WATER RIGHT LICENSE

WATER RIGHT NO. 63-10797

Priority: May 23, 1989 — Maximum Diversion Rate: 0.08 CFS; Maximum Diversion Volume: 30.0 AF

This is to certify, that MORES CREEK RIM RANCHES
HC 33 BOX 1157
BOISE ID 83706 has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated May 23, 1989; and has submitted Proof of Beneficial Use on July 11, 1990. An examination indicates that the works have a diversion capacity of .080 cfs of water from a **GROUNDWATER** source, and a water right has been established as follows:

BENEFICIAL USE	PERIOD OF USE	RATE OF DIVERSION	ANNUAL VOLUME
DOMESTIC	01/01 to 12/31	0.08 CFS	30.0 AF

LOCATION OF POINT(S) OF DIVERSION: NWSW , Sec. 27, Township 04N, Range 04E
BOISE County

PLACE OF USE: DOMESTIC

TWN	RGE	SEC		
04N	04E	27	SWNW	NWSW
		28	Lot 2(SENE)	NESE

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Two points of diversion are located within NWSW, S27, T04N, R04E.
6. Place of use is located within Mores Creek Rim Ranch Subdivision.
7. Domestic use is for 50 homes.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 28th day of January, 1995.

RE: Water Right 63-10797 (Transfer 5100)

Dear Water Rights Holder(s):

Enclosed is a copy of your approved Transfer of Water Right for the above referenced water right (Transfer 5100). Please be sure to thoroughly read the Conditions and Remarks listed on the transfer. Also, please be advised that the accompanying transfer approval should be considered and treated as a **preliminary order** of the department issued pursuant to section 67-5243, Idaho Code. Enclosed are instructions for responding to **Preliminary Orders** if you are in disagreement with the approved transfer.

As of July 1, 1996, all water right owners are required to report any change in water right ownership and any change of mailing address to the department.

> If you have acquired any other water right or have changed your mailing address **PRIOR TO** July 1, 1996, you have until July 30, 1998, to record the ownership and/or address change with the department.
>
> If you acquired other water rights or changed your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes in a timely manner could result in a $100 late filing fee. You can contact any office of the department for more information. If you have any questions concerning your water right listed above you can contact me at (208) 327-7947.

Sincerely,

JIM JOHNSON, Manager

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. **A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

(a) the petition for reconsideration is disposed of; or
(b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right No. 63-10797

Dear Mr. Hain:

I recently received a 'New Property Owner' form on the above referenced licensed water right.

In Idaho, decreed, licensed, and claimed water rights are considered real property; therefore, proof of owning the land is proof of owning the water right, unless extenuating circumstances exist. Water right statute does not provide a means for changing owner of record for licensed water rights; although, I have placed your correspondence in the water right file.

If you have any questions, you may contact me directly at (208) 327-7947.

Respectfully,

Jim Johnson, Manager
Water Permits Section

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

SUBJECT: Confirmation of Field Examination

==========

On the morning of October 25, 1994, Shelley Keen and I went out to the Mores Creek Rim Ranches Subdivision to confirm usage of water under this right.

As in the field exam conducted by Mark Sonics on 6/29/92, we found two groundwater points of diversion located within NWSW, S27, T04N, R04E.

Well #1 is located at an elevation of about 3320′ in the subdivision's Lot 5 within the SWNWSW of Section 27. Per attached drilling permit 63-92-0386-001 and well log, this well was redrilled to 4" diameter and to a depth of 505′, the static water level was at 165′, and the well was test pumped at 23 gpm at a pumping level of 365′.

Well #1 uses a 5 hp pump to move water through 2" and 1-1/2" pipes uphill approximately 200′ over approximately 1980′ to two 15,000 gallon storage tanks located at an elevation of about 3520′. At the time of our exam, the well pump was set up to be used manually. This well is equipped with volume metering and pressure gauges. The well was off. The pressure gauge read 93.5 psi which is consistent with the back pressure of water standing in the pipe going to the uphill storage tanks.

Well #2 is located at an elevation of about 3380′ in the subdivision's Lot 32 at approximately the center of NWSW of Section 27. I could not find a drilling report on record for this well. This well uses a 10 hp pump to move water through 2" and 1-1/2" pipes uphill approximately 120′ over approximately 1320′ to the same two 15,000 gallon storage tanks located at an elevation of about 3520′. This well pump was set for automatic use as needed. This well was also equipped with volume metering and pressure gauges. While we were there, the pump did come on, the meter read 10 gallons pumped in 48 seconds (12.5 gpm) or 0.03 cfs, the pressure gauge was inoperable.

FEB 14 1995

Mark Sonics' exam identified rates consistent with our findings. Mark found that well #1 produced 22 gpm at 100 psi, and well #2 produced 15 gpm at 60 psi. Mark's estimate of the combined diversion capacity at 0.08 cfs [(22 gpm + 15 gpm) ÷ 448.83 gpm] is consistent with our findings.

Our field exam also confirmed domestic use for 50 homes on 84 subdivision lots as found by Mark. Usage of the 30,000 gallon storage tanks enables the system to have a sufficient capacity to meet the requirements of the domestic use.

However, we were unable to confirm irrigation use on 14.5 acres as recommended by Mark. The place of use is hilly with deep gullies and covered in mostly native vegetation (see attached photos). Most homes did not have any lawns, very few homes had small lawns ranging from patches of about 10'x 20' to one home which had a front and back lawn of about 75'x 100'. Total irrigation is estimated to be less than 1/2 acre.

While on site, we spoke with one of the homeowners who confirmed the lack of irrigation of lawns is due to an insufficient water supply and poor soil quality, as well as the residents' interest to keep the surrounding lands in a natural vegetative state.

In summary, Shelley and I found that this right is used for domestic use for 50 homes, mostly on in-house use only, with a limited total diversion capacity of 0.08 cfs. Due to the lack of development of irrigation use and the limited water capacity, I recommend removal of irrigation use from this right.

Two 6" wells located in the same q/q serve a 50 unit subdivision. The subdivision consists of 84 lots, but some houses set on two lots. No house in the subdivision irrigates more than approx. 1/2 acre due to a low water supply. The no. of acres irrigated is based on approx 1/4-1/2 acre per house.

The wells operate of pumps which are run manually. The pumps divert water through 1 1/2" and 2" mainlines, through the subdivision and into two 30,000 15,000 gallon tanks located approx 100'

G. VOLUME CALCULATIONS

1. **Volume Calculations for Irrigation:**

$V_{I.R.}$ = (Acres Irrigated) x (Irrigation Requirement) = $14.5 \times \frac{3.5}{4.0} = \frac{50.8}{58}\ af$

$V_{D.R.}$ = [Diversion Rate (cfs)] x (Days in Irrigation Season) x 1.9835 = $.08\ cfs \times \frac{213}{184} \times 1.9835 = \frac{33.8\ af}{29.2}$ *

V = Smaller of $V_{I.R.}$ and $V_{D.R.}$ = $\frac{33.8\ af}{29.2}$

2. **Volume Calculations for Other Uses:**

$\frac{.6\ af}{house} \times 50\ units = 30\ af$

PROOF DUE NOTICE

RE: PERMIT NO. 63-10797

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P63-10797

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

MICROFILMED

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
