CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 45C.

MEMORANDUM

TO: File 45-07654 / Department of Lands
FROM: Brenda Chapman
DATE: November 20, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for Right 45-07654 are based on the information below:

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Stockwater	5-01 to 10-31	.02	1.4
Wildlife	1-01 to 12-31	.02	.1

Volume recommendations had to be made for both uses.

Unless there is information to justify a higher requirement, the usual wildlife volume recommendation is .1 af per location. The recommendation for the volumes to be additive gives the wildlife a portion in addition to what the 200 cattle will consume.

Attached is a copy of the project summary page for Pickett Spring. The records indicate the construction was completed June 1985. The 250 range cows listed on the proof of beneficial use application #4507654 is most likely a conservative figure. But, it should be a satisfactory figure to use.

Summary 6/25/85

A request was submitted and approved for this project.

The water source was dug out with a backhoe and a 24"x48" perforated aluminum head box with lid was installed and packed around the outside with gravel which was covered with plastic visqueen. A 1½" plastic pipe was installed to carry the water to a 495 gallon Powder River stock trough approximately 200' away.

Also installed was a 1½" plastic pipe for an overflow. This was piped away about 50' into a natural drain.

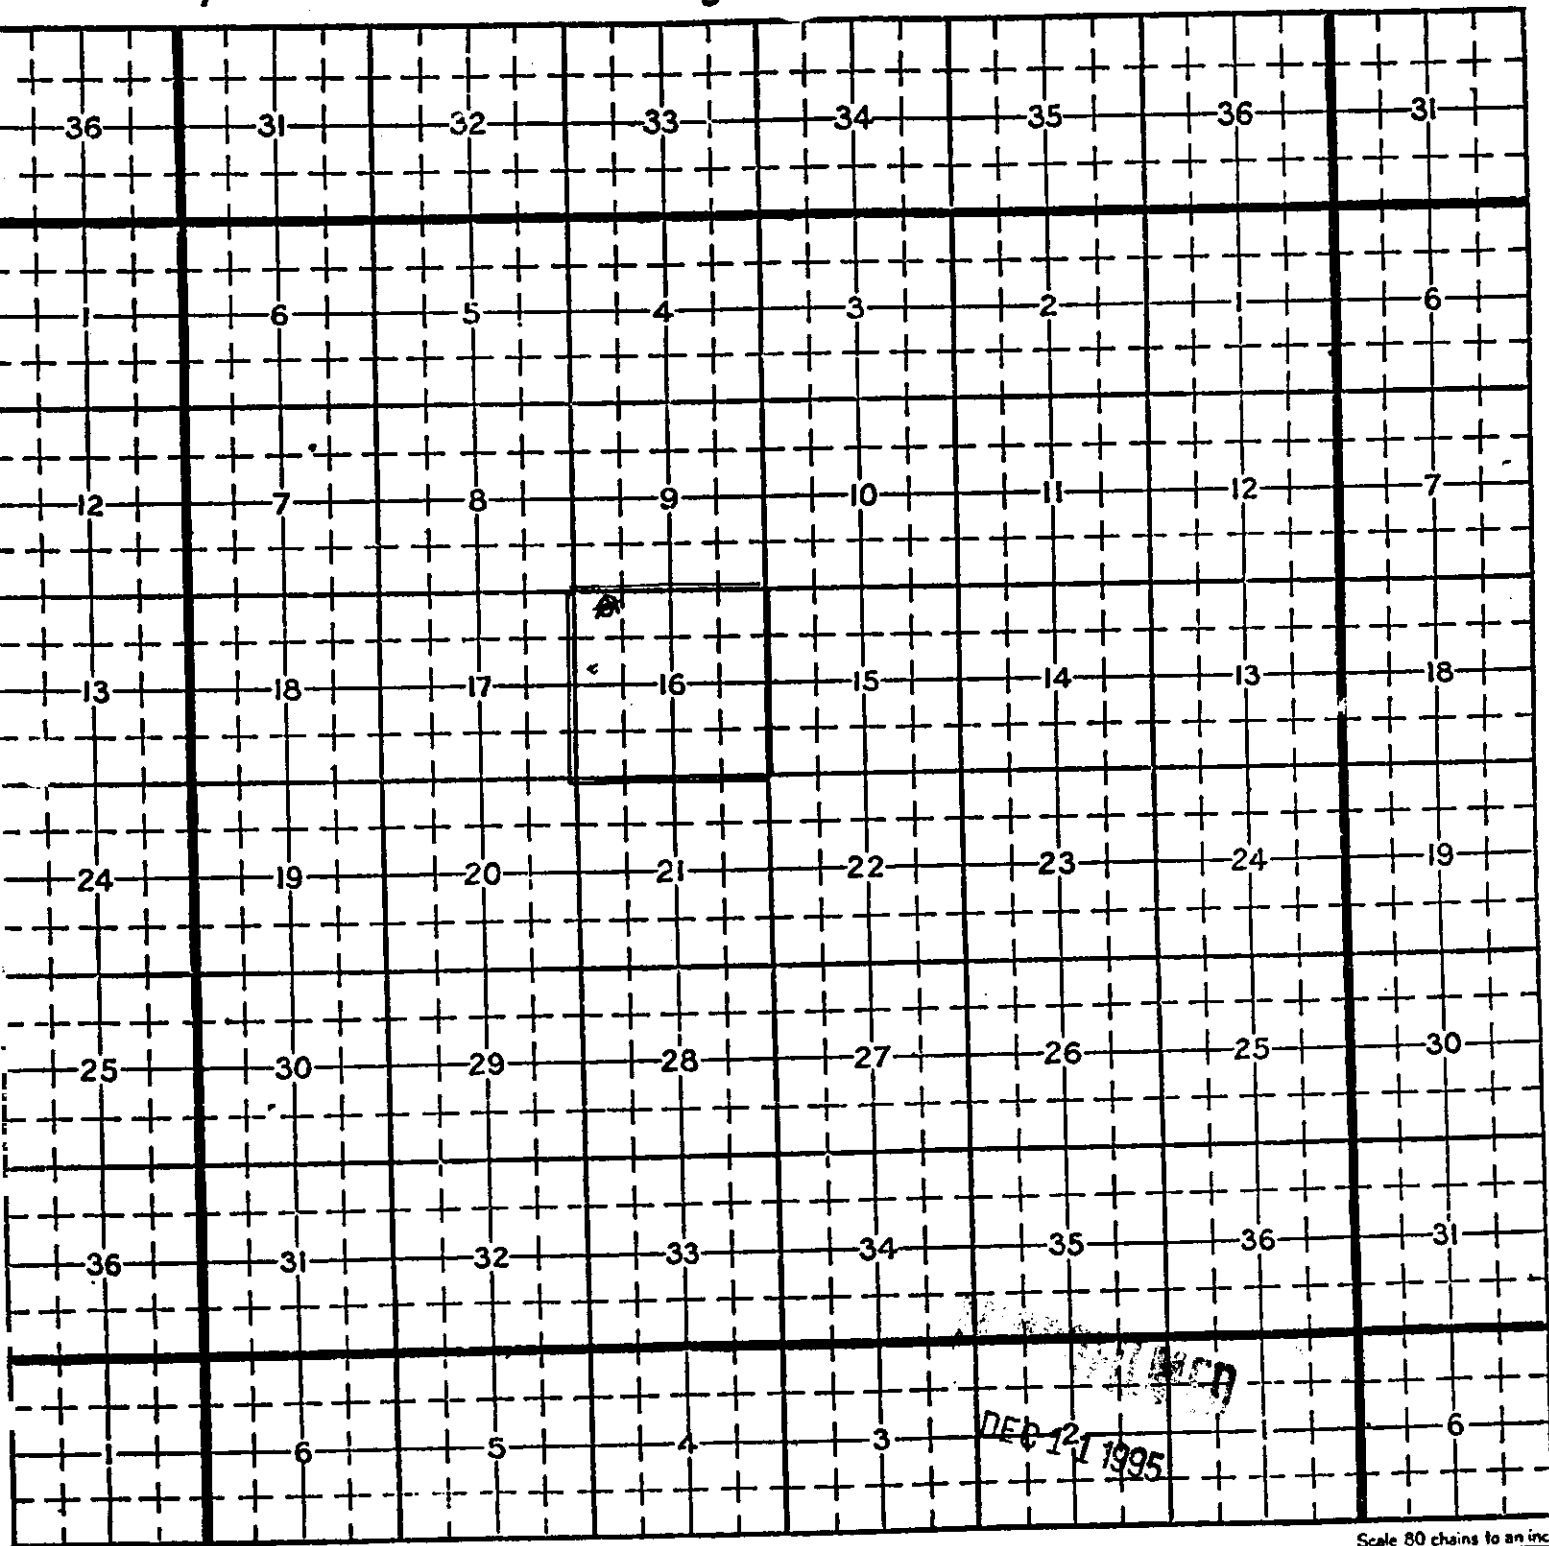

The stock trough was installed and after it was determined that the water would flow into the trough an overflow was installed using another 1½" plastic pipe which drained into a natural drainage about 50 feet away.

After all the excavation and installation work was done and it was determined that the system would work satisfactorily all excavations were filled and smoothed over.

A good supply of water was obtained approximately 1½ gallons per minute.

Re: Application for Permit No. 45-07654

Dear Applicant (s):

The Department of Water Resources acknowledges receipt of your water right application for permit. The application has been assigned the above referenced identification number. Please refer to this number in all further correspondence.

This office will be advertising the application in the South Idaho Press on 7/20 & 7/27/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.
