**ORDER AUTHORIZING
 TEMPORARY CHANGE
 AND CANCELLING
 PREVIOUS TEMPORARY
 CHANGE**

A drought emergency has been declared for Canyon County to allow administrative actions to lessen the severe impacts of the drought conditions in the county.

Section 42-222A, Idaho Code, provides that upon declaration of a drought emergency, the director of the Department of Water Resources (Department) is authorized to allow temporary changes in the point of diversion, the place of use, and the purpose of use for valid existing water rights or temporary exchanges of water, as provided in section 42-240, Idaho Code, when the director determines that such changes can be accomplished in accordance with the provisions of section 42-222A, Idaho Code; and

On September 25, 2001, the Department approved temporary change no. TC-63-02 for J. F. Watson Farms ("Watson") for a portion of permit to appropriate water no. 63-11659.

On October 3, 2001, J. R. Simplot Company ("applicant") submitted the attached Temporary Change Application ("application") to the Department. The application includes but is not limited to most of the water authorized for use in TC-63-02.

The application proposes to change the point of diversion and place of use for portions of permit to appropriate water no. 63-11659 and license no. 63-10611. Although a license has not been issued for permit no. 63-11659, proof of beneficial use has been filed and a field exam conducted. The right has been perfected, and the field exam confirms that the amount of water sought to be transferred under the permit has been recommended for licensing. It is appropriate to include permit no. 63-11659 in the temporary change application.

MICROFILMED
 NOV 26 2001

License no. 63-10611 is owned by Agland Incorporated, which has been telephonically identified as a subsidiary of J. R. Simplot Company. The applicant represented that Wilder Hop Company, owner of permit no. 63-11659, has approved the Simplot application.

Watson requested the Department to cancel temporary change TC-63-02 on October 5, 2001, to allow the applicant to use most of the water identified in Watson's temporary change approval.

The Department has reviewed the application and has determined the application can be approved with certain conditions.

The applicant assumes all risk and is the responsible party if diversion and use of water under the temporary change approval causes injury to other water rights, constitutes an enlargement in use of the original right, is inconsistent with the conservation of water resources within the state of Idaho, or is not in the local public interest.

ORDER

IT IS HEREBY ORDERED that the application is **APPROVED** subject to the following conditions:

1. Diversion and use of portions of water right nos. 63-10611 and 63-11659 are authorized only at the point of diversion and place of use described on the application or as otherwise approved in this order.
2. The temporary approval is based on 1.17 cfs for 97 acres from license no. 63-10611 and 1.26 cfs for 63 acres from permit no. 63-11659.
3. This temporary change approval does not authorize construction of a new well as a new point of diversion.
4. This temporary change approval may only be used to provide a replacement water supply to lands or other uses that normally have a full water supply, except for the drought condition. This temporary change approval may not be used to provide water for new development or to allow expansion of the use of water under existing water rights.
5. This temporary approval does not authorize the use of diversion works or a delivery system owned by or managed by a corporation or an irrigation district without the written consent of such corporation or irrigation district.

MICROFILMED

NOV 26 2001

6. The applicant agrees to hold the director and the state of Idaho harmless from all liability on account of the diversion and use of water under this temporary change approval.
7. This temporary change approval does not grant any right-of-way or easement to use the diversion works or conveyance works of another person or entity.
8. This temporary change approval expires on November 15, 2001, unless rescinded or extended by the director. Thereafter, the water right shall revert to the point of diversion, place of use and nature of use existing prior to the temporary change approval.
9. Temporary change no. TC-63-02 for J. F. Watson Farms is cancelled.

DATED this 5th day of October, 2001.

IN THE MATTER OF APPLICATION)
FOR TEMPORARY CHANGE OF)
PERMIT NO. 63-11659 (part) IN THE)
NAME OF J. F. WATSON FARMS)
_____)

**ORDER AUTHORIZING
TEMPORARY CHANGE**

A drought emergency has been declared for Canyon County to allow administrative actions to lessen the severe impacts of the drought conditions in the county.

Section 42-222A, Idaho Code, provides that upon declaration of a drought emergency, the director of the Department of Water Resources (Department) is authorized to allow temporary changes in the point of diversion, the place of use, and the purpose of use for valid existing water rights or temporary exchanges of water, as provided in section 42-240, Idaho Code, when the director determines that such changes can be accomplished in accordance with the provisions of section 42-222A, Idaho Code.

On September 25, 2001, J. F. Watson Farms ("applicant") submitted the attached Temporary Change Application ("application") to the Department.

The application proposes to change the place of use for a portion of permit to appropriate water no. 63-11659. Although a license has not been issued for permit no. 63-11659, proof of beneficial use has been filed and a field exam conducted. The right has been perfected, and the field exam confirms that the amount of water sought to be transferred will be recommended for licensing. It is appropriate to file the temporary transfer application.

The applicant assumes all risk and is the responsible party if diversion and use of water under the temporary change approval causes injury to other water rights or constitutes an enlargement in use of the original right.

ORDER

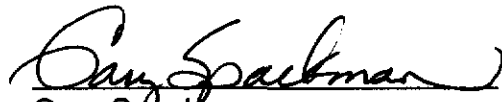

IT IS HEREBY ORDERED that the application is **APPROVED** subject to the following conditions:

1. Diversion and use of the portion of water right no. 63-11639 sought to be transferred is authorized only at the point of diversion and place of use described on the application or as otherwise approved in this order.

MICROFILMED
NOV 26 2001

2. This temporary change approval does not authorize construction of a new well as a new point of diversion.
3. This temporary change approval may only be used to provide a replacement water supply to lands or other uses that normally have a full water supply, except for the drought condition. This temporary change approval may not be used to provide water for new development or to allow expansion of the use of water under existing water rights.
4. This temporary approval does not authorize the use of diversion works or a delivery system owned by or managed by a corporation or an irrigation district without the written consent of such corporation or irrigation district.
5. The applicant agrees to hold the director and the state of Idaho harmless from all liability on account of the diversion and use of water under this temporary change approval.
6. This temporary change approval does not grant any right-of-way or easement to use the diversion works or conveyance works of another person or entity.
7. This temporary change approval expires on December 31, 2001 unless rescinded or extended by the director. Thereafter, the water right shall revert to the point of diversion, place of use and nature of use existing prior to the temporary change approval.

DATED this 25th day of September, 2001.

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-11659 Telephone No. 482-6448 / 482-6250
2. Name(s) of Permit Holder(s): Wild Ida Corp / Wilder Hop Co.
3. Mailing Address: P.O. Box 287, Wilder, Id. 83676-0287
4. Source of Water: Groundwater If **GROUNDWATER** (well), Date Drilled: mo. / yr. 92
 - a. Well Driller: Drilling Permit Number: 63 - 92 - W - 203
 - b. **OPTIONAL:**
Pump Horsepower: Pressure (psi): Dynamic pumping level (ft):
5. Use(s) (as authorized by the water right permit):
Domestic (No. of households): Stockwater (No. and type of stock):
Irrigation (No. of acres): 143 Other:
6. Total rate of diversion and/or volume for which proof is submitted: 2.86 cfs OR acre feet
7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)
(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device:	Is a measuring device required?	Yes ☒	or No ☐
	Has the measuring device been installed?	Yes ☒	or No ☐
Flow Measurement Port:	Is a flow measurement port required?	Yes ☐	or No ☐
	Has the measurement port been installed?	Yes ☐	or No ☐
8. Fee Enclosed: \$ 150.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Same as above Telephone Number:

Address:

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Signature of permit holder:

(include your title, if on behalf of company of organization)

		16	NESE 35.0	SESE 28.0		63.0

Total number of acres irrigated: 143.0

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before May 1, 1996.
2. Subject to all prior water rights.
3. Prior to diversion of water under this right, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to use power records to determine the amount of water diverted from each point of diversion listed under this right.
4. The right holder shall measure and annually report diversions of water and other pertinent hydrologic and system information as required by Section 42-701(5), Idaho Code.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right.
6. The rate of diversion of water for irrigation under this right and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.
7. This permit does not authorize the construction of any new well or the deepening or enlargement of any existing well.
8. Failure to comply with any condition of approval is cause for the Director to cancel this right.

RE: License No. 63-11659 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a copy of the approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right Permit No. 63-11659

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 Point(s) of Diversion

✓ Place(s) of Use

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

If you have any questions, please call me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

Comment Report

63-11659

1. skeen 10/9/2001 License Review

Comment: License review by S. Keen on 10/9/2001. Only active overlap is Wilder Irrigation District. Claim 63-4428 is claimed in the SRBA on other lands. Application 63-11867 has not yet been approved.

The examiner reported 269.9 acres of irrigation, but he does not describe his method of determining that number. I used the aerial photography from 2000 to heads-up digitize the place of use in ArcView. I came up with 265 acres, which is the number I will use to draft the license.

2. CZIMMERM 1/11/1996 CORPORATE OFFICERS

Comment: The corporate officers of Wild-Ida Corporation are: Reed Batt, President; Stuart Batt, Vice-President; and Stephen Batt, Secretary/Treasurer. The corporate officers of Wilder Hop Company are: Fred Batt, President; Norm Batt, Vice-President; and Ellen B Batt, Secretary/Treasurer.

E. NARRATIVE/REMARKS/COMMENTS

The water for this well is drawn from a well located in the SESE Section 16. The water from the well can travel in 3 directions. The first direction is due west to a cement ditch that travels north and irrigates the fields on the western edge of the place of use in Section 16.

The second direction the water can travel is due south to a head box that supplies water to an underground pipe that travels east along the southern border of the place of use. The pipe empties into a ditch just past the border between Section 15 and 16. This ditch travels north and irrigates the fields on the western edge on Section 15 and also feeds a ditch that parallels Peckham Road approximately $\frac{1}{4}$ of a mile north of the road. This ditch is used to irrigate the fields in the northern $\frac{1}{2}$ of the southern $\frac{1}{2}$ of Section 15. The original pipe continues on traveling east to a cement ditch that irrigates the southeastern most field in section 15.

The third direction the water can travel from the well is due west into the Wilder Irrigation District canal. No water is taken out of the canal for this place of use.

OVERLAPPING RIGHTS:

The only overlapping rights for this permit are the Wilder Irrigation District rights and an application for permit, which is currently being held due to a processing backlog.

RECOMMENDATIONS:

I recommend that this permit be licensed for 2.86 cfs and an annual volume of 643.5 afa. This permit should only irrigate 143 acre in a single season within the 269 acre permissible place of use described above. The applicants should be required to use the full allocation of surface water on this land before they begin pumping the well.

Have conditions of permit approval been met? ☒ yes* ☐ no

* This is an open discharge well, so power records and a PCC could be used to measure and monitor the well.

MICROFILMED

Re: Response to Well Use Inquiry, Permit No. 63-11659

Dear Water User:

Thank you for your recent response to my letter of August 22 regarding possible well use for the above-referenced permit. Your cooperation in this matter has been appreciated.

I am forwarding a copy of your response to the Water Distribution Section in the department's central office, also located in Boise. If you have any questions regarding the options for annual water measurement reporting requirements that are identified on your permit, please contact that Section at 327-7900.

Additional follow-up on this matter is not necessary at this time. Please contact me at your convenience if you have any other questions regarding your "drought well" permits.

Sincerely,

Steve Lester
Deputy Regional Manager

CONVERSATION MEMORANDUM

DATE 8/29/96FILE 63-11659NAME OF PARTY FRED BATTEMPLOYEE Cindy HodgesRE: Steve's Letter.

Mr. Batt very displeased to receive Steve's letter. He feels we are unduly alleging that their well is being pumped illegally & that we should have checked w/ Idaho Power first.

I reminded him that ① Idaho Power records cannot be accessed by us w/o owner's consent ② wells & pumps were required to be disabled after the 1994 reinstatement ③ Many other 92 wells were also being checked & letters sent & ④ w/ respect to the domestic complaint, I pointed out that there was no obvious correlation between the 2 wells.

~~asked~~ In answer to one of Steve's questions: the power is on to the well because it is used as an emergency supply well for Wilder Fire Dept.

Mr. Batt did not offer further explanations but indicated that he would follow up in writing to either Steve or myself.

RE: WATER RIGHT PERMIT NO. 63-11659

Dear Water Right Holders:

This letter is in part a follow-up to the department's July 23, 1996 letter to owners of the "1992 drought permits" and in part a result of a complaint regarding your above-referenced "drought permit". A neighbor reported problems concerning a domestic well and indicated that your well has been in continuous use during this irrigation season. The allegation stated that your irrigation well usage has caused the domestic well to "go dry". At this time, this office does not have evidence that your irrigation well has been used in 1996.

During the field inspection, your irrigation well was not found to be in use. Furthermore, the inspector was informed by your representative that the well has not been used at all in 1996. As you can see in the attached copy of the field report memorandum for the August 9 complaint inspection (which also coincides with the department's July 23 statement that the "drought permits" would be inspected to determine compliance with conditions of approval listed on the permits), there does not appear to be an observable relationship between water right no. 63-11659 and the Orozco domestic well.

However, it appeared that power was being supplied to your irrigation well. Due to an adequate surface water supply this year and because the permit is intended to provide supplemental and/or replacement water, this office is seeking a better understanding of why your well currently has power supplied to it.

Please provide an explanation of your well usage by contacting this office at your convenience by September 3, 1996. As mentioned in the July 23 letter, please note the conditions of approval listed on your permit. In your reply to today's letter, please include information that addresses the following points:

- Why is power currently supplied to the well? If any use has occurred or will occur from the well, please specify which acres are involved (via map or land list).
- How do you intend to measure and report the amount of water diverted from the well during the 1996 irrigation season if the well has been used or will be used this year?

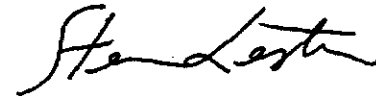

RECEIVED
SEP 12 1996

Permit No. 63-11659
August 22, 1996
Page 2

- Are you using all of the available surface water for the land listed on your well permit? Does your surface water allotment provide one miner's inch per acre? Please explain the reasons for not fully utilizing surface water if that describes your situation.

Thank you for your cooperation regarding this "drought permit". If you have any questions, please feel free to contact this office.

MEMORANDUM

August 9, 1996

TO: File 63-11659

FROM: Cindy Hodges *ch*

RE: Complaint Investigation

Three different staff members received calls from Melissa Orozco, who reported that an irrigation well operated by Wilder Hop Co. was pumping excessively, and that her domestic well had pumped dry in response. The Wilder Hop Co. well (aka "Batt well") is located approximately $\frac{1}{4}$ mile to the east of Orozco's home. The Batt well was constructed pursuant to the above "M" permit in 1992. I conducted a site visit today.

Earlier in the day, I had spoken to Mr. Dale Kenyon, Melissa Orozco's father, who indicated that the Batt well had been pumping last night. When I arrived in Wilder, I found that the Batt well was not operating, and the motor was cold (ruling out a recent shut down) but that power was connected to the power meter. I did find a nearby pump station relifting surface water to an undetermined location. This pump was connected to a separate meter. (see field notes for meter SN's)

I was accompanied at the Orozco well by Juan Orozco and Dale Kenyon. The well was drilled for Mr. Kenyon's mother in 1972, to replace a connection to an old shared well, and is 198 feet deep. Orozcos first experienced problems in 1992, about the time the Batt well was constructed. In 1994, Bill Doty Drilling installed a new 1 HP pump and lowered the pump setting by 60 feet. Mr. Kenyon did not know what the previous setting was, but the new setting has to be near the bottom of the well, based on the 1972 SWL of 120'. According to both gentlemen, no shortages occurred during either 1993 or 1995, but problems began again this year when the Batt well started pumping. I did not have a well probe to check for standing water, but Mr. Orozco turned on the power to the pump to demonstrate lack of flows. The well head pressure gage did not register a reading and no water flowed out the nearest tap. Unless the pump is malfunctioning, this suggests that water levels have fallen below the level of the pump.

I noticed that at least three homes immediately adjacent to the Orozco home were sprinkling lawns. All homes in this area are on private wells; few use surface water for lawn irrigation. I wondered why the Orozco well was impacted and the neighboring wells were not. Mr. Kenyon and I spoke with neighbor Ed Kyle, who said his well was about 300' deep, and a well owned by Brewer was 300+ feet deep. (both wells in S21) I could not find the Kyle well log, but the Brewer well log shows a total depth of only 192', roughly the same as the Orozco well. Several wells have been constructed in this area within the past 5 years, all to about the 200' range. To my knowledge, these well owners have not reported problems. This is puzzling and may indicate a well construction and/or pump problem at the Orozco well.

8/9/96

Fred Batt met me at the well site shortly after I arrived, and returned later with Reed Batt to visit with me and Mr. Kenyon. They both insist that the well has not been operated in at least 18 months, and not at all this year.

Mr. Kenyon later expressed uncertainty over his own observations, and wondered whether it was the relift pump rather than the irrigation well he heard operating. However, the Batts did not offer an explanation as to the reason the power was connected to the irrigation well if it was not in use. Any letter sent to the Batts should emphasize that I did not observe the well in operation, but did observe the active status of the meter.

RE: Water Right No. 63-11659

Dear Water Right Holder(s):

Early in 1996, the department issued the above referenced permit to you authorizing the diversion of water from a well(s) to be used to supplement the irrigation of land which is primarily irrigated with surface water shares. Most of these permit applications were originally filed in 1992 and are sometimes referred to as "1992 drought permits".

The purpose of this letter is to specifically call to your attention some of the conditions of approval dealing with use of water under your permit(s). Please note the following:

- You are required to measure and annually report to the department the amount of water you have diverted from your well. This includes the amount of water diverted during the 1996 irrigation season.
- You are required to use all of the surface water to which you are entitled each season in connection with use of water under your permit.
- If you sell, transfer, lease or use your surface water rights on any other place of use, the permit issued to you to divert supplemental groundwater is not valid.

The department plans to field inspect use of water under the drought permits to determine compliance with the conditions listed on the permits.

If you have questions, please feel free to contact the department.

Sincerely,

L. Glen Saxton
L. GLEN SAXTON
Chief, Water Allocation Bureau

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-11659

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH

PROOF DUE NOTICE

RE: PERMIT NO. 63-11659

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1996.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

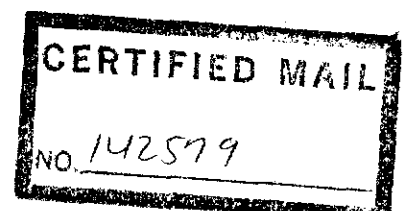

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11659

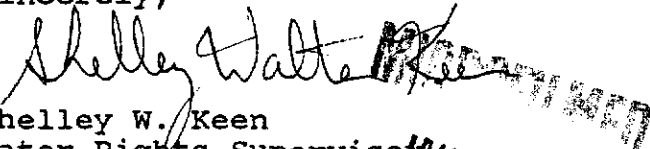

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that one of the conditions of approval on your permit requires that you install a measuring device or sign an agreement with the department to determine your diversion using power records prior to diverting water. You may choose to install a measuring device, or you may ask the department to review your system to determine whether your diversion can be estimated with power records. Another condition of approval requires that you measure your diversion and record other important hydrologic and physical features and report them annually to the department. The department will shortly send you further information about measuring devices, flow estimation using power records, and annual reporting forms. If you have questions about these requirements, please call the department at (208) 327-7900 and ask for someone in the Water Distribution Section.

Sincerely,

Shelley W. Keen

FROM: Dave Tuthill *DT*
DATE: August 17, 1995
RE: Review of Application

In accordance with Order Condition No. 3 of the Boise River Basin Amended Moratorium Order dated May 3, 1995, this application has been reviewed and screened by the department. The review committee consisted of the following personnel:

Doug Davidson, representing well construction concerns.
Janet Crockett, representing water quality concerns.
Shane Bendixsen, representing hydrologic concerns.
Dave Tuthill, representing regulatory concerns.

Any additional conditions of approval found to be needed have been added to the supplemental staff analysis sheet which has been prepared and is included in this file.

PHILIP E. BATT
GOVERNOR

KARL J. DREHER
DIRECTOR

May 19, 1995

**Distribution: Applicants Whose Water Right Applications Were Held
Without Action Under the Boise River Basin
Moratorium**

Dear Applicant:

As you might be aware, on May 3, 1995 the Director of the Department of Water Resources, Mr. R. Keith Higginson, signed an Amended Moratorium Order which provides for the processing of previously held applications within the Boise River Basin, with certain restrictions. Enclosed for your information is a copy of the Order.

As provided in the Order, this office will resume the processing of these applications in order of priority at a rate of 30 applications per month. Depending on how many applicants wish to proceed with development of their projects, the processing of the 338 presently-held applications could require as much as a year. To enable you to make an estimate as to when your application(s) will be processed, please be advised that 244 of the applications have priority (receipt) dates of 1992; 32 are dated 1993; 37 are dated 1994; and 25 are dated 1995.

As new applications are received, they are sorted into two groups. Those that would not have been held back under the moratorium are processed immediately. To assure fairness in processing, those that would have been held back under the moratorium, such as irrigation applications, are placed at the end of the moratorium processing line.

Note that the Order requires that all applications held under the moratorium will be advertised (or re-advertised if previously advertised), in order to enable neighboring water users to examine the proposed uses in view of water availability information gained during recent drought years. There will be no additional charge to the applicants for this process. For applications that propose use of ground water, the advertisement must include an indication of the depth interval from which the applicant proposes to withdraw water.

Please find enclosed a Profile Report which provides information from our water rights data base describing each of your moratorium-held applications. In addition we have included one response form for each application, which enables you to indicate whether you wish to proceed with processing of your water right application(s).

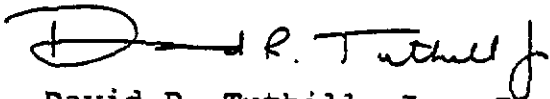

RECORDED
INDEXED

May 19, 1995

In case you no longer intend to develop a water use as described on an application, please complete and return the enclosed Withdrawal Form. Because of the time and effort already devoted to researching water availability in the Boise River basin, the Department will not be able to provide refunds of fees for applications that are withdrawn.

If you have questions about this process, or if you need assistance in completing the response form, please feel free to contact this office at (208) 334-2190. Response forms received no later than May 31, 1995, will be used in compiling the applications that will be advertised during June.

Sincerely,

David R. Tuthill, Jr., P. E.
Manager, Western Region Office

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION)
FOR PERMIT NO. 63-11659 IN)
THE NAME OF WILDER HOP CO)
WILD-IDA CORPORATION)
_____)

REINSTATEMENT ORDER

This matter having come before the Idaho Department of Water Resources (department), as a result of drought conditions being experienced during the 1994 irrigation season, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. In May 1992, the department issued the above captioned temporary permit (permit) to use ground water during the 1992 irrigation season to offset the effects of the drought and the associated reduced surface water supply. The permit expired on November 15, 1992.

2. The permit was conditioned that the Director of the department retained jurisdiction to reinstate the permit if drought conditions justify resumption of ground water use.

3. Water supply conditions during 1994 justify reinstatement of the permit by the Director.

CONCLUSIONS OF LAW

1. The Director is authorized under Chapter 2, Title 42, Idaho Code, to issue water right permits authorizing the diversion and use of the state's water resources.

2. The Director should reinstate the above captioned permit with certain conditions and limitations.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the above captioned permit is **REINSTATED** with the following conditions and limitations:

1. The permit expires on November 15, 1994.

2. The right to divert water under the above captioned permit is void if the surface water appurtenant to the place of use has been sold, transferred, leased or used on any other place of use without the approval of the department.

AUG 08 1994

3. The permit holder shall use the full allotment of surface water to the extent it is available before diversion is authorized under this reinstated permit.

4. The permit holder shall employ reasonably efficient methods of water application to conserve the water of the state of Idaho.

5. The rate of diversion of water for irrigation under this right and all other rights shall not exceed 0.02 cfs for each acre of land.

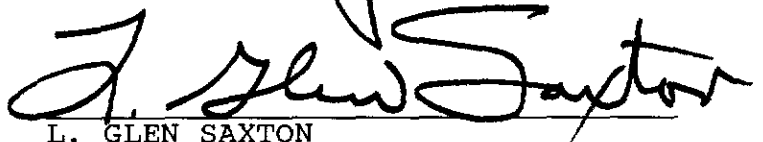

6. This use is subject to all prior water rights.

7. The place of use authorized is only that shown on the permit. Permit holder shall prevent use of this water on land for which it is not authorized.

8. This reinstatement does not authorize the construction of new wells or the deepening of existing wells.

9. Failure to comply with the above conditions and limitations of permit use voids this reinstatement.

Dated this 29th day of July, 1994.

RE: PERMIT NO. M63-11659

REINSTATEMENT OF PERMIT APPROVAL

Dear Reinstated Permit Holder(s):

Enclosed is an reinstatement order **authorizing diversion of water** under the above referenced permit.

The Department has reinstated your permit for the remainder of the 1994 irrigation season and the reinstatement will expire on November 15, 1994. When your permit expires, you must make the pump and motor inoperable, and you cannot operate the pump without approval from the Department of Water Resources. The Director may reinstate the permit again next year if drought conditions persist.

Please remember water diverted under your reinstated permit is only to be used on the lands identified on your permit. You must obtain the approval of the Department before using your water anywhere else.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If you have any questions please let me know.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Jim Johnson', with a horizontal line extending to the right.

DROUGHT RELIEF QUESTIONNAIRE

RECEIVED

JUL 28 1994

If you are not interested in having a 1994 temporary permit reinstatement, or if you did not drill a well in 1992, disregard this questionnaire. No response is necessary.

Please answer the questions below. Your answers will help the department assess the need for use of the wells to complete the 1994 irrigation season and the extent of water use that will occur if the department again authorizes use of the wells.

1. Temporary permit identification number. M63-11659
(See cover letter)

2. a) Person responding to this questionnaire

Errol Batt

b) Relationship to applicant? Same

3. Do you expect to use all of your surface water supplies for the land identified on the attached application prior to the end of the 1994 irrigation season? Yes No

4. What is the source of supply? (Name of Canal)

Wilder Irrigation Dist.

5. What date do you expect this to occur? Aug 20, 1994

6. List the type of crop, acreage and volume of water in acre feet (AF) needed under the temporary permit to complete the 1994 irrigation season. List only for the lands included in the land list of the attached application for permit.

CROP	ACRES ✓	ACRE FEET ✓
<u>Hops</u>	<u>63</u>	<u>70</u>

This questionnaire needs to be completed and returned to the department by August 1, 1994 in order to be considered as a request to reinstate a temporary permit.

RE: Water Right No. M63-11659

Dear Water Right Holder(s):

In 1992, the Department issued you a temporary permit to use groundwater from your well, if you drilled one, to replace depleted storage water supplies. This temporary permit expired on November 15, 1992.

During 1994, since available surface water supplies are again substantially below normal, the department has received a number of requests to re-authorize use of the "1992 drought relief" wells.

The department is willing to consider reinstating the temporary permits for the remainder of 1994 provided you can show that you used water under the 1992 temporary approval and that water will be used only on the lands identified on the temporary permit. Enclosed is a questionnaire which you must complete and return to the department if you want to be considered for reinstatement in 1994.

Also enclosed, for your reference, is a record of your application for permit.

Please be advised that unless the department specifically reinstates the expired permit, you are not authorized to divert and use the water from the well identified on the temporary permit.

If you have any questions, please feel free to contact me at Ph. 327-7947.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Jim Johnson', with a horizontal line extending to the right.

RE: REQUEST TO USE DROUGHT RELIEF WELL

Dear Mr. Batt:

This letter follows up your recent phone conversation with me in connection with the use of drought relief wells in 1994. The department has received several other inquiries which are similar to yours.

I have checked with the Boise Project Board of Control to determine if they planned to change the allotment of 2.5 AF per acre this year based on new projections or upon the weather patterns this spring. The Board of Control advised that they do not plan to change the allotment.

As you probably know, to assist irrigators to cope with the extreme drought conditions experienced in 1992, the department issued 167 temporary permits to pump ground water from aquifers in the Boise Valley. The permits allowed use of ground water to replace normally adequate surface water supplies. The authority to use water under these temporary permits expired at the end of the 1992 irrigation season. The wells or pumps were to be disabled to prevent further diversions until a permanent right to appropriate water had been obtained from the department. Permits have not been issued to operate the drought emergency wells because a moratorium on approving permits for new consumptive use of water remains in effect throughout the Boise Valley.

The department retained jurisdiction to extend the temporary authorization to use the wells if drought conditions persisted. An extension was given to allow use for a two week period at the start of the irrigation season this year because of the unusually dry conditions. At this time the canals are providing an adequate supply but, no one can predict what the remainder of the spring and summer will bring in terms of additional moisture.

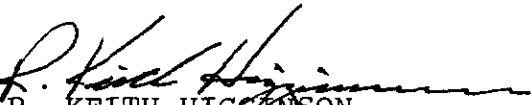

If drought conditions continue through the summer and the fall, the department will consider extending approval of the permits allowing the use of drought relief wells constructed in

1992, if the surface water supply available to users is exhausted prior to the end of the irrigation season and high value crops such as orchards and vineyards require an emergency supply to survive or to mature.

Any extension by the department would be specifically conditioned to not authorize the construction of new wells which did not exist by the end of 1992. Conditions of use would be similar to that in 1992 and would require that the drought relief wells not be authorized for use on "new" lands, i.e. lands which were not irrigated in 1992. Drought relief well use would only be authorized after surface supplies have been depleted and not for use in conjunction with surface water. Users would be required to show that they have not sold, moved or leased surface water from the land to which the drought relief wells apply.

To insure compliance with this practice, the department plans to periodically field check the status of drought relief wells during 1994 while surface water is available for use to determine compliance with the permits issued for drought relief. If you have additional questions, please feel free to contact the department.

Sincerely,

R. KEITH HIGGINSON
Director

APR 15 1994

Department of Water Resources

1

R. Keith Higginson
Dept of Water Resources
1301 North Orchard Street
Statehouse Mail
Boise, Idaho 83720-9000

Dear Mr. Higginson:

In response to our telephone conversation of 4-8-94, I would like to submit the following information regarding my water usage during our two most recent drought years (91 and 92) and the relationship of this usage to our current water allotment.

As we discussed, it has been announced that we are to receive 2.5 acre feet of water per acre during the 1994 growing season. You mentioned that due to the fact that the irrigation system would remain full and water would continue to be delivered throughout the entire season, there would be adequate supplies, and therefore no need for farmers to use their wells.

In a normal year we are supposed to receive 3.75 acre feet of water per acre. While it is true that in some years we have been able to get by with less, this depends on many variables, such as the types of crops planted and the weather that the summer brings. Many of the cash crops we grow in this area in fact require close to 4 acre feet per acre regardless of what the allotment may be. This means that we must come up with the difference through other means, either by purchasing water from other farmers who elect to idle their ground or by pumping water from our wells. It has also been mentioned that since we have gotten by on less water in previous years of allotment reduction, we can continue to do so now. This has been done so by idling ground or providing certain crops a smaller percentage of the water they need in order to stretch their supply. Neither option is very productive or popular.

In 1991, our allotment was 1.8 acre feet per acre. During this season I purchased an additional 320 acre feet to supplant my water needs on my 250 acres of hops. In addition, I pumped from a well which provided 90 inches of water daily for approximately 90 days. Water was purchased at a cost of 50 dollars per acre foot, costing my farm over 15000 dollars. The water I pumped from my well cost approximately 5000 dollars and amounted to nearly 300 acre feet.

In 1992, we were allotted 1 acre foot per acre. During this season I purchased 159 acre feet of water and was a partner in the drilling of two irrigation wells at a cost of over 100,000 dollars for my half alone. I used 490 acre feet from the system and the balance of my water use came from these two wells and the one I drilled in 1977.

RECEIVED

AUG 08 1994

As you can see, 2.5 acre feet of water may be stretched throughout the season but it would not be enough, especially since all of my consumption occurs between mid-May and the first week of September. I believe it is also apparent that it is cheaper to pump water than it is to buy it from other farmers.

It is with these points in mind that I am asking you to consider lifting the moratorium on our ground water wells so that we may be able to protect our investment and preserve some of the water in our system for future use.

Sincerely,

Reed Batt

WILDER HOP CO
WILD-IDA CORPORATION
PO BOX 287
WILDER ID 83676

RE: Water Right No. M63-11659

Dear Water Right Holder(s):

In 1992, the Department of Water Resources issued the above referenced permit allowing the diversion of water for the 1992 irrigation season only. The permit included a condition:

This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.

It now appears that 1994 early season water supply and precipitation conditions are such that short-term use of the wells that were drilled under this authority could be beneficial prior to the start of water delivery through the canal systems in the Boise Valley. We have been advised that most of the canals will not be able to deliver water for another 10 to 14 days.

Therefore, you are hereby notified that the permit is reinstated for temporary use during the period April 1 through April 15, 1994 only. All other conditions of the permit continue to apply. One requirement was that the well be disconnected from the power system at the end of the approved period of use, which under this reinstatement is April 15, 1994.

The existing moratorium in the Boise Valley area is not changed by this temporary reinstatement of the 1992 drought well permit. This temporary reinstatement does not authorize the construction of a new well or alteration of an existing well.

If you have any questions, please contact this office.

Sincerely,

L. GLEN SAXTON

		16	NESE 35	SESE 28		63

Total number of acres irrigated: 143

CONDITIONS/REMARKS:

1. This permit to appropriate water expires at the end of the 1992 irrigation season. The Director retains jurisdiction to reinstate the permit if drought conditions justify resumption of groundwater use.
2. A well drilled pursuant to this permit must be located at least 500 feet from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources.
3. This right to divert groundwater is void if the surface water right appurtenant to the place of use is sold, transferred, leased or used on any other place of use without the approval of the Department.
4. The permit holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this permit.
5. The permit holder must employ reasonably efficient methods of water application to conserve the water of the State of Idaho.
6. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
7. Construction of the well must comply with Idaho well construction standards.
8. This right is subject to all prior rights.

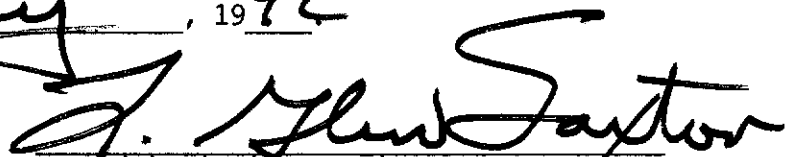

State of Idaho
Department of Water Resources

Permit To Appropriate Water

NO. 63-11659

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this

26 th day of May, 1992

for R. Keith Higginson, Director

State of Idaho

PO BOX 287
WILDER ID 83676

RE: PERMIT NO. 63-11659

LETTER OF PERMIT APPROVAL

Dear Permit Holder:

Enclosed is a copy of your approved permit. your proposed use of water qualifies for a narrow exception to the Snake River Basin Moratorium established by the Director on May 15, 1992. The exception allows the use of groundwater during the drought to protect agricultural uses which normally have an adequate supply of water. Please carefully review the conditions of approval.

The Department has approved your permit for the 1992 irrigation season. Diversion of groundwater is not authorized after the 1992 season, and the permit expires. The Director may reinstate the permit in a subsequent year if drought conditions persist. You will be responsible for requesting reinstatement during future irrigation seasons.

When your permit expires, you must make the pump and motor inoperable, and cannot operate the pump without approval from the Department of Water Resources.

Your permit is for supplemental use only to augment your surface water supply. If the surface water you own is sold, transferred, leased or used on any other land without the approval of the Department of Water Resources, you automatically lose your right to divert groundwater. You must obtain the approval of the Department before using your water anywhere other than where it has traditionally been used.

In addition, you must fully utilize your available surface water to the extent possible. The surface water need not be fully consumed or diverted prior to use of groundwater. You cannot, however, simply divert token quantities of surface water and rely primarily on your groundwater diversion. Surface water must be

AUG 08 1994

If you want to locate your well closer than 500 feet from an existing well, you must obtain the approval of the Department of Water Resources. We realize that under certain circumstances, it may be impossible to locate the well 500 feet away from another well. You must, however, be cognizant of possible interference resulting from pumping of your well.

If diversion from your well causes interference with other wells with an earlier priority, you may be required to cease pumping or compensate the affected party. Idaho law specifically protects groundwater levels for domestic wells which were in use prior to 1978.

If general water levels in the geographical area of your well decline below reasonable levels, the Department may require you to cease diverting from your well.

You must efficiently apply the water to the land and conserve water to the extent possible. Excessive irrigation, delivery systems with substantial losses, and application methods which cause substantial percolation or evaporation are not acceptable.

Sincerely,

JIM JOHNSON
Water Right Supervisor

JJ:cz

Enclosure

MORATORIUM EXEMPTION QUESTIONNAIRE

IF YOUR APPLICATION PROPOSES AN IRRIGATION USE, PLEASE COMPLETE AND RETURN THE FOLLOWING:

- Has ALL the land you propose to irrigate been irrigated with surface water in the past?

yes

- Do you summer fallow any of your irrigated land? If so, how many acres?

No

- List the water right(s) you have used to irrigate the land listed on the application. If you have received water from a canal company or water district, please identify the name of canal or water district.

W. Ider Irr Dist, Golden Gate Canal, Van Tress Lateral & Kilvain Lateral

- During the last ten years, how many years has your surface irrigation water been available for the entire irrigation season?

A portion has been available during each year.

- What crops have you grown in the past ten years?

hops, onions, grain, sugar beets, seed corn, alfalfa seed

I understand if my proposed diversion of groundwater is approved as a supplemental use, that I can only use my well during periods of drought, when a full supply of water is not available. I also agree that my surface water will be fully used to the extent available, will not be sold or used on other lands, and that a change in use of my surface water may result in revocation of any groundwater right granted pursuant to my application for supplemental water.

Dated this 26th day of May, 1992.

Re: Applications For Permit Nos. 63-11647 (Harris Orchard),
63-11659 (Wild-Ida Corp) and 63-11663 (Charles &/or Doug
Gross)

Dear Protestants:

On March 12 and 19, 1992, this Department received protests from
you on the above-referenced applications for permit. On March 23
and 24, 1992, we received withdrawals of protest on these three
applications.

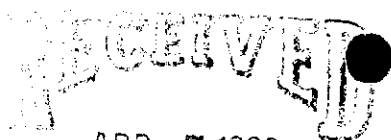

Since there are no other protests, we will now forward application
nos. 63-11647 and 63-11663 to our State Office for final
processing. Application no. 63-11659 in the name of Wild-Ida Corp.
was amended and readvertised and will remain in this office until
the final protest date of April 6, 1992.

Sincerely,

DAVID R. TUTHILL, JR. P.E.
Manager, Western Regional Office

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 4/7/1992

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum distance of 50 feet and 100 feet respectively from a septic tank.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. The surface seal shall extend from land surface to a depth not less than 100 feet below land surface.

NOTICE OF AMENDED
APPLICATION FOR PERMIT
No. 63-11659

Notice is hereby given that application No. 63-11659 in the name of Wild-Ida Corp. was filed on 2/13/1992 for the diversion of 1.6 cfs from groundwater with a point of diversion within the SESW Sec. 15 T04N R05W to be used for irrigation purposes from 3/15 to 11/15 within portions of T04N R05W Sec. 15 SWSW, SESW for 80 acres.

The applicant now proposes to amend the application by changing the amount of cfs to 2.86 cfs and the point of diversion to SESE Sec. 16 T04N R05W. The place of use changed to T04N R05W Sec. 15 SWSW, SESW and Sec. 16 NESE, SESE for a total of 143 acres.

Any protest against the approval of the proposed amendment must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 on or before APRIL 6, 1992.
