WATER RIGHT SUMMARY

ACTION	RIGHT NO.	NAME	AMOUNT CFS
Original Permit	63-10632	Waterman, Victor F.	1.24
Full Assignment	63-10632	Jacobson, Myron Bonnie	1.24

MICROFILMED

SEP 18 1990

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

WATER RIGHT NO. 63-10632

Priority: May 16, 1988

Maximum Diversion Rate:

0.21 CFS

Maximum Diversion Volume:

47.3 AF

This is to certify, that MYRON JACOBSON
BONNIE JACOBSON

7406 BOWMONT RD
NAMPA ID 83686

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated May 16, 1988; and has submitted Proof of Beneficial Use on July 19, 1989. An examination indicates that the works have a diversion capacity of 1.300 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.21 CFS	47.3 AF

LOCATION OF POINT(S) OF DIVERSION:

SWSE , Sec. 35, Township 02N, Range 02W
CANYON County

PLACE OF USE: IRRIGATION

<u>TWN RGE SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
02N 02W 35	SWSE 10.5		10.5

Number of acres irrigated: 10.5

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water claimed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the use, subject to the approval accepted standards of diversion as used officially.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.
6. The right holder shall fully use all surface water rights appurtenant to the lands identified above prior to using water under this right.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-10632, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 19 89.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Prior to the diversion of water under this permit a flow measurement port or other device as specified by the Department shall be installed to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Witness my hand this 3rd day of August, 1988.

Burgess Pump Co. said that a 30HP Jacuzzi pump set @ 120' with open discharge has a pumping capacity of ~580 GPM.

(939-6603)
tele #

SEP 09 1994

E. NARRATIVE/REMARKS/COMMENTS

A 12" well that previously had a 30 HP Jacuzzi pump, supplies water to 10.5 acres via ditch and siphon tubes. The well was drilled to 250' but collapsed. At the time of the field exam, the pump had been pulled by Tracy Pump for replacement ^{or repair}. The original applicant's intent was to irrigate 62 acres. Because of well and pump problems, the ground water has only been beneficially used on 10.5 acres. Based on theoretical and pump dealer information, the 30 HP Jacuzzi has a pumping capacity of 580-750 GPM, which justifies recommending 1" / acre for the 10.5 acres. The pump was pulled by Tracy pump in the summer of '93 and either a new pump or fixed old pump will be installed in the summer of '94 (per owner). Tracy Pump Co said that they had pulled the pump from 120'. (Proof received 7/19/89)

Nampa/Meridian irrigation water is also used on the property. No other wts are used

Dear Mr. Waterman:

Re: Permit No. 63-10632

This office acknowledges receipt of the proof of beneficial use form submitted on July 19, 1989.

Note the condition of approval of your permit which requires you to install a flow measurement port or other device to provide for the determination of the rate of diversion. The next step is for the department to conduct a field examination for licensing purposes. At the time the field examination is conducted, a type of measuring device should be installed.

The department understands, however, that certain methods of diversion make it impossible to install measuring devices. If this situation applies to you, discuss with the department representatives alternative techniques of measuring your diversion rate. At the time of the field inspection, the field examiner can be prepared with the appropriate measuring equipment.

If you have any questions concerning this matter, please feel free to contact the Western Regional Office at 334-2190.

Sincerely,

NINA K. SHIELDS
Clerical Assistant

RE: PERMIT NO. 63-10632 PROOF DUE NOTICE

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

ACTION OF IDWR

☒ Approved☐ Denied

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. The permit holder or his representative shall notify the Department ten (10) days prior to the start of construction unless good cause for later notification can be shown.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.

SPECIFIC CONDITIONS:

7. THIS DRILLING PERMIT DOES NOT REPRESENT A RIGHT TO DIVERT AND USE THE WATER OF THE STATE OF IDAHO. PRIOR TO DIVERSION OF WATER, THE WELL OWNER SHALL OBTAIN AN APPROVED APPLICATION FOR PERMIT FROM THE DEPT.

Dated this 16th day of May, 19 88.

RE: PERMIT NO. 63-10632

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct you attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

RECEIVED

SEP 30 1988

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is the statement of beneficial use that must be submitted when your project is completed.

Sincerely,

Gary Spackman
Supervisor, Water Allocation Section

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
