Sketch of pumping plant layout or attach photograph of pumping plant and piping.

Comments: Note decline in GPM as well pumped. This well had not been run this billing cycle. Test results reflect apparently, static draw down after 45 minutes. B.V. was adjusted by pump installer to avoid aerating/surging. Operator never adjusts. Position fixed by 1/4" bolt.

I certify that the above information is true and correct to the best of my knowledge and ability and the measurements taken and recorded are in accordance with the standards and specifications of the equipment used.

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 1996.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
7. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.
9. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.
10. This permit does not authorize the development and irrigation of land not previously irrigated under prior temporary approval of this application.
11. Water bearing zone to be appropriated is 25 to 75 feet.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

DESIGNATION OF AGENT

KNOW ALL MEN BY THESE PRESENTS, That I, Florence G. McNiell, has made, constituted and appointed, and by these presents do make, constitute and appoint C. J. Kniefel, a resident of Parma, County of Canyon, Idaho, and/or Robert E. Kniefel of Payette, County of Payette, Idaho, my agent, for me in my place and stead, and for my use and benefit to have charge of the lands situated in the Canyon County, State of Idaho, and more particularly described as follows:

W $\frac{1}{2}$ of NE $\frac{1}{4}$ Section 27, Township 5 North, Range 4 West, B.M.
NE $\frac{1}{4}$ of SW $\frac{1}{4}$ and
NW $\frac{1}{4}$ of SE $\frac{1}{4}$, Section 19, Township 5 North, Range 5 West, B.M.

And I hereby designate the said C. J. Kniefel and/or Robert E. Kniefel, as my agent with full power and authority, as follows:

1. Select tenants for the said lands, and prepare leases therefore.
2. Supervise the preparation of the said lands, the seeding thereof, irrigation, harvesting and marketing all crops grown and to be grown thereon, and to designate the kind of crops to be grown thereon.
3. Sell said crops, pay all expenses in connection therewith, and all farming expenses, and taxes and water assessments and all other financial operations in connection with the handling of said lands.
4. Have complete and general control and supervision of the said properties at all times.
5. This designation of agent hereby supercedes any and all designations heretofore signed.

AUG 09 1994

This DESIGNATION OF AGENT shall continue in full force and effect until formally terminated by me in writing, or until terminated by my heirs and assigns.

Giving and granting unto the said C. J. Kniefel and/or Robert E. Kniefel, as my agent, full power and authority to do and perform all and every act and thing whatsoever requisite and necessary to be done in and about the premises, as fully to all intents and purposes as I might do if personally present, I hereby ratify and confirm all that C. J. Kniefel and/or Robert E. Kniefel, my agent, shall lawfully do or cause to be done by virtue of these presents.

Re: Permit No. 63-11789

Dear Mr. Kniefel:

We have received your letter of April 2 inquiring about use of a well for irrigation related to the above referenced permit in the name of Florence McNeil.

I am enclosing a copy of the permit for your records. Pay special attention to condition numbers 5 through 10. This permit can be used any time that the appurtenant surface water is not available or is not sufficient to provide 0.02 cfs per acre. Surface water simply has to be used to its full extent, but when that source is not available or is limited, the well can be used.

This isn't considered a temporary permit so it is not necessary for your client to seek authorization from the department to use this right in water-short years. As long as the well is used within the confines of the conditions set forth in the permit, your client has everything in place paperwise to get through the irrigation season each year.

If I can be of further help, please give me a call.

Sincerely,

A handwritten signature in cursive script that reads "Sharla Curtis".

April 2, 2001

Department of Water Resources

Dear Sir

Florence Mc Neil installed a pump for irrigation on her farm at Notus in 1992 permit number 63-11789. She is under the Black Canyon Number 1. District which is the water that originates near the Amalgamated Sugar Plant at Nampa with some springs and flows towards Notus being piped under the Boise River at Caldwell. This irrigation canal water at times can be limited as I'm sure you are aware.

Because of a drought year being upon us, we are asking for your permission to run this pump when needed during this coming summer.

May we please hear from you.

4.

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
P/D WELL	FRANKLIN ELECTRIC	10 Hp	28232029310	FRANKLIN ELECTRIC	6 " DISCHARGE

*Code to correspond with No. on map and aerial photo

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
POLYSONIC				196605		

2. Measurements: Bryce Contor with IDWR measured the well and performed a PCC on this well in 1996. I performed a theoretical and both measurements are pretty close. Therefore I used Mr. Contor's measurement to determine the diversion rate for this well.

63-11789

E. NARRATIVE/REMARKS/COMMENTS

The water from this well is diverted by a 10 Hp Franklin Electric submersible pump. The water is then delivered to a distribution box by a 6 " mainline. From the distribution box, the water is delivered to a cement ditch that runs west to irrigate the north fields. The water can also be sent south through a buried pipeline that empties into cement ditch that irrigates the south field. All the irrigation is furrow irrigation.

Black Canyon Irrigation District is the only overlapping rights for this permit. This permit was filed as a supplemental right to this surface water, so this overlap should not deter the licensing of the permit.

RECOMMENDATIONS:

I recommend that this permit be licensed for 0.70 cfs and 320 afa for 71 acres. This groundwater right should not be used until all surface water rights have been used. I also recommend that the current season of use be used for this right of from 3/1 to 11/15.

Have conditions of permit approval been met? X yes* no

* A PCC has already been performed on this well to use power records to measure the water.

63-11789

F. FLOW CALCULATIONSYES Additional Computation Sheets Attached

Measured Method:

Theoretical calculation = .74 cfs

Bryce Contor's measurement in 1996 = .70 cfs

Permit allows = 1.20 cfs

Maximum allowable = .02 cfs X 71 acres = 1.42 cfs

The diversion rate that can be licensed is the amount measured by Bryce Contor in 1996 of .70 cfs.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (71) \times (4.5) = 320 \text{ afa}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (0.70) \times (260) \times (1.9835) = 361 \text{ afa}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 320 \text{ afa}$$

B

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
<u>IRRIGATION</u>	<u>3/1</u>	<u>11/15</u>	<u>0.70 CFS</u>	<u>320 AFA</u>

Totals: 0.70 CFS 320 AFA

2. Recommended Amendments

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☐ None
☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

GROUNDWATER THEORETICAL ANNALYSIS

FILE: 63-11789

DATE: 8-9-00

BY: Daniel A. Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

Q = $\frac{(8.8) \times (\underline{10}) \times (0.70)}{[(\underline{60}) + (\underline{10} \times 2.31)]} = \frac{61.6}{83.1} = .74 \text{ CFS}$

LIFT FROM:

Measurement ()

Owner ()

Area estimate ()

Well Logs (X)

PSI FROM:

Measurement ()

Owner ()

Estimate (X)

Owner Gage ()

Booster (Y) (N)

NOTES ON PUMP:

Motor Make, Serial or ID

Pump Make, Serial or ID, rating

$(.74 \text{ CFS}) \times (448.8) = 332 \text{ gpm}$

REMARKS: The LIFT OF 60' was taken from the well logs pump test. This lift seems reasonable for this well. I used 10 psi pressure since this well open discharges into a ditch only a few feet from the well.

332 gpm is very close to the 314 gpm that Bayce Center measured on this well in 1996. We should go with the measured amount of 314 gpm or .70 CFS.

Termination of Power Consumption Coefficient

Kilowatts of Energy Consumed

$$KW = 3.6 \times Kh \times \text{Multiplier} \times \text{No. of revolutions}(N) \div \text{Time}(T) \text{ in seconds per } N$$

Cond.#1 $N = 20$ (No. of Disc Rev) $\text{Time(sec)} = (69.0) + (68.8) + (69.1) / 3 = 69.0$ Ave

$$3.6 \times 7.2 (Kh) \times 1 (\text{Mult}) \times 20 (N) \div 69.0 (T) = 7.51 \text{ KW}$$

Cond.#2 $N = 10$ (No. of Disc Rev) $\text{Time(sec)} = (35.0) + (35.0) + (35.2) / 3 = 35.1$ Ave

$$3.6 \times 7.2 (Kh) \times 1 (\text{Mult}) \times 10 (N) \div 35.1 (T) = 7.39 \text{ KW}$$

Cond.#3 $N = 10$ (No. of Disc Rev) $\text{Time(sec)} = (35.1) + (35.0) + (35.0) / 3 = 35.0$ Ave

$$3.6 \times 7.2 (Kh) \times 1 (\text{Mult}) \times 10 (N) \div 35.0 (T) = 7.40 \text{ KW}$$

Pump on for:

(4 min)

(14 min)

(20 min)

(30 min + 30 min)

Measured Flow Rate - Enter flow rate as determined by the "standard" water measurement meter in GPM. Attach documentation to support data such as notes, printout tapes etc.

GPM Cond. #1 313.8 #2 297.7 #3 292.0 #4 296.1

Power Consumption Coefficient (PCC) = KW x 5431 + GPM

PCC Cond. #1 = 7.51 (KW) x 5431 + 313.8 (gpm) = 130.0 (kWh/ac.ft)

Percent of seasonal use 0

PCC Cond. #2 = 7.39 (KW) x 5431 + 297.7 (gpm) = 134.8 (kWh/ac.ft)

Percent of seasonal use 0

PCC Cond. #3 = 7.40 (KW) x 5431 + 292.0 (gpm) = 137.6 (kWh/ac.ft)

Percent of seasonal use 0

PCC Cond #4 = 7.37 x 5431 + 296.1 = 135.2

Percent of season = 100%

-3.6%

-2.0%

+1.8%

Describe system operating conditions and how percentage of seasonal use was obtained:

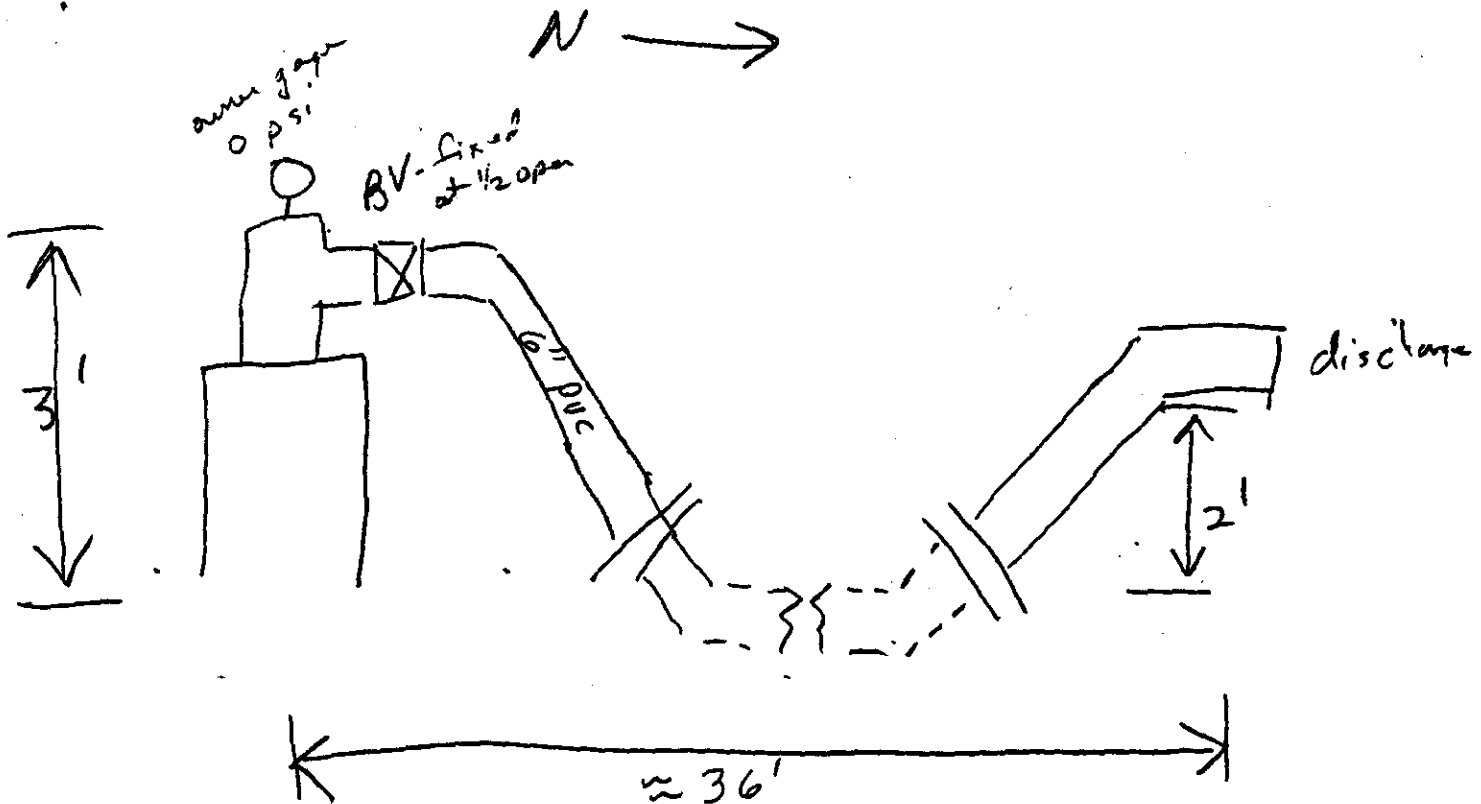

Cond 1 & 2 were at initial startup, draw down

not yet stabilized. Use PCC = 135.2

X,Y,Z on 1st run period. Pumps off x 5 min, then run 3 min before starting AA. Did 1 run last longer because water was threatening near lowest onion field.

63-11789

Sketch of pumping plant layout or attach photograph of pumping plant and piping.

Comments: Note decline in GPM as well pumped.
This well had not been run this billing cycle.
Test results reflect apparently static draw down
after 45 minutes.

===== B.V. was adjusted by pump installer to avoid aeration/
surging. Operator never adjusts. Position fixed by 1/4" bolt.

I certify that the above information is true and correct to the best of my knowledge and ability and the measurements taken and recorded are in accordance with the standards and specifications of the equipment used.

Re: Response to Well Use Inquiry, Permit No. 63-11789

Dear Water User:

Thank you for your recent response to my letter of August 22 regarding possible well use for the above-referenced permit. Your cooperation in this matter has been appreciated.

I am forwarding a copy of your response to the Water Distribution Section in the department's central office, also located in Boise. If you have any questions regarding the options for annual water measurement reporting requirements that are identified on your permit, please contact that Section at 327-7900.

Please contact me at your convenience if you have any other questions regarding your "drought well" permits.

Sincerely,

Steve Lester
Deputy Regional Manager

Steve Lester, Deputy Regional Manager
State of Idaho
Department of Water Resources
2735 Airport Way
Boise, Idaho 83705

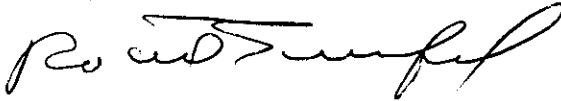

Dear Mr Lester

In regard to your letter dated August 22, 1996, I wish to make the following explanations:

In February 1996, I was sent a form asking how I wished to measure the well on the farm belonging to Florence McNeil permit # 63-11789. I chose to have you come out and measure the water flow and use Idaho Power records. Sometime during the month of June, I called Scott King to ask when they would be coming out to measure the well and he stated they would let me know. I was leaving the country to go overseas and would be gone therefore I called our renter to indicate the Water Dept. should be coming out soon to check the water volume coming from the well and suggested that he run the pump so it would be running when they came. I believe he started it around the first part of July.

We did not need the water and I realize that I should have not instructed our renter to run the Pump in anticipation of it being checked. We intend to use the Idaho Power records to measure the water and we have been using our surface water under Black Canyon #1. We will continue to use surface water in the future and do not intend to use this well for irrigation unless you have to authorized us to do so. We have 76.5 inches for this place.

Sincerely yours

Robert E. Kniefel

RE: WATER RIGHT PERMIT NO. 63-11789

Dear Water Right Holder:

As a follow-up to the department's July 23, 1996 letter to owners of the "1992 drought permits", field inspections have been completed for randomly selected wells such as your above-referenced permit.

During the field inspections, your well for this water right was found to be in use. Due to an adequate surface water supply this year and because these permits are intended to provide supplemental and/or replacement water, this office is seeking a better understanding of why your well was being used.

Please provide an explanation of the well usage by contacting this office at your convenience by September 3, 1996. As mentioned in the July 23 letter, please note the conditions of approval listed on your permit. In your reply to today's letter, please include information that addresses the following points:

- Why was the well in use on July 25, 1996, and was the well water only being applied to the acres listed on the permit?
- How do you intend to measure and report the amount of water diverted from the well during the 1996 irrigation season?
- Are you using all of the available surface water for the land being irrigated by the well? Does your surface water allotment provide one miner's inch per acre? Please explain the reasons for not fully utilizing surface water if that describes your situation.

Thank you for your cooperation regarding this "drought permit". If you have any questions, please feel free to contact this office.

Sincerely,

Steve Lester
Deputy Regional Manager

RE: Water Right No. 63-11789

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.
- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.
- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 63-11789

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that one of the conditions of your water right permit requires that the permit holder install a measuring device or enter into an agreement with the department to use power records to determine the amount of water diverted from this right (refer to condition #3 of your permit.) If you have any questions regarding the installation of the measuring device or your options, please contact Scott King or Gary Spackman at (208)327-7900.

If you have questions concerning the field examination, please feel free to contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: Basin 63 Approved Permit

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records.

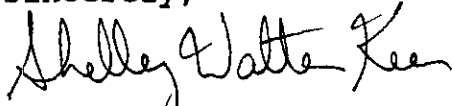

Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms.

FEB 23 1996

Page 2

If you have questions about the measuring and reporting requirements, please call the department at (208)327-7900 and ask for someone in the Water Distribution Section. If you have questions about other elements of your permit, call me at (208)327-7946.

Sincerely,

MEMORANDUM

TO: Application for Permit No. 63-11789
FROM: Dave Tuthill 
DATE: January 29, 1996
RE: Review of Application

In accordance with Order Condition No. 3 of the Boise River Basin Amended Moratorium Order dated May 3, 1995, this application has been reviewed and screened by the Department. The review committee consisted of the following personnel:

Mark Slifka, representing well construction concerns.
Janet Crockett, representing water quality concerns.
Shane Bendixsen, representing hydrologic concerns.
Jim Johnson, representing water allocation concerns.
Dave Tuthill, representing reg. office regulatory concerns.

Any additional conditions of approval found to be needed have been added to the supplemental staff analysis sheet which has been prepared and is included in this file.

DIRECTOR

May 19, 1995

**Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium**

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

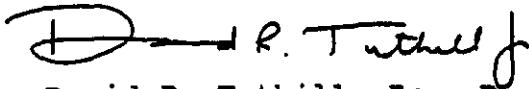

FEB 23 1996

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: PERMIT NO. M63-11789

REINSTATEMENT OF PERMIT APPROVAL

Dear Reinstated Permit Holder(s):

Enclosed is an reinstatement order **authorizing diversion of water** under the above referenced permit.

The Department has reinstated your permit for the remainder of the 1994 irrigation season and the reinstatement will expire on November 15, 1994. When your permit expires, you must make the pump and motor inoperable, and you cannot operate the pump without approval from the Department of Water Resources. The Director may reinstate the permit again next year if drought conditions persist.

Please remember water diverted under your reinstated permit is only to be used on the lands identified on your permit. You must obtain the approval of the Department before using your water anywhere else.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If you have any questions please let me know.

Sincerely,

Camela Skaggs

for JIM JOHNSON, Manager
Water Right Permits Section

Enclosure

RECEIVED

AUG 09 1994

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION)
FOR PERMIT NO. 63-11789 IN)
THE NAME OF FLORENCE MC NEIL)
_____)

REINSTATEMENT ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of drought conditions being experienced during the 1994 irrigation season, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. In May 1992, the department issued the above captioned temporary permit (permit) to use ground water during the 1992 irrigation season to offset the effects of the drought and the associated reduced surface water supply. The permit expired on November 15, 1992.
2. The permit was conditioned that the Director of the department retained jurisdiction to reinstate the permit if drought conditions justify resumption of ground water use.
3. Water supply conditions during 1994 justify reinstatement of the permit by the Director.

CONCLUSIONS OF LAW

1. The Director is authorized under Chapter 2, Title 42, Idaho Code, to issue water right permits authorizing the diversion and use of the state's water resources.
2. The Director should reinstate the above captioned permit with certain conditions and limitations.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the above captioned permit is **REINSTATED** with the following conditions and limitations:

1. The permit expires on November 15, 1994.
2. The right to divert water under the above captioned permit is void if the surface water appurtenant to the place of use has been sold, transferred, leased or used on any other place of use without the approval of the department.

MICROFILMED

AUG 09 1994

3. The permit holder shall use the full allotment of surface water to the extent it is available before diversion is authorized under this reinstated permit.

4. The permit holder shall employ reasonably efficient methods of water application to conserve the water of the state of Idaho.

5. The rate of diversion of water for irrigation under this right and all other rights shall not exceed 0.02 cfs for each acre of land.

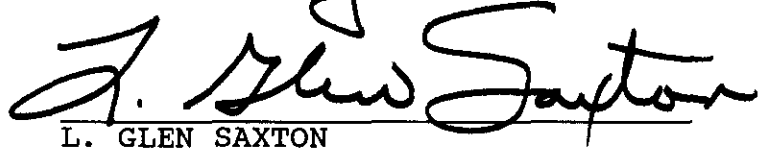

6. This use is subject to all prior water rights.

7. The place of use authorized is only that shown on the permit. Permit holder shall prevent use of this water on land for which it is not authorized.

8. This reinstatement does not authorize the construction of new wells or the deepening of existing wells.

9. Failure to comply with the above conditions and limitations of permit use voids this reinstatement.

Dated this 29th day of July, 1994.

L. GLEN SAXTON
Chief, Water Allocation Bureau

AUG 09 1994

DROUGHT RELIEF QUESTIONNAIRE

If you are not interested in having a 1994 temporary permit reinstatement, or if you did not drill a well in 1992, disregard this questionnaire. No response is necessary.

Please answer the questions below. Your answers will help the department assess the need for use of the wells to complete the 1994 irrigation season and the extent of water use that will occur if the department again authorizes use of the wells.

1. Temporary permit identification number. MG 3-11789
(See cover letter)

2. a) Person responding to this questionnaire

Robert E. Kniefel

b) Relationship to applicant? Agent for Florence McNeil

3. Do you expect to use all of your surface water supplies for the land identified on the attached application prior to the end of the 1994 irrigation season? Yes ✓ No

4. What is the source of supply? (Name of Canal) This water comes from Block Canyon Unit #1 springs over in Canyon County.

5. What date do you expect this to occur?

6. List the type of crop, acreage and volume of water in acre feet (AF) needed under the temporary permit to complete the 1994 irrigation season. List only for the lands included in the land list of the attached application for permit.

CROP	ACRES ✓	ACRE FEET ✓
~~1.25~~ Beans	31.5	25 Inches
wheat	40.5	
	72	

Had a great deal of problem with pumpco
~~PO~~ And Idaho Power finally hooked us
 up 8-19-92. Our power Bill in 1992 (Aug)
 was \$209²²

This questionnaire needs to be completed and returned to the department by August 1, 1994 in order to be considered as a request to reinstate a temporary permit.

RE: Water Right No. M63-11789

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

FLORENCE MC NEIL
2375 CENTER AVE
PAYETTE ID 83661

RE: Water Right No. M63-11789

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

AUG 09 1994

State law requires that this report be filed with the Director, Department of Water Resources within 30 days after the completion or abandonment of the well.

FLORENCE MC NEIL
C/O ROBERT KNIEFEL
2375 CENTER AVE
PAYETTE ID 83661

RE: PERMIT NO. 63-11789

LETTER OF TEMPORARY PERMIT APPROVAL

Dear Permit Holder:

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

AUG 09 1994

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

MORATORIUM EXEMPTION QUESTIONNAIRE

Department of Water Resources

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE
COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated
with surface water in the past? Yes

- Do you summer fallow any of your irrigated land? If
so, how many acres? None

- List the water right(s) you have used to irrigate the
land listed on the application. If you have received
water from a canal company or water district, please
identify the name of canal or water district.

Black Canyon unit # 1 (This is Boise River water originating
near the Nampa Amalgamated Sugar Co.
with one-half acre foot in Lake Lowell)

- During the last ten years, how many years has your
surface irrigation water been available for the entire
irrigation season? ten years

- What crops have you grown in the past ten years?

Primary crop sugar beets each year and then some beans
wheat.

I understand if my proposed diversion of groundwater is
approved as a supplemental use, that I can only use my well
during periods of drought, when a full supply of water is not
available. I also agree that my surface water will be fully used
to the extent available, will not be sold or used on other lands,
and that a change in use of my surface water may result in
revocation of any groundwater right granted pursuant to my
application for supplemental water.

Dated this 26th day of May, 1992.

STATE OF IDAHO)

) SS.

County of Canyon)

Mary B. Scott

Nampa, Canyon County, Idaho, being first duly sworn, deposes and says:

I. That I am a citizen of the United States of America, and at all times hereinafter mentioned was over the age of eighteen years, and not a party to the above entitled action.

I. That I am the Principal Clerk of the Idaho Press-Tribune, a daily, (except Saturday) newspaper published in the City of Nampa and Caldwell, in the County of Canyon, State of Idaho; that the said newspaper is in general circulation in the said County of Canyon, and in the vicinity of Nampa and Caldwell, and has been uninterruptedly published in said County during a period of seventy-eight consecutive weeks prior to the first publication of this notice, a copy of which is hereto attached.

I. That the notice, of which the annexed is a printed copy, was published in said newspaper Two Times the regular and entire issue of said paper, and was printed in newspaper proper, and not in a supplement.

I. That said notice was published the following dates:
