WATER RIGHT LICENSE

WATER RIGHT NO. 63-12025

Priority: May 28, 1993

Maximum Diversion Rate:

0.06 CFS

Maximum Diversion Volume:

8.6 AF

This is to certify, that BRYCE T BRADLEY
GAYLE BRADLEY

5423 PIERCE PARK LN
POISE ID 83703

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated May 28, 1993; and has submitted Proof of Beneficial Use on August 26, 1993. An examination indicates that the works have a diversion capacity of 0.140 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.06 CFS	8.6 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 3(NWSW), Sec. 19, Township 04N, Range 02E
ADA County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
04N	02E	19	Lot 3(NWSW)	1.9		1.9

Total number of acres irrigated: 1.9

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes.
6. This right when combined with all other rights shall provide no more than .03 cfs per acre nor more than 4.5 afa per acre for the lands above.
7. Place of use is located within Pierce Park Village.

Total number of acres irrigated:				1.9

PLACE OF USE: DOMESTIC, same as IRRIGATION use

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 1994.
2. Subject to all prior water rights.
3. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
4. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
5. Construction of the well must comply with Idaho well construction standards.
6. The point of diversion identified in this right is located within the boundaries of the Boise Front Low Temperature Geothermal Resource Groundwater Management Area. The well driller must monitor water temperatures while drilling the well. If water with a temperature greater than 85 degrees Fahrenheit is encountered by the driller, drilling must immediately cease, and the Department must be notified. Drilling shall not resume until the Department has reviewed the drilling conditions, and established standards for construction with the driller.

Comments: Date: 5/28/1993 User-ID: LESTER

Subject:

MORATORIUM EXCLUSION

This application should qualify for an exclusion from the Snake River Moratorium amended 4/30/93. The site has three existing homes with separate domestic wells. Proposed is a community well for the three homes (site A & B on attachment) and seven duplex or quadplex units to be built (site C).

Irrigation will be for yard use for the ten units. The current irrigation supply via Boise Valley Canal Co. cannot be used to irrigate the site after the new units are built because of restrictions issued by the city of Boise (no flood irrigation allowed for proposed development).

Proposed well is far enough from river to not be considered as tributary to the river.

RE: WATER RIGHT NO. 63-12025

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen". The signature is written in dark ink and is positioned above the typed name.

Shelley W. Keen

MEMORANDUM

DATE: May 30, 1997
TO: File No. 63-12025
FROM: Cindy Zimmerman *CS*
RE: Permit Condition No. 7

A condition of this permit reads: "The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit."

A comment on the application from Steve Lester identifies the "...irrigation supply via Boise Valley Canal Co. cannot be used to irrigate the site after the new units are built because of restrictions issued by the city of Boise (no flood irrigation allowed for proposed development).".

Per telecon today with Mr. Bradley, the city of Boise required him to put in a pressurized system. The irrigation water is not clean enough to use in the pressurized sprinkler irrigation system. He was unable to find an adequate filtering system that would enable him to use the canal co. water. Mr. Bradley has retained and continues to pay for his 8 shares of Boise Valley Canal Co. water. The water remains undiverted in the canal system.

Mr. Bradley stated that his intention when applying for the permit was to replace surface water with the groundwater for irrigation use. Mr. Bradley developed this permit as intended, with groundwater as the primary source of water for irrigation.

E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS: P/U Same QD, different place of use.

Well in 8" casing supplies water for irrigation of common area around multi-family dwellings known as Pierce Park Village. A 3 h.p. pump delivers water through underground sprinkling system.

Permit indicates a beneficial use of for domestic, but none of the units are served by well. All are hooked up to city water. No domestic use from well exists.

The capacity of system, 0.14 cfs, is considerably greater than the requested allocation of 0.06 cfs. Therefore, recommend licensing for 0.06 cfs for irrigation of 1.9 acres of common area.

(No Adjudication Claim Filed)

$$\text{Theoretical: } Q = \frac{(8.8)(0.7)(3)}{20 + (2.31 \times \frac{50}{55})} = \frac{18.48}{135.5} \approx 0.14 \text{ cfs}$$

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12025

Dear Permit Holder(s):

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may

RECEIVED

AUG 27 1993

cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

RE: IDWR - Public Waters Appropriation Permit
Permit No. 63-12025

Dear Mr. Tuthill:

As outlined in the attached letter from the applicant, this appropriation is apparently for irrigation only. In addition, this is an existing development which receives its domestic water from the Boise Water Corporation system. Based on this new information, I am rescinding the requirements outlined in my letter to you dated July 1, 1993.

Sincerely,

Jack M. Gantz

Subject: IDWR - Public Waters Appropriation Permit # 63-12025

Dear Mr. Gantz,

We are in receipt of your letter dated July 1, 1993.

Please be advised that the application is for an existing development that is currently occupied and in operation. The application is not for a proposed development.

The water right and well permit being applied for is for irrigation only and is not for domestic and/or culinary purposes. The existing units are serviced by Boise City Water Corporation.

The irrigation purposes are for watering the surrounding lawn and shrubs of the existing development.

Feel free to call with any questions you may have.

Please let us know your findings at your earliest convenience.

Yours truly,

Bryce T. Bradley

RE: IDWR - Public Waters Appropriation Permit
Permit No. 63-12025

Dear Mr. Tuthill:

The project must be conducted under the design and supervision of an Idaho registered professional engineer. The process to follow is:

1. The engineer must submit a preliminary site evaluation based on proximity of pollution sources. We will evaluate the proposal, conduct a site inspection, and issue a written site approval if warranted. The applicant should give his consultant the enclosed checklist.
2. Detailed plans and specifications must be submitted to this office for review. The well may not be drilled until all approvals are obtained from both the Division of Environmental Quality (DEQ) and the Idaho Department of Water Resources (IDWR). The last approval will come from DEQ; we will not issue approval until final approvals of both IDWR permits (appropriation permit and well drilling permit) have been submitted.
3. This will be a Public Water System and must have one (1) source of water for less than twenty-five (25) connections and two (2) sources for twenty-five (25) or more connections.

We will pay particular attention to the following items:

1. Construction must be done under the general supervision of the professional engineer. The contract assuring this must be submitted with the application.
2. Numerous water quality parameters must be tested as soon as the well is completed.

Sincerely,

Jack M. Gantz, P.E.
Senior Water Quality Engineer

Re: Application for Permit No. 63-12025 in the name of Bryce
&/or Gayle Bradley

Dear Sir:

Enclosed is a copy(s) of the above-referenced application(s) for permit which may be of interest to your agency. Please review the application(s) and submit any comments you may have.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter, however, if your agency desires to file a formal protest against the approval of this application(s), your written protest must be received in this office by JULY 7, 1993.

If you have any questions regarding the application, please contact this office.

Sincerely,

A handwritten signature in cursive script, reading "David R. Tuthill, Jr.".
