RE: WATER RIGHT NOS. 45-7549, 45-7591, 45-7594, 45-7595, & 47-8032

Dear Ms. Curtis:

We have reviewed the proposed applications listed above for amendment accuracy as requested in your letter of April 20. The first three of these proposed amendments are not completely correct as written because of minor land description and location discrepancies. These discrepancies are described for each proposed amendment as follows:

45-7549 is a small stockwater pond (West Goose Creek Pond #2) located in, and collecting water from a spring in the SWNESE, Sec. 18, Township 16S, Range 19E, as shown on the attached map, although it is close to the center of the SE quarter of that Section. Also, please correct the place of use to the NESE of that Section. There is a pond located at Rattlesnake Spring that, according to our records, was constructed in 1940, but that is not the pond nor source intended with this application.

45-7591 is for the development of a headbox, pipeline to a trough, and a stockwater pond to collect water from Meadow Spring in the SENESW, Sec. 6, Township 16S, Range 19E, as shown on the attached map. This location is in the same 40-acre, quarter-quarter section as in the original application. The original map was intended to be correct, as the place name, Meadow Spring, appears on the USGS quad map correctly, but the trough symbol was misplaced by that printed place name.

45-7594 is for the development of a headbox and pipeline to an adjacent trough, and to four more troughs over about two and one-half miles, for water from Chalk Spring and an unnamed spring as shown on the attached map. The proposed amendment goes a long way to show the correct description as opposed to the original application, but one of the five troughs is mis-described, and diversion location for the unnamed spring (or Chalk Spring II) is not given. There is no trough in the SWSE, Sec. 36, Township 15S, Range 20E; the trough is in the NWSE of that Section 36. The primary water source, Chalk Spring, is correctly located in the NWNENE of Section 25, but the identified secondary source should also be included in the SWNESE of Section 25.

The remaining two proposed amendments, 45-7595 and 47-8032, are correct as given. The signed applications and a check for the fee for these two are attached. Please forward corrected applications for amendments to the first three permits when appropriate. Please contact Forest Hydrologist Valdon Hancock at (208) 737-3215 if there are questions.

Gentlemen:

Enclosed are copies of your approved Applications for Permit. We direct your attention to the conditions of approval on the fourth pages.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permits were issued, and you must proceed diligently until the projects are completed. The enclosed blue cards must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permits were approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop these permits into licenses.

Sincerely,

GARY SPACKMAN
Supervisor, Water Allocation Section
