CONTINUATION ORDER

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Permit No. 45-7386 (permit) issued to Lennie Sam Skaggs (permit holder) authorized the diversion of 2.0 cfs of water from a groundwater source for the irrigation of 100 acres of land.
2. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, which propose to divert water held in trust by the state of Idaho pursuant to subsection (5) of section 42-203D, Idaho Code, to determine whether they comply with the provisions of Section 42-203C, Idaho Code. The review is not required for permits to the extent beneficial use was complete prior to July 1, 1985.
3. Information submitted by the permit holder shows that 100 acres authorized to be irrigated by Permit No. 45-7386 were not irrigated as proposed prior to July 1, 1985.
4. Water diverted and used on or after July 1, 1985 for the irrigation of land under the terms of this permit is trust water.

MICROFILMED

JUN 13 1989

5. The permit was readvertised in accordance with Water Appropriation Rule 4,2,3,1. and was not protested.

6. Proposed development of water under the permit satisfies the presumption of Water Appropriation Rule 5,2,1. that it will not cause either an individual or cumulative significant reduction.

CONCLUSIONS OF LAW

1. The permit will appropriate trust water.

2. IDWR has reviewed the permit under Section 42-203D, Idaho Code and has determined that the permit complies with Section 42-203C, Idaho Code since the diversion and use of water under the permit will not individually or cumulatively cause a significant reduction.

3. The Director should enter an order reauthorizing development in compliance with the provisions of Section 42-203D, Idaho Code.

ORDER

IT IS, THEREFORE, hereby ORDERED that development under Permit No. 45-7386 is reauthorized and CONTINUED as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitations:

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before January 1, 1990.

2. Any license issued by IDWR pursuant to the permit or portion thereof for the use of trust water is subject to a term review 20 years after the date of this continuation order to determine availability of water for the use and to re-evaluate the public interest at the end of the term.

3. The construction of diversion works must be commenced within one (1) year of the date of this order and shall proceed diligently and uninterruptedly to completion unless temporarily interrupted by circumstances over which the permit holder has no control.

MICROFILMED

JUN 13 1989

4. Diversion and use of water under this permit is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

5. The Director retains jurisdiction of the permit and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.

6. All conditions of approval contained on the original permit are incorporated into and made a part of this order.

The final licensing recommendations for the above referenced water right are based on the information below:

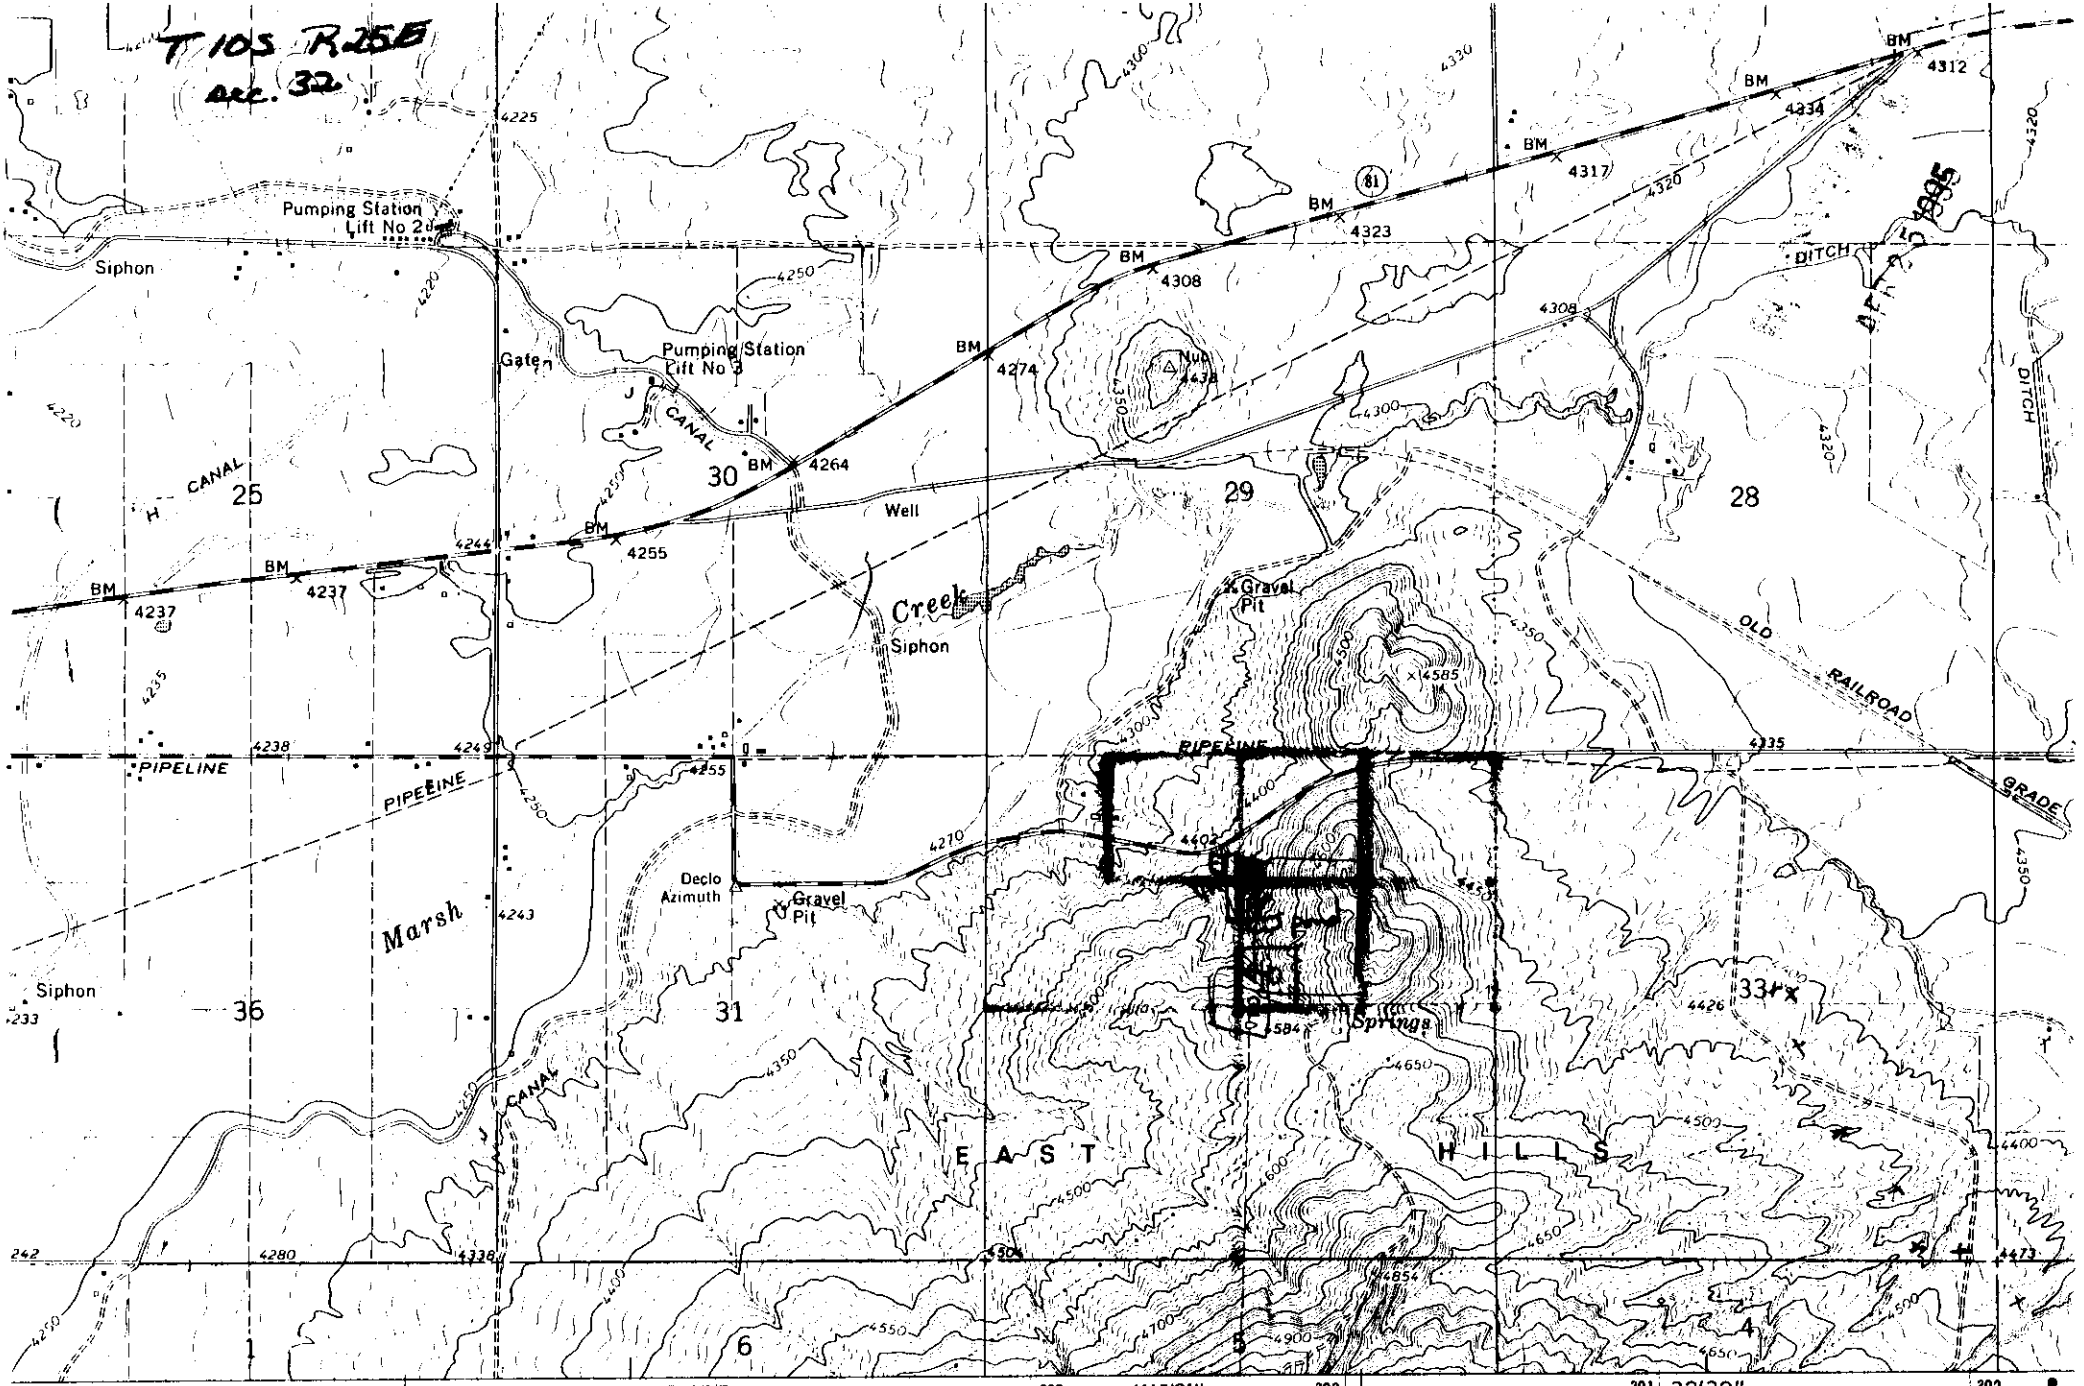

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	4-01 to 10-31	.10	20.0
Stockwater	1-01 to 12-31	.01	.5
Domestic	1-01 to 12-31	.02	.6

The lawn area is being recommended with the irrigated acres; therefore, the domestic rate and volume has been adjusted. This conforms the recommendation to the current guidelines for processing combination domestic and irrigation rights.

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Rita Fleck

Enclosed are two forms which will help the Department expedite the reprocessing of the permit.

Please complete and return the enclosed questionnaire if you wish to continue with your plans of development or have completed all or a portion of your development before July 1, 1985.

Dear Mr. Skaggs,

RE: Permit No. 45-7386

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Be sure to note the special condition requiring you to install an access port or other device to provide for the installation of measuring equipment by the Department. Enclosed are specifications for the installation of the access port, as well as a list of measuring device options.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

David R. Tuthill, Jr.
