OTHER METHODS OF APPROXIMATING WATER FLOW

Often an approximation of water flow is required when it is not practical to use weirs, orifices, nozzles or other means of determination. This can be done by taking the coordinates of a point in the stream flow as indicated in Fig. 75. The accuracy of this method will vary from 90-100%. The pipe must be flowing full.

FIG. 75. Approximating flow from horizontal pipe.

Capacity, Gpm = $\frac{2.45 D^2 x}{\sqrt{\frac{2y}{32.16}}}$ Where D = Pipe diameter, in.
 x = Horizontal distance, ft.
 y = Vertical distance, ft.

This can be further simplified by measuring to the top of the flowing stream and always measuring so that y will equal 12 inches and measuring the horizontal distance "X" in inches as illustrated in Fig. 76.

FIG. 76. Approximating flow from horizontal pipe.

Capacity, Gpm = $0.818 D^2 X$

TABLE 70. APPROXIMATE CAPACITY, GPM,
FOR FULL FLOWING HORIZONTAL PIPES
ILLUSTRATED IN FIG. 76.

how it was measured

Std. Wt. Steel Pipe, Inside Dia., In.		Distance x, in., when y = 12"											
Nominal	Actual	12	14	16	18	20	22	24	26	28	30	32	
2	2.067	42	49	56	63	70	77	84	91	98	105	112	
2½	2.469	60	70	80	90	100	110	120	130	140	150	160	
3	3.068	93	108	123	139	154	169	185	200	216	231	246	
4	4.026	159	186	212	239	266	292	318	345	372	398	425	
5	5.047	250	292	334	376	417	459	501	542	583	627	668	
6	6.065	362	422	482	542	602	662	722	782	842	902	962	
8	7.981	627	732	837	942	1047	1150	1255	1360	1465	1570	1675	
10	10.020	980	1145	1310	1475	1635	1800	1965	2130	2290	2455	2620	
12	12.000	1415	1650	1890	2125	2360	2595	2830	3065	3300	3540	3775	

In like manner flow can be estimated from a vertical pipe as shown in Fig. 77 by measuring the vertical height H .

Capacity, Gpm. = $5.68 K D^2 H^{1/2}$

D = I.D. of Pipe, In.

H = Vertical Height of water jets, in.

K = a constant, varying from .87 to .97 for pipes 2 to 6 in. dia. and H = 6 to 24 in.

FIG. 77. Approximating flow from vertical pipe.

TABLE 71. FLOW FROM VERTICAL PIPES, GPM.

State of Idaho
Department of Water Resources
Water Right License
WATER RIGHT NO. 63-11894

Priority: January 24, 1997

Maximum Diversion Rate:

0.51 CFS

This is to certify, that CITY OF NAMPA

411 3RD ST S

NAMPA ID 83651

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated June 26, 1992; and has submitted Proof of Beneficial Use on January 24, 1997. An examination indicates that the works have a diversion capacity of 2.140 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
MUNICIPAL	01/01 to 12/31	0.51 CFS	

LOCATION OF POINT(S) OF DIVERSION:

NWNW , Sec. 33, Township 03N, Range 02W
CANYON County

PLACE OF USE: See Remarks

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this right shall be non-consumptive.
2. This right does not authorize any commercial, industrial, or large irrigation uses developed after June 26, 1992.
3. Place of use within city limits of Nampa.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources. Signed and sealed this 12th day of

January, 1999.

Acting for KARL J. DREHER, Director

MICROFILMED

FEB 16 1999

IN THE MATTER OF PERMIT NO. 63-11894)
)
 IN THE NAME OF CITY OF NAMPA) ORDER OF
) REINSTATEMENT
)

FINDINGS OF FACT

5. On January 24, 1997, the permit holder submitted a proof of beneficial use statement along with a license examination fee in the amount of \$100.00 to the department. The permit holder also

MICROFILMED
APR 22 1967

submitted the well log from 1992, aquifer test data, and well production records for September and October of 1996, which shows the right was being put to beneficial use prior to the proof due date of October 1, 1996. The permit holder further explained that proof was not filed timely because, due to some changes in his office staff, the proof due notice and paperwork were misplaced.

CONCLUSIONS OF LAW

1. The permit holder has submitted proof of beneficial use along with supporting evidence which establishes that water was in fact beneficially used within the authorized development period.

2. The permit holder has shown sufficient cause why the proof of beneficial use was not submitted in a timely manner.

3. The department should reinstate the permit with the date of priority advanced to the date proof of beneficial use and supporting information was received by the Department.

ORDER

IT IS HEREBY ORDERED that Permit No. 63-11894 is **REINSTATED**.

IT IS FURTHER ORDERED that the priority date is advanced to January 24, 1997.

Dated this 17th day of April, 1997.

A handwritten signature in black ink, appearing to read "L. Glen Saxton", written over a horizontal line.

Permit To Appropriate Water

NO. 63-11894

Proposed Priority: June 26, 1992 Maximum Diversion Rate: 0.51 CFS

This is to certify, that CITY OF NAMPA
411 3RD ST SOUTH
NAMPA ID 83651

has applied for a permit to appropriate water from: GROUNDWATER
and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
MUNICIPAL	01/01 to 12/31	0.51 CFS

LOCATION OF POINT(S) OF DIVERSION: NWNWNW , Sec. 33, Township 03N, Range 02W
CANYON County

PLACE OF USE: See Remarks

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before October 1, 1996.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Prior to the diversion of water under this right a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
5. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
6. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
7. Construction of the well must comply with Idaho well construction standards.
8. Use of water under this right shall be non-consumptive.
9. The issuance of this right in no way grants any right-of-way or easement across the land of another.
10. This permit does not authorize any new commercial, industrial, or large irrigation uses.
11. Place of use within city limits of Nampa.

RE: WATER RIGHT NO. 63-11894

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

MICROFILMED

FEB 16 1999

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please call me at 208-327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

Shelley W. Keen

2. Measurements: pump curve supplied by Tracy Pump Co. who installed the pump

E. NARRATIVE/REMARKS/COMMENTS

A 10" well equipped with a 30 HP submersible pump supplies water to the City of Nampa's municipal system. The pump kicks on at 40 PSI and off at 80 PSI. The system consists of 3" to 12" mainline throughout. The City uses 11 wells for internal domestic uses and ~50 wells for external domestic uses (lawns etc).

Have conditions of permit approval been met? ☐ yes ☐ no

MICROFILMED

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-11894

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Enclosed is an order reinstating your permit since proof was submitted after the proof due date of October 1, 1996. Please note that the priority date has been advanced to January 24, 1997.

Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination, contact the **WESTERN** Regional Office in Boise at (208)334-1450.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

Subject: Permit No. 63-11894

Dear Ms. Yarbrough:

We are hereby requesting reinstatement of our water right developed under permit number 63-11894 for the City of Nampa.

Due to work load and some changes in staff responsibilities the proof of beneficial use was misplaced and not filed with your office as required.

Enclosed please find a completed proof of beneficial use form; a check for \$100.00 to cover the costs for filing; Aquifer Test Data and drillers log as supplied by Doty Pump Co.; and a copy of our production records for September and October, 1996.

If you have any further questions feel free to contact either Jack Heistand at 465-2209, or myself at 465-2220.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jim Brooks".

OTHER METHODS OF APPROXIMATING WATER FLOW

Often an approximation of water flow is required when it is not practical to use weirs, orifices, nozzles or other means of determination. This can be done by taking the coordinates of a point in the stream flow as indicated in Fig. 75. The accuracy of this method will vary from 90-100%. The pipe must be flowing full.

FIG. 75. Approximating flow from horizontal pipe.

Capacity, Gpm = $\frac{2.45 D^2 x}{\sqrt{\frac{2y}{32.16}}}$ Where D = Pipe diameter, in.
 x = Horizontal distance, ft.
 y = Vertical distance, ft.

This can be further simplified by measuring to the top of the flowing stream and always measuring so that y will equal 12 inches and measuring the horizontal distance "X" in inches as illustrated in Fig. 76.

FIG. 76. Approximating flow from horizontal pipe.

Capacity, Gpm = $0.818 D^2 X$

TABLE 70. APPROXIMATE CAPACITY, GPM,
 FOR FULL FLOWING HORIZONTAL PIPES
 ILLUSTRATED IN FIG. 76.

how it was measured

Std. Wt. Steel Pipe, Inside Dia., In.		Distance x, in., when y = 12"										
Nominal	Actual	12	14	16	18	20	22	24	26	28	30	32
2	2.067	42	49	56	63	70	77	84	91	98	105	112
2½	2.469	60	70	80	90	100	110	120	130	140	150	160
3	3.068	93	108	123	139	154	169	185	200	216	231	246
4	4.026	159	186	212	239	266	292	318	345	372	398	425
6	5.047	250	292	334	376	417	459	501	543	585	627	669
8	6.065	362	422	482	542	602	662	722	782	842	902	962
10	7.981	627	732	837	942	1047	1150	1255	1360	1465	1570	1675
12	10.020	980	1145	1310	1475	1635	1800	1965	2130	2290	2455	2620
	12.000	1415	1650	1890	2125	2360	2595	2830	3065	3300	3540	3775

In like manner flow can be estimated from a vertical pipe as shown in Fig. 77 by measuring the vertical height H .

Capacity, Gpm. = $5.68 K D^2 H^{1/2}$

D = I.D. of Pipe, In.

H = Vertical Height of water jets, in.

K = a constant, varying from .87 to .97 for pipes 2 to 6 in. dia. and H = 6 to 24 in.

FIG. 77. Approximating flow from vertical pipe.

TABLE 71. FLOW FROM VERTICAL PIPES, GPM.

Nominal I.D. Pipe, In.	Vertical Height, H, of Water Jet, in.

LAPSE NOTICE

RE: PERMIT NO. 63-11894

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated July 31, 1996. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifty dollar (\$50.00) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

L. GLEN SAXTON
Chief, Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 63-11894

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1996. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11894

Dear Permit Holder(s):

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under Condition No. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as

MICROFILMED

SEP 21 1992

far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

BRENDA MILLER
Water Resource Agent
