CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.
6. The right holder shall use the full allotment of his surface water right, to the extent it is available, in conjunction with groundwater diverted pursuant to this right.
7. The total combined rate of diversion under this right and Rights 63-03480, 63-07362, and 63-07399 shall not exceed 0.74 cfs nor a

RE: WATER RIGHT NO. 63-10899

Dear Water Right Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to correspond with the findings of the Department's field examiner.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the point(s) of diversion. Please review carefully and if you concur, sign the amendment and return with the \$20.00 filing fee within 14 days.

The last page of the Application for Amendment form contains a list of CONDITIONS/REMARKS proposed for the license when it is issued. These conditions/remarks may be modified upon further administrative review.

If you do not concur or have any questions with this information, please contact me as soon as possible. My telephone number is (208) 327-7947.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

E. NARRATIVE/REMARKS/COMMENTS

2 wells feeding relift ponds are used for supplemental irrigation purposes at Dry Creek cemetery (which ^{now} ~~was~~ also includes Syringa Garden). A second well at the Syringa site was used in the development of this permit. This permit is to add additional acres under the supplemental system at the Dry Creek site only (see map). Primary irrigation source for entire 80 acres irrigated is Boise Valley Ditch Shares via Farmers Union canal. Water is diverted to holding ponds and relifted into respective systems. When flows are short or in early spring wells are discharged to ponds to supplement for cemetery grounds. Approx ~~20~~ ³⁰ acres hay between the cemetery sites receives only surface water.

Overlap: P/D #1, Dry Creek well, originally licensed under 63-7362, measured @ .22 cfs, on 7 acres.

P/D #2, Syringa well, originally licensed under 63-7399 (s/o 63-3480) on 15.2 acres, measured in 1976 @ .49 cfs.

P/D #1 also used for domestic purposes at a mobile home & at offices at Dry Creek site (Claims 63-17476 & 17477. Claims include 3 ac irrig.)

See attached for P/D overlap analysis. Other rights (except ditch rights) do not affect permit.

F. FLOW CALCULATIONS

____ Additional Computation Sheets Attached

Measured Method:

$$P/D \# 1 \text{ (meas} = .22 \text{ cfs)} \frac{15 \times 8.8 \times .7}{200 + (60 \times 2.31)} = .27 \text{ cfs}$$

.88 system capacity

$$P/D \# 2 \text{ (meas} = .49 \text{ cfs)} \frac{20 \times 8.8 \times .7}{200} = .61 \text{ cfs}$$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

allow .3 cfs for 15 ac

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 15 \times 4.5 = 67.50$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .3 \times 246 \times 1.9835 = 146.4$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 67.5$$

2. Volume Calculations for Other Uses:

CONDITION: SHALL NOT DIVERT MORE THAN ^{0.74 *} .88 cfs OR ^{167.4} 168.8 AFA *
WHEN USED W/ 63-3480, 63-7399 & 63-7362.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-10899

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. Enclosed is an order advancing the priority of the permit since the proof was received after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

RE: PERMIT NO. 63-10899

Dear Mr. Sims:

The department has reviewed the proof of beneficial use form which you submitted on December 4, 1990 in connection with the above referenced permit. The proof was accompanied by a \$50 license examination fee instead of the required fee of \$100. The \$50 fee is applicable for rates of diversion up to 0.20 cfs (90 gallons per minute). Your permit authorizes the diversion of 0.44 cfs (198 gallons per minute) of water.

Please submit the additional license examination fee in the amount of \$50 within 20 days in order to keep the permit in good standing. Please reference the permit number on your submittal so the fee can be properly credited. Feel free to contact the department if you have questions.

Sincerely,

PROOF DUE NOTICE

RE: PERMIT NO. 63-10899

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. P63-10899

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
