**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

IN THE MATTER OF AMENDED LICENSE)	
NO. 63-11518 IN THE NAME OF ROGER)	PRELIMINARY ORDER
L. WELSH AND MAUREEN N. WELSH)	AMENDING LICENSE
_____)	

This matter having come before the Idaho Department of Water Resources (department), as a result of the request of the license holders to review the acreage and rate of diversion on License No. 63-11518, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. On September 14, 1996, the department issued License No. 63-11518 (license) to Roger L. Welsh and Maureen N. Welsh (petitioners) with certain conditions and limitations.

2. Following denial of a petition for reconsideration on January 14, 1997, pursuant to Section 67-5243(3), Idaho Code, the license became final on February 12, 1997.

3. By letter dated March 18, 1997, petitioners requested the department to review the correctness of the acreage and rate of diversion on the license and to amend the place of use under the license to 100 acres.

4. After review of pertinent aerial photography, the department has determined that it should issue an amended license increasing the irrigated acreage from 99 to 100 acres and increasing the authorized rate of diversion from 1.98 cfs to 2.0 cfs.

CONCLUSIONS OF LAW

1. Section 42-219, Idaho Code, provides in pertinent part as follows:

Upon receipt by the department of water resources of all the evidence in relation to such final proof, it shall be the duty of the department to carefully examine the same, and if the department is satisfied that the law has been fully complied with and that the water is being used at the place claimed and for the purpose for which it was originally intended, the department shall issue to such user or users a license confirming such use.

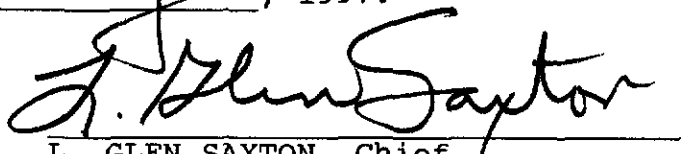

2. The department should issue an amended license providing for the diversion of 2.0 cfs of water for the irrigation of 100 acres of land.

3. This order amending the license relates only to changes in the authorized rate of diversion and acres irrigated and does not reopen for purposes of further administrative or judicial review any other elements or conditions of the license.

ORDER

IT IS, THEREFORE, HEREBY ORDERED that the department issue Amended License No. 63-11518 in the form attached.

Dated this 2nd day of May, 1997.

L. GLEN SAXTON, Chief
Water Allocation Bureau

State of Idaho
Department of Water Resources

JUL 08 1993

**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

IN THE MATTER OF WATER RIGHT)
LICENSE NO. 63-11518 IN THE)
NAME OF ROGER L. WELSH AND)
MAUREEN N. WELSH)
_____)

**ORDER
DESIGNATING A FINAL ORDER**

This matter having come before the Idaho Department of Water Resources (department), as a result of a request from a license holder to issue an amended license, the department makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

1. On September 14, 1996, the department issued water right License No. 63-11518 in the name of Roger L. Welsh and Maureen N. Welsh (petitioners). When issued, the department did not designate the license as being a recommended order, a preliminary order or final order.

2. On December 4, 1996, the petitioners submitted a letter to the department asking the department to issue an amended license.

CONCLUSIONS OF LAW

1. IDAPA Rule 37.01.01750 (Rule of Procedure 750) provides as follows:

If an order does not designate itself as recommended, preliminary or final at its release, but is designated as recommended, preliminary or final after its release, its effective date for purposes of reconsideration or appeal is the date of the order of designation. If a party believes that an order not designated as a recommended order, preliminary order or final order according to the terms of these rules should be designated as a recommended order, preliminary order or final order, the party may move to designate the order as recommended, preliminary or final, as appropriate.

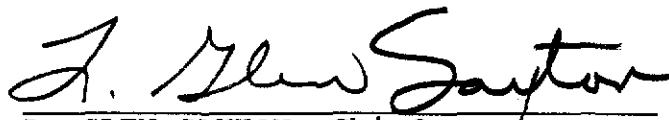

2. The department should designate the issuance of water right License No. 63-11518 as a final order and should allow the petitioners to file a petition for reconsideration as provided in IDAPA Rule 37.01.01740 (Rule of Procedure 740).

ORDER

IT IS THEREFORE, HEREBY ORDERED that the issuance of water right License No. 63-11518 is designated as a final order of the department with the effective date for purposes of reconsideration or appeal being the date of this order.

IT IS FURTHER HEREBY ORDERED that the petitioner may file a petition for reconsideration with the Director as provided in IDAPA Rule 37.01.01740 (Rule of Procedure 740).

Dated this 12th day of December, 1996.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

RE: Thomsen Golf, Inc. - Application for Transfer for License No. 6311518

Dear Mr. Lester:

Thank you for your letter of February 23, 2001, returning the application we previously submitted to your office to Gary Spackman on February 8th.

As we discussed on March 19, I have some concerns about the process to be followed in this matter. Apparently, Thomsen Golf may be able to effect a change in ownership by submitting another form and further information, but the formal process will require some further proof as to the amount of water put to use by the present owner and some additional matters of acreage equivalency between the prior use and any new use, will also be involved.

I am uncertain as to the extent of the water right that is subject to being transferred. In previous discussions with your office, there has been a question raised concerning the extent of the water right involved. Your office raised the issue that this water right is actually a "secondary" right and therefore any transfer of ownership would only carry with it the amount of water that has actually been applied to beneficial use. We have discussed this matter with Mr. Spackman in an effort to calculate the amount of water that was actually used on this "secondary" right which would then become a "primary" right in the hands of Thomsen Golf, Inc. Mr. Spackman has done some calculations in conjunction with the right owner, Mr. Welsh. Nothing about acreage equivalencies has been provided or formulated.

Steve Lester
March 23, 2001
Page 2

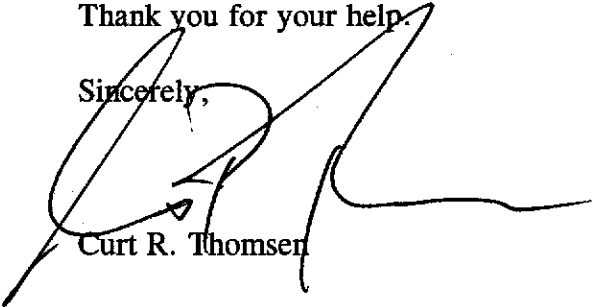

Thomsen Golf must know specifically what level of water usage goes with this right as part of any change of ownership. We must understand the exact amount of water we could use to develop another nine-hole golf course. If this right is insufficient to do that, then Thomsen Golf will have to find another source and abandon this effort.

I have been attempting to get the Department to help me quantify this number specifically and reliably for the future without reaching ultimate success. You have now suggested that Thomsen Golf will need the services of a hydrologist-consultant to provide the necessary data to process this matter. We will attempt to do so.

Thank you for your time on this matter.

Thank you for your help.

Sincerely,

Curt R. Thomsen

Re: Application for Transfer for License No. 63-11518

Dear Mr. Thomsen:

Your recently filed application for transfer for the above referenced water right is returned with this letter. The \$290 transfer filing fee will be refunded to you within a few weeks. The transfer process involves changing an element(s) of a water right, such as the point of diversion or nature of use. The transfer process is not available to record just an ownership change.

Changes in ownership can be recorded with the enclosed form, "*notice of change in water right ownership*." License No. 63-11518 was perfected after the November, 1987 commencement of the Snake River Basin Adjudication (SRBA). Therefore, a SRBA claim is not required and has not been filed for the water right. Note the change in ownership fee will apply for 63-11518.

Approved transfers generally include a condition of approval requiring the proposed change to be accomplished within one year of the date of transfer approval. The appropriate time to file a transfer application can be determined from at least that factor. I enclosed an information sheet to assist in a future transfer process should you decide to pursue such an option.

Please contact me at your earliest convenience if you need more information in this regard.

Sincerely,

Steve Lester
Water Rights Supervisor

**RE: Thomsen Golf, Inc.
Application to Transfer Water Right
Application to Lease Water Right to Water Supply Bank
Permit No. 63-11518 (Welsh)**

Dear Mr. Spackman:

This letter will follow up our conversations concerning the referenced application. We had previously submitted an application in August, 2000 concerning Water Permit No. 63-11518 presently owned by Roger and Maureen Welsh. Presently this water right is utilized in Township 02N, Range 01E, Sections 17 and 18 and the point of diversion is in the Southwest Quarter of the Northwest Quarter of Section 17. As explained, Thomsen Golf, Inc. owns a nine-hole golf course facility found in Blocks 10 and 11, Indian Lakes Subdivision, Ada County, State of Idaho. We are presently pursuing leasing ground from the Idaho Department of Lands to construct an additional nine-hole golf course.

To that end, we have entered into a purchase agreement with Welsh (copy attached to applications) to acquire Welsh's Water Permit No. 63-11518 referenced above. As there are a number of matters that must be completed to finalize either an acquisition or lease of ground, and to actually begin construction of the facility, Thomsen Golf, Inc. wishes to acquire the water right and place it in the Water Bank to avoid any loss for non-use or abandonment. We also submitted the Water Bank application to the Department in August, 2000, which is apparently holding same pending approval of the transfer of the water right, which will involve a determination of how much of the Welsh permit may be considered a primary right based on past beneficial use, which will now be available to Thomsen Golf, Inc. Mr. Saxton of your Department has advised this office that such a procedure is appropriate and can be accomplished with the approval of the IDWR.

February 8, 2001

Page 2

Accordingly, enclosed is an Application for Transfer of Water Right (without requesting a change in the point of diversion at present); the application to put the same water right after transfer into the Water Supply Bank is still in the Departments's hands. When we are ready to use the water, a request for change in point of diversion will be submitted. Our check in the amount of \$290.00 as the application fee is also enclosed.

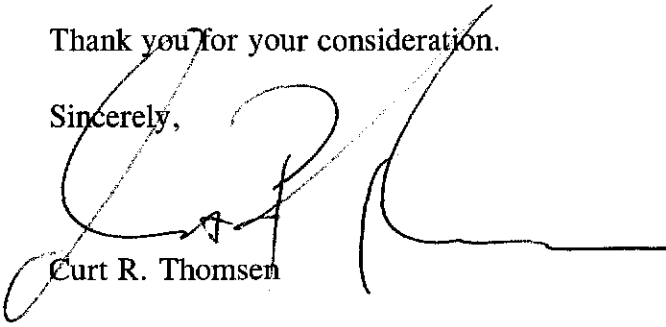

We understand that you have received information from Mr. Welsh which will allow the Department to determine the extent of the permit right which may be used by Thomsen Golf Inc. as a primary water right. If you need any additional information or data, or believe that the application has not been correctly filled out, please contact me at your earliest convenience.

We would appreciate your consideration in processing the application and advising us as soon as possible concerning approval of the transfer, and also advising on placement of the water right in the Water Bank. Both items are linked and it is essential that we not lose the any approved transferred water right during the time necessary to begin construction of the golf course and utilization of the water right for irrigation purposes on the new golf course.

Thomsen Golf Inc. is not changing the type of use, and the water will be used for irrigation purposes on the new golf course.

Thank you for your consideration.

Sincerely,

Curt R. Thomsen

**RE: Thomsen Golf, Inc.
Application to Transfer Water Right
Application to Lease Water Right to Water Supply Bank
Permit No. 63-11518 (Welsh to Thomsen)**

Dear Sirs:

License
This letter will follow up my conversations with Mr. Saxton and others at your office concerning Water Permit No. 63-11518 presently owned by Roger and Maureen Welsh. Presently this water right is utilized in Township 02N, Range 01E, Sections 17 and 18 and the point of diversion is in the Southwest Quarter of the Northwest Quarter of Section 17. As explained, Thomsen Golf, Inc. owns a nine-hole golf course facility found in Blocks 10 and 11, Indian Lakes Subdivision, Ada County, State of Idaho. We are presently pursuing purchasing property existing near the nine-hole course, or leasing ground from the Idaho Department of Lands to construct an additional nine-hole golf course.

To that end, we have entered into a purchase agreement with Welsh (copy attached to applications) to acquire Welsh's Water Permit No. 63-11518 referenced above. As there are a number of matters that must be completed to finalize either an acquisition or lease of ground, and to actually begin construction of the facility, Thomsen Golf, Inc. wishes to acquire the water right and place it in the Water Bank to avoid any loss for non-use or abandonment. Mr. Saxton has advised this office that such a procedure is appropriate and can be accomplished with the approval of the IDWR.

Accordingly, enclosed is an Application for Transfer of Water Right (without requesting a change in the point of diversion at present) and an application to put the same water right after transfer into the Water Supply Bank. When we are ready to use the water, a request for change in point

Total number of acres to be irrigated _____

C. ADDITIONAL INFORMATION ABOUT RIGHT, OR PORTION THEREOF, FOR SALE OR LEASE

1. Explain how the seller/lessor acquired the right, or portion thereof, and attach a copy of the deed to the land to which it is appurtenant or other evidence of ownership of the right.

Purchase by Thomsen Golf, Inc. from Welsh

2. Describe the frequency of water use under the right, or portion thereof, during the past 5 years. Attach water-master records, pumping power bills, or other evidence to demonstrate that the right has not been lost through abandonment or forfeiture:

3-15 to 11-15 each year for irrigation - farming; see Affidavit of
Welsh re: usage and documentation.

3. Describe the relative availability of water to fill the right, or portion thereof. Attach evidence to support the availability:

Groundwater - complete availability

4. Describe any other water rights with the same purpose and place of use as the right, or portion thereof. Will the present place of use continue to receive water from any source? If so, describe.

Not to applicant's knowledge. The farm ground is going out of
production. Thomsen Golf will use to water new nine-hole
golf course.

5. If the water right is a permit, describe the work accomplished toward developing the right.

N.A.

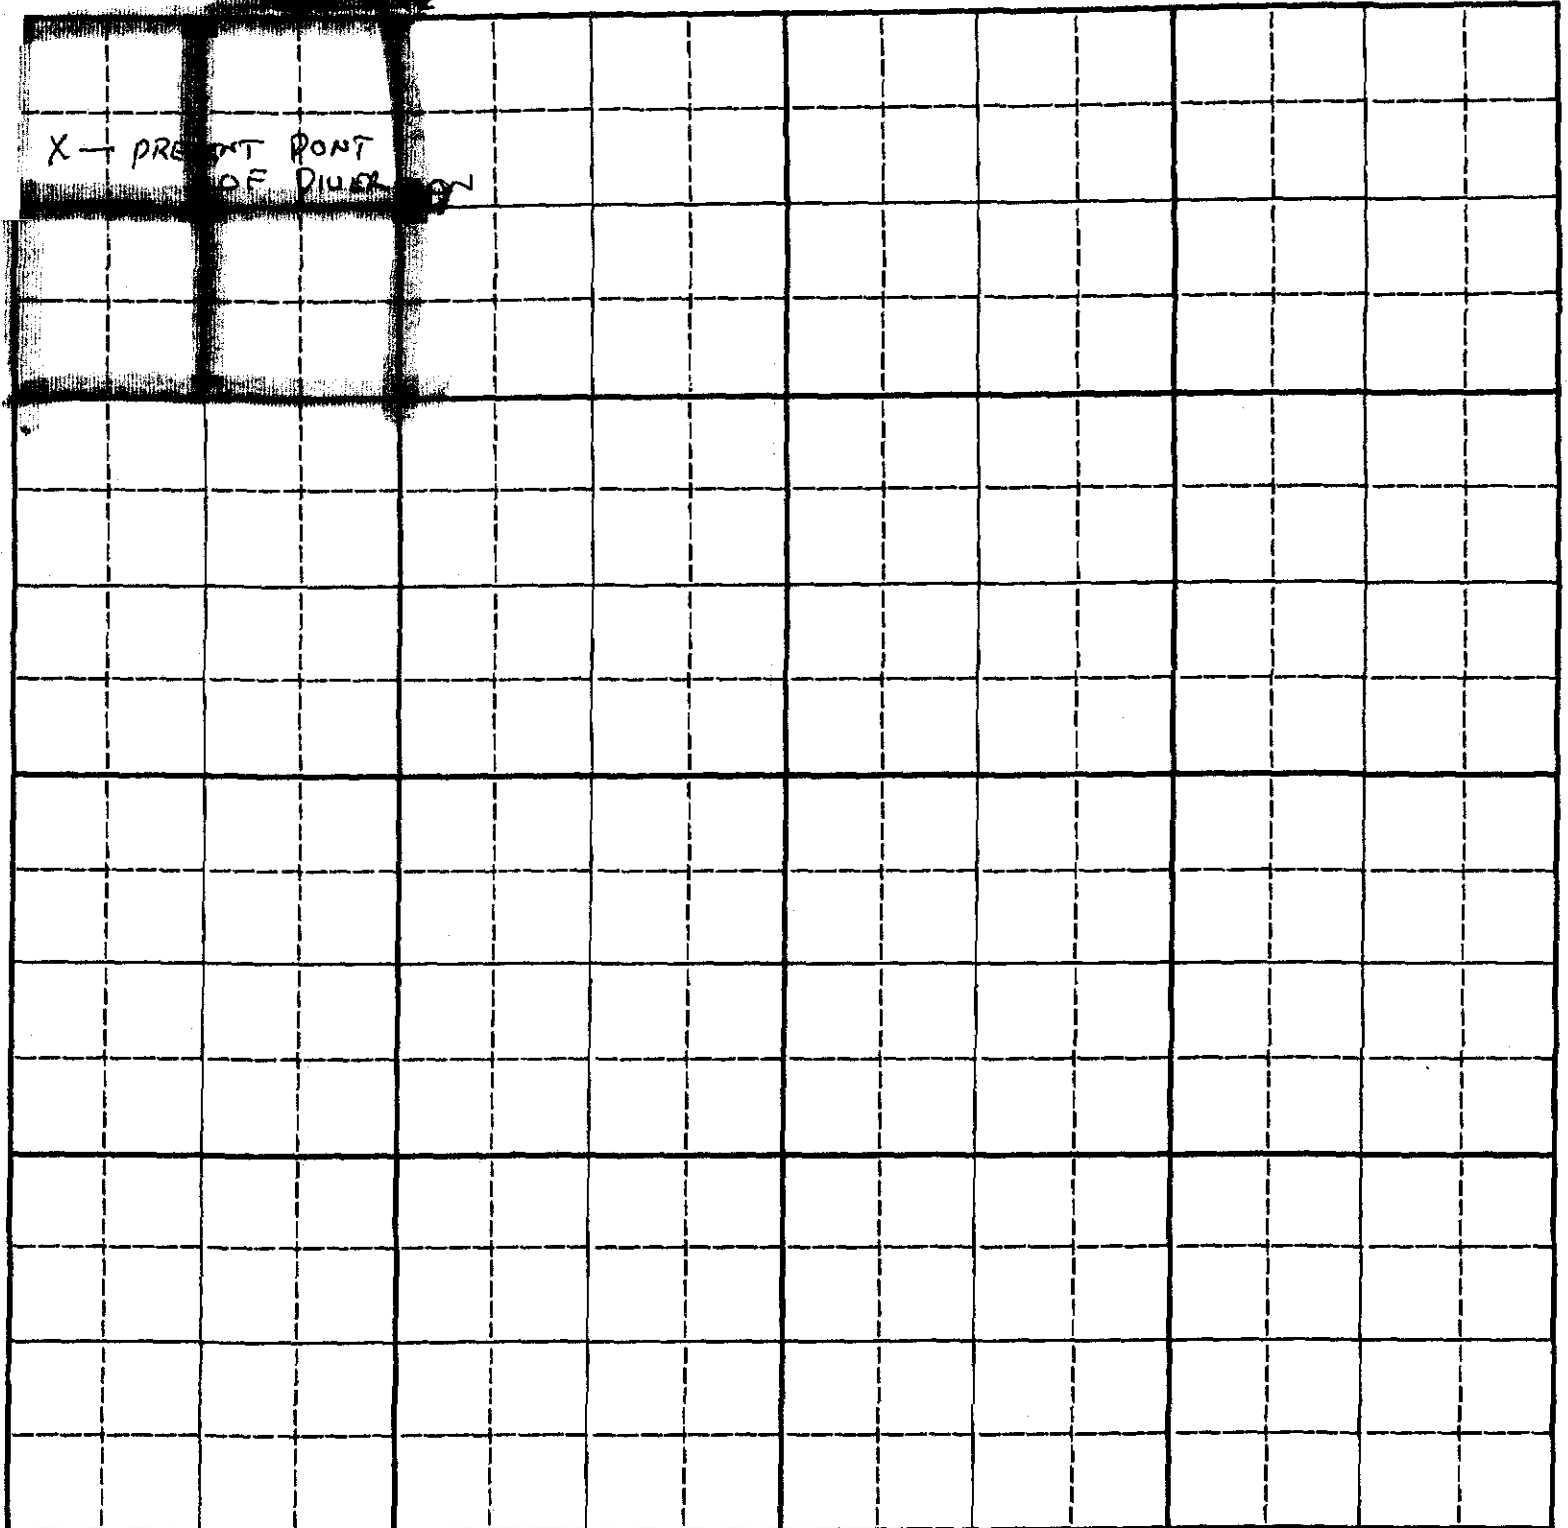

6. If the right to the use of the water or the use of the diversion works or irrigation system is represented by shares of stock in a company or corporation, or if such works or system is owned or managed by an irrigation district, a written consent of the sale or lease must be attached. N.A.

7. If the right is included in an ongoing adjudication, a copy of the claim must be provided with this application.

See attached documentation.

8. Draw a map indicating the point(s) of diversion and place of use of the right, or portion thereof. Show clearly the land involved by section, township and range.

T02N R01E S17 SWNW

SCALE: 2 inches equal 1 mile. Draw plan in ink.

MEMORANDUM AGREEMENT - WATER RIGHTS

THIS AGREEMENT, made this 21 day of MAY, 2000, by and between Thomsen Golf, Inc., an Idaho corporation doing business as Indian Lake Golf Course (hereafter Thomsen) and Roger and Maureen Welsh, husband and wife, of 3606 Hubbard, Kuna, Idaho (hereafter Welsh), as follows:

RECITALS

1. Welsh owns certain groundwater water rights and irrigation equipment incident to certain real property consisting of approximately 100 acres located near Kuna, Idaho. Welsh is in the process of subdividing that property and the GROUNDWATER water rights and equipment are not necessary in the development and Welsh therefore desires to sell same.
2. Thomsen Golf, Inc. operates the Indian Lake Golf Course with a street address of 4700 Umatilla Avenue, Boise, Idaho 83709. Thomsen desires to acquire groundwater water rights for its future use in connection with its golf course properties and projects.
3. Thomsen's ability to use any groundwater rights and irrigation equipment is conditioned upon approval of a transfer of groundwater rights and point of diversion to their property, or property they control, near the golf course site.
4. Thomsen desires to acquire the groundwater rights and associated equipment owned by Welsh subject to specified conditions precedent.

NOW, THEREFORE, in consideration of the mutual promises, conditions and undertakings of this agreement, the parties agree as follows:

1. Description of the Water Rights and Property to Be Purchased. Welsh represents that they have clear ownership of, and rights to the GROUNDWATER rights described in Exhibit A attached hereto and to the irrigation equipment described in Exhibit B attached hereto, and are possessed of all right and authority to transfer those groundwater rights and equipment to Thomsen.

2. Purchase of Water Rights and Equipment. Thomsen agrees to buy, and Welsh agrees to sell, the groundwater rights and equipment itemized on Exhibits A and B attached hereto, subject to the terms and conditions of this agreement, for the sum of Twenty Five Thousand and No/100 Dollars (\$25,000.00), payable as provided below and subject to the conditions subsequent provided below.

3. Payment Terms. Thomsen shall deposit in an escrow account for the benefit of Welsh, the sum of \$25,000.00 cash. The escrow funds shall be released to Welsh upon fulfillment of the conditions subsequent stated below. The designated escrow agent shall be Pioneer Title Co. of Boise, Idaho. Thomsen shall pay for all costs associated with set up of the escrow account and any fees assessed incident to disbursement of the escrowed amounts.

4. Conditions Subsequent. Thomsen and Welsh agree that the escrowed funds may only be released to Welsh upon the occurrence and completion of the following conditions:

a. Receipt of all necessary governmental approvals, including approval by the Idaho Department of Water Resources, approving the transfer of the groundwater rights reflected in Exhibit A to the ownership, title and possession of Thomsen Golf, Inc. Transfer

of groundwater rights shall not be deemed to have occurred until all the requisite appeal periods and administrative periods have passed and the required governmental authorities, or any court adjudications, have been issued and title and possession of the groundwater rights are approved.

b. All governmental authorities have approved a transfer in the point of diversion for the groundwater rights described in Exhibit A from the present points of diversion operated by Welsh to points of diversion near or on the Indian Lake Golf Course as designated and controlled by Thomsen.

Welsh agrees to execute all further and necessary documents required to accomplish the conditions stated in paragraphs 4a and b above.

Thomsen will act with all due diligence and deliberate speed to accomplish obtaining the governmental approvals as contemplated in paragraphs 4a and b above, at the sole expense and cost of Thomsen.

Thomsen and Welsh agree that in the event the conditions stated in paragraphs 4a and b above are not completed, all escrowed funds shall be returned to Thomsen without any claim, right or demand by Welsh.

5. Integrated Agreement. Thomsen and Welsh agree, acknowledge and represent that this agreement is the final integrated written expression of the parties' agreement. The parties acknowledge and agree that this written agreement supersedes all previous oral discussions, negotiations, agreements or any side agreements pertaining to the subject matter of this agreement with the intent that this agreement is the sole and only final integrated written

expression of the parties' understandings and agreements. No amendment of this agreement may be made except in writing and signed by all parties to this agreement.

6. Idaho Law. This agreement shall be construed in accordance with the laws of the State of Idaho and shall not be construed, in the event of ambiguity, against any party drafting this agreement.

7. Binding Authority. This agreement shall bind all the parties, their heirs, successors and assigns.

8. Memorandum. The parties agree that a Notice may be recorded reflecting the existence of this memorandum agreement with reference to the groundwater rights described in Exhibit A attached hereto which are considered real property in the State of Idaho to provide record notice to all persons that Thomsen and Welsh have entered into an agreement affecting those groundwater rights.

9. Attorney Fees. In the event of any dispute between the parties, whether litigated or not, the prevailing party in any such dispute shall be entitled to recover from the losing party all costs and attorney fees, including attorney fees on appeal incurred by the prevailing party.

EXHIBIT A

DESCRIPTION OF WATER RIGHTS

All GROUNDWATER rights owned by Roger and Maureen Welsh pertaining to property located at Township 24 North, Range 1 East, E.B.M.. Sections 17 and 18, Ada County, State of Idaho. having a priority date of April 15, 1991 bearing a water right license nos. 6311518, with a maximum diversion rate of 2.0 CFS (per the attached license).

NO SURFACE WATER RIGHTS ARE CONVEYED HEREIN BY WELSH TO THOMSEN GOLF INC.

EXHIBIT B

IRRIGATION EQUIPMENT

Pump ID# Q9479-00-6-605

STATE OF IDAHO)
)ss.
County of Ada)

1. This affidavit is made from my personal knowledge.

3. This particular groundwater right is appurtenant to approximately 100 acres of property located generally at sections 17 and 18, T2N, R01E, Ada County, State of Idaho (Section 17 in the NW1/4NW1/4 and in the SW1/4NW1/4 -76 acres; Section 18 NE1/4NE1/4 and in the NW1/4NE1/4 -24 acres). The present point of diversion is in the SW1/4NW1/4, Section 17. This groundwater right has been utilized by my wife and I in our farming operation. We use and apply the water for irrigation purposes between March 15 and November 15, of each given year. The last year we utilized the water right was 1996, between March 15 and November 15 for irrigation of the described property, and in the Spring of 2000 for early irrigation to check out the pump system. We used the water right in 1991 through 1993, between March 15 and November 15 for irrigation of the described property.

5. We have not abandoned, forfeited, or lost any right or ability to utilize the referenced groundwater right.

6. This matter is presently involved in the water rights adjudication process. A copy of the claim to this water right as submitted in the adjudication is attached to this affidavit.

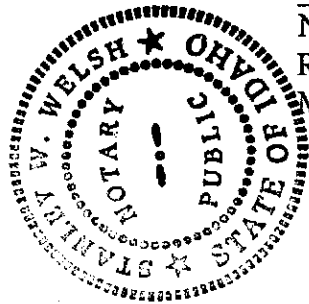

7. Attached to this affidavit is proof of our ownership of the land described above.

DATED this 10 day of August, 2000.

Total number of acres irrigated: 100

CONDITIONS OF APPROVAL AND REMARKS

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.
5. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
6. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.
7. This right when combined with all other rights shall provide no more than .02 cfs per acre nor exceed a combined annual diversion volume of 450.0 af for the lands above.

Curt R. Thomsen
2635 Channing Way
Idaho Falls, ID 83404

**RE: LICENSE NO. 63-11518 AND APPLICATION TO SELL OR LEASE A WATER
RIGHT TO THE WATER SUPPLY BANK**

Dear Mr. Thomsen:

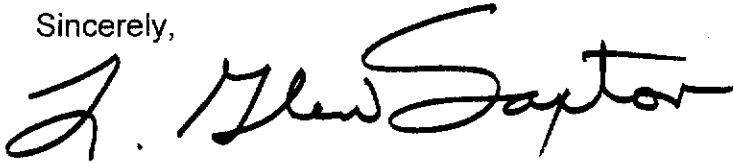

Returned is the Application for Transfer which you submitted to this office on September 5, 2000, together with your check in the amount of \$250 in connection with License No. 63-11518 ("license"). The application appears to be for the purpose of changing only the owner of the water right, since it does not show any other proposed changes. An application for transfer can be used to change the point of diversion, place of use, nature of use or season of use of a water right but not solely the owner of a water right. It also appears to be premature to file the application to change elements of the water right if Thomsen Golf, Inc. does not yet own it. Incidentally, the fee submitted with the application for transfer was not the correct amount.

The department can consider the Application to Lease the Water Right to the Water Supply Bank, however, provided the present owner (Roger and Maureen Welsh) submit to the department their written agreement for the right to be leased to the bank.

With respect to the license, please note Conditions of Approval Nos. 5 and 6, which apply to use of the water right and to any owner of the water right. The conditions show that diversion and use of groundwater under the license is supplemental to the use of surface water and requires use of the full allotment of surface water. I point this out, since Exhibit A of the Memorandum Agreement between Thomsen Golf, Inc. and the Welshes exclude the conveyance of surface water which appears to be the primary right of the Welshes. This is a potential problem in any future transfer of the water right, especially if the intent of a transfer is to make the groundwater right into a primary or stand alone water right.

If you have questions, please feel free to contact me or the department.

Sincerely,

A handwritten signature in black ink, reading "L. Glen Saxton". The signature is fluid and cursive, with the first name "L." being small and the last name "Saxton" being larger and more prominent.

L. GLEN SAXTON, P.E.
Chief, Water Allocation Bureau

RE: Water Right No. 63-11518

Dear Mr. and Mrs. Welsh:

I have enclosed a copy of the preliminary order amending water right license 63-11518 and a copy of the amended license document. The preliminary order is issued by the Department pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

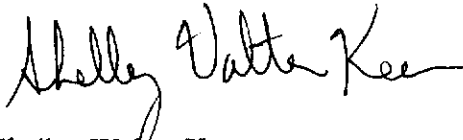

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please contact me at 208-327-7946.

Respectfully,

A handwritten signature in black ink that reads "Shelley Walter Keen". The signature is written in a cursive, flowing style.

Shelley Walter Keen

CHG&W File No. 12557-001

Dear Phil:

Thank you for your letter of March 6, 1997. I do appreciate the fact that you had someone review the matter in additional detail. On behalf of Roger and Maureen Welsh, I do request that the license be amended to change the place of use to 100 acres.

Very truly yours,

Dictated by Mr. Welsh and mailed
without signature in his absence to
avoid delay.

Re: License No. 63-11518 in the Name of Roger L. Welsh and Maureen N. Welsh

Dear Stan:

As we discussed in our telephone conversation of February 18, 1997, the time for appeal of the Department of Water Resources' order of December 12, 1996, designating the issuance of the above-referenced license as a final order expired on February 11, 1997.

I did, however, request the Department to review the license to determine whether the place of use properly should have been described as 100 acres rather than the 99 acres appearing on the license. After staff review of the aerial photography, I am informed that the Department is prepared to amend the license to change the place of use to 100 acres upon receipt of a written request.

Sincerely,

A handwritten signature in cursive script that reads "Phillip J. Rassier".

Phillip J. Rassier
Deputy Attorney General
Natural Resources Division

MEMORANDUM

To: File 63-11518
From: L. Glen Saxton *WJ*
RE: CONTACTS RELATIVE TO THE LICENSE
Date: March 21, 1997

This memo summarizes a number of contacts which were represented in the file by inter-office memos which normally are not kept as a part of a water right file:

- On January 15, 1997, attorney Stan Welsh called wanting to know the department's response to his petition. I advised that the department had received the petition and was reviewing it.
- On February 12, 1997, the right holder, Roger Welsh called and requested the status of the petition and about licensing 100 acres instead of 99 acres.
- On February 14, 1997, Phil Rassier talked with attorney Stan Welsh about whether the surface water shares could be transferred off the land and why the license was for 99 acres instead of 100 acres. Phil asked Welsh to provide information to the department about the nature of the irrigation district rights appurtenant to the land.
- On February 18, 1997, the department prepared an amended license showing 100 acres of land and a rate of diversion of 2.0 cfs.

RE: In the Matter of Water Right License No. 63-11518 in the name of Roger L. Welsh and Maureen N. Welsh

Dear Interested Party:

The accompanying order is a "final order" issued by the department pursuant to section 67-5246 or 67-5247, Idaho Code.

Section 67-5246 provides as follows:

- (1) If the presiding officer is the agency head, the presiding officer shall issue a final order.
- (2) If the presiding officer issued a recommended order, the agency head shall issue a final order following review of that recommended order.
- (3) If the presiding officer issued a preliminary order, that order becomes a final order unless it is reviewed as required in section 67-5245, Idaho Code. If the preliminary order is reviewed, the agency head shall issue a final order.
- (4) Unless otherwise provided by statute or rule, any party may file a petition for reconsideration of any order issued by the agency head within fourteen (14) days of the issuance of that order. The agency head shall issue a written order disposing of the petition. The petition is deemed denied if the agency head does not dispose of it within twenty-one (21) days after the filing of the petition.
- (5) Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- or
- (a) the petition for reconsideration is disposed of;
 - (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

(6) A party may not be required to comply with a final order unless the party has been served with or has actual knowledge of the order. If the order is mailed to the last known address of a party, the service is deemed to be sufficient.

(7) A non-party shall not be required to comply with a final order unless the agency has made the order available for public inspection or the non-party has actual knowledge of the order.

(8) The provisions of this section do not preclude an agency from taking immediate action to protect the public interest in accordance with the provisions of section 67-5247, Idaho Code.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a final order within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5246(4), Idaho Code.

APPEAL OF FINAL ORDER TO DISTRICT COURT

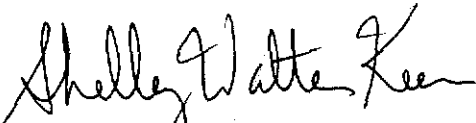

Pursuant to sections 67-5270 and 67-5272, Idaho Code, any party aggrieved by a final order or orders previously issued in a matter before the department may appeal the final order and all previously issued orders in the matter to district court by filing a petition in the district court of the county in which:

- i. A hearing was held.
- ii. The final agency action was taken.
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days a) of the service date of the final order, b) of an order denying petition for reconsideration, or c) the failure within twenty-one

(21) days to grant or deny a petition for reconsideration, whichever is later. See section 67-5273, Idaho Code. The filing of an appeal to district court does not in itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

for L. GLEN SAXTON
Chief, Water Allocation Bureau

MEMORANDUM

DATE: December 9, 1996

TO: Glen Saxton

FROM: Shelley W. Keen *SWK*

RE: Request for Amendment of License 63-11518

We have received a request to amend License 63-11518, issued in September, to "eliminate the conditions which were not set forth in the original permit." I would like your guidance on how to proceed.

The "new" conditions are our standard conditions for groundwater rights supplemental to a surface water supply. The permit was issued in 1991 before the Basin 63 moratorium was put in place. At that time, the relationship of groundwater rights to surface water was less of a concern than it is now. However, the application clearly states that Boise-Kuna and New York Irrigation District water was being used to irrigate the place of use.

Cindy Hodges wrote in her field report that the place of use was irrigated only with groundwater in 1991, 1992, and 1994. It was not irrigated in 1993 and 1995. In 1996 it was being irrigated with surface water, and the well was not in use. We have no indication where the surface water went from 1991 through 1995.

The issue appears to be this:

- On the one hand the application appears to show an intent to develop a supplemental right, and the department is now very deliberate in requiring that supplemental groundwater development remain supplemental.
- On the other hand, the permit did not require the groundwater to be developed as a supplemental use, and it was apparently developed as a primary source.

Last January Norm drafted the following condition to be applied to licenses if the intent of the permit holder was to replace a surface water use with groundwater. It is intended to put the right holder on notice that future conjunctive management rules may require the resumption of surface water use. Perhaps this condition will work in this case.

Diversion and use of water under this right is subject to rules that may subsequently be promulgated for the use of existing rights used for supplemental purposes.

Dear Ms. Keen:

This office represents Roger and Maureen Welsh.

I have enclosed herewith a copy of your letter dated September 16, 1996. Also enclosed herewith is a copy of the original permit. The license issued contained additional conditions beyond those set forth in the permit. We request that the license be re-issued and eliminate the conditions which were not set forth in the original permit.

Please give me a call if you have any questions regarding this matter.

Very truly yours,

RE: WATER RIGHT NO. 63-11518

Dear Water Right Holder(s):

Enclosed is a copy of the Water Right License issued on the above referenced permit. If you have any questions, please contact me within 10 days of receipt of this license.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

TO: File 63-11518

FROM: Shelley W. Keen *SK*

RE: Phone call from Roger Welsh

Roger Welsh called this afternoon to discuss License 63-11518. He thinks that the license should show 24 acres in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Section 18, T2N, R1E. Mr. Welsh is going to submit information from the ASCS to support his assertion. I reminded him that the information must show that the 24 acres were irrigated prior to 1993.

Mr. Welsh is also concerned by the conditions on his license making the right supplemental to surface water. He told me that when he got Permit 63-11518, which does not have conditions requiring the right to be developed as supplemental to surface water, he moved his surface water to other lands and developed 63-11518 as a primary right. Mr. Welsh is going to submit a letter asking the department to amend his license to recognize that it is a primary right.

Measured Method: 900 gpm or 2.00 cfs from pump curve.

Check: $\frac{25 \text{ HP} \times 8.8 \times .7}{81} = 1.90 \text{ cfs}$

(^{actual} horsepower estimated. BHP = 23)

allow 1.98 cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 99 \times 4.5 = 445.5$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 1.98 \times 246 \times 1.9835 = 966$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 445.5$$

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS

1. Recommended Amounts

MEMORANDUM

August 12, 1996

TO: 63-11518

FROM: Cindy Hodges

RE: *File Information*

I conducted this exam in 1993 and had not yet completed the recommendation because I was waiting to receive a pump curve or other information from the owner. This summer, I was contacted by two different parties regarding the purchase of this right. As a result of the ensuing conversations with those parties and with Mr. Welsh, I have some additional information regarding the use of this right in combination with the appurtenant surface water rights.

When I was contacted by the interested purchasing parties, they indicated that Mr. Welsh was considering the sale of the right separate from the land. I advised both parties that it was my understanding that the ground water right had been developed as supplemental to surface water diversions, and therefore might not be able to be removed as a primary irrigation right.

Mr. Welsh contacted me later and offered the following details regarding development of the right:

Well was drilled in 1991 and used for irrigation in 1991, 1992 and 1994. However, surface water was not used for those years because the appurtenant shares were moved to other lands within the District. No irrigation occurred from any source on these lands in 1993 or 1995; I do not know the disposition of the surface shares for those years. For 1996, surface shares have been moved back to these acres and the well is not in use.

Since the above permit was awarded in 1991, without the prohibitive conditioning found on the 1992 and later permits, the transfer of surface water shares off the land in question does not necessarily invalidate the permit. However, does it substantiate the development of ground water as a primary irrigation source, enabling the right to be sold for that purpose?

The above information should not delay or modify licensing of this right, but it could become important if the sale of the right becomes imminent. Because the intent of the application was to provide supplemental water, I have recommended this right as a supplemental right. In the event the right is proposed for transfer, the right holder should be obligated to provide the evidence that the right was developed in the manner described.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-11518

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a flow measurement port to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the flow measurement port must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 63-11518

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

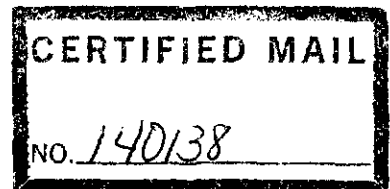

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

Drilling Permit No. 63-91-W-123

Water Right No. 63-11518

REQUEST FOR EXPEDITED ISSUANCE OF A DRILLING PERMIT

Roger Welsh, Applicant, requests issuance of Drilling Permit prior to approval of a water right. The request is made for the following reason(s):

well driller's schedule

Applicant understands that the drilling permit does not constitute a water right and does not authorize diversion or use of water from the well.

Applicant acknowledges that by accepting a drilling permit and commencing construction he accepts all risk that the well may not ultimately be approved for use.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 4/15/91

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. Water cannot be diverted from this well until Permit No. 63-11518 is approved.

Re: Permit No. 63-11518

Dear Permit Holder(s):

We acknowledge receipt of the correspondence transferring ownership of the above referenced water right to you. We have modified our computer records to reflect this change in ownership.

If you have any questions regarding this matter, please feel free to contact us.

Sincerely,

BRENDA L. MILLER
Technical Records Specialist

Re: Roger L. Welsh Loan No. 30539-441

Dear Sir:

We have enclosed our Assignment of Permit for Permit No ⁶³G3-11518 issued to Roger L. Welsh and Maureen N. Welsh.

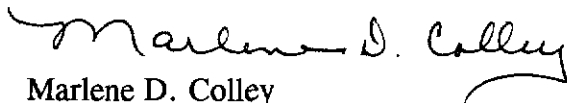

Mr. and Mrs. Welsh have pledged this security for the above mentioned loan.

Please send copies of all notices and correspondence to Northwest Farm Credit Services, ACA. P. O. Box 730, Caldwell, Idaho 83606-0730.

Thank you for your cooperation in this matter.

Sincerely,

NORTHWEST FARM CREDIT SERVICES, ACA

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11518

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water.

MICROFILMED

JUL 15 1991

Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Sincerely,

JIM JOHNSON
Water Rights Supervisor
