C. OVERLAP REVIEW

1. P/D overlap found. (relating to the same source only)

(all in Hilliard's name)
63-9638, 63-10219, and 63-10278 are all from the same P/D.
Each new right is to add new acres to the well. *(no P/D overlap)*
63-9306 is a permit from the same P/D but the owner of the well and surrounding land has not given the permit holder access rights to the well and therefore the permit cannot be examined or licensed. Overlap with this permit has been disregarded for this licensing recommendation. *Note: The permit holder's name is Smith. He would like to use Hilliard's well to irrigate some acres north of these but Hilliard will not allow it.*

2. Overlap Analysis Narrative

The first right from this P/D is 63-9638. This system was a pipeline supplying water to laterals and a sprinkler system. The acres irrigated are in the South half of the southeast quarter.

The next right is 63-10219. This is new acres located in the northwest of the southeast quarter, new acres same P/D. These acres and the acres under 63-9638 are now irrigated by the center pivot.

RECEIVED

JUL 15 1991

the permit was 10000
(per 63-10219/10278)
(12-28-90)

2. Overlap Analysis Narrative (continued)

The last right is 63-10278. This permit is for lands leased by the owner of the well. These acres are in the northeast of the southeast quarter. The corner outside the center pivot and the acres blocked by the buildings are not irrigated by any other method therefore they are excluded from the licensing recommendation.

3. No P/U overlap found. (relating to the same permit acres only)

D. SYSTEM DESCRIPTION (General system description)

1. Diagram found on;

a. Aerial Photo	--	--	--	--	--	--	--	☒
b. Hand Sketch	--	--	--	--	--	--	--	☐

2. Narrative

The system is a well located beside the pivot point for a center pivot irrigation system. There is also a 6" line running east from the well to the road where the line then turns south. This line is used to carry water to the southeast corner of the Q/Q where hand lines irrigate the acreage that the center pivot misses.

A home and related buildings was found in the NE/SE quarter which stops the center pivot from completing a full circle. The well was measured on 09-01-83. Using this measurement and a theoretical calculation, it was determined that the system is capable of providing the required AFA for the original license and the two permits covered by this field examination, therefore the licensing recommendation will be for AFA only.* No measurement was made during this exam.

PROOF DUE NOTICE

RE: PERMIT NO. 63-10278

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager
