Re: Permit No. 63-10779

Dear Permit Holders:

On July 31, 1989, the department received the proof of beneficial use form for this permit. The permit and proof indicates the water will be used for irrigation of one acre and stockwater.

You have indicated the rate of diversion on the permit and the proof of beneficial use form to be 0.03 cfs and submitted a \$100 license exam fee. There is no license exam fee required for a rate of 0.04 cfs or less, therefore, I have initiated the process to refund the \$100. This refund process takes 2-4 weeks.

The department will continued to process the proof. If you have any questions concerning this matter, feel free to contact this office.

Sincerely,

Nina Shields
Clerical Assistant

RE: PERMIT NO. 63-10779

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Dear Dave:

Department of Water Resources

I would like it to go on record that the well applied for by Larry E. Gray, Right Number 63-10779, should be considered as supplemental irrigation. On-site inspection reveals that this land does have adequate gravity flow irrigation.

Sincerely,
