MEMORANDUM

DATE: June 2, 1994
TO: File No. 63-11031
FROM: Cindy Zimmerman
SUBJECT: Adjustments to Beneficial Use Exam

=====

An adjustment to the place of use acres was made on the field exam to be consistent with data entry standards. The acres were rounded to the nearest tenth, from 5.26 acres to 5.3 acres, and the annual irrigation volume calculations were adjusted accordingly, $5.3 \text{ A} \times 4.5 \text{ AF/A} = 23.9 \text{ AFA}$.

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

This system uses a 15 hp motor with a 10" casing. The well logs could not be found. But it can be estimated that the static water level is 20' & the dynamic could not be higher than 80'. The well pumps into a pressure tank that holds 5000 gallons. The Badger meter that demonstrates the flow between the tank & the well said 60 gallons but depending on the tank's fluctuating pressure it could change.

RE: PERMIT NO. P63-11031

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please be advised that water quality is subject to regulations of the Idaho Department of Health and Welfare. We suggest that you check with them before starting construction.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also
