CONDITIONS OF APPROVAL

1. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
2. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 319.5 af at the field headgate.
4. This right when combined with all other rights shall provide no more than 4.5 afa per acre for irrigation of the lands above.

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-11689 Telephone No. 208-482-7737
2. Name(s) of Permit Holder(s): H. J. BATT - WILDER LAND CO.
3. Mailing Address: Box 666 WILDER, ID. 83676
4. Source of Water: GROUNDWATER If GROUNDWATER (well), Date Drilled: mo. / yr.
- a. Well Driller: RIVERSIDE DRILLING Drilling Permit Number: 63-92-W-199
- b. **OPTIONAL:**
Pump Horsepower: 125 Pressure (psi): Dynamic pumping level (ft):

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): Stockwater (No. and type of stock):

Irrigation (No. of acres): 80 Other:

6. Total rate of diversion and/or volume for which proof is submitted: 1.60 cfs OR acre fee

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required?

Yes X or No

Has the measuring device been installed?

Yes or No X

Flow Measurement Port: Is a flow measurement port required?

Yes or No

Has the measurement port been installed?

Yes or No

8. Fee Enclosed: \$ 125.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Douglas Batt Telephone Number: 208-482-7737

Address: Box 666 WILDER ID 83676

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Signature of permit holder: Douglas Batt - Partner Date: 5-21-96

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 1996.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
7. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF APPLICATION)
FOR PERMIT NO. 63-11689 IN)
THE NAME OF H J BATT WILDER)
LAND CO LTD)
_____)

REINSTATEMENT ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of drought conditions being experienced during the 1994 irrigation season, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. In May 1992, the department issued the above captioned temporary permit (permit) to use ground water during the 1992 irrigation season to offset the effects of the drought and the associated reduced surface water supply. The permit expired on November 15, 1992.

2. The permit was conditioned that the Director of the department retained jurisdiction to reinstate the permit if drought conditions justify resumption of ground water use.

3. Water supply conditions during 1994 justify reinstatement of the permit by the Director.

CONCLUSIONS OF LAW

1. The Director is authorized under Chapter 2, Title 42, Idaho Code, to issue water right permits authorizing the diversion and use of the state's water resources.

2. The Director should reinstate the above captioned permit with certain conditions and limitations.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the above captioned permit is **REINSTATED** with the following conditions and limitations:

1. The permit expires on November 15, 1994.

2. The right to divert water under the above captioned permit is void if the surface water appurtenant to the place of use has been sold, transferred, leased or used on any other place of use without the approval of the department.

AUG 08 1994

3. The permit holder shall use the full allotment of surface water to the extent it is available before diversion is authorized under this reinstated permit.

4. The permit holder shall employ reasonably efficient methods of water application to conserve the water of the state of Idaho.

5. The rate of diversion of water for irrigation under this right and all other rights shall not exceed 0.02 cfs for each acre of land.

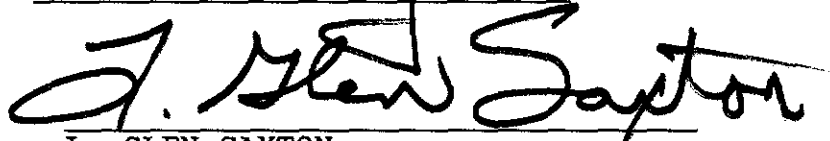

6. This use is subject to all prior water rights.

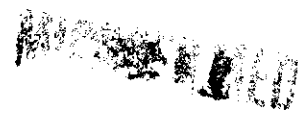

7. The place of use authorized is only that shown on the permit. Permit holder shall prevent use of this water on land for which it is not authorized.

8. This reinstatement does not authorize the construction of new wells or the deepening of existing wells.

9. Failure to comply with the above conditions and limitations of permit use voids this reinstatement.

Dated this 25th day of July, 1994.

L. GLEN SAXTON
Chief, Water Allocation Bureau

AUG 08 1994

State of Idaho
Department of Water Resources

Expired

Permit To Appropriate Water

NO. 63-11689

Proposed Priority: March 5, 1992 Maximum Diversion Rate: 1.60 CFS
This is to certify, that H J BATT WILDER LAND CO LTD
PO BOX 666
WILDER ID 83676

has applied for a permit to appropriate water from: **GROUNDWATER**
and a permit is **APPROVED** for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/15 to 11/15	1.60 CFS

LOCATION OF POINT(S) OF DIVERSION: SWNE , Sec. 15, Township 04N, Range 05W
CANYON County

<u>PLACE OF USE:</u>	<u>IRRIGATION</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
<u>TWN RGE SEC</u>					
04N 05W 15	SWNE	40	SENE	40	80
Total number of acres irrigated:					80

CONDITIONS/REMARKS:

1. This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.
8. This right is subject to all prior rights.

RE: License No. 63-11689 - Issuance of License

Dear Water Right Holder(s):

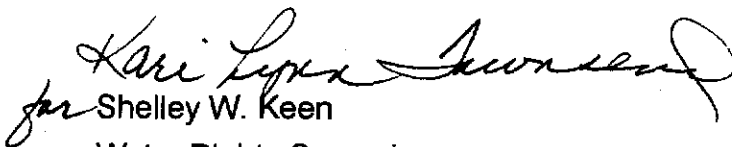

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

for Shelley W. Keen

Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

MICROFILMED
FEB 04 2002

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Comment Report

63-11689

1. skeen 11/27/2001 License Review

Comment: License review by S. Keen on 11/27/2001. No place of use overlap except Wilder Irrigation District. Point of diversion overlap is Application 63-11836. Examiner recommended 71.5 acres and 1.43 cfs. I am recommending 71 acres and 1.42 cfs. ASCS shows 71.4 acres. When digitizing the place of use based on 2000 aerial photography, I got only 71 acres. Also, our rules indicate that we round to the nearest acre for parcels over five acres.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. **Measurements:** This is a supplemental pump that has not been operated this season. I felt that it would be unreasonable to the applicant turn on the pump for a measurement. This could cause the applicant to pay high demand charges for the well. Therefore, a theoretical calculation was performed on the well.

MICROFILMED

FEB 04 2002

E. NARRATIVE/REMARKS/COMMENTS

The water is drawn from a well in the southwest corner of the NE ¼ of section 15, Township 4N, Range 5W. The water is then transported through a mainline to a ditch located approximately 10 feet west of the well. The water in the ditch can travel north through a cement ditch to irrigate the field in the SWNE. The water can also be directed to travel south into the Wilder Irrigation District lateral. This lateral travels east and a headgate is used to divert the well water out of the lateral into a cement ditch that travels north to irrigate the field in the SENE.

There does not seem to be any significant overlap except for the Wilder Irrigation District water. Since this application is a supplemental right to that water this should not be a problem. Application for permit 63-11836 overlaps the point of diversion, but this right is in application form and is not currently being used.

I am concerned about the pump used to draw the water from the well. The pump is a 125 Hp pump that shows a capacity well above the 1.43 cfs allowable for this permit. The pump was installed with the mind set of 63-11836 being processed. However, since this application is currently on hold, I would recommend monitoring of the diversion rate of this system if there is a water shortage.

RECOMMENDATIONS:

I recommend that this permit be licensed for 1.43 cfs and 322 afa for 71.5 acres. This is a supplemental right and when combined with canal water should not exceed .02 cfs per acre or 4.5 afa per acre. The canal should be used to its full extent prior to using the well for irrigation. The season of use for this permit should be changed to current IDWR standards from 3/1 to 11/15.

Have conditions of permit approval been met? X yes * ___ no

* This is an open discharge system so power records can be used to monitor the annual volume of the well.

MICROFILMED

SEP 04 2002

63-11689

F. FLOW CALCULATIONSYES Additional Computation Sheets Attached

Measured Method:

SYSTEM CAPACITY IS 2.31 CFS (SEE ATTACHED THEORETICAL SHEET).

The permit limits the diversion rate to 1.60 cfs and IDWR standard of .02 cfs per acre limits this permit to 1.43 cfs (.02 cfs X 71.5 acres).

THEREFORE THE DIVERSION RATE FOR THIS PERMIT IS 1.43 CFS.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (71.5) \times (4.5) = 322 \text{ AFA}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (1.43) \times (260) \times (1.9835) = 738 \text{ AFA}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 322 \text{ AFA}$$

B

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS

GROUNDWATER THEORETICAL ANALYSIS

FILE: 63-11689

DATE: 8-8-2000

BY: DAN Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$$Q = \frac{(8.8) \times (\underline{125 HP}) \times (0.70)}{[(\underline{263.5}) + (\underline{30} \times 2.31)]} = \frac{770}{332.8} = \underline{2.31 CFS}$$

<u>LIFT FROM:</u>	<u>PSI FROM:</u>	<u>NOTES ON PUMP:</u>
Measurement ()	Measurement ()	Motor Make, Serial or ID
Owner ()	Owner ()	
Area estimate (X)	Estimate (X)	Pump Make, Serial or ID, rating
Well Logs ()	Owner Gage ()	
Booster (Y) (N)		

REMARKS: I LOOKED AT THE PUMP TESTS DONE BY THE well driller AND THEY SHOWED A PUMPING LEVEL BETWEEN 135 AND 185 FT. THE BEST PWT WAS AT 179 FEET. BUT, IN LOOKING AT THE WELL LOG I NOTICED THAT THE WELL WAS DRILLED TO 625 FEET. I WAS CONCERNED ABOUT THIS, SO I DID THE IDWR PUMPING LEVEL ESTIMATE. THIS ESTIMATE SHOWED A PUMPING LEVEL OF 263.5 FT (625 WELLDPTH - 98 STATIC equals 263.5 FT). I USED THIS PUMPING LEVEL.

PSI. I ESTIMATED THE PSI OF THIS SYSTEM AS 30 PSI, BECAUSE OF THE EXCESSIVE PUMP ON THE WELL. EVEN WITH THE INFLATED PUMPING WATER LEVEL AND PSI ESTIMATIONS, THIS PUMP PRODUCES A MUCH ~~MUCH~~ HIGHER DIVERSION RATE THEN THE PERMIT WILL ALLOW. MICROFILMED

RE: ASSIGNMENT OF PERMITS 63-11689 & 63-11760

Dear Mr. & Mrs. Adams:

The department acknowledges receipt of correspondence changing ownership of the above referenced permits to you. The department has modified its records to reflect the changes in ownership and has enclosed computer-generated reports for your records.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact the department if you have questions.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Jeff Peppersack'.

RE: Water Right No. 63-11689

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.
- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.
- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: PERMIT NO. 63-11689

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: Water Right No. 63-11689

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records.

Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms.

RECEIVED
MAY 22 1996

Page 2

If you have questions about the measuring and reporting requirements, please call the department at (208)327-7900 and ask for someone in the Water Distribution Section. If you have questions about other elements of your permit, call me at (208)327-7946.

Sincerely,

TO: File 63-11689

FROM: Shelley W. Keen *SWK*

RE: No committee review

Application for Permit 63-11689 was previously approved on a temporary basis as M63-11689 during the droughts of 1992 and 1994. Basin 63 "drought permits" such as this one are now being reviewed to determine if they can be approved on a permanent basis. Part of the process is review by a technical committee comprised of IDWR staff. The technical committee recently reviewed Application 63-11746, which is located about 1.5 miles from 63-11689, and found no reason to hold up approval. Rather than convene the committee simply to review this one application, I recommend that we rely upon the committee's recommendation for 63-11746 and recommend approval of 63-11689.

Distribution: Applicants Whose Water Right Applications Were Held Without Action Under the Boise River Basin Moratorium

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

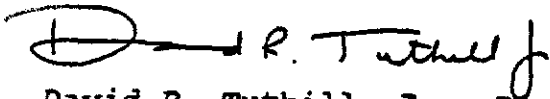

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: PERMIT NO. M63-11689

REINSTATEMENT OF PERMIT APPROVAL

Dear Reinstated Permit Holder(s):

Enclosed is an reinstatement order **authorizing diversion of water** under the above referenced permit.

The Department has reinstated your permit for the remainder of the 1994 irrigation season and the reinstatement will expire on November 15, 1994. When your permit expires, you must make the pump and motor inoperable, and you cannot operate the pump without approval from the Department of Water Resources. The Director may reinstate the permit again next year if drought conditions persist.

Please remember water diverted under your reinstated permit is only to be used on the lands identified on your permit. You must obtain the approval of the Department before using your water anywhere else.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If you have any questions please let me know.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

JJ:dc

AUG 08 1994

DROUGHT RELIEF QUESTIONNAIRE

If you are not interested in having a 1994 temporary permit reinstatement, or if you did not drill a well in 1992, disregard this questionnaire. No response is necessary.

Please answer the questions below. Your answers will help the department assess the need for use of the wells to complete the 1994 irrigation season and the extent of water use that will occur if the department again authorizes use of the wells.

1. Temporary permit identification number. M63-11689
(See cover letter)

2. a) Person responding to this questionnaire

Doug BATT

b) Relationship to applicant? OWNER - MANAGER - PARTNER

3. Do you expect to use all of your surface water supplies for the land identified on the attached application prior to the end of the 1994 irrigation season? Yes X No

4. What is the source of supply? (Name of Canal)

WILDER IRR. DIST.

5. What date do you expect this to occur? FIRST WK Aug.

6. List the type of crop, acreage and volume of water in acre feet (AF) needed under the temporary permit to complete the 1994 irrigation season. List only for the lands included in the land list of the attached application for permit.

<u>CROP</u>	<u>ACRES</u>	<u>ACRE FEET</u>
<u>Hops</u>	<u>80</u>	<u>160</u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>
<u> </u>	<u> </u>	<u> </u>

This questionnaire needs to be completed and returned to the department by August 1, 1994 in order to be considered as a request to reinstate a temporary permit.

RE: Water Right No. M63-11689

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

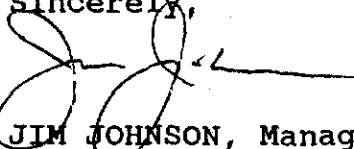

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

RE: PERMIT NO. 63-11689

LETTER OF TEMPORARY PERMIT APPROVAL

Dear Permit Holder(s):

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water is your primary source of water.

AUG 08 1994

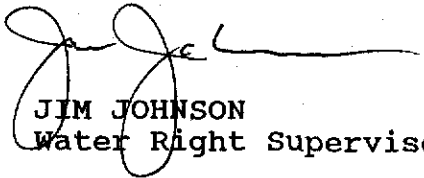

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

MORATORIUM EXEMPTION QUESTIONNAIRE

RECEIVED
MAY 26 1992

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, ~~PLEASE~~ Department of Water Resources
COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated with surface water in the past?

YES

RECEIVED
JUN - 1 1992
Department of Water Resources
Western Regional Office

- Do you summer fallow any of your irrigated land? If so, how many acres?

NO

- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of canal or water district.

Boise Project-Wilder Irrigation District
Golden Gate Canal
Peffley Lateral

- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?

Total Season

- What crops have you grown in the past ten years?

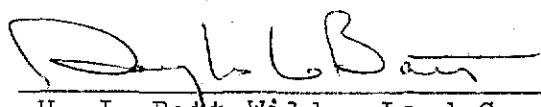

HOPS

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

Dated this 22 day of May, 1992.

Re: Application for Permit No. 63-11689

Dear Applicant:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to the above-referenced application. The Department suggests that you contact the protestant and attempt to resolve the protest.

The Department has just issued a Proposed Memorandum Decision and Order for protested application for permit no. 63-11551 and application for amendment of permit no. 63-11474 in the name of Rim Ranches, Inc. A copy of the Proposed Memorandum Decision which contains information regarding water availability the the Wilder area is enclosed for your information.

As you are aware, the protestant has agreed to not object to the issuance of well drilling permit in this area. Thus, you have been issued a well drilling permit subject to the condition that no water shall be removed from the well until this water right is approved.

If this office has not been advised within twenty (20) days that the protest(s) has been resolved, the matter will be scheduled for a conference. At such a conference, the following are the principle items the Department will review (per Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

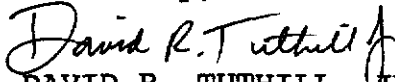

RECEIVED

AUG 08 1994

6. Will the proposed use be contrary to conservation of water resources within the state of Idaho?

Please contact this office if you have questions regarding this procedure.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Manager, Western Regional Office

Re: Protest Relating to the following Applications:
H J Batt Wilder Land Co. Ltd. Application 63-11689

Gentlemen:

This office represents Rim Ranches, Inc. Our Client owns and possesses certain real property situate in Canyon County, Idaho, and holds, or has applied for the following Permits or Amendment to Permits: Permit No. 63-11474; Application for Permit No. 63-11551 and Application for Amendment of Permit No. 63-11474, both in the name of Rim Ranches, Inc.

This letter is to Protest the issuance of the following Permits: Application 63-11689. This Protest is made on each and all the grounds as follows:

1. Rim Ranches, Inc., has applied for a Permit, and an Amendment to Permit, to pump approximately 3.9 c.f.s. from its Well in Canyon County, Idaho. The Applications were Protested by several individuals and entities. A hearing was held on the Applications of Rim Ranches, Inc., on March 05, 1992. A decision has not been made on the Applications of Rim Ranches, Inc., and further it is uncertain whether or not any of the Protestants will file any appeal. If any appeal is filed, it is also uncertain as to whether or not the Department would or would not stay the Permit of Rim Ranches, Inc., if the Permit is granted.

2. If the Rim Ranches, Inc., Permit is granted, but the Department stays the Permit pending any appeal, then it is possible that Rim Ranches, Inc., would not be able to pump water from its well pursuant to the Permit, but yet the H J Batt Wilder Land Co. Ltd., Applicants would be able to pump water if their Permit is

RECEIVED

AUG 08 1994

Page 2
Idaho Department of Water Resources
April 06, 1992

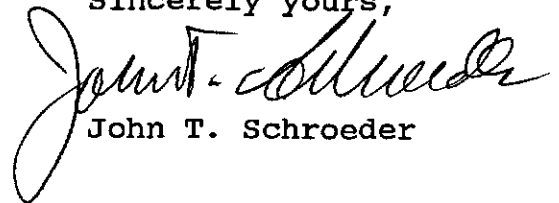

immediately granted. This would be so despite the fact that Rim Ranches, Inc. would have a priority date of February, 1991, some 1 and 1/2 years prior to that of the Batt Ltd., wells under Application.

3. If the Batt Ltd., Applications are granted, but yet the Rim Ranches, Inc., well Applications are not granted or are stayed pending any appeal, Rim Ranches, Inc., **Protests** on the basis that it is not in the local public interest that the Fargo Farms, Inc., Applicants are able to pump water when Rim Ranches, Inc., is **not** able to pump water. In other words, Rim Ranches, Inc., has a prior appropriation date to that of the Batt Ltd., Applicants. Rim Ranches, Inc., believes that it is not fair that other alleged junior rights are able to pump water if Rim Ranches, Inc., is not able to pump water from its senior right.

4. Rim Ranches, Inc., protests on the basis that the junior application of Batt Ltd., may conflict or interfere with the well of Rim Ranches, Inc.

5. Rim Ranches, Inc., reserves the right to withdraw this Protest at the time that Rim Ranches, Inc., is able to pump water from its well currently under application at the level applied for.

Sincerely yours,

John T. Schroeder

Re: Application for Permit No. 63-11691 in the Name of Stephen Kent Garman; No. 63-11689 in the Name of H.J. Batt; Nos. 63-11685 and 63-11686 in the Name of Fargo Farms, Inc.; Nos. 63-11699 and 63-11700 in the Name of Fred &/or Norma Batt; No. 63-11698 in the Name of Paulsen Farms

Dear Protestant:

This office acknowledges receipt of your protests to the issuance of permits pursuant to the above referenced applications. The Department suggests you contact the applicants directly in an effort to determine what is proposed by the applications and to attempt to resolve the protests.

As you are aware, the Department has just issued a Proposed Memorandum Decision and Order for protested application for permit no. 63-11551 and application for amendment of permit no. 63-11474. This decision provides information on the availability of water for appropriation in the Wilder area. The proposed decision has been released to you and the protestants of the aforementioned application.

If this office has not been advised within twenty (20) days that the protests have been resolved, each matter will be scheduled for a conference. At such a conference, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

[Handwritten signature]

AUG 08 1994

6. Will the proposed use be contrary to conservation of water resources within the state of Idaho?

If this office can be of further assistance, please contact us.

Sincerely,

DAVID R. TUTHILL, JR., P. E.
Manager, Western Regional Office

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved Date 4/7/92

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFUL.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. The Surface Seal in this Well shall extend From land Surface to a depth not less than 100 feet below land Surface.
