Remarks System has been changed from Hand lines to pivots and handlines since Photo was taken. Measurement was made while system was operating.

This image shows a full page of handwriting practice paper. It consists of a large rectangular area divided into a grid of smaller squares. Each square is further divided by dashed lines into four quadrants, creating a cross-like pattern within each square. This design is intended to help learners practice the placement and orientation of letters as they write. The grid covers most of the page, leaving small margins at the top and bottom.

Re: Permit No. 45-7299

Dear Mr. Walton:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

Field examinations must be done while the system is in operation. For this reason we concentrate on irrigation permits during the summer months and do examinations on permits for other uses during the non-irrigating months.

If you have any questions regarding the field examination, please contact our office.
