CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.
6. The issuance of this right in no way grants any right-of-way or easement across the land of another.

A 6" well is located in the center of a well head. Four 1" PVC lines divert water from the well into four separate pressure tanks. A pump is located on each pressure tank and they operate independently of each other. All four of the pressure tanks were between 50' to 60' ps. Each pressure tank and pump served a single domestic unit. The Division ID No. below correspond to the pump closest to each numbered domestic unit in the diagram. Each domestic unit had approx 1/4 acre of lawn for a total of

Attention Rita Fleck:

SUBJECT: Proof Of Beneficial Use,

As I discussed with you on the phone on October 26, 1990 there are certain circumstances which effect the filing of this statement of beneficial use.

It has been brought to my attention that the developer of Utter Subdivision, John Browning of S & J Construction, did not comply with all of the requirements when having our well drilled. Due to the fact that Mr. Browning has filed Chapter 13 bankruptcy and has been no-place to be found since that time we are unable to find out the name of the company that drilled our well. I do know that the well was drilled in August of 1988 but can not be sure of the exact time of that month.

Myself and the other members of NUMBER ONE UTTER SUBDIVISION WELL USERS are submitting this statement of Proof Of Beneficial Use along with the \$50.00 license examination fee to hopefully rectify this situation. If anything further is needed please contact me as soon as possible so I can attempt to obtain any further needed information.

Thank you for your assistance on the phone as well as now in this matter. If any further questions please feel free to contact me at (208) 244-2440 which is my home phone or at (208) 376-0252 at my work.

Sincerely,

Kirby J. Robertson

ACTION OF IDWR

☒ Approved () Denied

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.

SPECIFIC CONDITIONS:

8. This permit is approved for single family domestic use until the associated water right for multiple family use is processed and approved.
9. This well shall be less than 150 feet deep unless approved by the Department

Re: Well located at lot 23-24 Utter Subdivision
Boise, Idaho

Dear Mr. Higginson,

We are in the process of building a first time home buyer, a new home located on the above property.

Construction has started and is scheduled to be complete on August 20, 1988. This would include the need of water to this house. This letter, therefore, is a request to allow us to proceed with the drilling prior to having all of the paper work cleared.

It is understood that we will be proceeding at our risk; however, at that location and under the circumstances, I foresee no problem.

Sincerely,

John Browning

PROOF DUE NOTICE

RE: PERMIT NO. 63-10942

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

RE: PERMIT NO. P63-10942

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Microfilm

DEC 19 1989

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
