CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The Director retains jurisdiction of this right and any license subsequently issued to require streamflow augmentation or other action determined to be appropriate to protect prior surface water or ground water rights. Such streamflow augmentation or other action will be required only upon a determination of need and applicability by the Director.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

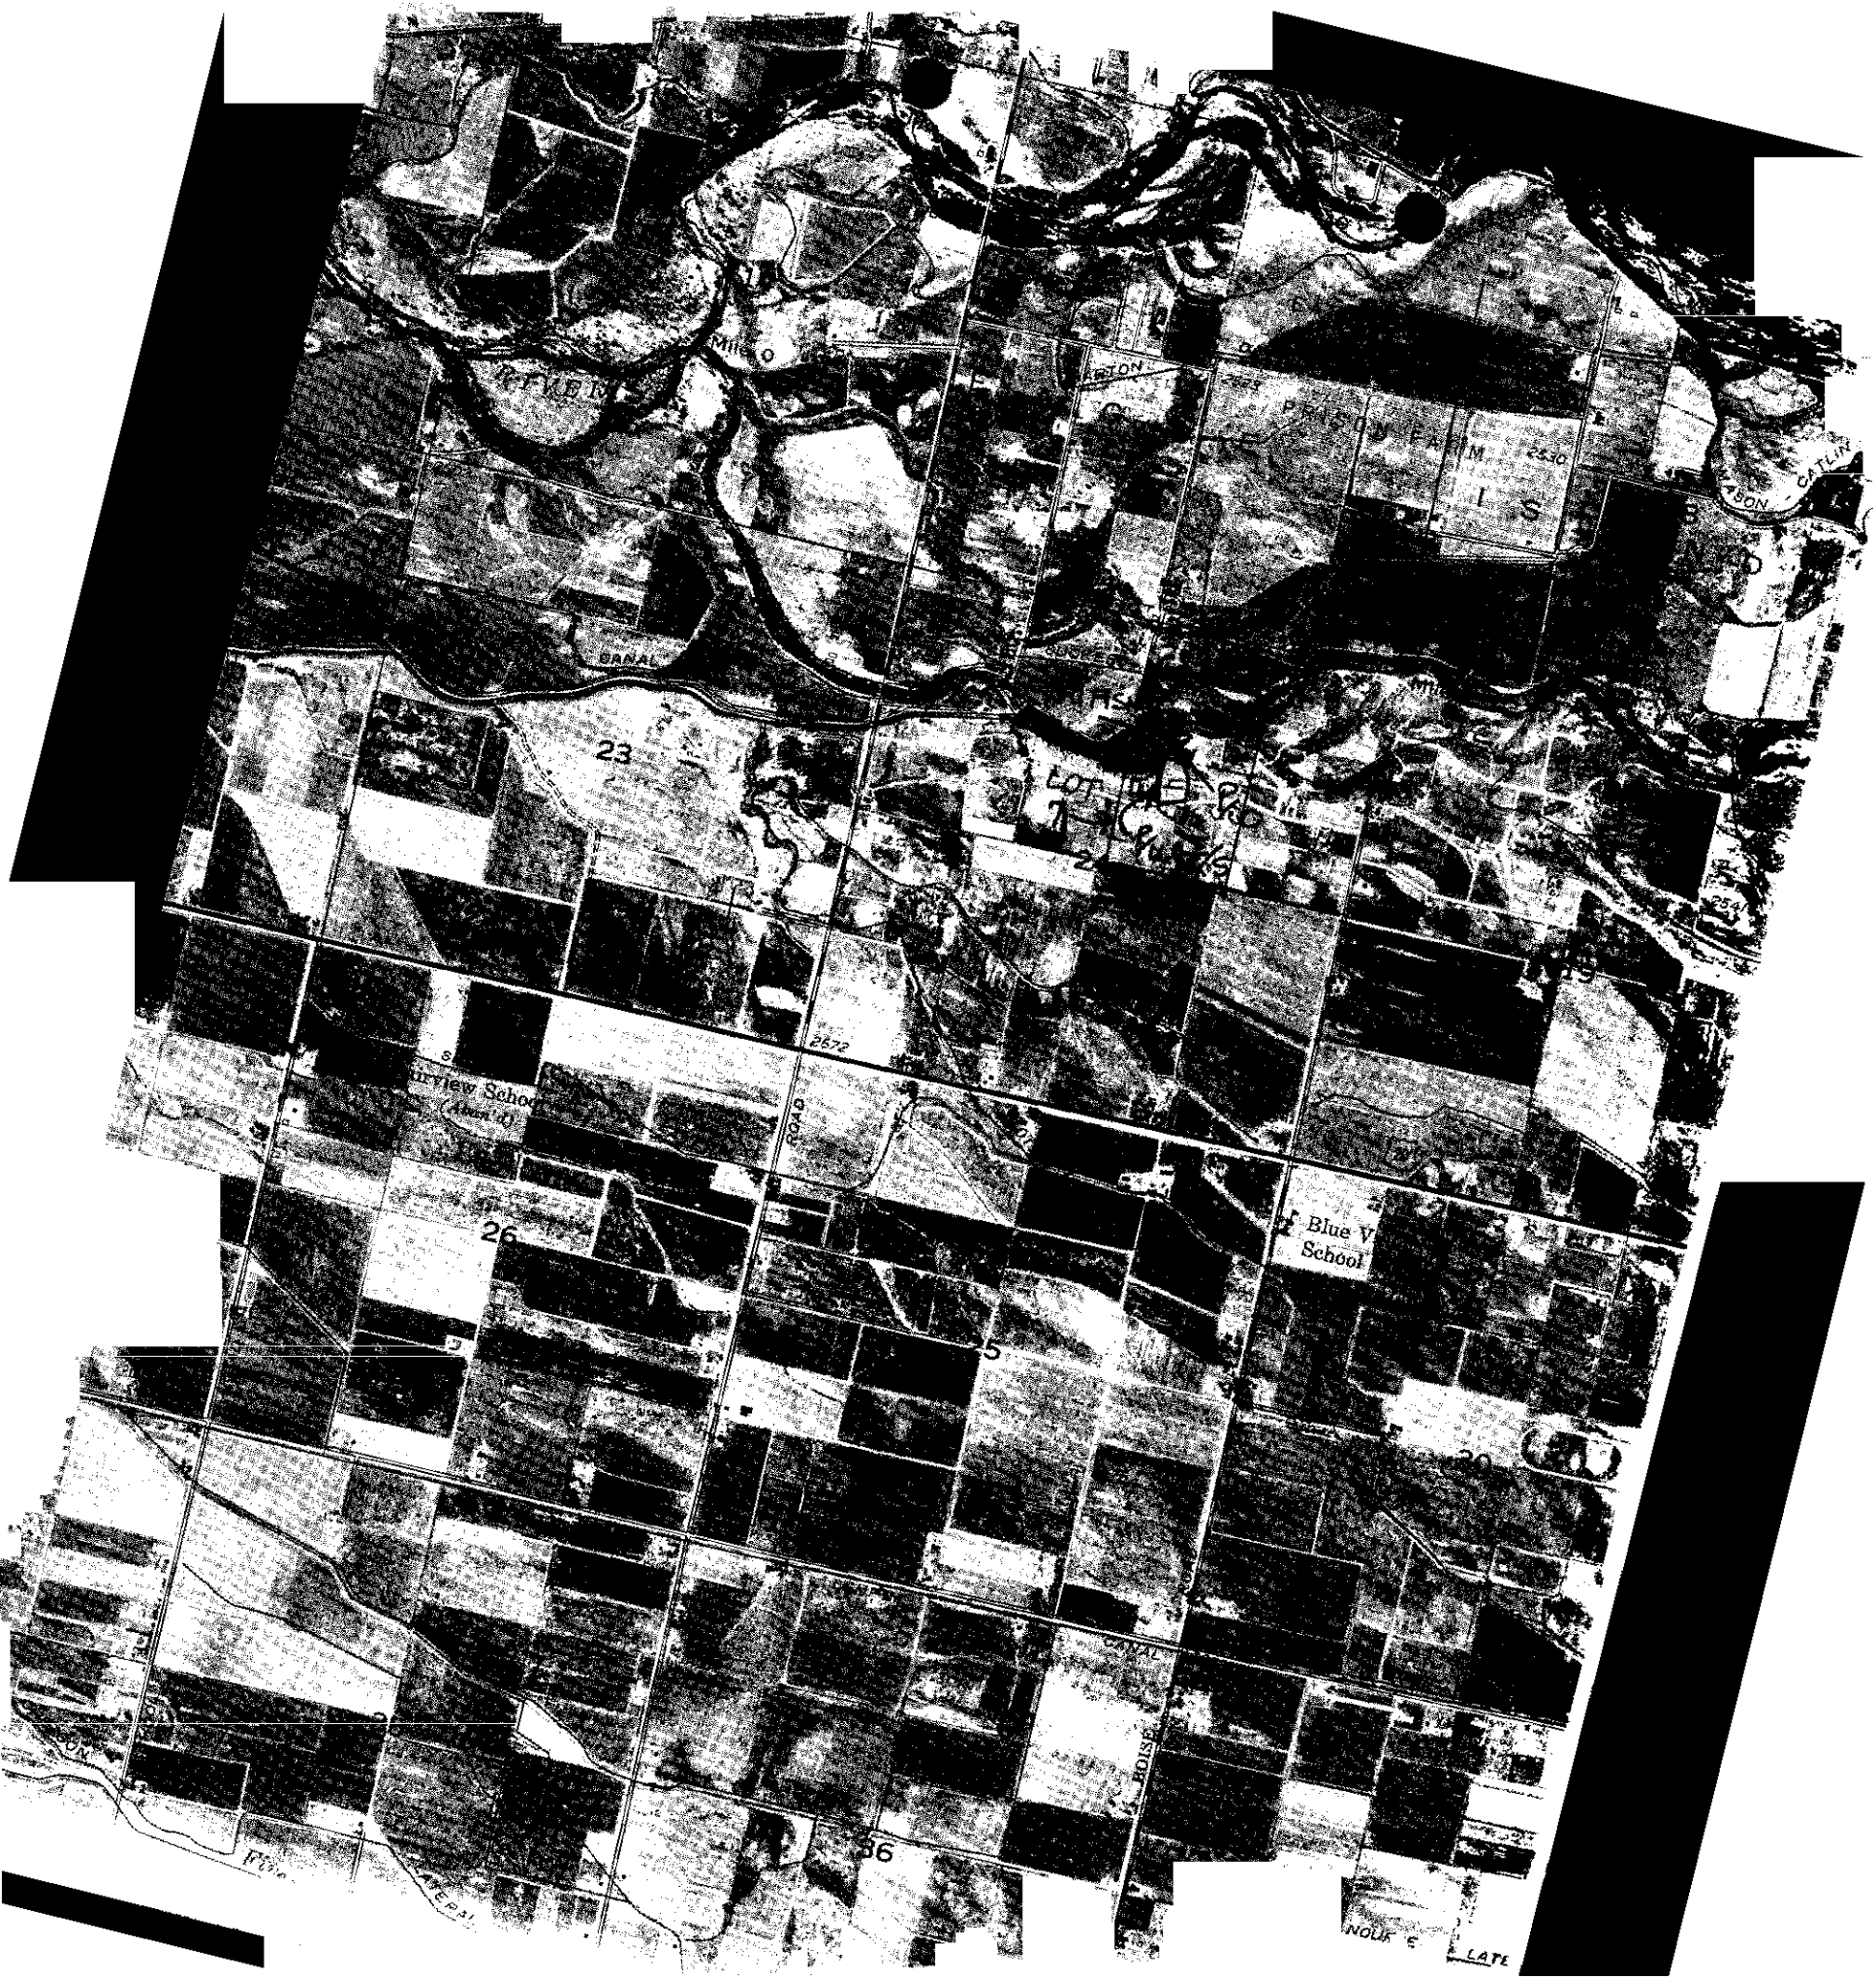

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

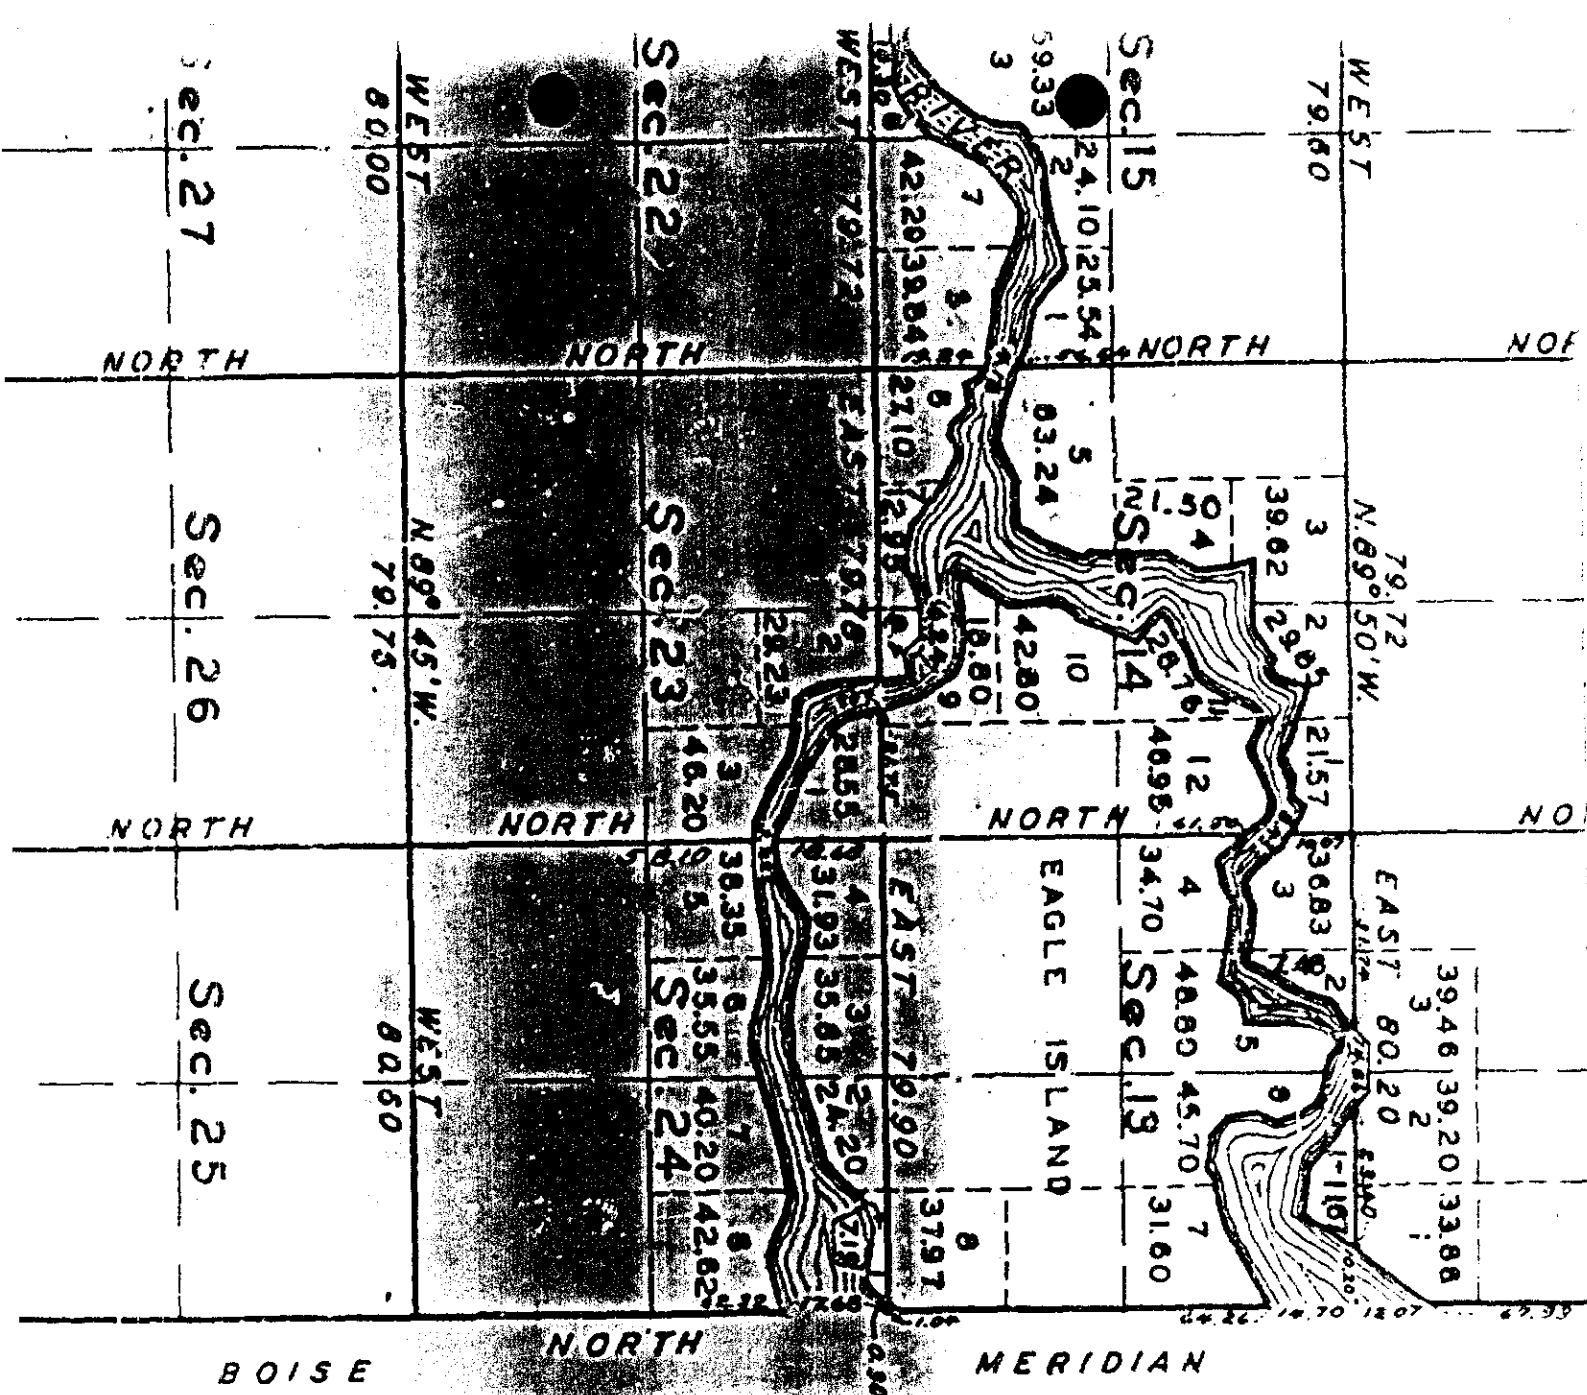

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

RE: Fish Propagation / Annual Volume Requirements

=====

The standard formula for determining the annual volume required for a fish propagation facility is:

1. Calculate changes per hour:

Flow into facility x 3600 sec / facility volume (cf) = changes

2. Calculate annual volume:

Facility volume (af) x changes x 8760 hrs/yr = afa

3. Calculate volume given by permitted flow:

Flow rate (cfs) x 1.9835 x 365 days = afa

4. Recommend lower figure.

----- *- Volume Limited By Permit -* -----

1. .50 cfs x 3600 sec per hr / 87120 cf = .02066 changes

2. 2.0 af x .02066 x 8760 hrs per yr = 361.9 afa

3. .50 cfs x 1.9835 x 365 days = 361.9 afa

P/U Same QR, different places of use.

ARTESIAN WELL from 6" casing supplies water to pond for fish propagation. A small man-made channel has been constructed to direct water to pond.

Near the northwest corner of pond, there exists a 20" unconfined overflow standpipe. The overflow discharges through unknown pipe size to Boise River to the north. Bass are raised in pond.

Since the overflow pipe into the Boise River was submerged, flow measurement was taken at the well discharge by the orange peel method. The measured flow was approximately 0.70 CFS, which is greater than the requested allocation of 0.5 CFS. Therefore, recommend licensing for 0.50 CFS for fish propagation and diversion to storage.

Estimated pond size is 2.8 AF, but since 2.0 AF was requested on permit, recommend licensing for 2.0 AF for fish propagation storage. No irrigation or stockwater use by this system.

RE: PERMIT NO. 63-11625

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise, at (208)334-2190.

RE: Permit No. 63-11625

Dear Permit Holder:

Returned is the Proof of Beneficial Use form submitted to this office in connection with the above referenced permit. Unfortunately it is unacceptable as filed. Condition #3 of your permit to appropriate water states you must install a flow measurement port or other device to measure the rate of diversion. It does not appear you have complied with this condition.

If you have installed a flow measurement port, please indicate this on the proof. If you have not installed the port, you have until August 1, 1994, to submit proof of beneficial use. You may also return the proof form and request, in writing, a waiver of the condition.

If you have any questions, or if I can be of any further assistance, please feel free to contact me.

Sincerely,

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to August 1, 1994. Please note that the department has granted this extension based on due diligence. It is important that you work diligently toward the completion of this project during the construction period allowed since the department will not be able to grant additional extensions based on due diligence

If you have any questions or if I can be of any further assistance, please feel free to contact this office.

PROOF DUE NOTICE

RE: PERMIT NO. 63-11625

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

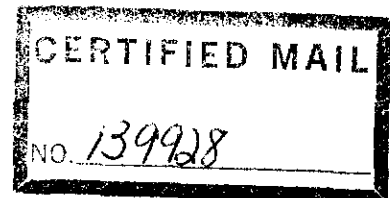

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11625

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please be advised that water quality is subject to regulations of the Idaho Department of Health and Welfare. We suggest that you check with them before starting construction.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist
