WATER RIGHT LICENSE
WATER RIGHT NO. 63-10940

Priority: March 17, 1989

Maximum Diversion Rate: 0.15 CFS
Maximum Diversion Volume: 13.5 AF

This is to certify, that DIAMOND SPORTS INC
5600 GLENWOOD ST
BOISE ID 83714

has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated March 17, 1989; and
has submitted Proof of Beneficial Use on December 21, 1990. An examination indicates
that the works have a diversion capacity of .210 cfs of water from a **GROUNDWATER**
source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/10 to 10/20	0.15 CFS	13.5 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 2(SENE), Sec. 25, Township 04N, Range 01E

Total number of acres irrigated: 3

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
6. The issuance of this right in no way grants any right-of-way or easement across the land of another.
7. The Director retains jurisdiction of the right and any license subsequently issued to incorporate the use into a water district, require streamflow augmentation or other action needed to protect prior surface water and groundwater rights.

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before April 1, 1991.
2. Subject to all prior water rights.
3. Use of water under this permit is subject to control by the watermaster of State Water District No. 63.
4. The issuance of this permit in no way grants any right-of-way or easement across the land of another.
5. Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
6. The rate of diversion of water for irrigation under this permit and all other water rights on the same land shall not exceed 0.05 cubic feet per second for each acre of land.
7. Authorization to divert water under this right is dependent upon the annual lease of 3.0 acre-feet of water from the Boise River Water Supply Bank.

**ORDER REMOVING THE CONDITION OF APPROVAL
FROM PERMITS WITH DIVERSIONS TRIBUTARY TO THE BOISE RIVER**

Each of the above-referenced permits was approved with one of the following requirements:

- A. Prior to diverting water under this water right, the water right holder shall submit to the Department and for an augmentation plan to compensate for depletions of the flows of the Boise River. (63-10761)
- B. Twelve acre-feet of storage water shall be leased from the Boise River water supply bank every year prior to diverting water under this right. (63-10786)
- C. Diversion of water under this right is conditioned upon the annual rental of two acre-feet of storage water from the Boise River Water Supply Bank. The Department retains jurisdiction to modify the rental storage requirement if it finds that the water right holder is diverting more or less water than is required presently under this condition. (63-10943)
- D. Authorization to divert water under this right is dependent upon the annual lease of water from the Boise River Water Supply Bank. (63-10940, 63-11080, and 63-11082)
- E. It is the responsibility of the user of this water right to determine when flows are sufficient to satisfy this water right plus all downstream water rights. (63-11152)

The Department has determined that these conditions are not necessary for the distribution of water under these permits.

The Department orders the removal of any one of these conditions from the above-referenced permits.

**ORDER REMOVING THE CONDITION OF APPROVAL
FROM PERMITS WITH DIVERSIONS TRIBUTARY TO THE BOISE RIVER**

Each of the above-referenced permits was approved with one of the following requirements:

- A. Prior to diverting water under this water right, the water right holder shall submit to the Department and for an augmentation plan to compensate for depletions of the flows of the Boise River. (63-10761)
- B. Twelve acre-feet of storage water shall be leased from the Boise River water supply bank every year prior to diverting water under this right. (63-10786)
- C. Diversion of water under this right is conditioned upon the annual rental of two acre-feet of storage water from the Boise River Water Supply Bank. The Department retains jurisdiction to modify the rental storage requirement if it finds that the water right holder is diverting more or less water than is required presently under this condition. (63-10943)
- D. Authorization to divert water under this right is dependent upon the annual lease of water from the Boise River Water Supply Bank. (63-10940, 63-11080, and 63-11082)
- E. It is the responsibility of the user of this water right to determine when flows are sufficient to satisfy this water right plus all downstream water rights. (63-11152)

The Department has determined that these conditions are not necessary for the distribution of water under these permits.

The Department orders the removal of any one of these conditions from the above-referenced permits.

RE: PERMIT NO. 63-10940

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

RE: CHANGE IN ADDRESS

DATE: 15-MAR-1990

=====

Peter Gray of Diamond Sports Inc. called the office this morning with questions on their permit. He was wondering about the drilling permit condition that was attached to his permit. The "well" that they have developed is only 15' deep so the drilling permit condition on this permit is not applicable.

Mr. Gray also wondered how they would be notified about the rental of storage water that they are required to obtain. I told him to contact Lee Sisco since the rental would probably have to go through the Water District 63 office.

Mr. Gray also gave me a new address for our use on this water right. The new address is as follows:

RE: PERMIT NO. P63-10940

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Natural flow of the Boise River is fully appropriated except during periods of flood flow. Your permit has ben conditioned to require you to obtain storage water to compensate for your diversion of natural flow from the river. The amount of storage which you will be required to obtain is approximately 3 acre-feet per acre of irrigated ground. You will be notified in the future of the necessity to obtain storage water.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

RECORDED

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

See in file that applicant has obtained supplemental water for 1989 via water supply bank. This supplemental water serves as the plan, as envisioned in Gary's memo. Perhaps our condition on this one should be something like:

"Each year Prior to placing water to irrigation use under this permit, the permit holder must obtain augmentation water to mitigate impacts on flows in the Boise River."

This will affirm that the augmentation requirement is ongoing.

Re: Application for Permit for Memorial Stadium

Dear Mr. Gray:

I have not received a reply to my letter of 4/5/89 (copy attached). It appears that the baseball stadium is currently irrigated despite the lack of an obvious valid water right. Idaho Code 42-351 prohibits illegal diversions of water in cases where water is diverted without a valid water right.

Please review my previous letter and address the points of concern. If the three acres described in the new application are indeed part of the land outlined under the existing licenses, this office must be notified to provide the proper method to change the licenses. If the three acres constitute new lands to be irrigated, this office must be notified to allow your application to proceed towards approval.

The water right record suggests that an illegal diversion may be occurring. This situation should be corrected immediately to prevent complications for the use of the new stadium.

A copy of this letter was sent to the Ada County Commissioners. The application states that the land is owned by the county. A response is requested no later than August 11, 1989. Please contact this office for additional help.

Re: Application for Permit for Memorial Stadium

Dear Mr. Gray:

Additional research of water rights in the area of the stadium construction provided information that may be helpful in completing the water right picture for the land in question. Your recent application shows three acres in the SENE, S.25. The attached licenses, 63-03568 and 63-03579 in the name of Ada County, provide ground water irrigation of 17 acres in the SENE, S.25. It is possible that the three acres were irrigated via the two Ada County rights. If so, the new ground water source may be added to the licenses with a transfer application. Transfers allow additional diversion points to be added to licenses.

If the above route is pursued, additional problems may arise. The new ground water source is most likely tributary to the Boise River, and the augmentation issue that we discussed still applies. Also, the validity of the licenses must be addressed. Generally, a water right remains valid if used at least once every five years.

Please consult with Ada County staff if you want to work with the licenses. Their staff should be able to help determine if the three acres for the stadium are within the 17 acres on the licenses. If you do not want to work with the county water rights, please let me know as soon as possible to allow advertising and processing of the Diamond Sports, Inc. application. For future reference, no surface water rights, eg. Boise River, were found in SENE, S.25.

This office will provide additional help and information at your request.
