3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A 6" well was drilled in 1988 to replace the old well on this property. At about the same time, a mobile home was installed on the property. The well services both homes and approx 3 acres of irrigated lawn, garden and cultivated trees, plus a garage & shop. One home, however, is covered under adjudication claim A63-17094. ^{see back} A central pressure system in house #1 basement (2 tanks - 40 & 60 gal) delivers water to both homes & several outdoor taps & a 1" mainline underground sprinkler system in the north tree lot.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Overlapping rights do not affect this permit.

Permit is for 2 households. However, one house is covered on claim A63-17094 (priority 1910). This permit was obviously to cover the mobile home which was moved in 1988 or 89 (per son's statement) and Supplemental Irrigation for trees & lawn.

Recommend licensing for one home only.

No stockwater use found.

System capacity .04 cfs based on theoretical calculation.

ACTION OF IDWR

(X) Approved () Denied

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.

Dear Mr. and Mrs. Nelson:

Re: Permit No. 63-11007

The department reviewed the proof of beneficial use (proof) which you submitted in connection with the above referenced permit. During my research I did not find where a drilling permit has been applied for (which is a separate requirement from the water right permit).

A drilling permit is required for all wells drilled, deepened or enlarged after July 1, 1987 (Section 42-235, Idaho Code). As a condition of the water right permit, you may need to submit a completed drilling permit form together with a drilling permit fee.

Please contact me within 15 days with either a drilling permit number and/or a copy a well driller's report. Upon receipt of this information, I can advise you what action is appropriate.

If I can be of further assistance, please contact me.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

RE: PERMIT NO. P63-11007

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,
