RE: Water Permit No. G-32480/36-2621

Gentlemen:

We note on your recent correspondence concerning the above permit that it authorizes the diversion of 4.45 cubic feet per second of ground water. However, when the four wells which we have at this facility are operating at full capacity we have the ability to divert 11.79 cubic feet per second.

Should we apply for a new permit before we have our public notice published? If so, please forward the necessary instructions and forms so that we may properly comply with this law.

Thank you for your help.
