(required for all but single household domestic groundwater, and stockwater).

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

The system consists of a 12" diameter well with a 40 Hp pump that discharges to an 8" diameter steel pipe. The discharge pipe diverts water 20' from the ~~pump~~ ^{well} into an open dirt ditch. A valve 3' from the ~~pump~~ well diverts water to an 8" x 12" steel pipe to a dirt ditch that flows North approx 100' and then East approx 200'. The first dirt ditch flows Northwest about 1000'. Irrigation is provided by siphon tube.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Other rights in same Q₉ don't affect this permit. 63-5310 is a domestic use and system, 63-10463 is a different P/D for 6 acres Southwest of this permit but in the same Q₉.

Recommend period of use comply with department standards for the use and license comply with acres requested in permit of 27 acres rather than 28 acres as shown on aerial map.

Permit was obtained by tenant farmer Tamara Bros on behalf of the owners Emerson and Elizabeth Platt.

IRRIGATION RIGHT FROM A GROUND WATER SOURCE

A theoretical calculation is necessary to determine if a measurement is required for irrigation from a groundwater source.

=====

1. Using the found acres (or an estimate by the permit holder) calculate the acre-foot per annum limit. This is the volume that the system must be able to theoretically produce to exclude a rate of flow measurement.
2. Next, given the pump hp and the estimated dynamic water level, calculate the theoretical rate of flow that the system can produce.
3. Using the rate found in step 2 and the days in the permitted irrigation season, calculate the theoretical AFA that the system could produce. This volume is then compared to the first AFA calculation. If the theoretical volume (step 3) is greater than the irrigation requirement volume (step 1) then no measurement is necessary. If it is less, then you must make a diversion rate measurement during the field examination.

$$1. \quad \frac{28}{\text{Found Acres}} * \frac{4.5}{\text{Irr. Req.}} = \frac{126}{\text{AFA}}$$

$$2. \quad \frac{(40) \text{ HP} * 8.8 * (.7) \text{ EFF}}{(94) \text{ Dyn Level} + (2.3 * \{0\} \text{ PSI})} = \frac{26}{\text{Theor. Div. Rate}} \text{ CFS}$$

$$3. \quad \frac{26}{\text{Theoretical Div. Rate}} * \frac{246}{\text{Days in season}} * 1.9835 = \frac{1268.6}{\text{AFA}}$$

Note: for electrical motors
EFF = 0.70
for diesel motors
EFF = 0.60

RE: PERMIT NO. 63-11220

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck

RE: PERMIT NO. P63-11220

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
