This system makes use of a 1.5 hp pump that has a 17" casing and a 2" discharge. The static water level is 30' and the well is around 38 ft deep. The line dumps directly into the ditch system which irrigates the farmland. The ditch also runs past pasture land where cattle use it to drink. Usually 300 to 400 head of stock use the system.

LAPSE NOTICE

Returned is the proof of beneficial use form submitted to this office on August 26, 1988. The proof submittal is unacceptable since it was not accompanied by the required licensing examination fee of \$50.

You are hereby notified that under the provisions of Sec. 42-218a, Idaho Code, this permit lapsed since the department did not received an acceptable proof of beneficial use submittal.

The permit cannot be reinstated unless you submit an acceptable proof of beneficial use or submit an extension of time request showing reasonable cause for delay. Either the completed proof of beneficial use submittal (including the examination fee or a completed field examination report) or the extension request form together with the \$15 fee must be received within sixty days of the date of mailing of this lapse notice or the permit will no longer be of any force or effect.

Your proof of beneficial use form and a request for extension of time form are enclosed for your use. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a governmental agency or by litigation which might bring title to the water in question.

RE: Permit No. 63-10496

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

Dear Water Right Applicant:

Enclosed is a temporary approval for diversion of groundwater during the 1987 irrigation season.

The copy of the application for permit to appropriate water attached to the interim approval defines the various components of your temporary approval. The inclusion of the copy of the application is only for the purpose of definition, and any terms contained therein are limited by the conditions of the temporary approval.

As described in condition of approval (k), this office will continue to process the original application for permit, pursuant to Chapter 2, Title 42, Idaho Code, unless directed otherwise by you. This processing will include advertisement for two weeks in the county where the point of diversion is located, and the result may be issuance of a water right permit.

Sincerely,
