Please print or type. Attach pages with additional information. Instructions are on the back of this page.
 Incomplete forms will be returned.

Water Right or Adjudication Claim No(s): See Attached Sheet

The following **REQUIRED** information must be submitted with this form:

A. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water rights or claims in question, **WITH ATTACHED LEGAL DESCRIPTION.**

AND

B. **PLAT OF PROPERTY** or **SURVEY MAP** for parcel of ten acres or less. (These are usually attached to your deed or on file with the county.)

OR

C. For water rights or adjudication claims involving ten or more irrigated acres, a USDA Farm Service Agency **AERIAL PHOTO** with irrigated acres outlined and point(s) of diversion clearly marked.

Name and Address of Former Owner/Claimant See Attached Sheet

4. New Owner/Claimant(s) City of Boise
 Name Connector (Check one): ☐ and, ☐ or, ☐ and/or
 New Mailing Address Parks & Recreation Dept.
1104 Royal Blvd.
 City, State and ZIP Code Boise, ID 83706
 New Telephone Number (208) 384-4060

5. Date you acquired the property _____

6. If you have acquired only a portion of the former owner's property, IDWR may need to split the water right(s) or adjudication claim(s). If this applies, describe in detail your portion of each water right or adjudication claim in the spaces below. If necessary, attach additional pages.

Number of acres you irrigate _____ Number and type of stock _____

Diversion rate in CFS _____ Number of homes _____ Other uses _____

If a water right or adjudication claim is being split and you are not/sure how to identify your portion of the original right or claim, please contact the nearest IDWR office for assistance.

7. Signature of New Owner or Claimant(s) James R. Ball
Director

Corporations or other organizations must submit a list of directors and/or officers demonstrating authority to sign this form.

8. For Snake River Basin Adjudication Claims: Please attach a Notice of Appearance completed by your attorney, if you wish IDWR to correspond with him or her for all matters related to your claims.

City of Boise
Parks & Recreation Department
Water Rights/Adjudication Claims

Names are those found on adjudication profile reports, if water right has been claimed. In many instances different names appear on water right profile reports. The water right names also need to be changed to the corrected name and address.

PROOF OF BENEFICIAL USE

Department of Water Resources

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-11822 Telephone No. 208-384-4060 ext 325
2. Name(s) of Permit Holder(s): Boise Parks and Recreation Department (Boise Park System)
3. Mailing Address: 1104 Royal Boulevard, Boise, ID 83706 *Boise Parks & Recreation Dept.*
4. Source of Water: groundwater If **GROUNDWATER** (well), Date Drilled: mo. 7 / yr. 84
 - a. Well Driller: Stevens & Sons Drilling Permit Number: - - -
 - b. **OPTIONAL:**
Pump Horsepower: 7.5 & 10 Pressure (psi): 65 Dynamic pumping level (ft): 59
5. Use(s) (as authorized by the water right permit):
 Domestic (No. of households): _____ Stockwater (No. and type of stock): _____
 Irrigation (No. of acres): 5 Other: _____
6. Total rate of diversion and/or volume for which proof is submitted: 0.25 cfs OR _____ acre feet
7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)
 (This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required?	Yes <u>X</u> or No _____
Has the measuring device been installed?	Yes <u>X</u> or No _____
Flow Measurement Port: Is a flow measurement port required?	Yes _____ or No <u>X</u>
Has the measurement port been installed?	Yes _____ or No <u>X</u>
8. Fee Enclosed: \$ 100.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)
9. Person to contact to accompany the Department representative during field examination of the water system.
 Name: Paul Philbrook Telephone Number: 208-384-4060 ext 325
 Address: 1104 Royal Boulevard, Boise, ID 83706

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

04N	01E	35	NESW	5.0		5.0

Total number of acres irrigated: 5.0

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **March 1, 1997**.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
6. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
7. Failure to comply with any condition of approval is cause for the Director to cancel this right.

RECORDED

MAR 14 1996

State of Idaho
Department of Water Resources

Permit To Appropriate Water

NO. 63-11822

CONDITIONS OF APPROVAL AND REMARKS

8. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.05 cubic feet per second for each acre of land.
9. Place of use is located within Jullion Park.
10. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.
11. The point of diversion is located within the Boise Front Low Temperature Geothermal Resource Groundwater Management Area and use of water with a temperature greater than 85 degrees Fahrenheit is not authorized under this permit.
12. Water bearing zone to be appropriated is 230 to 261 feet.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this

4th day of March, 1996

MAR 14 1996

Comment
12. Remarks: Water will be used for night irrigations of Julian Park lawn and planting areas. The amount applied far exceeds that normally used for irrigation but this is necessary to insure minimum public inconvenience during daylight hours and is consistent with previous applications approved for city parks. The high application rate is necessary to provide peak irrigation requirements during the maximum growing season within the limited time available for night irrigation during long daylight hour days in the sum

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

James R. Hall

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
BENEFICIAL USE FIELD REPORT

A. GENERAL INFORMATION

Permit No. 63-11822

1. Owner: Boise Park System Phone No. (208) 384-4060 ext. 325

Current Address: 1104 Royal Blvd., Boise, ID 83706

2. Accompanied by: Kelly McDaid EXAM DATE : 5/25/2000

Address: Same as above Phone No. _____

Relationship to Permit Holder: Employee of Parks and Recreation Department

3. Source: Groundwater

B. OVERLAP REVIEW

1. Other water rights with the same place of use: 63-10246

2. Other water rights with the same point of diversion: 63-10246

C. DIVERSION AND DELIVERY SYSTEM

1. Point(s) of Diversion:

[illegible]

2. Place(s) of Use:

Indicate Method of Determination USGS Topo Map

[illegible]

3. **Delivery System Diagram:** Indicate all major components and distances between components. Indicate weir size/ditch size/pipe i.d. as applicable.

SEE ATTACHED SHEET.

2. **Measurements:** See field exam for 63-10246

E. NARRATIVE/REMARKS/COMMENTS

Jullion Park is located in Township 04N, Range 01E, Section 35. This permit is for a new section that has been added to the park. The new section of park is 5 acres and is within the NESW of Sec. 35, T04N, R01E. The point of diversion is a well located in the SENW of Sec. 35, T04W, R01E. The permit incorrectly identifies the point of diversion as being in the NESW of Sec. 35.

The water is pumped from the well by a 7.5 hp submersible pump and then a 10 hp booster pump, designed to produce 200 gpm at 65 psi, pumps the water to the place of use. This system is also used to irrigate 5 acres of Jullion Park that were constructed previously to the new park addition. Water right 63-10246 is for irrigation of the 5 old acres.

Surface water will be used to irrigate the new portion of the park. However, this system is not yet functional. The surface water comes from Mitchell St. to a vault from which it is pumped. The park will be able to be irrigated using surface water or groundwater.

This right when combined with 63-10246 should be limited to a diversion rate of 0.48 cfs.

The diversion rate requested is necessary to irrigation between the hours of 10:00 pm and 6:00 am.

Paul Philbrook, the contact person for the exam was called. He asked that I contact Kelly McDaid for the field exam.

SRBA claim lists licensed point of diversion, but the well is in the SENW of Section 35. Boise Parks and Recreation should amend their SRBA claim to match the real location.

There is a flow meter to monitor the amount of water used. Condition of approval number 4 has not been met for 1998 and 1999. I recommend consulting with the Water Distribution Section about this condition prior to licensing.

Have conditions of permit approval been met? ___ yes ☒ no

F. FLOW CALCULATIONS

_____ Additional Computation Sheets Attached

Measured Method:

Theoretical

$$Q = [(17.5 \text{ hp}) * 8.814 * 0.70] / [48.5 \text{ ft} + (65 \text{ psi} * 2.308)] = 0.54 \text{ cfs}$$

Measurement in field exam for 63-10246

$$Q = (28 \times 5.1) + (7 \times 9.1) + (3 \times 3) = 215.5 \text{ gpm} = 0.48 \text{ cfs}$$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 5 \text{ acres} * 4.5 = 22.5 \text{ AFA}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.25 \text{ cfs} * 260 \text{ days} * 1.9835 = 128.9 \text{ AF}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 22.5 \text{ AFA}$$

2. Volume Calculations for Other Uses:

NONE

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Annual Volume	
	From	To	Q (cfs)	V (afa)
Irrigation	3/1	11/15	0.25	22.5
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
Totals:			0.25	22.5

2. Recommended Amendments

☒ Change P.D. as reflected above ☐ Add P.D. as reflected above ☐ None
☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

(including cover)

Lori -

The pump for the Centennial Park well is a Berkeley 6T 90, 7.5 hp submersible, rated to produce 100 gpm at 75 psi. Static water level is about 14 feet and pumping water level is about 25 feet. The pump is set at 40 feet. A curve is attached.

My records show that the pump for Jullion Park well is a Jacuzzi S6HZ-S2, 7.5 hp, submersible, set at 176 feet. The pump is designed to produce 200 gpm. A 10 hp booster pump at the surface (Jacuzzi DMZ 753H) is designed to produce 200 gpm at 65 psi. I don't have curves for these pumps. Park staff measured a pumping rate of 194 gpm at 66 psi during their annual evaluation on October 5, 1999. This suggests that performance is close to design point. Static water level at that time was 20 feet and pumping water level was 48.5 feet.

Call me with any additional questions.

Terry

Lori –

The pump house schematic for Centennial Park follows. The drawing is not to scale, but the as-built pump house contains all the components shown.

I checked my Jacuzzi catalog but was unable to find an exact match for the pumps at Jullion.

Call me with any additional questions.

Terry

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-11822

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

December 31, 1996

BOISE PARK SYSTEM
1104 ROYAL BLVD
BOISE ID 83706

PROOF DUE NOTICE

RE: PERMIT NO. 63-11822

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before March 1, 1997.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: Water Right Permit No. 63-11822

Dear Mr. Philbrook:

I am in receipt of your letter dated March 13, 1995, in which you requested reconsideration of Condition of Approval No. 5 on the above-referenced water right permit.

The addition of this condition of approval to this permit and others that have been recently approved throughout the Boise River drainage basin is based on the growing realization that urbanization has the potential of reducing the historic recharge to ground water aquifers within the basin. The widespread use of ground water throughout the basin has been made possible by annual recharge to the underground. Replacement of surface water irrigation with ground water could ultimately result in an inadequate recharge balance. Thus, the Department is routinely requiring that all surface water rights be used before ground water is applied.

However, you have provided information which argues for an exception to the general rule in the situation of Julion Park. Based on the factual scenario which you provided, the Department would be willing to modify condition number 5 to read as follows:

The right holder shall either (1) use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under this right and shall only divert ground water under this right when water from the appurtenant surface water rights cannot be delivered to the right holder, or (2) provide a plan acceptable to the Department and the surface water delivery organization, which provides for recharge of the ground water by utilizing the surface water right appurtenant to the place of use under this right.

Please contact Mr. Glen Saxton of this office if you desire to accept or modify this language. If you wish to discuss this matter further, feel free to contact Mr. Saxton, Mr. Tuthill or myself.

Sincerely,

Norman C. Young
Administrator, Water Management Division

RE: Water Right No. 63-11822; Jullion Neighborhood Park

Dear Mr. Young:

I want to thank you for the quick response from your department regarding my February 6, 1996 request to process two permits that had been on hold for some time, due to the prior moratorium. I understand that these two permits; Jullion and Centennial Park Sites, were two of only 32 that were processed. I now have an additional request regarding Jullion Park that I would appreciate your immediate consideration and attention to.

Centennial Park, the other permit, is in the Southeast Boise Ground Water Management Area, where your department is intent on protecting the aquifer. One condition required there was to utilize the surface water as the primary source of irrigation, with the secondary well source permitted based on appropriate recharge of the aquifer, to replenish the well water used.

After a recent discussion with Jim Johnson of your office, I was encouraged to notify you of further factors regarding the Jullion site that you may not be aware of. To my knowledge, Jullion Park is in an area of Boise where the groundwater is not experiencing any type of groundwater shortage, such as with the Centennial Park area. This particular parcel has a history of "non-use", since the early 1980's when Boise Parks & Recreation purchased the land. The existing well was designed, and drilled for water supply to the full acreage, although since that time, five acres have remained undeveloped. In addition, no surface water has been used in the area. As a result, the aquifer under this park has not had surface water recharge of the aquifer for at least 12 years.

MICROFILMED
MAR 11 1997

On the "Permit to Appropriate Water" received last week, there were 12 conditions of approval, of which we are concerned with No. 5, which states:

"The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder."

We feel this places an undue burden on this project development. Thus we request removal of condition No.5. We are interested in knowing, also, what other water users in this vicinity have met this condition, and would appreciate your provision of examples of similar permits.

As stated earlier, Jullion Park development has been bid, and awarded, and we attempting to abide by all requirements. We ask that you revoke condition No. 5 so that we can proceed with this contract as bid. In any case, we certainly would appreciate hearing from you in the immediate future, so that we can plan our next course of action.

Sincerely,

Paul Philbrook
Property Administrator

PERMIT APPROVAL NOTICE

RE: Basin 63 Approved Permit

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records.

Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms.

RECORDED

MAR 14 1996

Page 2

If you have questions about the measuring and reporting requirements, please call the department at (208)327-7900 and ask for someone in the Water Distribution Section. If you have questions about other elements of your permit, call me at (208)327-7946.

Sincerely,

Shelley W. Keen

TO: Application for Permit No. 63-11622
FROM: Dave Tuthill *DT*
DATE: February 20, 1996
RE: Review of Application

In accordance with Order Condition No. 3 of the Boise River Basin Amended Moratorium Order dated May 3, 1995, this application has been reviewed and screened by the Department. The review committee consisted of the following personnel:

Mark Slifka, representing well construction concerns.
Janet Crockett, representing water quality concerns.
Shane Bendixsen, representing hydrologic concerns.
Jim Johnson, representing water allocation concerns.
Dave Tuthill, representing reg. office regulatory concerns.

Any additional conditions of approval found to be needed have been added to the supplemental staff analysis sheet which has been prepared and is included in this file.

Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.

1104 Royal Blvd.
Boise, ID. 83706

RE: Application for Permit Nos. 63-11816 (Centennial Park) and 63-11822
(Jullian Park)

Dear Applicant:

Your applications for permit to appropriate irrigation water from ground water were received on 4/29/92. Due to continued drought and the need to protect existing water rights and water supplies, the Director of this agency declared a moratorium on 5/15/92 concerning water right applications proposing new consumptive uses of public water. Your applications cannot be processed for possible approval until the moratorium ends. Delays related to department decisions do not affect the date of priority or seniority of an application.

This office will hold the applications pending future developments in the water supply situation and will inform you of any changes. You might be able to locate someone with a valid water right with available water to sell or lease for your needs if necessary. If so, an Application for Transfer of Water Right should be filed at this office to legally change the right(s) prior to any sale or lease.

Please let me know if you need additional information.

Sincerely,

Steve Lester
Water Rights Supervisor
