CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
6. The Director retains jurisdiction of this right and any license subsequently issued to require streamflow augmentation or other action determined to be appropriate to protect prior surface water or ground water rights. Such streamflow augmentation or other action will be required only upon a determination of need and applicability by the Director.

CONDITIONS OF APPROVAL AND REMARKS

7. Right 63-10846 is also diverted through the point of diversion described above.
8. This right is limited to the irrigation of 18.5 acres within the place of use described above in a single irrigation season.
9. Use of this right with Right 63-10846 is limited to a total combined annual diversion volume of 123.6 af and to the irrigation of a combined total of 26.5 acres in a single irrigation season.
10. This right when combined with Right 63-10846 and all other rights shall provide no more than .04 cfs per acre nor more than 4.5 afa per acre for the lands above.
11. Places of use are known as White Pine Elementary and Les Bois Jr. High Schools.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before November 1, 1994.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Prior to the diversion of water under this right a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
5. The point of diversion identified in this right is located within the boundaries of the Boise Front Low Temperature Geothermal Resource Groundwater Management Area. The well driller must monitor water temperatures while drilling the well. If water with a temperature greater than 85 degrees Fahrenheit is encountered by the driller, drilling must immediately cease, and the Department must be notified. Drilling shall not resume until the Department has reviewed the drilling conditions, and established standards for construction with the driller.
6. Use of water under this right is subject to the control of the watermaster of Water District 63, Boise River and tributaries.

MEMORANDUM

TO: File 63-11567 / Independent School District No. 1
FROM: Brenda Chapman
DATE: August 25, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

A "permissible place of use" recommendation with Right 63-10846 is being made for this right. Recommendations will be based on priority date allowing the fullest entitlement to the earliest priority right of the two.

C. DIVERSION AND DELIVERY SYSTEM

2. Place of Use: Since this is the junior right of the two, the acres will decrease to 18.5.

F. FLOW CALCULATIONS

Because the 63-10846 was approved with a higher rate per acre than this right, the rate for this right will be based on the system rate per acre. It will give this right more water but not exceed the permitted rate.

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	3-15 to 11-15	.71	83.3

Measured Method:

63-11567

Theoretical Pump Efficiency Calculations
(see attachment) = 1.03 cfs

Paced off area:

$$\frac{\text{Total land} - \text{Parting/Hensco} - \text{building} - \text{parking}}{43560} = 10.16 \text{ acre}$$
$$\frac{76916.2 - 195250 - 89762.5 - 41175}{43560}$$

$$\frac{532.5 \times 392.5}{43560} = 4.79 \text{ acre}$$

$$\frac{630 \times 195}{43560} = 2.82 \text{ acres}$$

Total irrigation for Le Bois Jr. High:

$$10.16 + 4.79 + 2.82 = 17.77 + 10\% \text{ error} = 19.54 = 19.5 \text{ acre}$$

① Permit irrigation 3/15-11/15 1.72 cfs

② proof fee \$100.00 pd 10-12-94 21 - 1.00 cfs

③ max. allowable

$$19.5 \text{ acres} \times .02 \text{ cfs/acre} = .39 \text{ cfs}$$

④ $V_{IR} = 19.5 \times 4.5 = 87.75 \text{ Afa}$

$$V_{DR} = .39 \text{ cfs} \times 246 \times 1.9835 = 190.29$$

$$V = 87.75 \text{ Afa} = 87.8 \text{ Afa}$$

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 63-11567

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that one of the conditions of your water right permit requires that the permit holder install a flow measurement port. This condition must be complied with before the license exam, or you can request, in writing, a waiver of the condition.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 63-11567

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before November 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11567

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under Condition No. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist
