E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS - P/O same Q/Q, but different P/O
P/U same Q/Q, but different point of use.

Water from 8" well is used for home and irrigation of 2.5 acres. Approximately 0.8 acreage of lawn, and 1.7 acres of pasture. Lawn is irrigated by an underground sprinkling system. Rainbirds are attached in each section. Not a pop-up system. The rainbird nozzles were $\frac{1}{8}$ " at 34 psi, and $\frac{3}{16}$ " at 26 psi. Flow at spigot was measured to be 0.03 cfs.

Assuming 20 psi for sprinklers:

$$\frac{1}{8}" \text{ nozzle} = 2.77 \text{ gpm} = 0.006 \text{ cfs} \times 2 \approx 0.012 \text{ cfs}$$
$$\frac{3}{16}" \text{ nozzle} = 2.96 \text{ gpm} = 0.007 \text{ cfs} \times 2 \approx 0.014 \text{ cfs}$$

Flow per section of sprinkling approximately 0.03 cfs.

Irrigation of 1.7 acre of pasture is by several lengths of hose, with rainbirds, from spigot in back yard.

Pasture is watered once a week.

TOTAL flow for ^{PASTURE} ~~home~~ and lawn sprinkling was measured to be 0.06 cfs. ^{home use was not measured,} Therefore, recommend Licensing for ^{0.08} 0.06 cfs, not 0.08 cfs as requested on permit.

$$Q = \frac{(8.8)(1)(0.7)}{(60+20) \times 2.31} \approx \frac{0.04}{0.7} \text{ cfs}$$

No dynamic or static level available, therefore 60' is estimate.

Have conditions of permit approval been met? ☒ yes ☐ no

F. FLOW CALCULATIONS

____ Additional Computation Sheets Attached

Measured Method:

5 gallon bucket = 12.5 gpm = 0.03 CFS

Pressure Gauge on sprinkler heads - 5.54 gpm = 0.012 CFS

5.92 gpm = 0.014 CFS

TOTAL = 0.06 CFS

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 2.5 \times 4.5 = 11.25 \text{ AFA}$

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.08 \times 246 \times 1.9835 = 285 \text{ AFA}$

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 11.25 \approx 11.3 \text{ AFA}$

2. Volume Calculations for Other Uses:

* $V_{int} = 0.6 \text{ AFA}$

TOTAL VOL. = 11.9 AFA

PROOF DUE NOTICE

RE: PERMIT NO. 63-11200

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before July 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

RE: PERMIT NO. P63-11200

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you

commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor
