3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A 6" x 120' well with a 1 h.p. pump supplies water to a pressure tank for domestic use, and it also operates an underground sprinkler system for watering approx 1.5 acres of lawn. From the well driller's report, this well is an artesian with approx 3 psi. Approx 1/2 acre of the land being watered is located on a hillside with trace & natural grasses. During the exam, 4 sprinklers in one station were being used.

 $V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 6.8 \text{ aF}$

2. Volume Calculations for Other Uses:

Area = $[(100' \times 240') + (200' \times 240') - (110' \times 40') - (170' \times 15')] = 1.48 \text{ acres}$

RE: PERMIT NO. 63-10999

Dear Mr. Bunderson:

The department has reviewed the proof of beneficial use which you submitted in connection with the above referenced permit.

On the proof, you show a total rate of diversion of 0.07 cubic feet per second of water for domestic use and for the irrigation of three (3) acres. Since the permit was issued authorizing a total diversion rate of 0.05 cfs for domestic use and for the irrigation of two (2) acres, the proof can only be accepted in connection with the latter amounts. If you plan to irrigate the third acre, it will need to be included in a separate permit than this one.

The department will accept the proof for the amounts authorized by the permit.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

RE: PERMIT NO. P63-10999

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of
