RE: PERMIT NO. 63-10056

Dear Permit Holder(s):

Enclosed is a draft copy of the license proposed to be issued on the above referenced water right.

This right is currently being reviewed by this office for licensing. The enclosed preliminary copy is subject to change upon further administrative review.

We ask that you review the proposed license and if you do not concur with the information, please let us know within 10 days.

Sincerely,

JIM JOHNSON

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Overlap: According to file, Mr. Poplack has walked out the drainage ditch (i.e. his partial source) & found no one using water downstream of him.

- Lee Sisco (Watermaster, Basin 63) contacted our office to inform us that drainage ditch water's (i.e. Mr. Poplack's source) are accredited to downstream irrigation districts and that no water may be diverted from these ditches when the flow of the Boise R. is ≤ 4400 cfs. I informed Mr. Poplack of this (see attached letter).

Dear Mr. Poplack:

I am writing you to emphasize that your permit (63-10056) is subject to all prior water rights. Lee Sisco, Watermaster of State Water District No. 63 Boise River, recently contacted our office and informed us that drainage waters (including waters you are diverting) are accredited to irrigation districts further downstream along the Boise River. Water may be diverted from drainage ditches until flow in the Boise River declines to its natural level, 4400 cfs. The Boise River is presently flowing at 5200 cfs. I have enclosed a copy of Water Right License 63-2406 which applies to this drainage water.

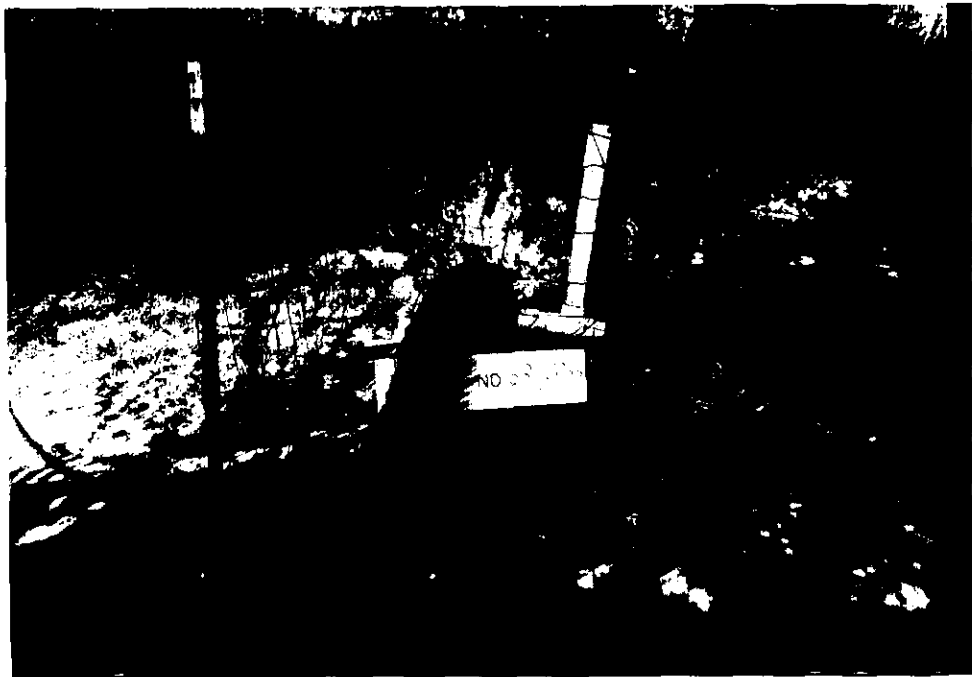

If you wish to continue diverting water from the drainage ditch after the Boise River reaches 4400 cfs, I suggest that you contact Lee Sisco (phone No. 344-4121) concerning the purchase of storage water from the Boise River. Your Water Right License to divert .06 cfs, (subject to the above conditions) is presently being processed.

Sincerely,

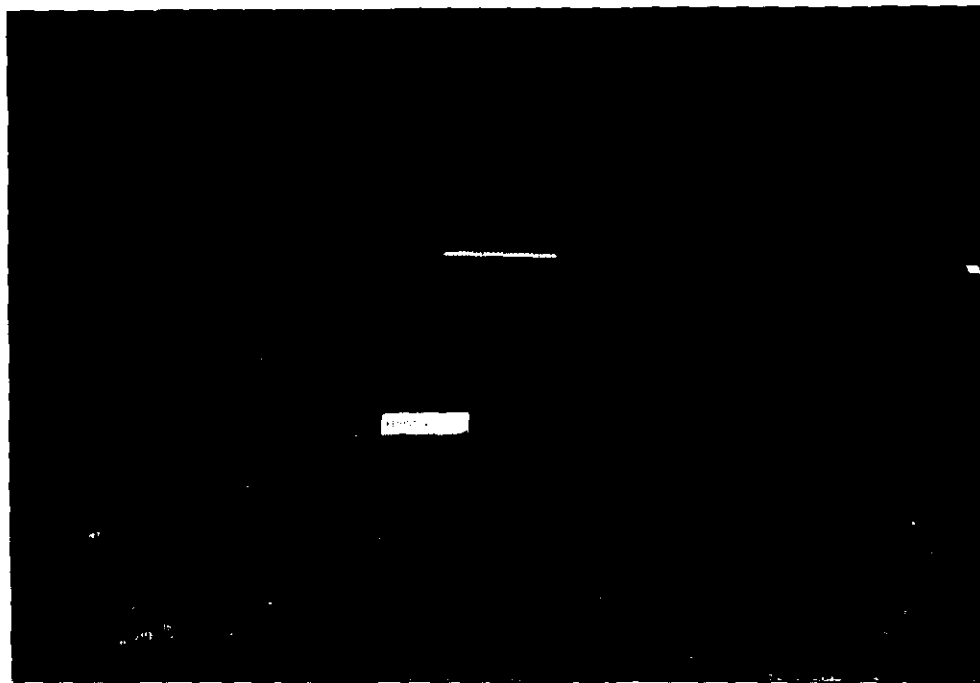

Brad E. Dingee

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot ~~change~~ your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Dear Mr. Poplack:

In our review of the application for permit you recently submitted, we need one more item before processing can begin.

Since this use is from a waste water source within an irrigation district (possibly Farmers Union Canal Co.) a letter of approval from the company involved needs to be submitted prior to processing. This letter is required on all water use from waste ditches contained in the irrigation companies system.

Please submit this letter as soon as possible in order for processing to continue on this application. If you have any questions, do not hesitate to contact us.

Sincerely,

JAN GROVER

Dear Mr. Poplack:

We have reviewed the letter you submitted regarding the use of the wastewater source listed in your application for permit within the Farmers Union Canal Co. boundaries.

After discussing this with others it has been decided, based upon your observation of the wastewater below your point of diversion which is not being recaptured or used by the Farmers Union Canal Co. that a letter from the Canal Co. need not be submitted to process this application.

Therefore, processing will now begin and your application should first appear in the Idaho Statesman next Thursday, June 16th.

If you have any further questions, do not hesitate to contact us

Sincerely,

JAN GROVER

5/25/83

Dear Ms Grover:

I am writing this letter, pursuant to your suggestion on May 23, 1983, to advise you that I have traced the drainage ditch meanderings as far as I can without trespassing on private land. So far as I can tell the ditch must flow into the Boise River just west of Eagle. It parallels State Street on its North side until just before it passes Wans Lumber Yard, East of Eagle. At that point it flows South under the road and passes South of Eagle crossing North Eagle Road. It seems to flow by a sewage treatment facility and then I lost it, so I suppose it must have flowed South towards the River.

At no time during my wanderings did I see any recapture of the water by any irrigator and certainly not by the Farmer's Union Canal Co. I also noticed that by the time the ditch reached Eagle it carried three to five times the volume that it carries by my house. I cannot, therefore, conceive how my small appropriation could possibly deprive anyone of useable water since a large volume appears to be wasted already.

It is my understanding that personnel in your office who work with the Canal company

regularly state that the company doesn't
recapture its water from its waste ditches. Under
the circumstances, I can see no reason why
I should obtain permission to appropriate water
from a non-user of that water. Therefore I
respectfully decline to obtain the permission
which you earlier requested. As I explained,
in my view any request for permission which I
might make would be a tacit recognition of the
company's jurisdiction over the use of this waste
water. Because, at this point, I have no
reason to believe that the company can assert
a legal right to this water I feel I have no
need to obtain such permission.

It is therefore my request that the
permit application which I earlier submitted
be processed to completion. Thank you.

Very Truly Yours,

Rick Poplack
