CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Domestic use is for 1 office.
6. The domestic use authorized under this right also includes the irrigation of trees surrounding a gravel pit operation.
7. The domestic use shall not exceed 2,500 gallons per day in accordance with the provisions of Section 42-111, Idaho Code.

PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 63-11887

Dear Permit Holder:

The Department is in receipt of the proof of beneficial use and the \$50.00 license examination fee filed in connection with the above referenced permit.

The proof of beneficial use and your permit authorize the diversion rate of 0.02 cfs. If you use a groundwater source and divert 0.04 or less, you are exempt from the license exam fee. Therefore, you are entitled to a \$50.00 refund from the department. The refund process takes approximately seven (7) to ten (10) days and will arrive under separate cover.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have any questions concerning this matter, please feel free to contact me or the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 63-11887

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1994.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved Date 7/14/1992

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11887

Dear Permit Holder(s):

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under Condition No. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as

MICROFILMED

far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

The irrigation portion of your original application No. 63-11764, does not qualify for an exempt status from the Snake River Basin Moratorium issued May 15, 1992. Therefore, the application has been separated into two permits. The original application will retain the irrigation use and be held from further processing until the Moratorium is lifted. This permit is issued for domestic use only.

Sincerely,

BRENDA MILLER

MEMORANDUM

TO: File No. 63-11764
FROM: Gary Spackman *Gary*
DATE: June 1, 1992

RE: Exemption from Snake River Basin Moratorium

On May 27, 1992, Tim Rambo of Bryan C. Rambo Crushing Company Inc. visited with me in my office about application for permit no. 63-11764. The application proposes irrigation, industrial and domestic use of water. The domestic use is for an office building. The application proposes industrial use of water for gravel washing. The water will spray across crushed gravel and will discharge to a settling pond, and ultimately discharge through a drainage ditch to Lake Lowell. The industrial use is a nonconsumptive use which is exempt from the moratorium. The domestic use will not exceed 2500 gallons per day and also qualifies for the definition set forth in Idaho Code § 42-111.

The application also proposes diversion of groundwater for the irrigation of poplar trees which would screen the gravel operation from the roadside. The screen is required by a conditional use permit granted to the gravel operation by Canyon County.

Rambo represented to me that no more than 100 poplar trees would be planted. He also represented that each poplar tree might require as much as 12 gallons per day in any given day. The trees will be irrigated by a pressurized pipe and a bubbler nozzle. The irrigation of the trees and the use of water in the office should not exceed 2500 gallons per day.

I recommend that we approve this application for domestic, irrigation and industrial use. The permit should state that the domestic and irrigation use cannot exceed 2500 gallons per day. The permit should also be conditioned that the industrial use shall be nonconsumptive.
