WATER RIGHT LICENSE

WATER RIGHT NO. 63-10776

Priority: March 6, 1989

Maximum Diversion Rate:

0.20 CFS

Maximum Diversion Volume:

23.8 AF

This is to certify, that PAUL MARLATT
ROBERT OBERMEYER

2721 N 31ST
BOISE ID 83703

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated March 6, 1989; and has submitted Proof of Beneficial Use on June 30, 1992. An examination indicates that the works have a diversion capacity of 1.950 cfs of water from:

GRIMES CREEK
UNNAMED STREAM

tributary to MORES CREEK
tributary to GRIMES CREEK

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
MINING	01/01 to 12/31	0.20 CFS	23.8 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 6(NESE), Sec. 29, Township 07N, Range 05E
Lot 7(NWSE), Sec. 29, Township 07N, Range 05E
BOISE County

PLACE OF USE: MINING

TWN RGE SEC

07N 05E 29 Lot 6(NESE)

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this right shall be non-competitive.
6. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 63-10776

CONDITIONS OF APPROVAL AND REMARKS

7. Use of water under this approval shall comply with applicable water quality standards of the Division of Environmental Quality of the Idaho Department of Health and Welfare.
8. Two points of diversion are located in the NESE, S29, T7N, R5E.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 26TH day of FEBRUARY, 1998.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-10776, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 19 92.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion prior to diversion of water under this permit.

Use of water under this permit shall be non-consumptive.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Water used under this permit if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards. Any outflow from settling ponds must be authorized with a National Pollution Discharge Elimination System permit issued by the U.S. Environmental Agency. Any underground seepage from settling ponds must be authorized by the Idaho Department of Health and Welfare, Division of Environment.

The mining operation that utilizes this water right must comply with all local, state and federal air and hazardous substance standards.

Prior to any use of this water right the entire mining project must be fully bonded by all governmental entities that require bonding.

Use of water under this permit is subject to control by the watermaster of State Water District No. 63, Boise River.

Witness my hand this 19th day of July, 1989.

RE: WATER RIGHT NO. 63-10776

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

MICROFILMED
APR 16 1998

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please call me at 208-327-7946.

Sincerely,

A handwritten signature in cursive script, reading "Shelley W. Keen".

RE: WATER RIGHT NO. 63-10776

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms that a water right has been established in compliance with the terms of the permit. The examiner who verified your water use reported that you developed more points of diversion than were described on your permit. Therefore, before a license can be issued, your permit must be amended to include the additional point(s) of diversion.

The enclosed Application for Amendment form describes the additional point(s) of diversion and other information that will be included on the license when it is issued. In some cases, the reference to multiple points of diversion is contained in the list of conditions of approval and remarks on the last page of the amendment form. Please review the amendment carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

Also, please note that some of the proposed conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208)327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

APR 1 1998

E. NARRATIVE/REMARKS/COMMENTS

2 small recirculating ponds provide water to a recreational mining site. Ponds are filled in the spring with a gravity ditch diversion from an unnamed stream known locally as Tulley Creek.

Wash or process water is pumped from the lower, or #2, pond, through the sluice box and back to the #1 pond. Any overflow from the #2 pond goes back to Tulley Creek. When pond levels drop in late summer, a gas pump ~~is~~^{is} positioned in Grimes Ck, and 500 ft of portable line is taken to pond #2 to supplement lost volumes.

A portion of the place of use may be within Pearl Knob 1295 placer claim. Material is excavated under several ^{mineral} claims in the area. Water is used at only this site. The Twin Sisters Creek diversion was not developed. Use is primarily throughout the summer months (6 mos max) ^{8hrs day}. Overlaps: right no. 63-2517 for industrial use, different ownership (this right not claimed in SRBA)

* lockable device requirement removed by IDWR order.

However, I am unsure of the status of any applicable NPDES permitting. At times, there ~~is~~ is overflow from pond #2. At exam, a trickle was discharging to the drainage & into Grimes Ck. Permit holder says the orange color of the water is ferrous (iron) leachate from the soils - is this a water quality issue?

Have conditions of permit approval been met? ☐ yes ☒ no See above *

F. FLOW CALCULATIONS

 Additional Computation Sheets Attached

Measured Method:

FROM DITCH : ~1.95 cfs (from rough Mannings calculations)
exceeds permit limit of .20.

FROM PUMP: .13 cfs (from HP equation) allow .2 cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$ _____

$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$ _____

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} =$ _____

2. Volume Calculations for Other Uses:

POND VOLUMES (combined) = .1 AF $\rightarrow .2 \times 1.9835 = 2.4$ Storage not req'd
see attached page

VOL FOR MINING USE : $.2 \text{ cfs} \times 180 \text{ days} \times \frac{8 \text{ hrs}}{24 \text{ hrs/day}} \times 1.9835 = 23.8$ AFA

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
MINING	1-1	12-31	.20	23.8
Totals:			.20	23.8

2. Recommended Amendments

 Change P.D. as reflected above Add P.D. as reflected above None
 Change P.U. as reflected above Add P.U. as reflected above Other

Re: Permit No. 63-10776

Dear Permit Holder:

The Department is in receipt of your letter explaining the diverting works on the above referenced permit. After further review, the Department has determined that the need for a lockable device is unnecessary. Therefore, enclosed is an order removing the condition requiring a lockable device on the above referenced permit.

If you have any questions or if I can be of any further assistance, please feel free to contact me.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

RECEIVED
JUL 21 1992

Department of Water Resources

Permit No. 63-10776

Please refer to the original permit issued Aug 6, 1989 stating we are required to install a locking device to control the water. At this time, ownership of the property at the point of extracting the water is questionable therefore we cannot install a weir or dam in the creek. The water must be pumped uphill about 200 yards to reach the settling ponds.

We are requesting the equipment requirement be recinded to allow us to use only a small portable pump incapable of putting forth 0.2 cubic feet per second. We have a 1 1/2 inch pipe from the settling pond to the creek. We have found that any equipment left away from the processing plant will be stolen. We will probably need to pump water into the pond in August because BLM will be using our plant to test the claims per the requirments prior to recieving a Patent on the lands.

To assit your field man to view the place of pumping I gave Karen a Map showing how to get to the place. BLM will be on the location starting August 17, 1992 to do their testing.

While in the field with the BLM Crew checking boundries I made a strong effort to show them the pipe and where the water would be drawn from Grimes Creek. The Head of the crew was Tom Woodward, BLM, 384-3462.

From the information above I hope you can see the reasoning for not building a dam. We do not want to do any harm to the habitat more so than a small amount of mining and that is reclaimed back to nature as soon as possible.

Thank you very much for bringing this matter to my attention prior to the expiration date of the permet.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-10776

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a lockable device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the lockable device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 63-10776

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

RE: PERMIT NO. 63-10776

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor

Conditions of Approval

* Water used under this permit if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards. Any outflow from settling ponds must be authorized with a National Pollution Discharge Elimination System permit issued by the U.S. Environmental Protection Agency. Any underground seepage from settling ponds must be authorized by the Idaho Department of Health and Welfare, Division of Environment.

* The mining ~~and milling~~ operation that utilizes this water right must comply with all local, state and federal air and hazardous substance standards.

* Prior to any use of this water right the entire mining project must be fully bonded by all governmental entities that require bonding.
