STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-11664 Telephone No. 466-1018

2. Name(s) of Permit Holder(s): Hunter Bros. Inc

3. Mailing Address: 9040 Linden Nampa 83687

4. Source of Water: Groundwater If **GROUNDWATER** (well), Date Drilled: mo. 7 / yr. 92

a. Well Driller: Cope Drilling Permit Number: 63 - 92 - 0 - 173-000

b. *OPTIONAL:*
Pump Horsepower: PTO Pressure (psi): _____ Dynamic pumping level (ft): _____

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): _____ Stockwater (No. and type of stock): _____

Irrigation (No. of acres): 146 Other: _____

6. Total rate of diversion and/or volume for which proof is submitted: 2.92 cfs **OR** _____ acre feet

7. Measuring Device Requirement: **(refer to the approval conditions on your permit and respond accordingly)**
(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device:	Is a measuring device required?	Yes X **or**	No ____
	Has the measuring device been installed?	Yes ____ **or**	No X
Flow Measurement Port:	Is a flow measurement port required?	Yes ____ **or**	No X
	Has the measurement port been installed?	Yes ____ **or**	No X

8. Fee Enclosed: $ 150 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Earl Hunter Telephone Number: 466-1018

Address: 9040 Linden Nampa

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

MAR 2 8 1996

Signature of permit holder: Earl Hunter Sec. Date: 3-5-96

Permit To Appropriate Water

NO. 63-11664

Proposed Priority: February 18, 1992 Maximum Diversion Rate: 2.92 CFS

This is to certify, that **HUTER BROTHERS INC**
9040 LINDEN
NAMPA ID 83687
has applied for a permit to appropriate water from: **GROUNDWATER**

and a permit is **APPROVED** for development of water as follows:

BENEFICIAL USE	PERIOD OF USE	RATE OF DIVERSION
IRRIGATION	03/15 to 11/15	2.92 CFS

LOCATION OF POINT(S) OF DIVERSION: SWNW , Sec. 34, Township 04N, Range 02W
CANYON County

PLACE OF USE: IRRIGATION

TWN	RGE	SEC		ACRES		ACRES		ACRES	TOTAL
04N	02W	27	SWSW	36.0					36.0
		28	SESE	34.0					34.0
		34	NWNW	38.0	SWNW	38.0			76.0

Total number of acres irrigated: 146.0

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **May 1, 1996.**
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
7. This approval does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.

[illegible] JAN 24 1996

State of Idaho
Department of Water Resources

Permit To Appropriate Water

NO. 63-11664

CONDITIONS OF APPROVAL AND REMARKS

9. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.
10. This permit does not authorize the development and irrigation of land not previously irrigated under prior temporary approval of this application.
11. Water bearing zone to be appropriated is 280 to 300 feet.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this

18th day of January, 1996

Karl J. Dreher, Director

for

JAN 24 1996

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name: HUTER BROTHERS INC. 208-466-1018
   Address: 9040 LINDEN
   NAMPA ID 83687

2. Source: GROUNDWATER Trib. to:
3. Location of Point of Diversion: SWNW Sec. 34, Township 04N, Range 02W
   CANYON County

4. Water will be used for the following purposes:

Purpose	From	To	CFS	(or)	AF
IRRIGATION	03/15	11/15	2.920		

5. Total quantity to be appropriated is:
   2.920 CFS (and/or) AF

6. Proposed diverting works:
   a. Description of ditches, flumes, pumps, headgates, etc.
   WELL, OPEN DIS.
   b. Height of storage dam feet; active reservoir capacity acre-feet; total reservoir capacity acre-feet; period of year when water will be diverted to storage: to inclusive.
   c. Proposed well diameter is 16 inches; proposed depth of well is 300 feet.
   d. Is groundwater with a temperature greater than 90F being sought? NO

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 1 years.

8. Description of proposed uses:
   146AC IRRIGATION

9. Place of Use: IRRIGATION

P/D	AMARILLO RIGHT ANGLE GEAR DRIVE AND JOHN DEERE TRACTOR	50 HP	IBL 59470	LAYNE BOWLER	44543

**Code to correspond with No. on map and aerial photo*

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
N/A						

2. Measurements:

The tractor and the pump were not connected during the time of the field exam and it wasn't feasible to ask the owner to set the system up during the field exam. Therefore, I contacted the pump company and acquired pump curve information on the pump and calculated the flow rate based on the total dynamic head (tdh).

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is diverted from a well in the SWNW S34 T4N R2W. The water diverted from the well can then be diverted into a cement ditch to irrigate the 38-acre field in the SWNW S34 or be diverted into a pipeline that travels in a northwesterly direction to a cement distribution box located in the northwest corner of the SWNW S34. From the diversion box the water can be diverted into a ditch that irrigates the 37.7 acre field in the NWNW S34. This same ditch is also used to irrigate the 35 acre field in the SWSW S27. The water in the diversion box can also be diverted through a ditch mainline type system to the 35.3-acre field in the SESE S28. Furrow irrigation is used on all of the fields.

OVERLAP

The only significant overlap is Pioneer Irrigation District. This permit is a supplemental permit to those canal water rights, so these overlapping rights should not be a problem. There is an application filed on the same well, but is being held due to the Basin 63 processing hold.

RECOMMENDATIONS:

I recommend that permit be licensed for 1.18 cfs and 609 afa. When combined with the Pioneer Irrigation District rights the combined water used on the 146 acres should be limited to a combined rate of 0.02 cfs/acre and 4.5 afa/acre. The applicant should be required to retain ownership of the canal shares, and required to use the full allocation of surface water on the property prior to using the groundwater.

Have conditions of permit approval been met? _X__ yes ___ no

The applicant could use the hour clock on the tractor to determine the number of hours the pump is being used to determine the annual volume used from the well. A calibration would be needed to use this type of measurement.

3. **Delivery System Diagram:** Indicate all major components and distances between components. Indicate weir size/pipe i.d. as applicable.

SEE ATTACHED SHEET.

YES Copy of USGS Quadrangle Attached Showing location(s) of point(s) of diversion and place(s) of use (required).

YES Aerial Photo Attached (required for irrigation of 10+ acres).

YES Photo of Diversion and System Attached

4.

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
P/D	AMARILLO RIGHT ANGLE GEAR DRIVE AND JOHN DEERE TRACTOR	50 HP	IBL 59470	LAYNE BOWLER	44543

**Code to correspond with No. on map and aerial photo*

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
N/A						

2. Measurements:

The tractor and the pump were not connected during the time of the field exam and it wasn't feasible to ask the owner to set the system up during the field exam. Therefore, I contacted the pump company and acquired pump curve information on the pump and calculated the flow rate based on the total dynamic head (tdh).

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit is diverted from a well in the SWNW S34 T4N R2W. The water diverted from the well can then be diverted into a cement ditch to irrigate the 38-acre field in the SWNW S34 or be diverted into a pipeline that travels in a northwesterly direction to a cement distribution box located in the northwest corner of the SWNW S34. From the diversion box the water can be diverted into a ditch that irrigates the 37.7 acre field in the NWNW S34. This same ditch is also used to irrigate the 35 acre field in the SWSW S27. The water in the diversion box can also be diverted through a ditch mainline type system to the 35.3-acre field in the SESE S28. Furrow irrigation is used on all of the fields.

OVERLAP

The only significant overlap is Pioneer Irrigation District. This permit is a supplemental permit to those canal water rights, so these overlapping rights should not be a problem. There is an application filed on the same well, but is being held due to the Basin 63 processing hold.

RECOMMENDATIONS:

I recommend that permit be licensed for 1.18 cfs and 609 afa. When combined with the Pioneer Irrigation District rights the combined water used on the 146 acres should be limited to a combined rate of 0.02 cfs/acre and 4.5 afa/acre. The applicant should be required to retain ownership of the canal shares, and required to use the full allocation of surface water on the property prior to using the groundwater.

Have conditions of permit approval been met? _X__ yes ___ no

The applicant could use the hour clock on the tractor to determine the number of hours the pump is being used to determine the annual volume used from the well. A calibration would be needed to use this type of measurement.

F. FLOW CALCULATIONS YES Additional Computation Sheets Attached

Measured Method:

Pump curve information shows the maximum diversion rate is 1.18 cfs. Since no other measurement was possible, I am recommending this amount for the permit.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R}$ = (Acres Irrigated) x (Irrigation Requirement) = 146 acres X 4.5 = 657 afa

$V_{D.R.}$ = [Diversion Rate (cfs)] x (Days in Irrigation Season) x 1.9835 = 1.18 X 260 X 1.9835 = 608.5 afa

V = Smaller of $V_{I.R.}$ and $V_{D.R.}$ = 609 afa

B

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial use	Period Of Use		Rate of Diversion	Annual Volume
	From	To	Q (cfs)	V (afa)
IRRIGATION	3/1	11/15	1.18 CFS	609 AFA
TOTAL			**1.18 CFS**	**609 AFA**

2. Recommended Amendments

__ Change P.D. as reflected above __ Add P.D. as reflected above __ None

__ Change P.U. as reflected above __ Add P.U. as reflected above __ Other

DISTRIBUTION SYSTEM FOR 63-11664

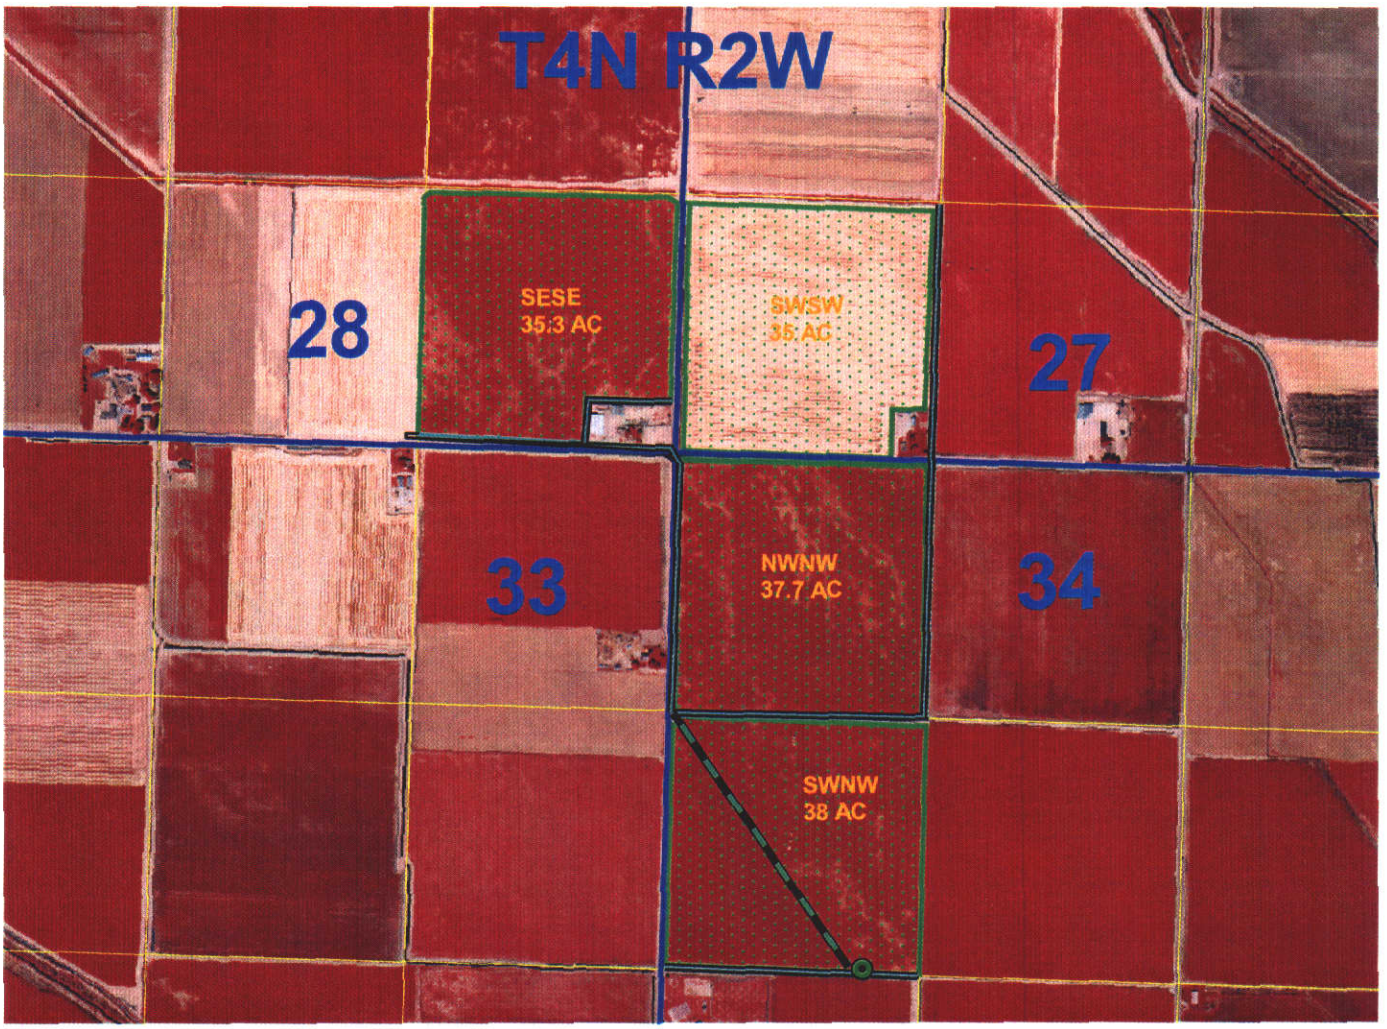

Water for this permit is diverted from the well directly into a cement ditch. The water then travels east or west depending on how the ditch is dammed up. The well can also be diverted into a pipeline that delivers the water to a distribution box. At the distribution box the water is sent east or north through ditches to irrigate the remaining fields.

63-11664

ESTIMATED FLOW BASED ON PUMP CURVE INFORMATION SUPPLIED BY PUMP COMPANY

The pump company supplied the following information on the pump used for this permit:

Designed point for this pump → 550 gpm @ 187 ft TDH
Shutoff head → 700 gpm @ 250 ft TDH

The TDH for this pump is as follows:

154 lift + (10 psi X 2.31) = 177.1 TDH

Calculation of linear curve for the applicant's TDH:

$$\frac{(700\ \text{gpm} - 500\ \text{gpm})}{(115\ \text{tdh} - 187\ \text{tdh})} - \frac{(700 - Q)}{(115\ \text{tdh} - 177\ \text{tdh})}$$

$(700 - 500)\ (115 - 177) = (700 - Q)\ (115 - 187)$

$(200)\ (-62) = (700 - Q)\ (115 - 187)$

$-12400 = (700 - Q)\ (-72)$

$-12400 / -72 = 700 - Q$

$172.22 = 700 - Q$

$172.22 + Q = 700$

$Q = 700 - 172.22$

$Q = 527.78$ gpm

528 gpm / 448.8 = 1.18 cfs

The pump curve shows that the maximum capacity of the well at 177 ft of TDH is 1.18 cfs.

Subject: Searching for a pump curve

Hello - I am the Application Engineer for Layne & Bowler. S/N 44543 was rated design point for 550 gpm @ 187 ft TDH. maximum hp draw anywhere on the curve is approx. 32 bhp. Shutoff head is just over 250 ft. Runout is 115 ft TDH at 700 gpm. Any further questions, please feel free to contact me by email, or (913) 748-4254, or fax at 4030.

Subject:

Ladies and Gentlemen,

I work for the Idaho Department of Water Resources. My duties require that I license water rights for individual water users. I am currently working on a water right license for a farming operation that uses a Layne Bowler pump with a Amarillo Right Angle Driver connected to a 100 Hp tractor. The gear drive has a 1:3 ratio with a 50Hp limitation and 1760 rpm. The pump on
this driver is a Layne Bowler pump Pump # 44543. The calculations that I have used on this pump is well below the amount that the farmer has the ability to pump, and I would like to do everythin within my power to ensure that the farmer gets the most water possible. Is there a way to get the pump curve for this pump? If I could get the pump curve I hope that I can give the farmer the ability to divert more water than I can give him with my
calculations.

Please let me know if you can attain this pump curve or if it is not available.

Thank you very much for your time and efforts.

RE: Water Right No. 63-11664

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.

- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.

- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. Glen Saxton

L. GLEN SAXTON

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-11664

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 63-11664

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1996. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11664

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records. Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you futher information about measuring devices, flow estimation using power records, and annual reporting forms. If you have questions about these requirements, please call the department at (208) 327-7900 and ask for someone in the Water Distribution Section.

RESPONSE FORM

Boise River Basin Moratorium Application

Name of Applicant: Huter Bros Inc.

Address: 9040 Linden

Nampa ID 83687

Water Right No.: 63-11664

Do you wish to proceed with development of the water right as proposed in the application? X Yes ___ No

(If the response is no, please complete and return the enclosed withdrawal form.)

If the source of water that you propose to appropriate is ground water, what aquifer level do you propose to develop to obtain water? 280 ft to 300 ft

Signature: Huter Bros Inc. By Earl Huter

Printed Name: Earl Huter

Please return this form to:

Distribution: Applicants Whose Water Right Applications Were Held Without Action Under the Boise River Basin Moratorium

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that **all** applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

RECEIVED
JAN 24 1996

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

DROUGHT RELIEF QUESTIONNAIRE

If you are not interested in having a 1994 temporary permit reinstatement, or if you did not drill a well in 1992, disregard this questionnaire. No response is necessary.

Please answer the questions below. Your answers will help the department assess the need for use of the wells to complete the 1994 irrigation season and the extent of water use that will occur if the department again authorizes use of the wells.

1. Temporary permit identification number. M63-11664 (See cover letter)

2. a) Person responding to this questionnaire

Huter Bros.

b) Relationship to applicant? owner

3. Do you expect to use all of your surface water supplies for the land identified on the attached application prior to the end of the 1994 irrigation season? Yes X No ____

4. What is the source of supply? (Name of Canal)

Pioneer Nampa-~~Meridian~~ Irrigation Dist.

5. What date do you expect this to occur? Aug. 9th - rotation ??

6. List the type of crop, acreage and volume of water in acre feet (AF) needed under the temporary permit to complete the 1994 irrigation season. List only for the lands included in the land list of the attached application for permit.

CROP	ACRES	ACRE FEET
Beets - 40 ac.	~~X~~ 78	?? unknown
Grain Stubble - 38 ac. (Preparation for beet crop 1995)		

This questionnaire needs to be completed and returned to the department by August 1, 1994 in order to be considered as a request to reinstate a temporary permit.

RE: PERMIT NO. M63-11664

REINSTATEMENT OF PERMIT APPROVAL

Dear Reinstated Permit Holder(s):

Enclosed is an reinstatement order **authorizing diversion of water** under the above referenced permit.

The Department has reinstated your permit for the remainder of the 1994 irrigation season and the reinstatement will expire on November 15, 1994. When your permit expires, you must make the pump and motor inoperable, and you cannot operate the pump without approval from the Department of Water Resources. The Director may reinstate the permit again next year if drought conditions persist.

Please remember water diverted under your reinstated permit is only to be used on the lands identified on your permit. You must obtain the approval of the Department before using your water anywhere else.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If you have any questions please let me know.

Sincerely,

Pamela Skaggs

for JIM JOHNSON, Manager
Water Right Permits Section

Enclosure

AUG 08 1994

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF APPLICATION) FOR PERMIT NO. 63-11664 IN) THE NAME OF HUTER BROTHERS) INC)

REINSTATEMENT ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of drought conditions being experienced during the 1994 irrigation season, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. In May 1992, the department issued the above captioned temporary permit (permit) to use ground water during the 1992 irrigation season to offset the effects of the drought and the associated reduced surface water supply. The permit expired on November 15, 1992.

2. The permit was conditioned that the Director of the department retained jurisdiction to reinstate the permit if drought conditions justify resumption of ground water use.

3. Water supply conditions during 1994 justify reinstatement of the permit by the Director.

CONCLUSIONS OF LAW

1. The Director is authorized under Chapter 2, Title 42, Idaho Code, to issue water right permits authorizing the diversion and use of the state's water resources.

2. The Director should reinstate the above captioned permit with certain conditions and limitations.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the above captioned permit is **REINSTATED** with the following conditions and limitations:

1. The permit expires on November 15, 1994.

2. The right to divert water under the above captioned permit is void if the surface water appurtenant to the place of use has been sold, transferred, leased or used on any other place of use without the approval of the department.

RECEIVED AUG 08 1994

AUG 08 1994

3. The permit holder shall use the full allotment of surface water to the extent it is available before diversion is authorized under this reinstated permit.

4. The permit holder shall employ reasonably efficient methods of water application to conserve the water of the state of Idaho.

5. The rate of diversion of water for irrigation under this right and all other rights shall not exceed 0.02 cfs for each acre of land.

6. This use is subject to all prior water rights.

7. The place of use authorized is only that shown on the permit. Permit holder shall prevent use of this water on land for which it is not authorized.

8. This reinstatement does not authorize the construction of new wells or the deepening of existing wells.

9. Failure to comply with the above conditions and limitations of permit use voids this reinstatement.

Dated this 29th day of July, 1994.

RE: Water Right No. M63-11664

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

> This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

MORATORIUM EXEMPTION QUESTIONNAIRE

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated with surface water in the past?

  Yes

- Do you summer fallow any of your irrigated land? If so, how many acres?

  NO

- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of canal or water district.

  Pioneer Irrigation District

- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?

  10 yrs.

- What crops have you grown in the past ten years?

  Lima beans, Beets, wheat Alfalfa Seed.

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

Dated this 26 day of May, 1992.

(Please sign) Earl Hunter Sec.

RE: PERMIT NO. 63-11664

LETTER OF PERMIT APPROVAL

Dear Permit Holder:

Enclosed is a copy of your approved permit. Your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be your primary source of water.

RECEIVED
AUG 08 1994

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

Lot, block and subdivision

4. **Proposed use of well:**

( ) Domestic: The use of water for homes, organization camps, public campgrounds, livestock and for any other purpose in connection therewith, including irrigation of up to 1/2 acre of land, if the total use is not in excess of 13,000 gpd; or any other uses, if the total use does not exceed a diversion rate of 0.04 cfs and a diversion volume of 2500 gpd.

Domestic does not include water for multiple ownership subdivisions, mobile home parks, commercial or business establishments, unless the use does not exceed a diverstion rate of 0.04 cfs and a diversion volume of 2500 gpd.

(X) Non-Domestic: Any beneficial use not included within the definition of domestic.

( ) Injection

( ) Monitoring - A well bore schematic and map is required for each well.
No. of proposed wells:

(X) Other Irrigation of 146 ac
(Describe)

5. **Well construction information:**

A. (X) New well ( ) Deepen ( ) Enlarge ( ) Replace - See Condition 9

B. Proposed Surface Diameter 16" Proposed Maximum Depth 300±

C. Anticipated bottom hole temperature:

(X) 85°F or less (Cold water well)
( ) 85°F to 212°F (Low temp. geothermal well)
( ) 212° or more (Geothermal well)

6. **Construction Start Date** ASAP.

AUG 08 1994

Anticipated Well Driller Pete Cope Drilling
NOTE: The actual well driller must be identified prior to drilling.

8. **Applicant's signature** Earl Huter Date 3-26-92

Title

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved. Date 3/27/92.

If approved, this permit authorizes the constuction or modification of a well subject to the following conditions. READ CAREFU'

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.
