System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

This system uses a 40 hp pump to move water through a 12" casing. The well is 220' deep. The static is at 114'. The drawdown is estimated at 53'. The system is used purely for irrigation via concrete ditches.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 158.6 \times 4.5 = 713.7$

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 1.47 \text{ cfs} \times 214 \text{ (Permit Season)} \times 1.9835 = 624.0$

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 713.7 \text{ AFA} \quad 624.0 \text{ AFA}$

H. REMARKS AND OVERLAP REVIEW ANALYSIS

* The theoretical was the only available source for measurement. The well pumps into a waste ditch - 'supplements'; the pump is too turbulent for a theoretical.

Although the theoretical only measured 1.47 cfs, I do believe that it is accurate. The information is accurate from well logs. Also even if the pump was running at 100% efficiency & there was no drawdown the pump could not even put out over 1.5 cfs, so that is not likely.

RE: PERMIT NO. 63-11279

Dear Mr. Davis:

Returned is the proof of beneficial use form which you submitted on October 15, 1990 in connection with the above referenced permit. The proof is not acceptable since it was not accompanied by the required license examination fee of \$175.

The permit authorized the diversion of 4.0 cfs for the irrigation of 200 acres. The proof you submitted shows the irrigation of 230 acres.

Please revise and/or complete the proof and resubmit it to the department together with the license examination fee within 20 days in order to keep the permit in good standing. Feel free to contact the department if you have questions.

Sincerely,

RITA I. FLECK

RE: PERMIT NO. 63-11279

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

JUN 04 1991

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

JIM JOHNSON

ACTION OF DEPARTMENT OF WATER RESOURCES

This Permit is Approved Date 4/11/90

If approved, this permit authorizes the construction of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

REQUEST FOR EXPEDITED ISSUANCE OF A DRILLING PERMIT

Idackest Farms Inc by Jack Davis, Applicant, requests
issuance of Drilling Permit prior to approval of a water right.
The request is made for the following reason(s):

Driller availability

Applicant understands that the drilling permit does not constitute a water right and does not authorize diversion or use of water from the well.

Applicant acknowledges that by accepting a drilling permit and commencing construction he accepts all risk that the well may not ultimately be approved for use.
