RE: Permit No. 63-11001

Dear Permit Holder(s):

We are in the process of licensing the above referenced water right. Because you submitted your Proof of Beneficial Use form in 1991 for .04 cfs (which required no fee), the Department has no alternative but to issue the license for less than the amount actually diverted unless the fee required to cover the irrigation use the examiner found is received. The amount of water to be licensed will be limited to .04 cfs rather than your system's capacity of .10 cfs.

You can submit the irrigation exam fee along with a late payment penalty. The priority of the right will be advanced according to the number of days from the date of this letter to the date we receive the extra fee.

The exam fee required to cover the additional .06 cfs is \$50 and the late penalty is \$25.00, for a total of \$75.00.

The Department will hold action on licensing this right for 30 days to allow you to submit the above fees. If we do not receive them, we will proceed with licensing the water right for the limited amount of water.

Sincerely,

BRENDA L. CHAPMAN

H. REMARKS AND OVERLAP REVIEW ANALYSIS

OVERLAPS - P/D - Same RR, different well.

P/U - Same RR, different areas of use.

The systems capacity is less than the total requested allocation. Since the irrigation of pasture is only for backup purposes when irrigation water is not available, allocation for irrigation needs to be reduced. Recommend Licensing ~~of~~ of 0.06 cfs for irrigation of 3 acres, and 0.04 cfs domestic.

RE: PERMIT NO. 63-11001

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson

RE: Permit No. 63-11001

Dear Permit Holder:

Returned is your Proof of Beneficial Use Form. Before we can complete processing, additional information is required.

A drilling permit is required for all wells drilled, deepened or enlarged after July 1, 1987 (Section 42-235, Idaho Code). You have indicated neither the well driller or the date drilled. If your well was drilled after July 1, 1987 please submit a copy of the drilling permit and indicate the name of the driller. If it was drilled before this date, please indicate this on the form.

Also, you have indicated the total cfs to be .04. Your permit was issued for .13 cfs. I would ask that you double check to make sure you have applied for adequate water. If you need to change the cfs to .13 at this time, a \$50 license exam fee will also need to be included.

Should you determine that .04 cfs is adequate, at the time the field exam is completed, if the examiner determines you are using more than .04 cfs, you will have to pay the license exam fee plus a penalty before a license will be issued. If this error is detected, you will also be penalized by advancing your priority date. As you can see, it is important that you apply for the appropriate amount of water at this time.

Please provide the appropriate information and fee within 15 days of the date of this mailing.

I realize that this can be confusing, so if you have any questions or if I can be of any further assistance, please feel free to contact this office.

Sincerely,

Karen L. Gustafson

PROOF DUE NOTICE

RE: PERMIT NO. 63-11001

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Nina Shields
Secretary/Records Manager

RE: PERMIT NO. P63-11001

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.
