RE: PERMIT NO. 63-11067

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck

RE: PERMIT NO. 63-11067

Dear Mr. Farmer:

The department has reviewed the proof of beneficial use form which you submitted on December 18, 1990 in connection with the above referenced permit. The proof was accompanied by a \$50 license examination fee instead of the required fee of \$100. The \$50 fee is applicable for rates of diversion up to 0.20 cfs (90 gallons per minute). Your permit authorizes the diversion of 0.60 cfs (270 gallons per minute) of water.

Please submit the additional license examination fee in the amount of \$50 within 20 days in order to keep the permit in good standing. Please reference the permit number on your submittal so the fee can be properly credited. Feel free to contact the department if you have questions.

Sincerely,

RITA I. FLECK

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P63-11067

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

RECEIVED

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Re: Application for Permit

Dear Sir:

Your recent application for a well for domestic, fire protection, and commercial uses was partially reviewed, but additional processing will not occur until your response is received. Please excuse the delay in writing; the Snake River Basin Adjudication resulted in a flood of recent applications for the local area. Department delays do not affect your preliminary dates of priority in the water right process. The following items need attention.

- 1) Please provide the names, titles, and addresses for the officers or directors of the homeowners association.
- 2) What is the well location? Refer to the attached map and mark the well site. Does the well already exist? If so, what were the month and year of drilling? What well depth is involved?
- 3) Is the water temperature warmer than 90 degrees Farenheit?
- 4) What is the development time to complete the water use system (well and homes and commercial use)? The minimum answer is one year (use this if system is already complete) while the maximum development period is five years. Please indicate whether or not the system is completed.
- 5) Do you anticipate any irrigation (yards etc.) with the 40 homes? If so, indicate the number of acres to be irrigated. If necessary I will add irrigation as a use based on your information.
- 6) Mark the place of use on the map. Include any acres of irrigation if applicable. Indicate where the commercial use will occur on the map. Indicate where the homes are found.

Please respond within 30 days. Be sure to return the map in your response because the application did not include a map. Additional help is available at this office.

Sincerely,

Steve Lester
