WATER RIGHT LICENSE

WATER RIGHT NO. 63-10867

Priority: August 14, 1989

Maximum Diversion Rate: 3.00 CFS
Maximum Diversion Volume: 1771.6 AF

This is to certify, that GREG OBENDORF
ANN OBENDORF

24997 HWY 20-26
PARMA ID 83660

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated July 27, 1989; and has submitted Proof of Beneficial Use on December 19, 1990. An examination indicates that the works have a diversion capacity of 4.990 cfs of water from:

SAND RUN GULCH	tributary to	BOISE RIVER
UNNAMED STREAM	tributary to	BOISE RIVER
UNNAMED DITCH	tributary to	BOISE RIVER

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
WILDLIFE	01/01 to 12/31	3.00 CFS	1771.6 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 6(SWNW), Sec. 30, Township 05N, Range 04W
SWSE , Sec. 24, Township 05N, Range 05W
CANYON County

PLACE OF USE: WILDLIFE
TWN RGE SEC

	NENW	SENW	NESE
	SESE		
24	NESW	NWSW	SWSW
	SESW	SWSE	

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

MICROFILMED

Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 63-10867

CONDITIONS/REMARKS:

5. The issuance of this right in no way grants any right-of-way or easement across the land of another.
6. A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.
7. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
8. This right when combined with 63-03201 and 63-09744 during the irrigation season of March 15 thru November 15 annually shall not exceed 1057.5 af.
9. Source is known locally as Cole Slough.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 5TH day of NOVEMBER, 1992.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. WCO3868, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

Conditions of Approval:

- 004 - The issuance of this right in no way grants any right-of-way
- or easement across the land of another.
- R39 - A measuring device and lockable controlling works of a type
- acceptable to the Department shall be permanently installed and
- maintained as part of the diverting works.
- R04 - Use of water under this water right will be regulated by the
- watermaster of State Water District No. 63.

Remarks: This right when combined with 63-03201 and 63-09744 during the
irrigation season of March 15 thru November 15 annually shall not
exceed 1057.5 af.
Source is known locally as Cole Slough.

MEMORANDUM

TO: FILE 63-10867
FROM: STEVE LESTER
DATE: DECEMBER 27, 1990
SUBJECT: FIELD EXAM REPORT

The system used for year-long wildlife use (mostly waterfowl use) is the same found in license 63-03201 and permit 63-09744, which are irrigation rights for 235 acres. The field exam for 63-09744 was conducted 9/25/87 and 7/27/89 but is held at the Region pending clarification of changes in the P/U for the license. Clarification is required prior to a license recommendation for 63-09744 due to SRBA demands in creating a proper fit for overall use under the two irrigation rights. Let me know if additional information from exam 63-09744 is necessary.

The 1987-1989 exam produced a better understanding of the common sources for the license and two permits. 63-03201 was licensed and 63-09744 was permitted as Cole Slough, although the name is not recognized by the USGS nor is it familiar to the Canyon County ASCS staff (personal conversation 9/25/87). I discovered that three sources actually exist: Sand Run Gulch, unnamed stream, and unnamed ditch (waste ditch). The stream and ditch intersect just before the culvert diversion in P/D #1. I recommend that these sources, locally known -at least in part- as Cole Slough, be licensed in 63-09744 as a clarification but not a change in the source. The source(s) in the existing license can be clarified in the SRBA.

Note that permit 63-10867 was approved for Sand Run Gulch and the unnamed stream but not for the unnamed ditch. This is my error. I prepared the original application for permit for the owner and failed to list the ditch in application item #2. However, the application remark identifies the sources as the same ones found in 63-03201 and 63-09744.

Therefore, I recommend that all three sources be included for licensing in 63-10867. This is a clarification and should not be treated as an amendment or expansion.

Permit 63-10867 requires measuring devices and lockable controlling works as part of the diversions. P/D #1 has a 36" Cipolletti weir. P/D #2 does not include a measuring device. Lockable works are not found. The exam report for 63-09744 contains the owner's request to waive the measuring device requirement in S.30. It seems reasonable to retain but not enforce the measuring device and lockable works conditions at this time. Watermaster control can be invoked if necessary.

Dear Mr. and Mrs. Obendorf:

Re: Permit No. 63-10867

This office acknowledges received the proof of beneficial use form. Enclosed is a copy of the order of reinstatement which advances the priority date since the proof was received after the proof due date.

The next step is for the department to conduct the field inspection to confirm and determine the extent of beneficial use. I cannot tell just when the representative from our Western Regional office will conduct the exam, but he will try to contact you or your representative prior to being in the area.

If you have questions, please contact me.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

DIRECTOR

RE: Permits 63-10867 and 63-09744 and License 63-03201

Dear Greg and Ann:

The above rights use the same diversion system for irrigation of 235 acres and wildlife use on the same land. License 63-03201 and Permit 63-09744, which I examined for licensing purposes in 1987 and 1989, provide irrigation water, and Permit 63-10867 deals with the wildlife use.

The proof of beneficial use for 63-10867 was submitted on 12/19/90. That permit is ready to be licensed. I wrote the field exam report and license recommendations for the permit based on field information collected during my two visits to your place (visits for field exam of irrigation right 63-09744). The wildlife license recommendations will be forwarded to the Department's State Office. The State Office will mail you a copy of the license as soon as it is issued. This takes considerable time but such delays do not adversely affect your water rights.

In order to make a license recommendation for Permit 63-09744, additional information is required from you. The 1987-89 exam describes 235 acres irrigated from the diversions in Sec. 24 and 30. License 63-03201 covers 167 acres and Permit 63-09744 will be licensed for the remaining 68 acres. Both rights will provide the maximum miner's inch per acre. A problem occurs in identifying acres per quarter-quarter (QQ) to recommend in the permit. The 167 acre license was issued for particular acres/QQ that do not agree with the recent field investigation. A change occurred between the 5/22/70 exam for 63-03201 and the 9/25/87 - 7/27/89 exam for 63-09744. Table 1 outlines the difference between the actual irrigated acres and License 63-03201.

The Snake River Basin Adjudication enters the picture at this point. As you know, adjudication claims were filed to protect rights 63-03201 and 63-09744. The claims are labelled A63-03201 and A63-09744 and agree with the license and permit information, respectively. The actual irrigation use was determined by my exam in 63-09744, and this recent information will be used to verify the uses described in your adjudication claims. For example, the irrigated acres in License 63-03201 can be redescribed via the adjudication process. Eventually, a decree will be issued that redefines the license to make it agree with current practices.

Before I can recommend the acres/QQ to be licensed in Permit 63-09744, you must provide some form of documentation to show when the irrigation changes in License 63-03201 occurred (sometime between 1970 and 1987). The documentation might include information from the ASCS or other public agencies, personal records (contracts, farm records, etc.), and neighbors, or at least a written response by you discussing the situation and approximate date(s) of change.

FEB 07 1991

G. and A. Obendorf
12/28/90, Page 2

Based on your response, I can recommend that License 63-03201 be changed to reflect a change in 167 acres and that Permit 63-09744 be licensed for 68 acres. The two rights will then cover all 235 acres with a full compliment of water. In this manner your irrigation rights will already be completed when the adjudication review and verification process occurs in your area (tentatively in 1993). By that time, 63-09744 should be licensed and can be easily included in the Department recommendations to the district court. This process allows 63-09744 to advance from its current permit status to a license and eventually to a decreed right. License 63-03201 will also advance to a decreed right.

Please provide the required information by March 31, 1991. Let me know if additional help is needed.

Sincerely,

Steve Lester
Sr. Water Resource Agent

LAPSE NOTICE

RE: PERMIT NO. 63-10867

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated September 30, 1990. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifteen dollar (\$15) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

PROOF DUE NOTICE

RE: PERMIT NO. 63-10867

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P63-10867

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device and lockable controlling works that will enable the watermaster to control the rate of diversion.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor
Water Right Permits Section
