CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The domestic use authorized under this right shall not exceed 13,000 gallons per day per home.
6. Two points of diversion are located within SESE, S24, T10S, R24E.
7. Domestic use is for 5 homes and does not include lawn, garden, landscape, or other types of irrigation.

Dear Water Right Holder(s):

Enclosed is a copy of the Water Right License issued on the above referenced permit along with a copy of your approved Application for Amendment. Should you have any questions regarding these documents, please contact me.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

RE: WATER RIGHT NO. 45-07720

Dear Water Right Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects the addition of a second point of diversion. Please review carefully and if you concur, sign the amendment and return it with the \$50.00 filing fee within fourteen (14) days.

The last page of the Application for Amendment form contains a list of Conditions of Approval and Remarks proposed for the license when it is issued. These conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

RE: Overlap with SRBA claim A45-10390

The field examiner for permit 45-07720 reported a substantial overlap with SRBA claim A45-10390, which is based on beneficial use. I discussed the situation with Don Shaff, and we agreed that the best way to proceed for now would be to license 45-07720 for as much as possible because there is a slight risk that claim A45-10390 will not be decreed as claimed.

The total beneficial use under permit 45-07720 and A45-10390, if the claim is decreed, is domestic use for six homes and a pumping plant. (See the beneficial use field report in this file for more details.)

E. NARRATIVE/REMARKS/COMMENTS

Two connected wells & pumps. Well #1 originally served 7 homes and the pump station with culinary water since about 1909. A sucker pump ran more or less continuously to fill a 500-gallon storage tank. This was replaced with a submersible pump & pressure tank in the 1960s. One home in the middle of the property was removed in 1980, and is unlikely to be replaced. One home on the west end of the property was replaced with a mobile home about 1986. By the early 1990s, the existing well was not providing enough flow rate to meet the demand. So a second well was drilled maybe 30' west of the old well. Each well/pump has a theoretical capacity of 0.046 cfs.

As the system now operates, the old well serves the pumping plant & the 2 easternmost homes with culinary water. The new well serves the other 3 homes & the mobile home with culinary water. Lawns are watered with canal water.

This property is owned by the Bureau of Reclamation but operated by the Burley Irrigation District. BID employees live in the homes. A bill pending in Congress would turn over this property to the BID. The BOR has filed Claim A45-10390 for 0.24 cfs for ~~7~~ 6 homes domestic use at this facility. It is unlikely that the original system ever used more than 0.05 cfs or 4.2 AFA. Beneficial use for the last 5 years was probably closer to 3.7 AFA.

Assuming the SRBA claim is recommended as discussed above, this permit should be licensed for 0.04 cfs of additional pumping capacity, with no additional volume usage. Theoretical pumping capacity of this system is 0.09 cfs.

Recommend this permit be licensed for the new well only, as the SRBA claim will cover the old well. Each right will have the same place of use - 6 homes & the pumping plant. Permit only covers 5 homes, but I see nothing wrong with allowing all 7 buildings to be

Have conditions of permit approval been met? ☒ yes ☐ no covered. With no additional volume to be ~~increased~~ ~~added~~ does not represent a volume increase over the 1909 water claim.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published in your newspaper. We have inserted the required publication dates. If time allows, please submit a galley proof for review before publication.

We have attempted to submit this legal as camera ready. Please call me at your earliest convenience and prior to your staff re-typing the legal if it does not meet your specifications so I can possibly make adjustments.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Very truly yours,

Marj Baldwin
Sr. Secretary

Re: Application for Permit No. 45-07720

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office has scheduled advertising the application in the South Idaho Press for 12/6 & 12/13/93. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

James E. Stanton
Sr. Water Resource Agent
