PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-11825 Telephone No. 888-4320
2. Name(s) of Permit Holder(s): Meridian School District
3. Mailing Address: 911 Meridian St. Meridian, Id. 83642
4. Source of Water: Well If GROUNDWATER (well), Date Drilled: mo. 9 / yr. 92
 - a. Well Driller: Adamson Pump Drilling Permit Number: 63-92-C-197
 - b. **OPTIONAL:**
Pump Horsepower: 12 Pressure (psi): 60-70 Dynamic pumping level (ft): 133
5. Use(s) (as authorized by the water right permit):
Domestic (No. of households): _____ Stockwater (No. and type of stock): _____
Irrigation (No. of acres): 18 Other: _____
6. Total rate of diversion and/or volume for which proof is submitted: 136 cfs OR _____ acre feet
7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)
(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device:	Is a measuring device required?	Yes <u>X</u>	or No _____
	Has the measuring device been installed?	Yes _____	or No <u>X</u>
<u>Water meter will be installed</u>			
Flow Measurement Port:	Is a flow measurement port required?	Yes _____	or No _____
	Has the measurement port been installed?	Yes _____	or No _____
8. Fee Enclosed: \$ 100.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)
9. Person to contact to accompany the Department representative during field examination of the water system.
Name: Chuck Liehe Telephone Number: 888-4320
Address: 2301 E. Lanark St. Meridian, Id. 83642
10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Signature of permit holder: Chuck Liehe Admin. Operator Date: 3-6-96

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 1996.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
7. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.

Permit To Appropriate Water

NO. 63-11825

CONDITIONS OF APPROVAL AND REMARKS

9. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.
10. This permit does not authorize the development and irrigation of land not previously irrigated under prior temporary approval of this application.
11. Water bearing zone to be appropriated is 88 to 98 feet.
12. Place of use also known as Meridian Middle School.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.
Witness the signature of the Director, affixed at Boise, this

29th day of February, 1996

MAR 29 1996

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION)
FOR PERMIT NO. 63-11825 IN)
THE NAME OF SCHOOL DISTRICT)
NO 2)
_____)

REINSTATEMENT ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of drought conditions being experienced during the 1994 irrigation season, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. In May 1992, the department issued the above captioned temporary permit (permit) to use ground water during the 1992 irrigation season to offset the effects of the drought and the associated reduced surface water supply. The permit expired on November 15, 1992.
2. The permit was conditioned that the Director of the department retained jurisdiction to reinstate the permit if drought conditions justify resumption of ground water use.
3. Water supply conditions during 1994 justify reinstatement of the permit by the Director.

CONCLUSIONS OF LAW

1. The Director is authorized under Chapter 2, Title 42, Idaho Code, to issue water right permits authorizing the diversion and use of the state's water resources.
2. The Director should reinstate the above captioned permit with certain conditions and limitations.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the above captioned permit is **REINSTATED** with the following conditions and limitations:

1. The permit expires on November 15, 1994.
2. The right to divert water under the above captioned permit is void if the surface water appurtenant to the place of use has been sold, transferred, leased or used on any other place of use without the approval of the department.

AUG 09 1994

3. The permit holder shall use the full allotment of surface water to the extent it is available before diversion is authorized under this reinstated permit.

4. The permit holder shall employ reasonably efficient methods of water application to conserve the water of the state of Idaho.

5. The rate of diversion of water for irrigation under this right and all other rights shall not exceed 0.02 cfs for each acre of land.

6. This use is subject to all prior water rights.

7. The place of use authorized is only that shown on the permit. Permit holder shall prevent use of this water on land for which it is not authorized.

8. This reinstatement does not authorize the construction of new wells or the deepening of existing wells.

9. Failure to comply with the above conditions and limitations of permit use voids this reinstatement.

Dated this 25th day of July, 1994.

L. GLEN SAXTON
Chief, Water Allocation Bureau

03N	01W	12	NENW	18		18
Total number of acres irrigated:						18

CONDITIONS/REMARKS:

1. This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.
8. This right is subject to all prior rights.

E. NARRATIVE/REMARKS/COMMENTS

An 8" well equipped with a 12 hp submersible pump supplies water to 18 acres of grass surrounding Meridian Middle School via 6" buried mainline and sprinklers. The sprinklers are equipped with 5/32" nozzles. The system is equipped with a turbine meter, which was calibrated by IDWR 9/30/96. The recommendations for this permit are based on the flow measured by IDWR's Fuji Polysonic meter during the calibration.

Nampa/Meridian Irrigation District water enters the school property in the SENENW section 12.
City water is used for the school's internal domestic uses. No other rights are used

Have conditions of permit approval been met? X yes ___ no

F. FLOW CALCULATIONS

___Y___ Additional Computation Sheets Attached

Measured Method:

147 GPM (.33 cfs) per IDWR's Fuji Polysonic flow measurement 9/30/96.**G. VOLUME CALCULATIONS**

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 18 \times 4.5 = 81$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .33 \times 246 \times 1.9835 = 161$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 81$$

2. Volume Calculations for Other Uses:

Re: 1997 Water Measurement Report for Water Right 63-11825

Dear Wateruser:

See attached letter of May 18, 1998. We realize you may not have responded to the correspondence due to school vacation. However, to keep our files in order, we need for you to submit the 1997 report for Meridian Middle School as soon as possible or we must process the Order Voiding Permit.

We previously received your 1997 report for Pioneer Elementary School water right 63-11681 on May 20, 1998, but no report for the above referenced permit.

I am also enclosing copies of the 1998 Water Measurement Annual Reporting forms. They must be filled out and returned to the department by January 15, 1999.

Your quick response will be appreciated. If you have any questions, please call me at 327-7907.

Sincerely,

A handwritten signature in cursive script that reads 'Roberta Loveall'.

Re: 1997 Water Measurement Reports and Fees for the following diversions:
63-11681 & 63-11825

Dear Wateruser:

NOTICE OF PENDING ORDER VOIDING PERMIT

The records of the Department of Water Resources (Department) show that you have failed to complete and submit the 1997 water measurement report forms and reporting fees for your diversions 63-11681 and 63-11825. You are reminded that there are conditions listed on your permit to measure and report. See our correspondence to you in relation to this issue dated April 27, 1998. Also enclosed in that correspondence was a report form.

If you fail to submit your reports and the \$25.00 per diversion (if water was diverted) reporting fee by **June 2, 1998**, a **PRELIMINARY ORDER VOIDING PERMIT WILL BE ISSUED**.

If you have any questions or feel that our records are incorrect, you may contact Water Distribution Section at (208) 327-7907.

Sincerely,

A handwritten signature in cursive script that reads "Tim Luke".

RE: Water Right No. 63-11825

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.
- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.
- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

MEMORANDUM

To: File 63-11825
From: L. Glen Saxton *LS*
RE: TELEPHONE CONVERSATION WITH CHUCK LIEHE
Date: May 21, 1996

Chuck Liehe called today relative to use of water under Permit No. 63-11825. He advised that the school district plans to renovate the football field and some softball fields which will involve replanting with new grass. He stated that the surface water source was relatively unreliable since other users upstream often took the water when they want it.

Liehe's question was whether the school district could use the well to water the new grass plantings when surface water was not available to use. I reviewed the conditions of approval on the permit and advised him that if surface water was available, the school district had to use it. If surface water was not available, the district was authorized to pump groundwater under terms of the permit.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11825

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records. Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department.

The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms. If you have questions about the measuring and reporting requirements, please call the department at (208)327-7900 and ask for someone in the Water Distribution Section. For questions about other elements of your permit, please call me at (208)327-7946.

APPROVED

MEMORANDUM

TO: Application for Permit No. 63-11825
FROM: Dave Tuthill *DT*
DATE: February 20, 1996
RE: Review of Application

In accordance with Order Condition No. 3 of the Boise River Basin Amended Moratorium Order dated May 3, 1995, this application has been reviewed and screened by the Department. The review committee consisted of the following personnel:

Mark Slifka, representing well construction concerns.
Janet Crockett, representing water quality concerns.
Shane Bendixsen, representing hydrologic concerns.
Jim Johnson, representing water allocation concerns.
Dave Tuthill, representing reg. office regulatory concerns.

Any additional conditions of approval found to be needed have been added to the supplemental staff analysis sheet which has been prepared and is included in this file.

RE: Illegal Diversion of Water

Dear Mr. Liehe:

Enclosed is a Cease and Desist Order in the above referenced matter.

If you disagree with the decision of the Director, you may request a hearing within fifteen (15) days of the date of this order pursuant to Idaho Code §42-1701A.

Sincerely,

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF TEMPORARY	)	
	)	ORDER TO
PERMITS NOS. M63-11681 AND M63-11825	)	
	)	CEASE AND DESIST
<u>IN THE NAME OF SCHOOL DISTRICT NO. 2</u>	)	

The Director of the Department of Water Resources (Department) being charged with the duty of protecting vested water rights and enforcing specific statutes of the State of Idaho and the rules promulgated by the Department, has been authorized to order the cessation of violations or attempted violations of the provisions of law relating to all aspects of the appropriation of water. Based on the Director's investigation of the application of water by School District No. 2 and his understanding of the law, the Director finds, concludes and orders as follows:

FINDINGS OF FACT

1. On May 15, 1992, the Director of the Department issued a moratorium preventing the issuance of certain water rights within the Boise River basin, and establishing provisions for the issuance of temporary water rights.

2. On May 22 and July 14, 1992 the Department issued to School District No. 2 Moratorium Permits Nos. M63-11681 and M63-11825, respectively. Both approvals were conditioned with the following requirement:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify the resumption of ground water use.

3. Because 1993 is an average year for surface water runoff in the Boise River basin, wells drilled under moratorium permits are not authorized to be pumped.

4. On July 29, 1993, Department personnel conducted a routine inspection of moratorium permits that had been issued during 1992,

JUL 29 1996

shall be subject to a civil penalty to be imposed by the director of the department of water resources not to exceed one hundred dollars (\$100) per diversion for each calendar day, or any part of a calendar day, following service of the cease and desist order in which the illegal diversion or use of water occurs.

6. The Director should issue a cease and desist order pursuant to the authority of Idaho Code §42-351.

ORDER

IT IS HEREBY ORDERED that School District No. 2 shall immediately CEASE AND DESIST the diversion and use of water as described above.

IT IS FURTHER ORDERED that School District No. 2 not resume the use of water until the Director modifies or rescinds this order or otherwise authorizes the diversion and use of water.

IT IS FURTHER ORDERED that School District No. 2 pay one hundred dollars (\$100) for the use of water for each calendar day or portion thereof that illegal diversion and/or use of water occurs following the service of this cease and desist order.

Dated this 2nd day of August, 1993.

R. KEITH HIGGINSON, Director
Department of Water Resources

**Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium**

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

MAR 29 1996

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: Water Right No. M63-11825

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

MERIDIAN ID 83642

RE: Water Right No. M63-11825

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

August 30, 1993

Chuck Liehe
Joint School District No. 2
911 Meridian Street
Meridian, ID 83642

RE: APPLICATION FOR PERMIT NO. 63-11825 - SCHOOL DISTRICT NO. 2

Dear Mr. Liehe:

The department has reviewed your letter dated August 23, 1993 in which you inquire about the diversion and use of water from your well under terms of the above referenced permit after surface water deliveries from Nampa & Meridian Irrigation District cease.

The moratorium issued by the department on May 15, 1992, against the approval of new applications seeking to appropriate water, was for the purpose of protecting existing water rights.

The permits approved by the department in 1992 for drought emergency relief have expired and were not reissued for the 1993 irrigation season. If reinstated, however, the permits could only provide "replacement" water, not additional water during periods when canal water is not usually (or ever) available. The existing moratorium on new development would have to be lifted before additional consumptive use of water could be considered for approval.

The option which may be available to provide ground water for your use on a continuing basis likely is the acquisition of an existing ground water water right. The place of use of such an acquired right then would need to be changed through the filing of an application for transfer with the department. The department suggests you look into the acquisition of such a right. If you find such a right, the department is willing to review its records with respect to the validity of the right before the School District actually purchases it.

The department does not wish to be hard-nosed about this matter, however, we are clearly charged with the protection of prior water rights under state law. Until such time that evidence is available to show that there is ground water available for appropriation for new consumptive uses, the department likely will not change the conditions of the existing moratorium.

David R. Tuthill, Jr., P.E. *Dr*
Department of Water Resources
Western Region
2735 Airport Way
Boise, ID 83705

Dear Sirs:

On July 14, 1992, the Department of Water Resources issued a moratorium permit #M63-11825 to drill a well at Meridian Middle School. On August 2, 1993 we received a cease and desist order pertaining to this well.

We are requesting an exception to this order for the following reason. When irrigation (ditch) water is shut off - usually on October 15 of each year, the football season is not over. If the football field is not watered it becomes dry and hard. We fear that the players may be injured as a result of the hard conditions of the playing surface.

Your consideration and approval of this request will assist us in dealing with a potential safety hazard.

Thank you for your attention to this situation.

Sincerely,

Chuck Liebe

MERIDIAN ID 83642

RE: PERMIT NO. 63-11825

LETTER OF TEMPORARY PERMIT APPROVAL

Dear Permit Holder(s):

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

MAILED

AUG 0 1992

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

Sharla Curtis

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date July 15, 1992

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

THE WELL MUST BE LOCATED AT LEAST 500 FEET FROM ANY EXISTING WELL. WELL SPACING CLOSER THAN 500 FEET MUST BE APPROVED BY THE DEPARTMENT OF WATER RESOURCES PRIOR TO CONSTRUCTION.

IF THE WELL IS DRILLED DEEPER THAN 100 FEET, THE SURFACE SEAL MUST CONSIST OF CEMENT OR BENTONITE CLAY GROUT AND EXTEND FROM LAND SURFACE TO A DEPTH OF NOT LESS THAN 75 FEET BELOW LAND SURFACE, OR 5 FEET INTO THE NEXT SIGNIFICANT CONFINING LAYER, WHICHEVER IS GREATER.

EXTENSION OF DRILLING PERMIT

Extension approved by _____ Approval Date _____

This extension is good for 60 days beyond the above extension approval date.

MORATORIUM EXEMPTION QUESTIONNAIRE

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE
COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated with surface water in the past?

YES

- Do you summer fallow any of your irrigated land? If so, how many acres?

NO

- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of canal or water district.

Nampa-Meridian Irrigation District

- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?

TEN

- What crops have you grown in the past ten years?

NONE - GRASS

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

Dated this 26 day of June, 1992.
