E. NARRATIVE/REMARKS/COMMENTS

Other WR # A63-26202, 63-03532B (Licensed WR on a different P/D + P/u)

The ASCS aerial map was already planimetered, P/u SWNW into 2 sections 21.6 ac. + 13.5 ac., with 35.1 total ac. (the house area in the front had been taken out).

Connie Porter said they had planned to build a house & use this well, but haven't yet at this time. From this, I request to amend domestic internal/external use, ~~on the~~ since no proof of use could be shown.

- Use is for irrigation of 35.1 total acres. No home was built, as they had planned so there is no domestic use on this W.R.
- Other water source: Nampa-Meridian Irrigation.
- There ~~was~~ were no overlaps for the P/D, but there were overlaps for the P/u but they were other land &/or other uses

There were no govt lots for this $\frac{1}{4}\frac{1}{4}$.

The artesian well is not free-flowing, when not being used for irrigation. It is controlled by the use of a shut off valve.

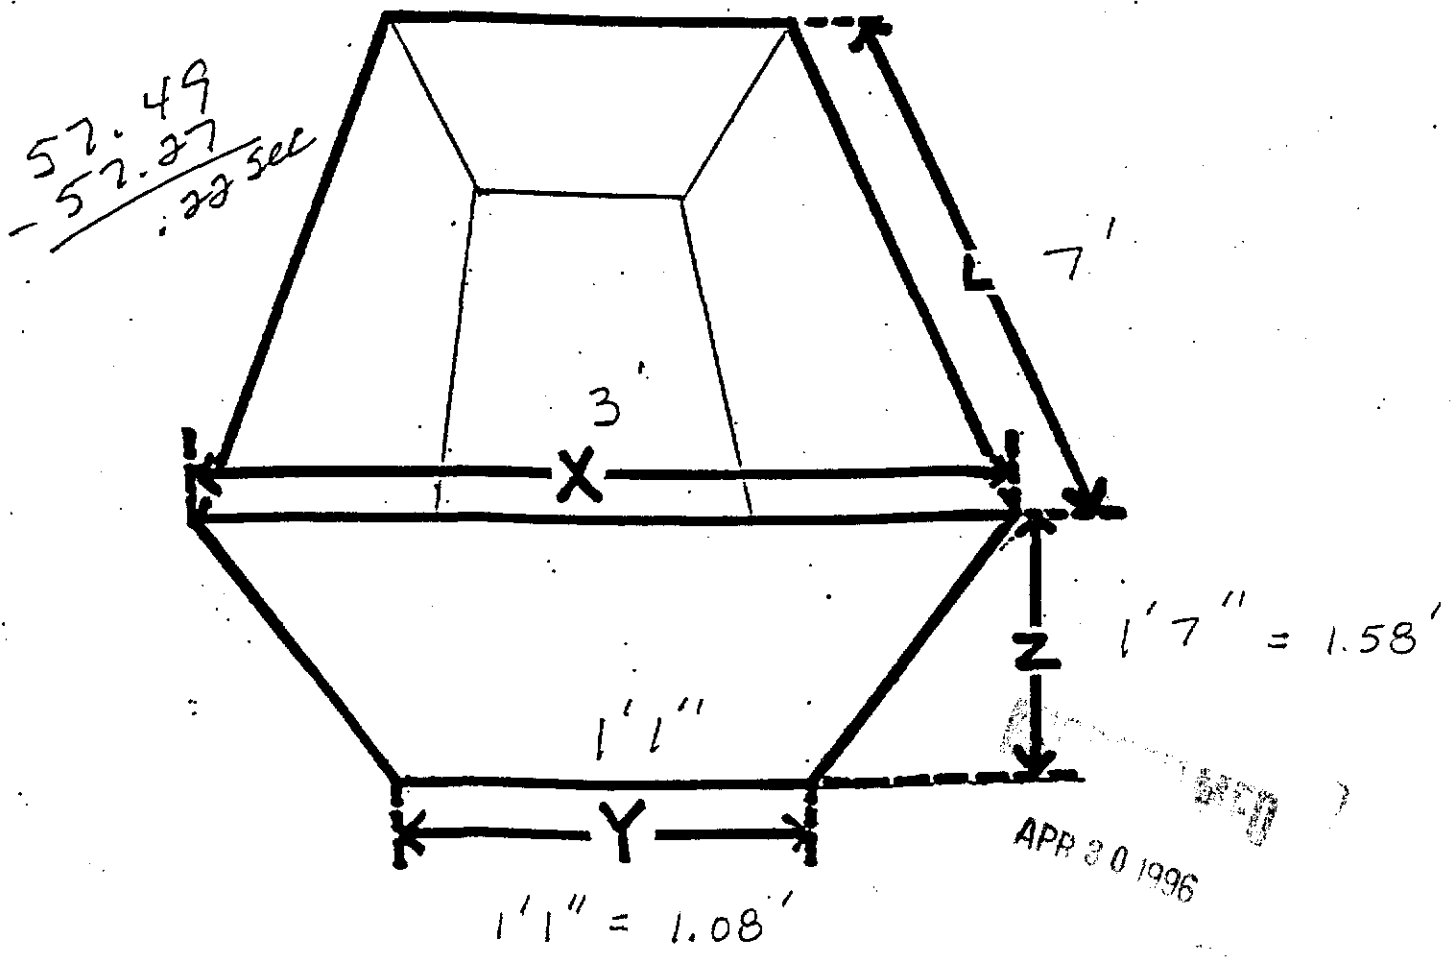

- The system consists of an artesian, open discharge into cement ditches to run north or south, siphon tubes to flow west.

Have conditions of permit approval been met? ☐ yes ☒ no

Measured amount of diverted rate of flow at the time of exam was (1.108 cfs) $\approx$ 1.11 cfs, which exceeds the .72 cfs amount on the permit.

RE: Permit No. 63-11643 (Porter to Johnson)

Dear Ms. Mayden:

I recently received a 'New Property Owner Notice of Change of Water Right Ownership' form on the above referenced permit assigning the permit to Harmon & Elizabeth Johnson. This form is used for changing ownership or address on Snake River Basin Adjudication claims. This permit has not been claimed in the Snake River Basin Adjudication, not does it need to be.

In Idaho, a permit is considered personal property and can only be assigned by the owner of record using an 'Assignment of Permit' form. Our records identify Wesley M. and Connie I. Porter as joint owners of this permit.

As of July 1, 1994, the assignment of a permit must be accompanied by a \$25.00 filing fee. Assignments of permits are not acceptable without filing fees.

I am returning the 'New Property Owner Notice of Change of Water Right Ownership' to you. I have enclosed a partially completed 'Assignment of Permit' form for Wesley M. & Connie I. Porter to sign. Please resubmit the assignment with the filing fee to my attention at the above address.

I have also enclosed a few blank copies of the 'Assignment of Permit' form for your future use.

If you have any questions, please feel free to contact me directly at (208) 327-7944.

Sincerely,

Cindy Zimmerman

RE: Permit No. 63-11643

Dear Permit Holder:

The Department acknowledges receipt of the proof of beneficial use and assignment of permit form transferring ownership of the above referenced water right to you. We have modified our computer records to reflect this change in ownership.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Additionally, enclosed is an order reinstating your permit since the Proof of Beneficial Use form was submitted after the proof due date. Please note that the priority date has been advanced to April 1, 1992.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls, at (208)525-7161.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is

APPROVED

Date

Jan 29, 1992

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. This drilling permit does not authorize the diversion of water from this well in excess of 13,000 gpm or .04 cfs or for any nondomestic purposes. A water right permit is required prior to the diversion of water for irrigation of more than 1/2 acre.

11. No water may be diverted from this well for irrigation purposes until Application for Permit 63-11643 is approved.

LAPSE NOTICE

RE: PERMIT NO. 63-11643

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated February 28, 1994. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifteen dollar (\$15) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

PROOF DUE NOTICE

RE: PERMIT NO. 63-11643

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

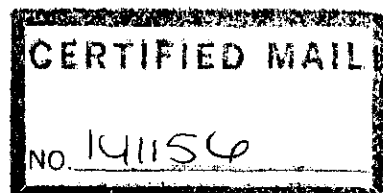

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

RE: Letter Hamd-Schweil

Mr. Rice delivered a letter today signed by him & two other parties. They are concerned about an irrigation well in T3W R1W S.5 S $\frac{1}{2}$ NW $\frac{1}{4}$. This is not a complaint at this time - wants to file letter in case needs to take action at later date.

All wells mentioned are artesian, he said. Three domestic wells have flow at land surface. He stated that all 3 dom. wells predate 1978 (Parker v. Wallentin issue).

Gentlemen:

We are writing this letter for the purpose of bringing to your attention a recent problem experienced in our neighborhood. We are not trying to file a formal complaint, but are merely bringing to your attention what we feel could develop into a serious problem and to get our concerns before you as a matter of written record

The situation developed as follows:

On about the eighth of August 1992 our neighbor, Mr. Don Hume started to pump an artesian well at S1/2, NW1/4, SEC.5 T3N R 1W. The result of this action was to stop the artesian flow in the following several wells.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11643

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under Condition No. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well so that groundwater tributary to surface water flows are not
