ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

PROOF DUE NOTICE

RE: PERMIT NO. 63-11185

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. P63-11185

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the department. Enclosed please find a list of measuring device options and specifications for the installation of the flow measurement port.

MICROFILMED

JUL 24 1990

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

RE: WAIVER OF RULE 4,5. ADDITIONAL INFORMATION REQUIREMENT

DATE: 05-JUL-1990

=====

The location of the point of diversion falls outside of the trustwater area. Normally, additional information would be required under Rule 4,5. of the Water Appropriation Rules and Regulations. However, this application is for use of a well that was installed in 1963 and has been used to supplement their surface water rights. Possible issues that the additional information should address have probably already been raised during development and operation. The applicant's did supply response to the Rule and Reg. requirements in their correspondence of 3/9/1990. No further review should be required.

COMMENTS

CONVERSATION MEMORANDUM

DATE 6-22-90FILE 63-11185NAME OF PARTY Vicki of Settlers Tring Dist 344-2471EMPLOYEE Steve LesterRE: Comment Letter from Ada County Comm. office for
Large Div. Rejuvenation:

Vicki summarized attempts to obtain written response -

- 4/18 approached Co. Comm. office, spoke with Becky.
- referred to Central Dist. Health & on 5/21 was referred to D.O. Envin. (Tom wrote - see 5/30/90 come name).
- Tom W. - no concerns except impact on D/I wells

Since supplemental well has been in place & presumably used sometime since 6/1961, it appears that negative impacts on D/I wells have not occurred or at least have not been brought **MICROFILMED** to our attention.

JUL 24 1990

It also appears that Ada Co. Comm. office does not want to submit a comment ~~letter~~ despite more than one attempt by applicant to obtain a letter.

Therefore, I suggest that Co. Comm. have had ample opportunity to comment & have declined. The matter does not need to be pursued & TOWR can act on application.

/DLK 6/28/90

CONVERSATION MEMORANDUM

DATE 5/30/90FILE 63-11185NAME OF PARTY Jon Wroten D.O. Environment (ZO. Dept. H & W)EMPLOYEE Steve Lester

RE: Jon called to discuss a phone call he received from Vicki of Settlers I. D. regarding comment letters for local public interest in large d.i. suppl. analysis requirements. He outlined this process:

Vicki asked County Comm. for comment letter, they referred her to Central Dist Health.

C. D. Health referred her to D. O. E.

D. O. E. has no problem with the appl. as long as domestic wells are not impacted.

It appears that a comment letter was sent to County (note found on L. D. Suppl. Analy. sheet). If we don't receive a response soon, we could contact Co. Comm. office to request this.

This single request for a comment letter has become unnecessarily complex.

Re: Application for Permit 63-11185

Dear Mr. Lester:

In order to answer your questions pertaining to the filing on this well, I feel it necessary to give you some history on this particular well.

This well was initially installed in 1963 to alleviate drainage problems in the area. The management of Settlers at that time, filed an Application for Permit on May 13, 1963 (Application #39222/ Permit #31131) but they failed to show Beneficial Use within the proper time frame and the Permit was never issued. The well has been in use off and on since that time, however.

Although the well was initially used for drainage, the water from the well was also used to supplement irrigation water in the McMullen Lateral. The use of this well now is primarily to supplement water to the McMullen Lateral which serves 352 acres from the well downstream.

To answer the questions from your letter:

- 1) Please see the enclosed map with the location of the well marked. Please note the deletion of Sec. 27 from the land list and map as the well is located downstream from that section. See Item #3
- 2) The proper flow from the well is approximately $1/2 \approx .50$ cfs
CFS, 50 Idaho miners inches ≈ 1.00 cfs
- 3) Sec. 20 has 48 acres
Sec. 28 has 304 acres

352 acres
- 4) a. The McMullen Lateral is on the tail-end of the canal and often times experiences a shortage of water. The water pumped from this well makes up for any shortage and enables us to deliver the proper amount to irrigators.
b. This is just supplemental water and is sufficient

Large Diversion

for that purpose.

- c. Not applicable
- d. Not applicable
- e. An inquiry was sent out in 1965 to all people concerned and with the exception of one individual, we have no records indicating any adverse public reaction. The opposed individual was concerned that their shallow well was being dried up. A Geologist-Engineer was hired by Settlers to resolve the matter. No further public opposition has been noted.

If you have any further questions regarding this well, please phone 344-2471 Mondays, Wednesdays, or Fridays between the hours of 9:00 a.m. and 3:00 p.m.

Sincerely,

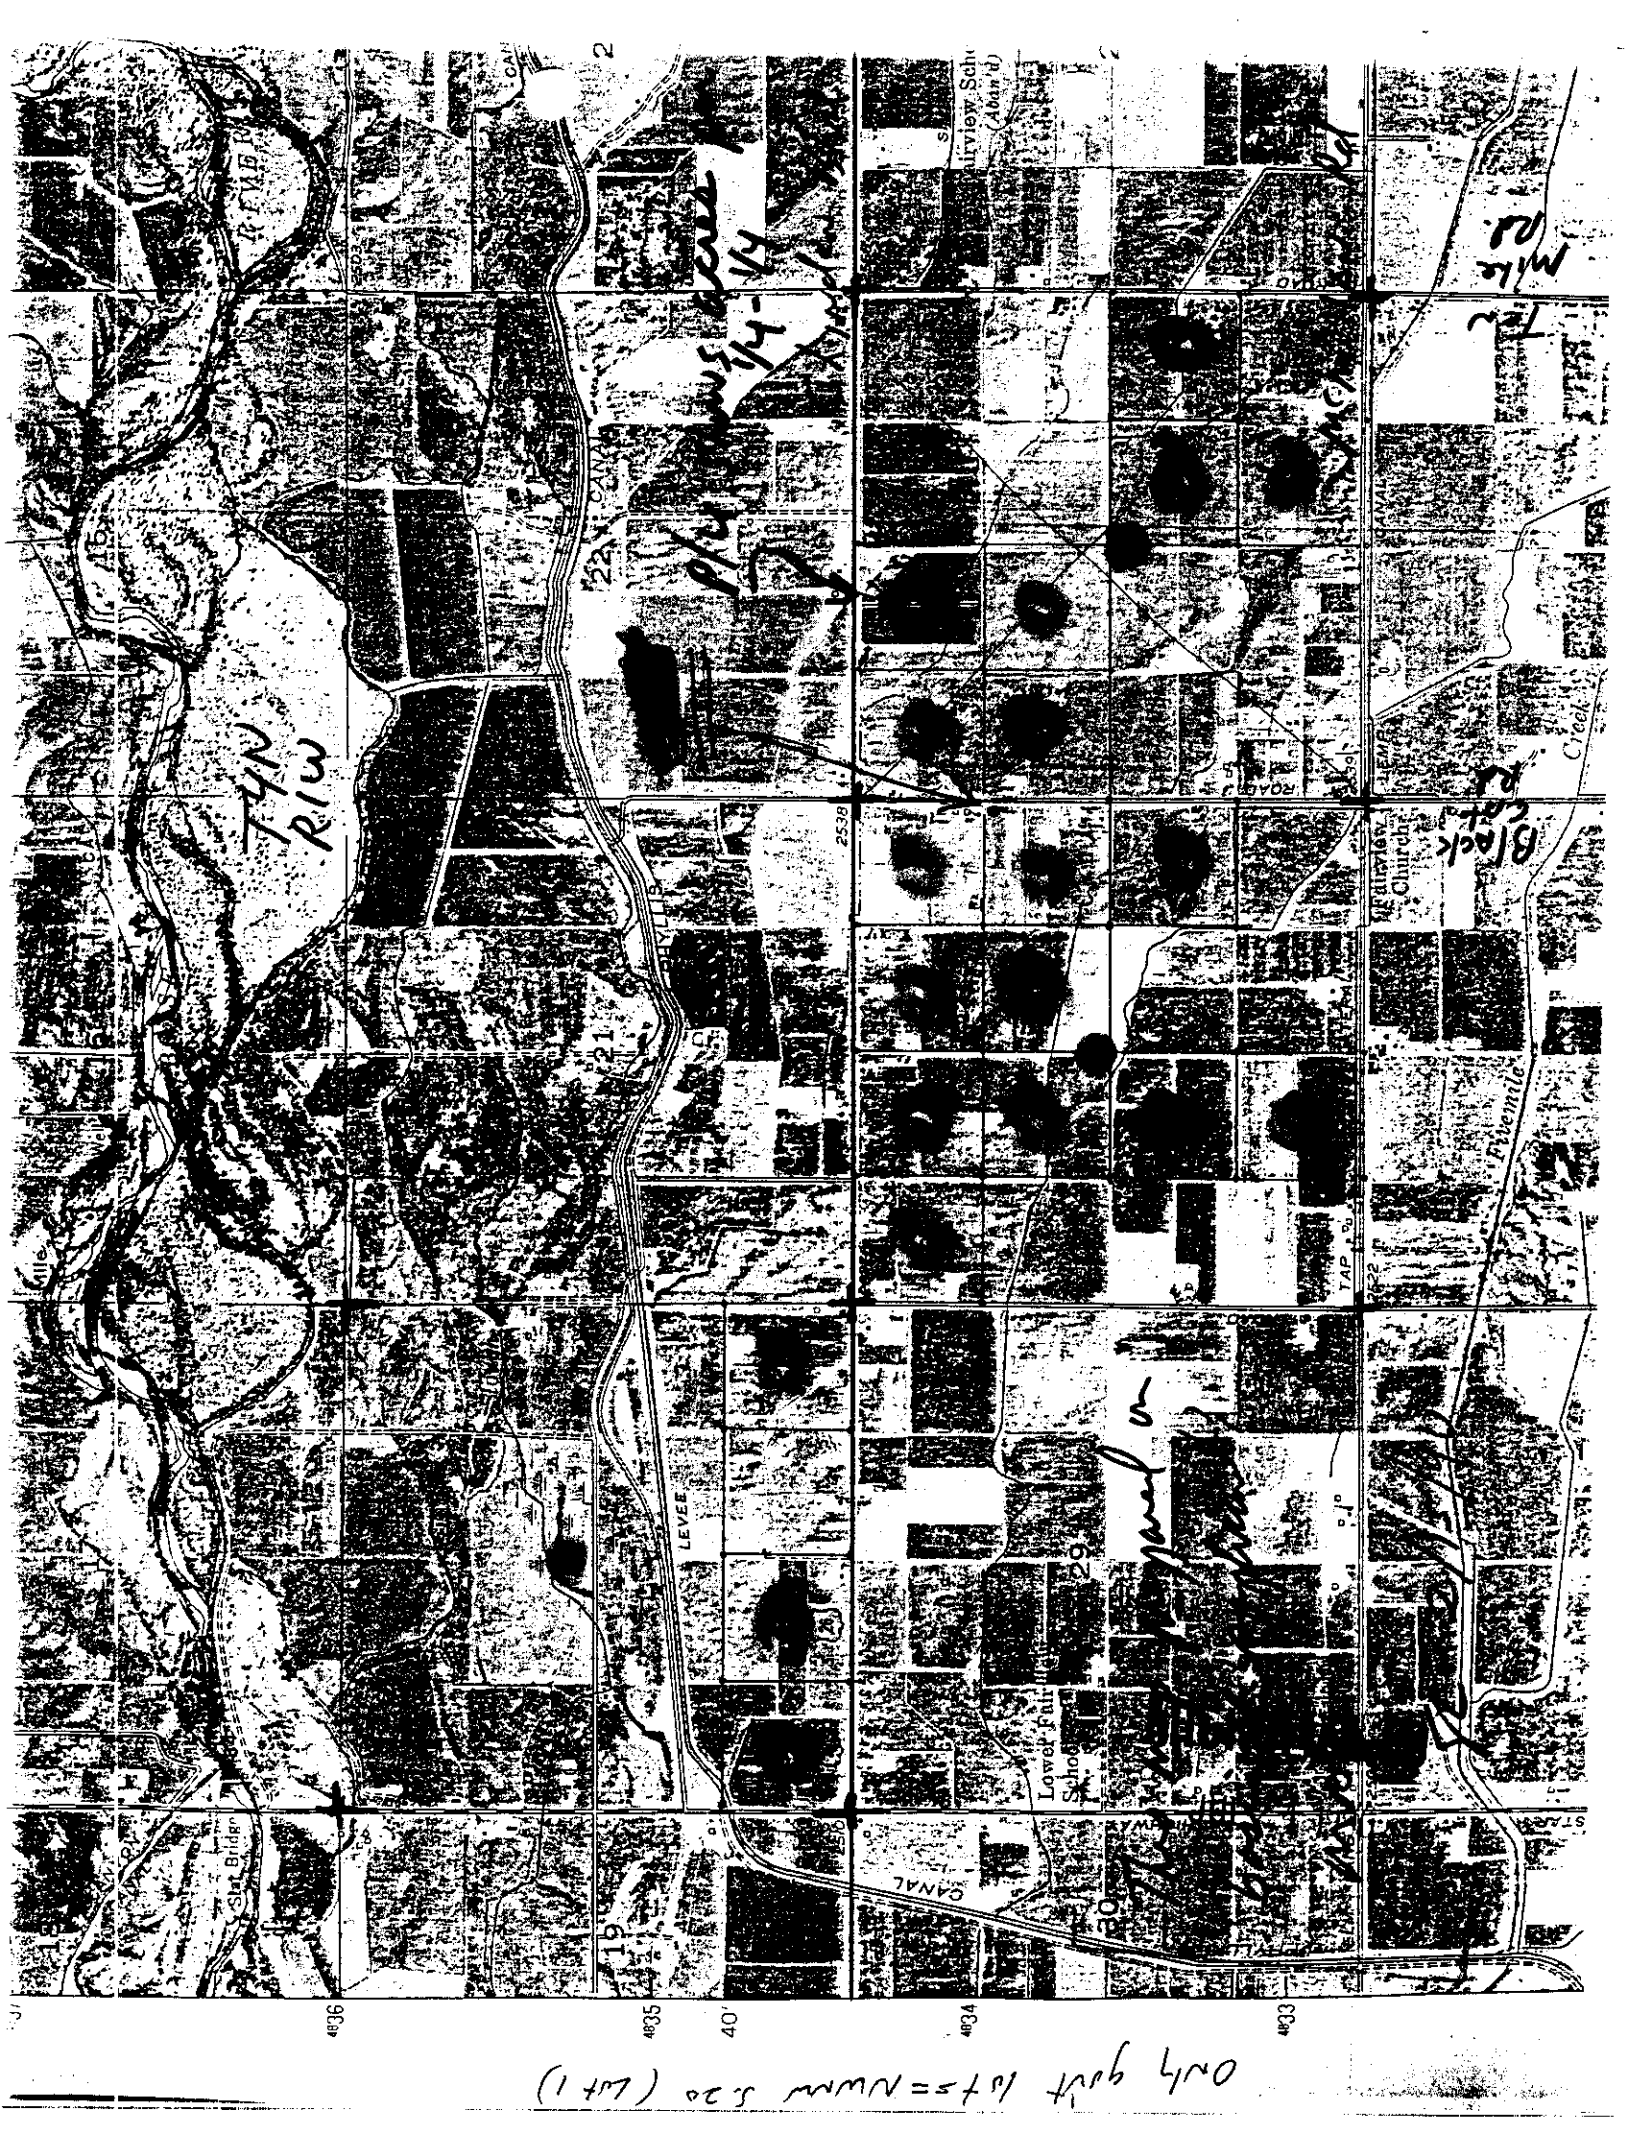

Troy L. Upshaw, Manager

Re: Application for Permit 63-11185

Dear Applicant:

Your recent application for permit for a well to provide supplemental irrigation on district acres was received. Please review the following items and respond accordingly to allow processing of the application to continue.

1) Locate the well and mark the site on the attached map. Some uncertainty was found with the well location on the hand-drawn application map.

2) Explain how 3.50 cfs may be produced with a 15 hp. pump and six inch discharge pipe. An expected flow from a six inch pipe is approximately 1.00 cfs or 50 miner's inches.

3) Note the number and location of acres on the attached map. This was prepared based on the application map. However, the land list in the application showed 344 acres in Sec. 28 instead of the 304 on the map. Also, the total acres in the land list was 572 instead of the 632 acres shown on the map. The map is assumed to be correct unless otherwise noted.

4) Information related to large diversions is required. See the following paragraph for details.

Based on Idaho Code 42-203A(5)(a-e), additional information is needed for applications involving irrigation of more than 200 acres and/or diversions exceeding 5.00 cfs. Please provide information relating to the proposed water right as outlined in the attached copy of Water Appropriation Rules 4,5,3,1 through 4,5,3,5,1. This covers the following items:

- a) effect on existing water rights,
- b) sufficiency of water supply,
- c) good faith, delay, or speculative purposes,
- d) financial resources, and
- e) local public interest.
