WATER RIGHT LICENSE

WATER RIGHT NO. 63-11451

Priority: January 31, 1991

Maximum Diversion Rate:

0.45 CFS

Maximum Diversion Volume:

90.2 AF

This is to certify, that SCHOOL DISTRICT NO 139

2423 S GEORGIA AVE

CALDWELL ID 83605-9096

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated January 31, 1991; and has submitted Proof of Beneficial Use on February 16, 1993. An examination indicates that the works have a diversion capacity of .450 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.45 CFS	81.0 AF
DOMESTIC	01/01 to 12/31	0.45 CFS	9.2 AF
FIRE PROTECTION	01/01 to 12/01	0.45 CFS	
	Totals	0.45 CFS	90.2 AF

LOCATION OF POINT(S) OF DIVERSION:

NESW , Sec. 11, Township 03N, Range 03W
CANYON County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
03N	03W	11	NESW	18		18

Total number of acres irrigated: 18

PLACE OF USE:

DOMESTIC, same as IRRIGATION use

PLACE OF USE:

FIRE PROTECTION, same as IRRIGATION use

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-11451 Telephone No. (208) 454-0445
2. Name(s) of Permit Holder(s): Vallivue School District
3. Mailing Address: 2423 S. Georgia Ave., Caldwell, ID 83605
4. Source of Water: Ground water

If **GROUNDWATER**, Well Driller's Name: Caron Pump Co. Date Drilled: 09/91

OPTIONAL:

Pump horsepower: 15 HP Pressure (psi): 60-80 Dynamic pumping level (ft.): 110

5. Extent of Use (as authorized by the permit):

Domestic 1 (No. of ^{school}households) Stockwater _____ (No. and type of stock)

Irrigation 20 (No. of acres) Other School fire protection

6. Total rate and/or volume for which proof is submitted 1.89 cfs OR acre/feet

7. Refer to the approval conditions on your permit and respond accordingly: pentelcon 2/16/93

Measuring device: Required? Yes No Installed? Yes No

OR

Flow Measurement Port: Required? Yes No Installed? Yes No

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
- e. Other:

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

E. NARRATIVE/REMARKS/COMMENTS

A 10" well with a 15HP submersible pump supplies water to 18 acres and Central Canyon School. The outskirted acres are irrigated with 3 handlines. The lawn area closer to the school is irrigated with a buried zoned sprinkler system. Water is delivered through a 4" buried mainline.

The 57,400^{sq} school consists of 600 students, 50 faculty members and 2 full time janitors. There are 4 large restrooms with 6 stalls each, 4 single restrooms, 9 drinking fountains and a large kitchen facility.

The system utilized a 10K gallon pressure tank for primary use and a 40K gallon storage tank for fire protection. Based on the attached computations, the system can sufficiently supply peak irrigation and domestic water demands simultaneously.

The school has been allowed 3"/acre as a condition of this permit. No other wts are used.

(Carom Pump Co installed the pump system)

Have conditions of permit approval been met? ☐ yes ☐ no N/A for exam

RECORDED
JUN 13 1994

F. FLOW CALCULATIONS

Measured Method:

$$\frac{15 \times 8.8 \times .7}{205 \text{ TDH}} = .45 \text{ cfs}$$

Additional Computation Sheets Attached

$$\text{TDH: } 65 \text{ psi} \times 2.31 = 150 + 55 \text{ dynamic} = 205' \text{ TDH}$$

- PSI per owner
- dyn pumping level per Carson Pump Co

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 18 \times 4.5 = 81$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .45 \times 246 \times 1.9835 = 219.6$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 81$$

2. Volume Calculations for Other Uses:

$$600 \text{ students} \times 25 \text{ GPD/student} = 15000 \text{ GPD}$$

$$50 \text{ faculty} \times 25 \text{ GPD/person} = 1250 \text{ GPD}$$

$$2 \text{ custodians} \times 25 \text{ GPD/person} = 50 \text{ GPD} \times 355 \text{ days} = 17750 \text{ GPD}$$

$$\frac{16250 \text{ GPD} \times 184 \text{ days}}{325850} = 9.17 \text{ afa}$$

$$\frac{17750 \text{ GPD}}{325850} = .05 \text{ afa}$$

$$\underline{9.2 \text{ afa}}$$

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
<u>Irrigation</u>	<u>3/15</u>	<u>11/15</u>	<u>.45</u>	<u>81</u>

Lori,
I just thought this info
might be of some help!

Re: Vallivue Elem. Well and Pump

Dear Jim,

Following is the information you requested on the above referenced well and pump system;

This well is 10" X 214' deep, pump is set 105' on 3" galvanized pipe, static water level is 25', and this pump will produce 200 GPM with a draw down to 55'.

The well log and information pertaining to the well casing, screen size, strata's and aquifers can be obtained from the Department of Water Resources in Boise at 1301 N. Orchard, 327-7900. Dennis Phipps, should also have a copy of the complete well information and he can be reached at 888-1113.

If you have any further questions regarding this pump system, or need additional information, please feel free to contact our office.

It's a pleasure to be of service!

Sincerely,

Steve R. Caron

MICROFILMED
JUN 13 1994

REASONABLE SYSTEM?

Storage tank size estimates:

$$A = \pi r^2$$

Pressure tank

$$r^2 = (\frac{1}{2} \text{Dia}')^2 = (4' \div 2)^2$$

$$A = 4' \pi = 12.6' \times 20' = 252 \text{ cu'}$$

$$\text{Gal} = 252 \text{ cu'} \times 7.5 \text{ gal/cu'} = \sim \underline{2000 \text{ gal}}$$

Log tank

$$r^2 = (22' \div 2)^2$$

$$A = 121' \pi = 380' \times 14' = 5320 \text{ cu'}$$

$$\text{Gal} = 5320 \text{ cu'} \times 7.5 \text{ gal/cu'} = \sim \underline{40,000 \text{ gal}}$$

GPD required:

school - 16,300 GPD

$$\text{acres} - 4.5 \text{ afa} \div 246 \text{ dya} = .018 \text{ af/ac/dy}$$

$$.018 \text{ af/ac/dy} \times 18 \text{ ac} = .33 \text{ affdy}$$

$$.33 \text{ af/dy} \times 325,850 \text{ gal/af} = \underline{107,531 \text{ GPD}}$$

GPD Potential:

$$.45 \text{ cfs} \times 448.8 \text{ GPM/cfs} = 202 \text{ GPM}$$

$$202 \text{ GPM} \times 60 \text{ min} \times 24 \text{ hrs} = \underline{290,880 \text{ GPD}}$$

$$\text{Normal use: } 107,531 + 16,300 = 123,831 \text{ GPD req} \div 2000 \text{ gal storage} = \sim 62 \text{ fills/dy}$$

$$2000 \text{ gal} \div 202 \text{ GPM} = \sim 10 \text{ min/fill}$$

$$62 \text{ fills/dy} \times 10 \text{ min/fill} = 620 \text{ min} \div 60 \text{ min/hr} = \underline{10.3 \text{ hrs/dy}}$$

$$10.3 \text{ hrs} \div 24 \text{ hrs} = .43$$

Assuming peak irrigation demand and
and max school demands simultaneously,
the pump would only need to operate @ 43%
of its daily pumping capacity. This is not
unreasonable since IDWR allows up to
80%.

Fire Protection
Considerations:

$$40,000 \text{ gal} \div 202 \text{ GPM} = \sim 200 \text{ min/fill}$$

$$200 \text{ min} \div 60 \text{ min} = 3.3 \text{ hrs between fills}$$

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-11451

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a flow measurement port to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the flow measurement port must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is

Approval

Date

6/12/91

If approved, this permit authorizes the constuction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approval

Date

6/12/91

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

Signature of Authorized Department Representative

Re: Permit No. 63-11451

At the time we applied for the well drilling permit it was thought a second well might have to be drilled. However, as indicated on the proof of beneficial use, only one well was drilled at our Central Canyon Elementary school for the purpose of domestic use, fire protection and irrigation.

We need to apologize for giving you wrong information. Your records are correct showing Dennis Phipps as the well driller. He was a subcontractor for Caron Pump Co., our contractor for the well and pump.

Thank you for your assistance in this matter. Please proceed with the examination of our system and the issuance of a license of water right.

Sincerely,

Ken Brocke
Director of Operations

Re: Permit No. 63-11451

Dear Permit Holder:

In the department's review of the proof of beneficial use submitted in connection with the above referenced permit, the department was not able to locate a well log which should have been submitted by your well driller 30 days after completion of the construction of the well. Our records indicate that two wells were to be drilled. We were able to locate one well log drilled by Dennis Phipps in September of 1991, however, we could not locate the second well log.

Did you drill two wells as you indicated you would when you applied for the permit? Or did you drill only one well as indicated on the proof of beneficial use?

If you did drill a second well and if you have a copy of the well log, please provide this office with a copy. If you do not, please contact your driller and ask that he submit a copy directly to me. In your return letter, please be sure to show the above referenced permit number on any documents. Also, please address any correspondence directly to me. Your response should be received within 30 days of the date of this mailing.

Also, you have indicated the well driller to be Caron Pump Co. We believe this to be the company that sold you the pump, not the well driller. In your correspondence, please clarify who drilled the well or wells.

This information is needed before the department can proceed further with the examination of your system and the eventual issuance of a license of water right.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 63-11451

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before April 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

Re: Vallivue Elementary School

Dear Steve:

The Vallivue School District is now ready to begin developing two wells at their new elementary school site.

As I mentioned in our phone conversation last February, the school district is not drilling a new well at the high school. Instead, please credit the \$465.00 you already have to two new wells and one water right at the elementary school site on Florida Avenue.

Enclosed are two "Application for Drilling Permits" for the elementary school. After you have reacquainted yourself with the file, please call me.

Sincerely,

BRIGGS ENGINEERING, Inc.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-11451

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

You should be aware that you are located within a drainage basin where surface water diversions are regulated by a watermaster. It is possible that diversion of groundwater under your permit may cause a reduction of surface water flow. Siting your well as far as possible from surface water channels and casing your well

APR 23 1991

so that groundwater tributary to surface water flows are not diverted will reduce the potential for the watermaster to regulate your water use.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

STATE OF IDAHO

DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

Ident. No. _____

To appropriate the public waters of the State of Idaho

1. Name of applicant Vallivue School District #139 Phone 454-0445

Post office address Route 8, Box 474, Caldwell, Idaho 83605

2. Source of water supply Ground Water which is a tributary of _____

OR, it
is
NE SW
?
3. Location of point of diversion is _____ 1/4 of NE 1/4 of SE SW 1/4, Govt. Lot _____
Sec. 11 Township 3N Range 3W Canyon _____ County; additional
points of diversion if any: _____

4. Water will be used for the following purposes:

Amount 0.64 for Domestic purposes from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount 1.25 for Irrigation purposes from March 15 to Nov. 15 (both dates inclusive) *

1.89 Amount 6.7 for Fire Flow Protection purposes from Jan 1 to Dec. 1 (both dates inclusive)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated is (a) 1.89 and/or (b) 44
cubic feet per second acre feet per annum

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. Drilled wells (one for each use)
with pump, piping, and controls.

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.

c. Proposed well diameter is 12 inches; proposed depth of well is 165 feet.
8 Dom. 300 Dom.
12 Irrig. 165 Irrig.
12 Fire 165 Fire

d. Is ground water with a temperature of greater than 90°F being sought? NO APR 23 1991

7. Time required for the completion of the works and application of the water to the proposed beneficial use is
2 years (minimum 1 year).

* Fire protection adjusted per telecon with Stan McHutchins, P.E. Excess in irrigation
rate requested for school irrigation. Irrigation season per IOWR standard
season for that location.

82 1/28/91

8. Description of proposed uses (if irrigation only, go to item 9):

- a. Hydropower; show total feet of head and proposed capacity in KW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; show name of municipality. _____
- d. Domestic; show number of households. Elementary School - 600 students & 50 staff
- e. Other; describe fully. (1) Emergency Fire Demand
(2) Irrigation

9. Description of place of use: shown as NESW OKSM

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
3N	3W	11									20								20

Drilling and Water Rights

Dear Steve:

Per our phone conversation last Monday, I'm ~~enclosing a check for \$5.00 and a~~
~~resigned~~ copy of the water rights permit.

Please note that I could not find an originally signed application in my files or at the school district. Please let me know if the enclosed signature is not sufficient.

Sincerely,

BRIGGS ENGINEERING, Inc.

RE: Applications for Permit for Vallivue School District No. 139

Dear Mr. McHutchison:

The following information results from our telephone conversation on 1/28/91. Two applications for permit to appropriate water and two applications for drilling permits relating to the existing high school and proposed elementary school were received from your firm. Enclosed is the receipt for \$460 and the necessary documents to allow revision of the two water right applications.

In the course of establishing a new water right, an application fee is paid at the initial stage and a license fee is paid later in the licensing or proof of beneficial use stage.

Water rights for fire protection are not necessarily required in Idaho. Water under an established right can be used for fire uses when needed whether that use is recorded on the right or not. While a water user can apply for and receive a right for fire protection, this is not needed in many cases.

High School Site

The water right application and well drilling application for the high school are returned. A new well, but not additional water, can be added to existing water right permit 63-10182, which provides 1.40 cfs of irrigation and domestic water for that site. Fire protection is an assumed use in permit 63-10182.

A new well can be added to permit 63-10182 by signing and returning the enclosed "Application for Amendment of a Permit". It should be signed by a representative (include title with signature) of the district. Upon approval of the amendment, a well drilling permit can be approved prior to drilling the well. The drilling permit should be submitted after the amendment is approved and within 60 days prior to drilling.

The amendment alternative provides an additional well, recognizes but does not record fire protection as a beneficial use, and saves the district \$305 (\$20 for the amendment v. \$125 to apply for and \$200 to license 4.5 cfs).

Elementary School Site

The proposed elementary school is a different story. No existing rights are found for such use at the proposed site. The application to appropriate water is the correct step. However, the large flow for fire protection may not be advisable. Again, fire protection is assumed under any right. By combining the domestic and irrigation parts of the application, 1.89 cfs is available for

MICROFILMED

APR 23 1991

S. McHutchison, 1/29/91, Page 2

fire needs. To apply for 6.7 cfs, a \$165 application fee, and subsequently a \$250 license fee, would be required. The application and subsequent license fee for 1.89 cfs is \$190, a \$225 savings compared to the fees associated with 6.7 cfs.

I suggest that the application be modified to allow up to 1.89 cfs for fire protection. The domestic and irrigation parts do not need to be adjusted. Alternatively, fire protection could be deleted since it will be assumed, and the application could total 1.25 cfs or 1.89 cfs for irrigation and domestic. The excessive irrigation flows (greater than one miner's inch per acre) can be requested for schools. Fees for 1.25 cfs or 1.89 cfs are identical.

Please review the copy of the elementary school water right application and note the changes that I made. Also, please clarify the proposed points of diversion. The legal description in item 3 does not agree with the map in item 13. The corrections or clarifications can be made on the copy, and it can be returned to me with an **original signature** below the map on application page 3. (The water right applications were received with a photocopy signature. The drilling permits show original signatures.)

The second drilling permit application applies to the elementary school. Three possible new wells are mentioned for the site. Each well would require a \$200 drilling permit. This drilling permit form is also returned and can be activated after approval of the water right application. Contact this office at the appropriate time for approval of well drilling permits.

Response Requested

A response within 30 days is requested. Return the signed "Application for Amendment" to add a well to permit 63-10182 for the high school (or contact me if this is not the preferred alternative). Return the signed "Application for Permit to Appropriate Water" for the elementary school. All signatures must be originals. The two applications require \$65 in fees, but \$60 was already paid in the \$460 payment (the other \$400 applies to the drilling permits). Please submit \$5 with the returned documents.

Feel free to call contact me if additional information is needed.

Sincerely,

Steve Lester
Sr. Water Resource Agent
