MEMORANDUM

TO: FILE/PERMIT NO. 45-7450

FROM: TIM LUKE

RE: SWAN FALLS PROCESSING

DATE: 1-23-90

=====

This file had been in license review despite the fact that it remained on the Swan Falls process list.

Review of the file shows that proof of beneficial use was received by the department on October 21, 1985. The proof statement claimed development of 60 acres prior to June of 1984. The proof was filed in a timely manner and in response to a proof notice dated September 30, 1985.

It appears that a partial field exam was made in June of 1984, and then completed in March of 1986. The field examiner recommended licensing of 102 acres. There is no evidence in the file as to why the exam was not completed until 1986. The examiner did note that water under this right is used mainly to seed new alfalfa. Soil moisture in rooting zone is usually sufficient for one or two crops before re-seeding. The IDWR remote sensing report lists the land under this permit has dry farmland in 1986. The irrigation practice noted by the examiner would explain the discrepancy between the land classification and the fact that a permit exists for the same land. It is apparent however that the permittee has made beneficial use of the water on at least 60 acres prior to July of 1984, and 102 acres total prior to March of 1986.

Since an exam has been completed, I recommend that we continue with licensing for the amounts and parameters recommended by the exam. I further recommend that the entire 102 acres be considered developed prior to July, 1985 for purposes of trust water processing. The permit therefore is exempt from the review requirements of Section 42-203D.

RE: SWAN FALLS PROCESSING

=====

This file had been in license review despite the fact that it remained on the Swan Falls list.

Review of the file shows that proof of beneficial use was received by the department October 9, 1985 (proof due date was November 1, 1987). The proof statement claimed that beneficial use commenced in April of 1985. The proof statement was submitted in response to Glen Saxton's letter of September 1, 1985. That letter informed users to submit proof if development was completed prior to July 1, 1985. The permit holder submitted a letter with the proof statement which noted that Idaho Power Co. had provided service to the well on April 2, 1985. A commencement of works card had been submitted in March of 1985 which noted that only an electrical connection needed to be made and that there was plans to use the well water in 1985.

Based on the above information in the file, it appears that beneficial use of groundwater had commenced prior to July 1, 1985. ~~Review of the file further indicates that this groundwater source is supplemental to surface water under existing irrigation district shares.~~

There is sufficient documentation in this file confirming that the use was developed prior to July 1, 1985. The permit therefore is exempt from the review requirements of Section 42-203D.

1. Measurement Calculations

Department of Water Resources

a) Field Measurement Calculations (Include theoretical capacities and system capacity)

Weir meas .24' on a 1.5' Cipp. weir = 0.591 cfs

Allow 0.57 cfs and filed on

300 hd stock x .00022 cfs/hd (from 4-7-75 memo) = .0660 cfs

Allow .07 cfs

b) Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 102 \times 4 = 408$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .6 \times 245 \times 1.9835 = 292$$

$$V_{D.R.} = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 292 \text{ AF/Ann}$$

c) Volume Calculations for Other Uses:

$$\frac{300 \text{ cattle @ } 12 \text{ gpd/hd} \times 275 \text{ days/Ann}}{325,851 \text{ gal/AF}} = 3 \text{ AF/Ann}$$
