Permit To Appropriate Water

NO. 63-11676

Proposed Priority: February 10, 1992 Maximum Diversion Rate: 1.75 CFS

This is to certify, that **SYMS FRUIT RANCH INC**
14068 SUNNY SLOPE RD
CALDWELL ID 83605

has applied for a permit to appropriate water from: **GROUNDWATER**

and a permit is **APPROVED** for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/15 to 11/15	1.75 CFS

LOCATION OF POINT(S) OF DIVERSION: NESE , Sec. 23, Township 03N, Range 04W
CANYON County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
03N	04W	23	NESE 40.0	SWSE 40.0	SESE 40.0	120.0

Total number of acres irrigated: 120.0

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **June 1, 1996**.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
7. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.

CONDITIONS OF APPROVAL AND REMARKS

9. This right uses the same well as Right 63-02875.
10. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.
11. This permit does not authorize the development and irrigation of land not previously irrigated under prior temporary approval of this application.
12. Water bearing zone to be appropriated is 210 to 525 feet.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.

Permit To Appropriate Water

Expired

NO. 63-11676

Proposed Priority: February 10, 1992 Maximum Diversion Rate: 2.40 CFS
This is to certify, that SYMMS FRUIT RANCH INC

14068 SUNNY SLOPE RD
CALDWELL ID 83605

has applied for a permit to appropriate water from: GROUNDWATER
and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/15 to 11/15	2.40 CFS

LOCATION OF POINT(S) OF DIVERSION: NESE , Sec. 23, Township 03N, Range 04W
CANYON County

Total number of acres irrigated:						120

CONDITIONS/REMARKS:

1. This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.
8. This right is subject to all prior rights.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

2. **Measurements:** A measurement was made using the polysonic meter. The measurement seemed well within standards and criteria.

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is diverted from a well in the NESE of S23. The water is then transported by a 10-inch mainline due south along Chicken Dinner Road. Hand lines are run off of this mainline to irrigate the fields west of the road. A spur of the mainline comes off the mainline approximately 1/8 of a mile south of the well. This spur runs due west for 1/8 of a mile to another mainline approximately 1/8 of mile west of the road the supplies water to field in the NESE. The spur continues west for another 1/4 mile where it open discharges into two ditches that supply water to lands in the SWSE and the west field in the SESE.

63-11-676

OVERLAP

Wilder Irrigation District rights and license 63-2875 overlap the place of use for this right. Water right 63-2875 uses the same well as this permit. This permit was filed to supplement the canal water, so there should not be any problem with the canal overlap for this permit.

Water right 63-2875 does raise some problems with the overlapping rights. 63-2875 is a water right out of the same well with a diversion rate of 1.02 cfs, which only leaves 0.30 cfs available for a new appropriation. However, both rights do not describe the exact same lands to be irrigated, but they do share acres in the NESE and SESE. This permit was filed to supplement canal water and the full amount of the well could be used when not needed for water right 63-2875. Therefore, this permit should be licensed at the full capacity of the well, but a condition should be in place that limits the combination of the two rights to the capacity of the well and the maximum volume available for the lands irrigated.

RECOMMENDATIONS:

- 1.) I recommend that this permit be licensed for 1.32 cfs and 485.6 afa.
- 2.) When combined with the Wilder Irrigation District rights and 63-2875 this permit should be limited to 0.02 cfs per acre and 4.5 afa per acre.
- 3.) The surface water should be utilized if available before the groundwater is used on these acres. The water from this permit should only be used if surface water is not available or the full amount of surface water is not delivered due to drought or other conditions.
- 4.) When this permit and 63-2875 are combined the maximum number of acres that can be irrigated with the well should be limited to 142.9 acres.
- 5.) The well capacity is 1.32 cfs, so when this permit and 63-2875 are combined the maximum diversion rate of the well should be limited to 1.32 cfs.
- 6.) The combined volume from the well should be limited based on the irrigation requirement of the 142.9 acres covered under both rights or 643.1 afa ($4.5 \times 142.9 = 643.05$). The irrigation volume is still less than diversion capacity volume shown below of 680.73. Therefore, when combined this permit and 63-2875 the annual volume diverted from this well should not exceed 643.1 afa.

Have conditions of permit approval been met? X yes ___ no

This system is complex, but power records could be used if a weighted PCC was incorporated. From the field exam that I performed it looks as though there are 2 basic conditions, diverting to sprinklers and open discharge into the ditch. The owners try to maintain a constant pressure of 70 psi on the pump, which would suggest that a weighted PCC is possible. If a PCC can not be done, the owner has the connector for a impeller meter already installed on the pipe, and a meter could be installed quickly if the power records will not work.

63-11676

F. FLOW CALCULATIONS**YES** Additional Computation Sheets Attached

Measured Method:

Theoretical = 1.39 cfs

Polysonic Measurement = 1.32 cfs

Acre limitation 0.02 cfs/acre X 107.9 acres = 2.16 cfs

Permit Limitation = 1.75 cfs

The limiting factor for this permit would be the actual measurement made on the well. Therefore this permit should be recommended at 1.32 cfs.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 107.9 \times 4.5 = 485.6 \text{ afa}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 1.32 \times 260 \times 1.9835 = 680.73 \text{ afa}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 485.6 \text{ afa}$$

B

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS**1. Recommended Amounts**

Beneficial use	Period Of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
IRRIGATION	3/1	11/30	1.32 CFS	485.6 AFA
TOTAL			1.32 CFS	485.6 AFA

2. Recommended Amendments

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☐ None
☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

GROUNDWATER THEORETICAL ANNALYSIS

FILE: 63-11676

DATE: 9-27-2001

BY: DAN Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$$Q = \frac{(8.8) \times (100 \text{ Hp}) \times (0.70)}{[(281 \text{ Ft.}) + (70 \text{ psi} \times 2.31)]} = 1.39 \text{ CFS}$$

6 24.5 gpm

LIFT FROM:

Measurement ()

Owner ()

Area estimate (x)

Well Logs ()

PSI FROM:

Measurement ()

Owner ()

Estimate ()

Owner Gage (x)

Booster (Y) (N)

NOTES ON PUMP:

Motor Make, Serial or ID

Pump Make, Serial or ID, rating

REMARKS: The lift for this well was calculated
by subtracting the static water level
from the total well depth and divided by
2 to attain the well pumping level.
 $(662 - 100) / 2 = 281 \text{ FT}$

This is very close to the 1.32 CFS
measured.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

A. Draw a map or attach a USGS map indicating the new point(s) of diversion and/or the new place of use for rights described in part 1. Clearly depict the land by section, township and range number.

The map is drawn on a grid. A 2x2 grid of larger squares is centered, representing sections 22, 23, 27, and 26. Section 22 is the top-left square, 23 is the top-right, 27 is the bottom-left, and 26 is the bottom-right. A point 'X' is marked on the boundary between sections 23 and 26. A line points from the text 'Point of Diversion' to this 'X'.

SCALE: 2 inches equal 1 mile. Draw plan in ink.

PART 3

B. CHANGES IN NATURE OF USE

1	New Nature of Use	Amount (cfs/ac-ft)	Hours/days/year	Period of Use
				to
				to

2. Quantity and quality of return flows and location of discharge:

3. Describe effects on other water uses resulting from the proposed change:

*Notary did not show seal here but did in letter dated 9/7/93
to approve OK.*

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willful misrepresentations made in this application may result in voiding its approval.

R. D. Leonard

THIS IS TO CERTIFY that

FORREST M. PROHASKA

HAZEL P. MUNSEY, Assignee

of Boise, Idaho

made application for a permit to appropriate the public waters of the State of Idaho, dated August 18, 1951; that Permit No. 0-22317 was issued under said application; that Certificate of Completion of works, with a carrying capacity of 1.02 second feet, was issued thereunder on October 10, 1958, showing that said works were completed on the 22nd day of August, 1956; and that on the 22nd day of August, 1956, HAZEL P. MUNSEY

of Caldwell, State of Idaho, made proof to the satisfaction of the State Reclamation Engineer

of Idaho, of the right to use the waters of a well

a tributary of subterranean for the purpose of Irrigation

under Use Permit No. 0-22317 of the Department of Reclamation and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume 10 of Licenses at page 643, on the 10 day of October, 1958;

The right hereby confirmed dates from August 18, 1951;

The Point of Diversion is located

in the SE 1/4 SE 1/4 Sec. 23, Tp. 3 N., R. 4 W., E. M. County Canyon

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 1.02 cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated
3 N.	4 W.	24	SW 1/4 SW 1/4	--	35
		23	NE 1/4 SE 1/4	--	37
			SE 1/4 SE 1/4	--	24
Total number of acres irrigated					96

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, as provided by the laws of Idaho.

WITNESS the seal and signature of the State Reclamation Engineer, affixed at Boise, Idaho, this 10th day of October, 1958.

/s/ Geo. M. Carter

State Reclamation Engineer.

DEPARTMENT OF RECLAMATION
BOISE, IDAHO
REPORT OF ENGINEER

Permit No. 1-22317

This proof is for conservation of water for beneficial use in Water District No. _____1. Name of applicant: Harold P. Maloney2. Source of water supply: Subterranean flow from a well3. Location of point of diversion: Is in the SE 1/4 of Section 23County of Canyon

4. Describe works as they exist, giving dimensions and capacities of same:

40 hp. V.S. Motor # 1065242V.S. Turbine pump # 22116no protection. Delivery to wash into a holding pond. water to fields either by gravity or by sprinkler system5. Water is used for: Irrigation6. State whether or not water has been turned into works of diversion: yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

Approx. 57 acres in the E 1/4, Sec. 23, Twp. 3 N., Rge. 1 W., B.V." 37 acres in SW 1/4 of the SW 1/4 of Sec. 24, Twp. 3 N., Rge. 1 W., B.V." 26 acres in NE 1/4 of the NE 1/4 of Sec. 26, Twp. 3 N., Rge. 1 W., B.V.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks:

Mr. MaloneyThis has pumped lots of sand and is still pumping sand

Boise, Idaho 83720

Re: Water Right No. 63-11676, 63-11678, 63-11679

Dear Mr. Saxton,

Per your request in letter of 23 July, 1996, the above referenced wells have been used as follows:

1992 - All three wells were used from the time they were completed to the end of the irrigation season. All three wells were completed and used during 1992.

1993 - None of these wells were used in 1993 as the permits were not valid for the 1993 irrigation season.

1994 - These wells were not used until late in the irrigation season, because your department did not reinstate the permits until the end of July. Water was diverted from all three wells during August and September of 1994.

1995 - Permits 63-11678 and 63-11679 were not used in 1995 as surface water was available at these locations. 63-11676 was used approximately half of the 1995 irrigation season.

1996 - 63-11678 and 63-11679 have not, and we do not intend to use them during the 1996 irrigation season, as surface water is available. 63-11678 has been, and will be used upon occasion (approximately 50%) during the 1996 irrigation season.

We are using these wells within the guidelines of our permits and using the water for beneficial use. I spoke to Julie Yarbrough today by telephone and she indicated that all paper work on these permits was completed.

AUG 21 1996

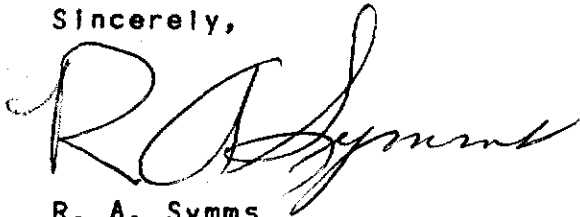

Glen Saxton
Department of Water Resources
July 26, 1996
Page 2

All of these wells are adapted to be measured with a Grain Land FM-400R flowmeter. At this time none of the above wells are operating. If your department plans to measure the water diverted from these wells, please give me advance notice and we will have them in operation for your inspection.

Please advise if you need additional information.

Sincerely,

A handwritten signature in cursive script, appearing to read "R. A. Symms".

RE: Water Right No. 63-11676

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.
- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.
- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

RE: PERMIT NO. 63-11676

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

PERMIT APPROVAL NOTICE

RE: Basin 63 Approved Permit

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records.

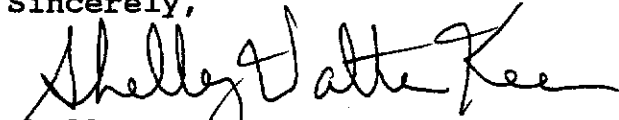

Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms.

MAR 14 1996

Page 2

If you have questions about the measuring and reporting requirements, please call the department at (208)327-7900 and ask for someone in the Water Distribution Section. If you have questions about other elements of your permit, call me at (208)327-7946.

Sincerely,

MEMORANDUM

DATE: March 11, 1996
TO: File No. 63-11676
FROM: Cindy Zimmerman *CZ*
SUBJECT: Overlapping Licensed Right

=====

In April 1992, Symms Fruit Ranch Inc. drilled a 28" by 465' deep well under drilling permit 63-92-W-0154-000 and diverted 2.40 cfs from this well to irrigate 120 acres during the 1992 irrigation season under a temporary permit.

In 1993, Symms Fruit Ranch Inc. transferred (under Transfer No. 4216) License No. 63-02875 to the well drilled in 1992 and has diverted 1.02 cfs from the well since 1993 to irrigate 96 acres, of which 61 acres overlap this application (average rate of 0.0106 cfs/acre).

This application is being recommended for 120 acres of irrigation with the rate of diversion reduced to 1.75 cfs to reflect the partially overlapping right.

RECEIVED
MAR 14 1996

MEMORANDUM

TO: Application for Permit No. 63-11676
FROM: Dave Tuthill *DT*
DATE: February 20, 1996
RE: Review of Application

In accordance with Order Condition No. 3 of the Boise River Basin Amended Moratorium Order dated May 3, 1995, this application has been reviewed and screened by the Department. The review committee consisted of the following personnel:

Mark Slifka, representing well construction concerns.
Janet Crockett, representing water quality concerns.
Shane Bendixsen, representing hydrologic concerns.
Jim Johnson, representing water allocation concerns.
Dave Tuthill, representing reg. office regulatory concerns.

Any additional conditions of approval found to be needed have been added to the supplemental staff analysis sheet which has been prepared and is included in this file.

Re: No. 63-11676

Dear Mr. Lester,

Symms Fruit Ranch was granted a transfer of an old water right (63-02875) with a priority date of August 18, 1951, to the new well 63-11676. The moratorium was lifted and we have been allowed to use this well for irrigation.

Sincerely,

R. A. Symms

Distribution: Applicants Whose Water Right Applications Were Held Without Action Under the Boise River Basin Moratorium

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

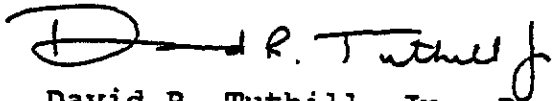

MAR 14 1996

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

RE: Water Right No. M63-11676

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

SYMMS FRUIT RANCH INC
14068 SUNNY SLOPE RD
CALDWELL ID 83605

RE: Water Right No. M63-11676

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON

RE: Illegal Diversion of Water

Dear Mr. Symms:

Enclosed is a Cease and Desist Order in the above referenced matter.

If you disagree with the decision of the Director, you may request a hearing within fifteen (15) days of the date of this order pursuant to Idaho Code §42-1701A.

David R. Tuthill, Jr., P.E.
Manager, Western Regional Office

RECORDED
MAR 14 1996

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF TEMPORARY	)	
	)	ORDER TO
PERMIT NO. M63-11676	)	
	)	CEASE AND DESIST
<u>IN THE NAME OF SYMMS FRUIT RANCH, INC.</u>	)	

The Director of the Department of Water Resources (Department) being charged with the duty of protecting vested water rights and enforcing specific statutes of the State of Idaho and the rules promulgated by the Department, has been authorized to order the cessation of violations or attempted violations of the provisions of law relating to all aspects of the appropriation of water. Based on the Director's investigation of the application of water by Symms Fruit Ranch, Inc. and his understanding of the law, the Director finds, concludes and orders as follows:

FINDINGS OF FACT

1. On May 15, 1992, the Director of the Department issued a moratorium preventing the issuance of certain water rights within the Boise River basin, and establishing provisions for the issuance of temporary water rights.

2. On May 29, 1992 the Department issued to Symms Fruit Ranch, Inc., Moratorium Permit No. M63-11676. The permit was conditioned with the following requirement:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify the resumption of ground water use.

3. Because 1993 is an average year for surface water runoff in the Boise River basin, wells drilled under moratorium permits are not authorized to be pumped.

4. On July 29, 1993, Department personnel conducted a routine inspection of moratorium permits that had been issued during 1992, to ensure compliance with conditions of approval. This inspection

MAR 14 1996

revealed that the well drilled under permit M63-11676 has been used illegally during the summer of 1993.

CONCLUSIONS OF LAW

1. Idaho Code §42-351 provides in part as follows:

If the director of the department of water resources finds, on the basis of available information, that a person is diverting water from a natural water course or from a ground water source without having obtained a valid water right to do so or is applying water not in conformance with the conditions of a valid water right, then the director of the department of water resources may file an action seeking injunctive relief or may issue an order directing the person to cease and desist the activity or activities alleged to be in violation of applicable law or of any existing water right.

2. Idaho Code §42-103 provides as follows:

The right to the use of the unappropriated waters of rivers, streams, lakes, springs and of subterranean waters or other sources within this state shall hereafter be acquired only by appropriation under the application, permit and license procedure as provided for in this title, unless hereinafter in this title excepted.

3. Water has been diverted as described in the findings of fact in violation of the statutes of the State of Idaho and Water Appropriation Rule 3,1,1.

4. The illegal diversion of the public water of the State of Idaho must be stopped to prevent injury to other water rights, to protect the water resources of the state, and to assure that the allocation and use of available water supplies take place in an orderly manner. In the absence of District action to stop expanded and improper use of water, the Department is empowered to take regulatory action.

5. Idaho Code §42-352 provides in part as follows:

Any person who wilfully violates any cease and desist order issued under Chapter 3, Title 42, Idaho Code, after the same has been served on that person shall be subject to a civil penalty to be imposed by the director of the department of water resources not to exceed one hundred dollars (\$100) per diversion.

for each calendar day, or any part of a calendar day, following service of the cease and desist order in which the illegal diversion or use of water occurs.

6. The Director should issue a cease and desist order pursuant to the authority of Idaho Code §42-351.

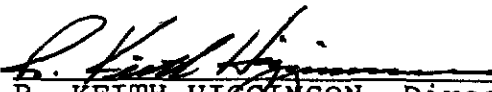

ORDER

IT IS HEREBY ORDERED that Symms Fruit Ranch, Inc. shall immediately CEASE AND DESIST the diversion and use of water as described above.

IT IS FURTHER ORDERED that Symms Fruit Ranch, Inc. not resume the use of water until the Director modifies or rescinds this order or otherwise authorizes the diversion and use of water.

IT IS FURTHER ORDERED that Symms Fruit Ranch, Inc. pay one hundred dollars (\$100) for the use of water for each calendar day or portion thereof that illegal diversion and/or use of water occurs following the service of this cease and desist order.

Dated this 2nd day of August, 1993.

R. KEITH HIGGINSON, Director
Department of Water Resources

CECIL D. ANDRUS
GOVERNOR

R. KEITH HIGGINSON
DIRECTOR

June 2, 1992

SYMMS FRUIT RANCH INC
14068 SUNNY SLOPE RD
CALDWELL ID 83605

RE: PERMIT NO. 63-11676, 63-11677, 63-11678, & 63-11679

LETTER OF TEMPORARY PERMIT APPROVALS

Dear Permit Holder(s):

Enclosed are copies of your approved permits. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permits for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permits expire. The Director may reinstate the permits in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permits expire, you must make the pumps and motors inoperable, and cannot operate the pumps without approval from the Department of Water Resources.

Your permits are for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

RECEIVED

MAR 14 1996

If you want to locate your wells closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the wells 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your wells.

If diversion from your wells cause interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your wells decline below reasonable levels, the Department may require you to cease diverting from your wells.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

JJ:cz

MORATORIUM EXEMPTION QUESTIONNAIRE Department of Natural Resources

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated with surface water in the past?
YES, MOST ALL LAND HAS BEEN IRRIGATED FROM WILDER IRRIGATION DISTRICT
- Do you summer fallow any of your irrigated land? If so, how many acres?
NO
- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of canal or water district.
WILDER IRRIGATION DISTRICT
- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?
MOST YEARS, WATER HAS BEEN AVAILABLE FROM BOISE PROJECT
- What crops have you grown in the past ten years?
ORCHARDS - FRUIT TREES

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

Dated this 28 day of MAY, 1992.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 3/24/1992

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.
