3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A 12" diameter well with a 7.5 Hp pump directs water through a 6" diameter steel pipe into a concrete ditch located about 5' from the well. The concrete ditch flows North about 150' and South about 500'. At the South end the ditch goes West about 300' where it flows into a dirt ditch that goes Northwest for approximately 1000'. All irrigation is by gravity flow by siphon tubes.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

No overlaps.

The discharge water was slightly oxygenated and appeared to be the result of a cavitation and surging problem. The owner indicated the pump was set at 40' and recognized the need for attention to the problem.

This permit supplements Settlers Irrigation Dist. water.

Re: Applications for Permit Nos. 63-10410, 10412, 10416, 10417, 10419, 10425, 10430, and 10458

Dear Sharon:

Enclosed is a copy of the original notice for the above-referenced applications and the affidavit of publication received by our office. Note that there is a discrepancy in the two notices.

Also, 63-10412 was listed as a total of 125 acres, whereas, the actual acres irrigated was 129. On 63-10425, one point of diversion was left off. It should read as NWSE, NESE, Sec. 28, T 03N., R 01N. The protest date on this list should read July 20, 1987.

So sorry to have to bother you with this and bring it to you attention after all your good service to us!

Sharon, if you have any questions, please don't hesitate to call.

Sincerely,

Judy Pense
Secretary

Re: Water Right No. 63-10410

Dear Water Right Applicant:

Enclosed is a temporary approval for diversion of groundwater during the 1987 irrigation season.

The copy of the application for permit to appropriate water attached to the interim approval defines the various components of your temporary approval. The inclusion of the copy of the application is only for the purpose of definition, and any terms contained therein are limited by the conditions of the temporary approval.

As described in condition of approval (k), this office will continue to process the original application for permit, pursuant to Chapter 2, Title 42, Idaho Code, unless directed otherwise by you. This processing will include advertisement for two weeks in the county where the point of diversion is located, and the result may be issuance of a water right permit.

Sincerely,

David R. Tuthill Jr.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES
WITH RESPECT TO TEMPORARY APPROVAL OF
APPLICATION FOR PERMIT NO. 63-10410

This is to certify that I have examined Application for Permit to Appropriate the public waters of the State of Idaho No. 63-10410; and a temporary approval to divert groundwater is granted until August 20, 1987, subject to the following limitations and conditions:

- a. The water use approved herein is subject to all prior water rights.
- b. The water user acknowledges that the temporary approval does not convey a continuing right to divert water and does not convey any right to divert water except as specifically provided in the temporary approval.
- c. The water user assumes all risk that he or she will be successful in obtaining a permanent water right permit when the application is processed under the provisions of Chapter 2, Title 42, Idaho Code and the water Appropriation Rules and Regulations.
- d. Violation of temporary approval conditions, provisions of the Idaho Code, or the Water Appropriation Rules and Regulations is cause for cancellation of the temporary approval and denial of future requests.
- e. By commencing diversion of water under this temporary approval, the water user acknowledges and agrees that the Director of IDWR is authorized to disconnect the power supply from the pump motor used to divert water under the temporary approval or to take other reasonable steps to insure that water is not diverted during any period the temporary approval is suspended or revoked.
- f. The Director may impose additional conditions not a part of the original temporary approval conditions.
- g. The temporary approval applies only to uses and lands which normally have an adequate supply of water from surface water sources but are temporarily water short because of drought conditions.
- h. The temporary approval granted under the expedited procedure shall not be effective for more than the 1987 irrigation season and will expire upon termination of the declared drought emergency, or on the expiration of the term of the approval set herein, whichever is earlier.
- i. The Director will retain jurisdiction of any temporary approval given.
- j. By acceptance of the temporary approval and diversion of water under the temporary approval, the water user assumes all risk relative to interference with other water rights and acknowledges and agrees that the Director is authorized to take reasonable steps to insure that water is not diverted under the approval at any time the Director determines there is not water available for diversion.

SEP 28 1987

- k. Temporary approval granted will be of no force nor effect from and after the 1987 irrigation season. The application for permit, however, will be processed by the Department under the provisions of Chapter 2, Title 42, Idaho Code, unless directed otherwise by the applicant.

Witness my hand this 22nd day of April, 1987.
