RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for Right 63-11134 are based on the information below:

Per telephone conversation today with Jack Mellenthin, this permit will be recommended as a supplemental groundwater right. Jack stated that 3 or 4 homes did use the Nampa-Meridian Irrigation District water all of the time, but are currently having headgate problems. So the water is used when it can be delivered.

He also informed me that he is no longer the treasurer and would we please send the license to the new one .. Janice Durflinger at 12654 Wild Rose Lane.

6 10" well and an 8" well, both with SFP submersible pumps, supply water to 20 lots and 19 existing homes via 4" buried mainline. Actual irrigation was estimated @ 1/2 acre per lot. The natural area in the center of the subdivision is not irrigated. Lot 9 has one home + lawn although the plat states that it isn't a building lot. The lawn areas are irrigated with a combination of portable and buried sprinklers. No other water etc are used.

Pump curves were not available on the pumps. Tracy Pump did some work on the system and was able to supply pump levels, pressure, and HP info.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P63-11134

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please be advised that water quality is subject to regulations of the Idaho Department of Health and Welfare. We suggest that you check with them before starting construction.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
