OFFICE OF STATE ENGINEER

APR 19 1912

RECEIVED

MICROFILMED

SCALE: 2 INCHES=1 MILE. DRAW PLAN IN INK.

Printed and for sale by the Statesman Shop, Boise, Idaho.

STATE OF IDAHO,
County of Canyon } ss.

Harry E Meek

being first duly sworn, upon his

oath deposes and says:

That he is the owner of a decreed water right appurtenant to the following described land to-wit:

North East 1/4 of the S.E. 1/4 Section 7, Twp 4 N. R. 3 East of Boise Meridian.

as evidenced by the decree dated 18th day of January 1906

in the cause entitled Farmers Co-Operative Ditch Co., Plaintiff

vs. Boise Meridian Irrigation District Limited Etal, Defendants brought

in the district court of the Seventh Judicial District of the State of Idaho, or

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho No.

That he intends to change the point of diversion, as described in said decree or ~~permit~~, to the following described point:

To the heading of the Canyon ditch in Lot 6 of Section 15, Twp 4 N. R. 3 E. 13 M.

That such change will be made for the following reasons, to-wit: that he can not divert the water from the Siederberg Canal upon the following lands, the South west one fourth (SW 1/4) of the Northwest one fourth (NW 1/4) of Section 16 Twp 4 North of Range 3. West of the Boise Meridian.
where I desire to use said water.

That no one will be injured by such change and that deponent will make such change at his own risk.

And further deponent saith not.

Harry E Meek

Subscribed and sworn to before me this

8th day of

April, 1912.

My commission expires

Jan 14th - 1913

STATE ENGINEER'S OFFICE

REGULATIONS AS TO CHANGE OF POINT OF DIVERSION

Aff. Point of Diversion
 Harry E. Meek
 From Stedenberg Canal
 to
 Canyon Ditch.

Section 3247 of the Revised Codes provides that a person entitled to the use of water, may change the place of diversion if others are not injured by such change. The Board of Irrigation has adopted the following regulations as to procedure under said section.

The person desiring to change point of diversion must file with the State Engineer an affidavit describing his water right, setting forth his intent to change point of diversion and the reasons for such change, together with an averment that no one will be injured thereby and that deponent will make such change at his own risk.

The point to which it is desired to change the place of diversion must be described as follows:

When the amount claimed does not exceed 25 cubic feet per second and point of diversion will be on surveyed land, locate same by giving the legal description of the 40 acre tract in which it will be situated. If upon unsurveyed land, give approximate distance to mouth of stream from which water is claimed or to the mouth of some creek flowing into said stream. Where there is more than one point of diversion, describe each separately and specify the amount claimed from each.

Where the water claimed exceeds 25 cubic feet per second, locate the point to which it is desired to change the place of diversion as follows:

If upon or near surveyed land, tie point of diversion by course and distance to section or quarter section corner. If said point will be more than two miles from the corner of a public survey, the tie may be made to the mouth of the stream from which the water is claimed or to the mouth of some creek flowing into said stream.

The affidavit must be accompanied by maps in duplicate, showing the following details:

1. If for irrigation and domestic use:
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches, including laterals delivering water within one mile of each 160 acre tract of the lands to be irrigated.
 - (f) Lands to be irrigated to be shown by crosshatching, outlining, or coloring.
2. If for other than irrigation and domestic purposes:
 - (a) Name of applicant.
 - (b) Section, town and range numbers, where public survey has been made.
 - (c) Source or sources of supply.
 - (d) Point or points of diversion.
 - (e) Route of ditch or ditches.
 - (f) Points or points of use.
 - (g) Point or points of return to stream after use.

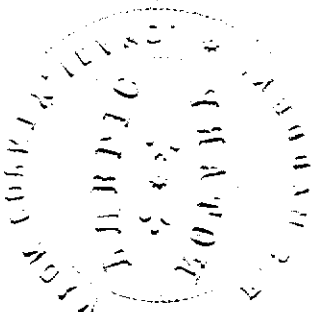

If application is for more than 25 cubic feet per second, the maps must be prepared from actual survey and must be certified to by the engineer in charge of survey, in the following form:

I hereby certify that this map was prepared from an actual survey made by me191..... and correctly shows position of points indicated thereon.

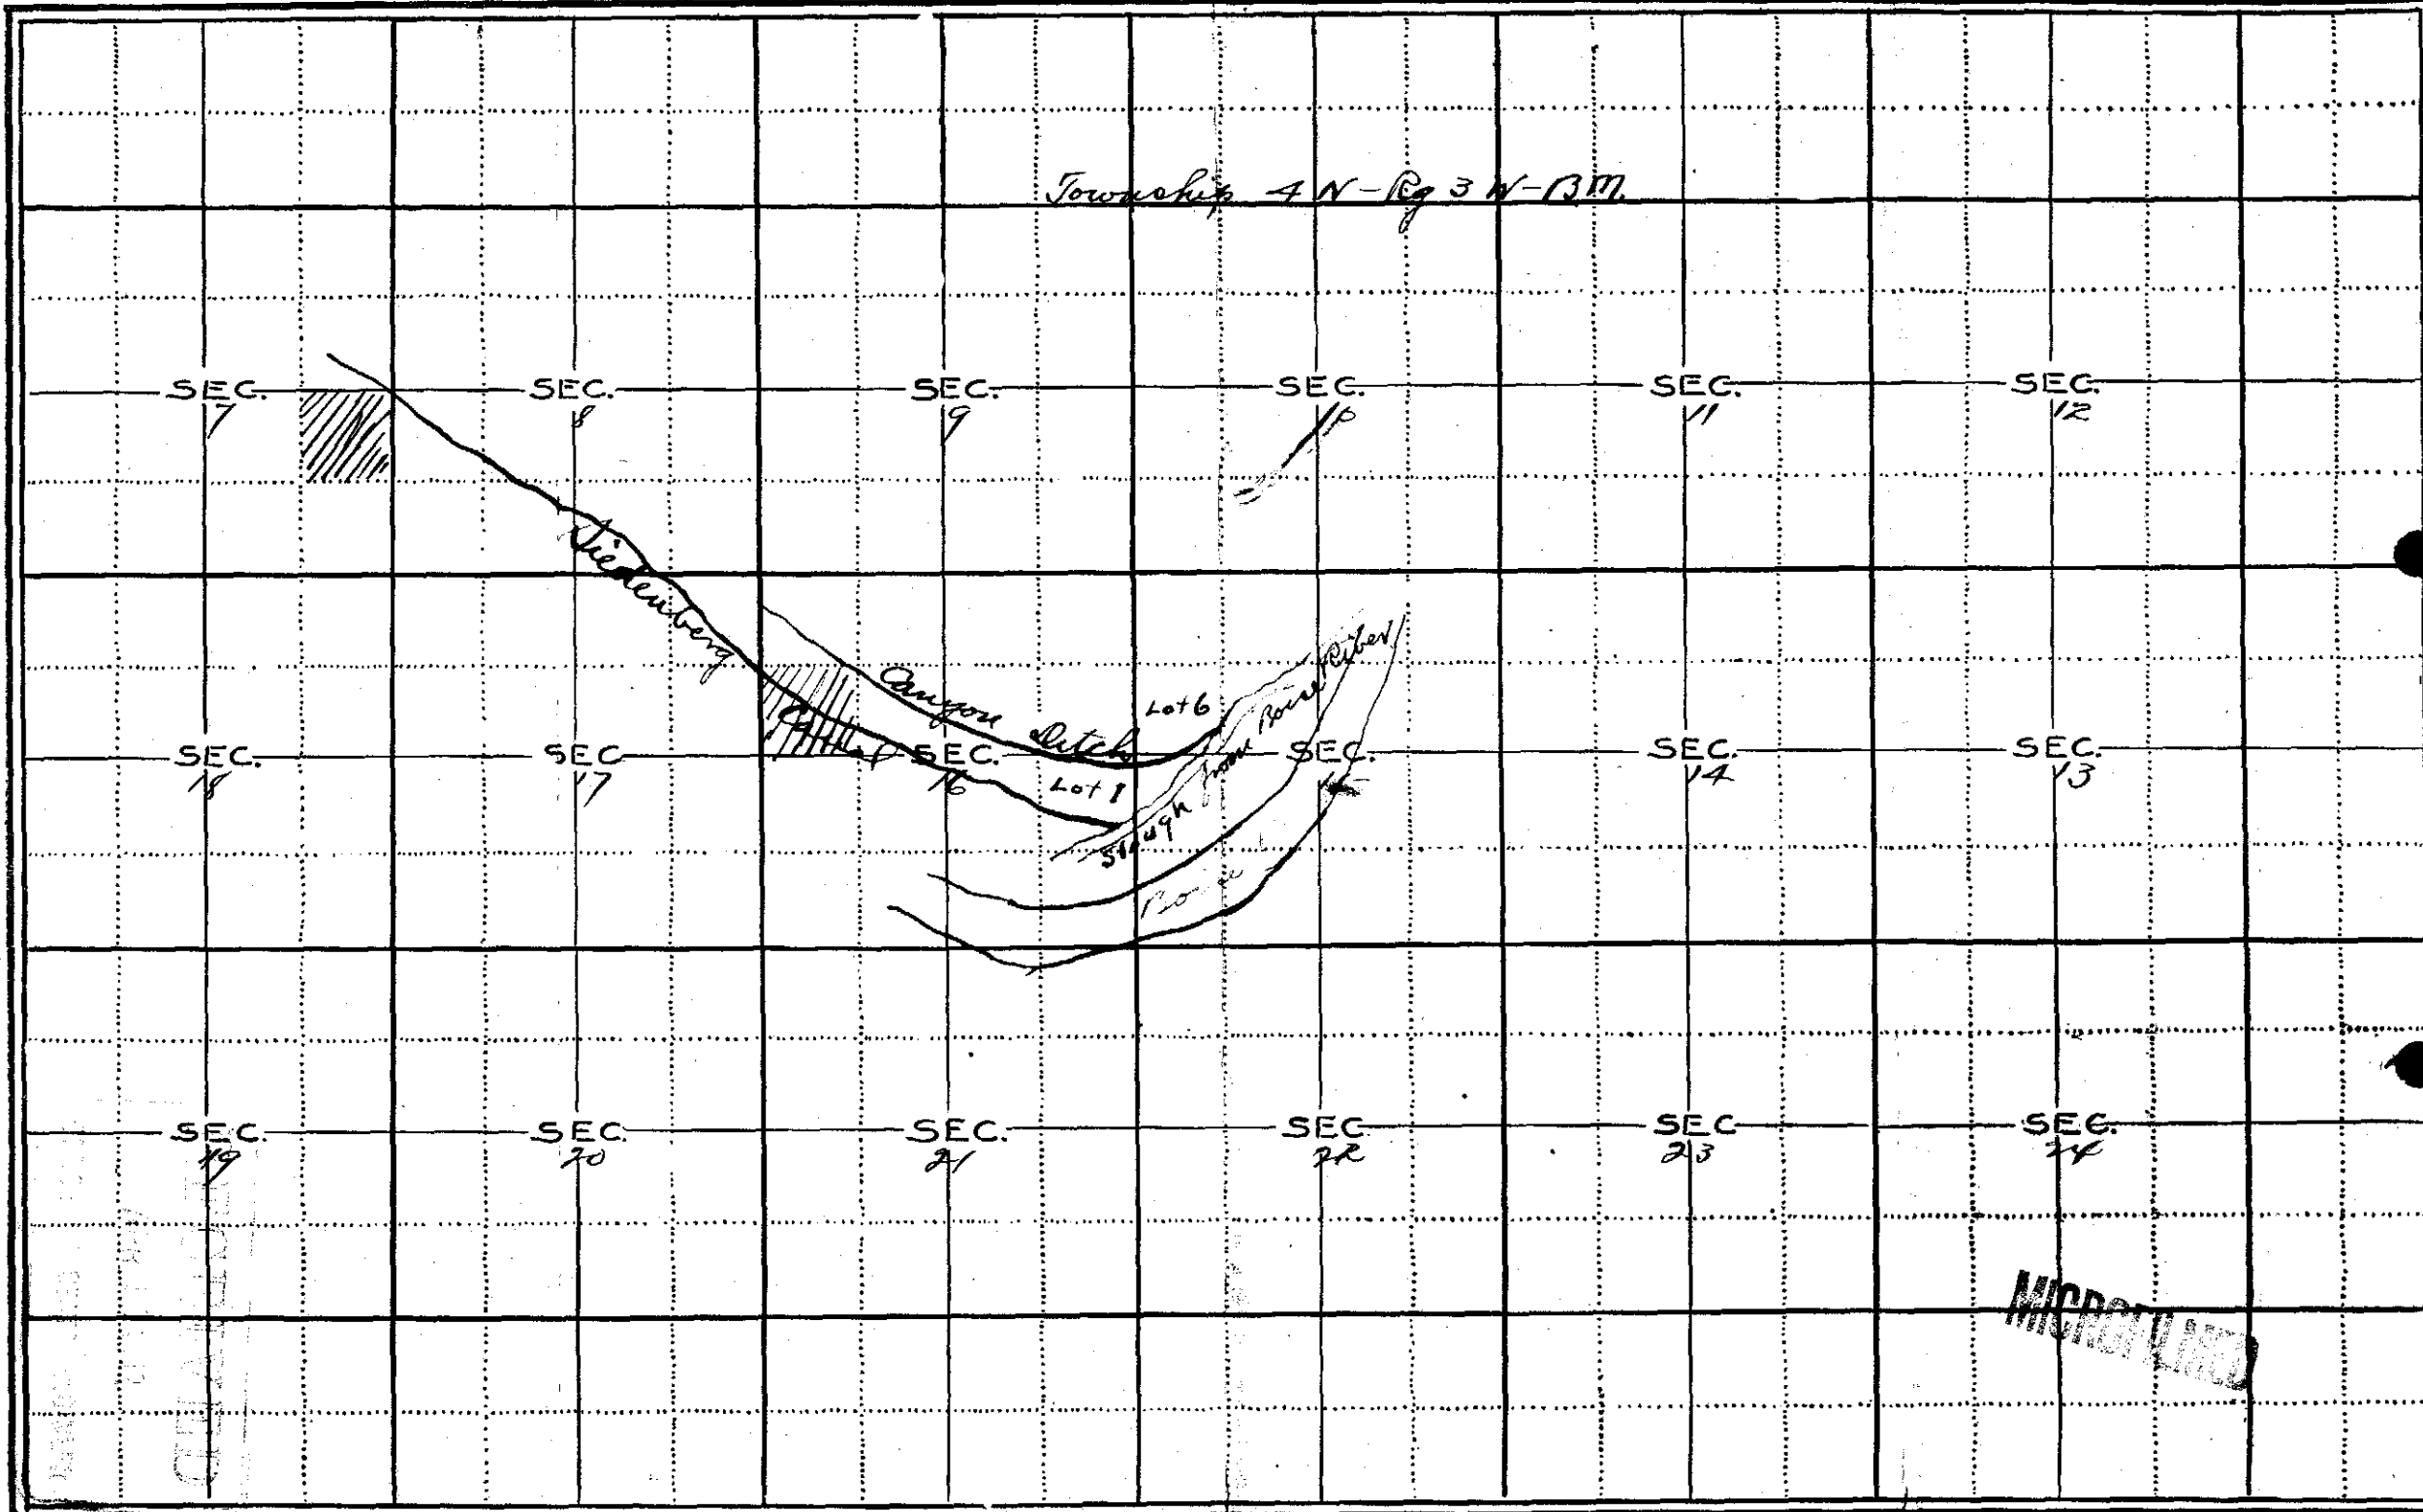

Engineer.
