitat of the Yuba River

Application No. 63-12033

Source: Middle Fork Boise River tributary to Boise River
Reach: 16.3 miles beginning at a point in the NWNWNW (lot 1) Section 31, T6N, R11E, B.M. downstream to the confluence with the Boise River in the NWNWNW (lot 1) Section 7, T5N, R9E, B.M.
Rate of flow: 230 cfs from July 1 to April 30
1000 cfs from May 1 to June 30
Purpose: To preserve fish habitat and recreational quality of

the Middle Fork Boise River

Application No. 63-12034

Source: North Fork Elk Creek tributary to Elk Creek
East Fork Elk Creek tributary to Elk Creek
Elk Creek tributary to Mores Creek

Reach: 15.4 miles beginning at a point on North Fork Elk
Creek in the SESENE Section 3, T7N, R6E, B.M. and
at a point on the East Fork Elk Creek in the NWSWNE
Section 14, T7N, R6E, B.M. downstream to the
municipal water supply diversion for Idaho City in
the NWSENW Section 26, T6N, R5E, B.M.

Rate of flow: 5 cfs year-round

Purpose: To preserve the municipal water supply for Idaho
City

The five (5) applications are consistent with the recommendations for the establishment of minimum stream flows in the Upper Boise River Comprehensive State Water Plan adopted by the Board on December 3, 1992 and approved by the Idaho Legislature in 1993.

IDWR will hold a public hearing on the applications beginning at 9:00 a.m. on October 30, 1996 at the IDWR Conference Room, 1301 N. Orchard St, Boise, Idaho for the purpose of hearing testimony and receiving evidence in regard to the applications. The hearing will be held pursuant to provisions of Section 42-1503, Idaho Code, and the presiding officer will be L. Glen Saxton.

Any party who wishes to formally appear in the proceeding for the purpose of presenting evidence and testimony or cross-examining witnesses should file a notice of appearance with the Director of IDWR, Statehouse Mail, Boise, Idaho 83720, Attn: L. Glen Saxton, five (5) days prior to the hearing. Other parties may informally present their views and comments without filing a notice of appearance. Informal written views and comments may also be submitted to IDWR prior to the hearing.

The hearing will be conducted in a facility which meets the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the hearing, please advise IDWR at least (10) days prior to the hearing. The hearing will be conducted by L. Glen Saxton, IDWR, Statehouse Mail, Boise, ID 83720, telephone (208)327-7900

If issued, these permits will be subject to all prior water rights.

Karl J. Dreher
Director, IDWR

Dear John and/or Hearing Officer:

Idaho Rivers United requests formal intervenor status to maintain its right to appeal decisions regarding the disposition of minimum streamflow water right applications in the Upper Boise River Basin. Specifically, we want to intervene as a party to the scheduled hearing on October 30, 1996 for water right numbers 63-12030 through 63-12034. These applications cover portions of the E. Fork of Montezuma Creek, Crooked River, Yuba River, Middle Fork Boise River, and N. Fork of Elk Creek.

Please notify me in writing as to our intervenor status. Thank you.

MEMORANDUM

TO: JIM JOHNSON

FROM: STEVE LESTER 

DATE: APRIL 3, 1996

RE: PROCESSING APPLICATIONS 63-12030 THROUGH 63-12034

I am forwarding these five IWRB applications for minimum streamflows in the Boise River Basin upstream from Lucky Peak Reservoir. The files have been held at Western -- they became caught up in the moratorium and then the processing delay syndrome. However, it appears that neither the moratorium nor the delay scenario would apply to these non-consumptive proposals.

Here is a brief file summary:

IDWR 6-30-93 comment letters to ID Health & Welfare, ID Fish & Game, ID Parks & Rec., and Watermaster #63.

No responses yet from IDHW or Watermaster.

Protest letter 7-27-93 from IDFG for 63-12031 through 63-12033. This was prior to protest fee requirement.

Supporting letter 7-20-93 from IDPR for all five applications.

ID Rivers United letter 9-19-93 stating too late to protest but has concerns, requests to remain informed/involved about status.

It does not appear that any legal notices have been published yet. ID Rivers or other parties can protest up to the protest deadline that is not yet defined.

From the file checklist (see 63-12030), all of the Region tasks are done and the processing can resume at S.O. level. Please let me know if I can provide additional help.

Re: Applications for Permit No. 63-12030, 63-12031, 63-12032, 36-
63-12033 and 63-12034 in the name of the Idaho Water Resource
Board

Dear Mr. Tuthill:

I have reviewed the instream flow applications for the East Fork of Montezuma Creek, the different forks of Elk Creek, Yuba River, Crooked River, and the Middle Fork of the Boise River.

We support these instream flows water rights sought in conjunction with comprehensive basin planning on the North Fork, Middle Fork and Main Boise River.

We would like to thank the Water Board for following through with the recommendations of staff and advisory group members in filing for these water rights.

Sincerely,

Mary Jean Lucachick
Resource Specialist

Dear Sir:

Enclosed is a copy(s) of the above-referenced application(s) for permit which may be of interest to your agency. Please review the application(s) and submit any comments you may have.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter, however, if your agency desires to file a formal protest against the approval of this application(s), your written protest must be received in this office within 30 days.

If you have any questions regarding the applications, please contact this office.

Sincerely,

DAVID R. TUTHILL, JR., P. E.
Manager, Western Regional Office
